# Budget Message

BY

GOVERNOR EDMUND G. BROWN

*To the Senate and Assembly of the Legislature of California:*

I present to you a budget faithful to the principles of fiscal solvency, faithful to the needs of today, faithful to the future of California. It is balanced not by borrowing against the future but by living within our means. It provides for a prudent investment in colleges, state hospitals, parks, and other public facilities essential to accommodate the relentless, magnificent growth of our population and industry.

The annual budget stands as a portrait of the dedication, the demands, and the discipline of all the people of California. It reflects the preferences and mirrors the basic decisions not only of me as Governor and you as legislators, but of all the citizens of this State. Neither the complexity nor the abstractions of the budget should ever blind us to this public truth.

The hopes and needs of people are not expressed in percentages or ratios, or even in dollars. Instead, in the context of government, they exist in terms of the facilities and services that people rightfully demand of their government—for example, penal institutions, recreational facilities, aid to the needy blind, and many more matters of a social and economic nature. The wisdom of a budget cannot be measured solely by bookkeeping entries or an accounting analysis. In a democracy, a budget should do more than balance; it should serve as an instrument for the fulfillment of the just desires and vital needs of the people.

A year ago when I took office, there was a crisis in State finances. The State had been spending more than its income year after year. Fiscal experts of the previous Administration anticipated a General Fund deficit at June 30, 1959, of more than \$60 million; and 1959-60 expenditure requirements were expected to exceed estimated revenues from then existing sources by more than \$200 million.

I asked you in my first budget message to join me in facing up to our responsibilities and to adopt a program to put our State back in the black. The program called for an aggressive economy drive and new, broadly obtained revenues to meet the State's obligations. You gave these recommendations magnificent support. The action on last year's budget showed that the people of California have the courage and the character to choose the course of fiscal solvency.

Because of our accomplishments last year, our State finances today are on a sound basis. We now estimate that on June 30, 1960, the General Fund will show a net balance of approximately \$73 million. Much of this results from the improvement in economic conditions. More than \$23 million, however, arises out of our savings—expenses which we were able to cut below budget authorizations. This is a result of our determined drive to get maximum effectiveness from every tax dollar.

For the fiscal year ahead, I pledge you and the people of this State unswerving diligence on behalf of stern economy and efficiency in our public stewardship. I have demanded that agency directors, in their individual diligence, develop improved economies of operation, hand in hand with better service for the public. In the coming year, I shall press even more insistently for those objectives.

In measuring this budget with the state it must serve, you will find that the central, all-pervasive fact of life in California is growth—growth in population and industry, and growth in the responsibilities and opportunities that government, like each of us individually, has in an increasingly complex society. The size of the budget is a symptom of this growth!

Indeed, the budget can be understood only in terms of our relentless population increase, our spiraling complexity as a community, our immense potential. Nearly all of our citizens have personal knowledge of the overcrowding of California's schools and colleges, prisons, hospitals, campsites, and other public facilities. The aggravations and inadequacies—public and private—resulting from these shortages have accumulated over many years. Just ahead lie still greater demands and still greater loss of potential economic and social wealth and well-being if we fail to build parallel with California's irrepressible expansion in population.

To meet the public needs of the State requires what is properly called "substantial capital outlay for institutions and facilities." But these are cold, impersonal words. For me, it is more meaningful to liken our schools, campuses, parks, and other public facilities to a house. It is the *other* house that you and I and our children live in. It occasionally needs roof repairs, the plumbing has to be fixed, the wiring repaired, just as in our own houses. And when the family of Californians grows as it does by over 500,000 new residents each year, we need to add more rooms, just as we would for our own families.

I would no more think of permitting California's house to become impossibly over-crowded or dilapidated than I would allow this to happen to my own house. I am sure each of you feels the same way.

I propose that the great bulk of the balance which will be on hand at the end of the present fiscal year be invested—not just spent—to provide the buildings and equipment immediately necessary for our skyrocketing educational demands, our rising prison problems, our mental health requirements, and our other basic capital needs. In this way the State government can best help build for California's future. It is also the only way to reduce the backlog of need caused by neglect in prior years.

The prospects for California's future growth and greatness refute the notion that revenues can be cut back at this time. The rate of population increase expected in the years ahead indicates

that basic demands on the state government for long established responsibilities will not soon lessen. In the face of that, the fiscal solvency and capital plant of the state must be kept up, not undercut. To reduce revenues in the face of the urgent educational needs—to take just one example—would constitute a callous disregard for the State's credit standing and financial soundness. To cut back now would be irresponsibility of the same character as that which produced the financial crises I inherited at the beginning of my term in office. We should reject the glib advice of those who prefer the easy path of fiscal self-deception to the austerity of fact.

I want to stress that the contemplated net balance will be used for immediately-required capital construction which otherwise would have to be financed by bonded indebtedness. I believe that this is particularly sound during this period of high interest rates, which I am advised will likely continue in the foreseeable future. To use the prospective balance to keep down debt financing on continuing, non-revenue producing public responsibilities is an objective of government supported by the responsible leadership of both our major political parties. When I became Governor, I pledged fiscal responsibility for this State; and that is exactly what I am determined to affirm through this budget.

## SUMMARY

I want to turn now to a brief definitive summary of the budget for the year 1960-61. The total budget amounts to \$2,477,121,574, a profound responsibility for you of the Legislature and for myself. Following is a summary of the total General Fund revenue and expenditure estimates for the fiscal year 1960-61:

## GENERAL FUND CONDITION

(In Millions of Dollars)

	<i>1959-60</i> <i>Estimated</i>	<i>1960-61</i> <i>Proposed</i>
Beginning Surplus, July 1-----	\$18.1	\$73.9
Reserves Consolidated -----	37.9	-----
<b>INCOME:</b>		
Revenues and Transfers-----	1,487.8	1,633.0
<b>EXPENDITURES:</b>		
State Operations -----	474.7	550.8
Capital Outlay (current funds) -----	30.1	140.4
Capital Outlay (bond funds) -----	(79.3) *	-----
Local Assistance -----	965.1	1,014.3
<hr/>		
Total Expenditures—Current Funds -----	\$1,469.9	\$1,705.5
Current Year Surplus -----	\$17.9	—\$72.5
Ending Surplus, June 30 -----	\$73.9	\$1.4

\* Not included in totals.

## IMPORTANT ASPECTS

The proposed budget is essentially an extension of the budget which I submitted to you last year and which received your approval with little modification. It is an austere budget with every expenditure item having been subjected to the strict test of necessity.

I want to take just a few minutes of your time to indicate highlights of the most important expenditure requirements. In addition, I urge you to review complete analyses and program data set forth in the budget document.

### **Education**

In my Inaugural Address last year, I stated my determination to provide California with the best public educational program in the United States. There is no better investment for the future of our State and Nation than monies prudently expended in our schools, colleges and universities. This means, quantitatively, that each individual shall have a full educational opportunity con-

sistent with his abilities. Qualitatively, it means we shall strive continually to raise standards of excellence, not only for sound fundamental training but to develop social, political and ethical understanding of our technological achievements.

I am recommending in this message that \$1.045 billions, or 42 per cent of the entire budget, be devoted for the support of the public school system and for higher education in California. It is interesting and perhaps surprising to note that California, which is so attractive to senior citizens, actually does not have an aging but a "younging" population. An increasing percentage of our total population is of pre-school and school age.

Of the children in the 5 to 17 age group, California has a higher percentage enrolled in the public school system than any other state in the union. In aggregate, we anticipate in 1960-61 an average daily attendance in the public school system of 3,355,000, greater by a half a million than New York State, which is now second in the Nation to California.

With the increased support for the public school system adopted last year, the State's obligation will amount in 1960-61 to \$678,957,600. This includes a sum of approximately \$40 million to accommodate the enrollment of 200,000 additional students over the current year. California is one of the states which contributes most heavily to the support of its public school system. Without this support, the burden on local property owners from school district taxes would be far heavier and in many cases inequitable.

### ***State Colleges***

The sharp increase in births in the early 1940's first caused the great expansion in our public school system and is now reflected in increased applications for admission to college. I am recommending in this budget a total of \$66½ million for the net operating costs of our state college system to meet the challenge presented by an increase in the enrollment by 7,600 students. Provision is also made for a modest beginning, in rented quarters, for the three new colleges in Orange, Alameda and Stanislaus Counties, previously authorized by legislative action. This means that for state colleges, there will be a budgetary increase of 14.8 per

cent. This increase is primarily a reflection of the increased work load and the necessary preparation for anticipated continued expansion of the program without a marked change in the level of educational service.

I also propose the expenditure of \$42.5 million for capital outlay for the state colleges. This includes, among other needed projects, funds for the planning and development of the new colleges at Orange, Alameda and Stanislaus Counties, and to permit work to proceed upon those new campuses without delay.

#### *University of California*

For the University of California the budget provides from the General Fund \$113 million, an increase of 14.2 per cent over the current year. This will help provide for the anticipated increase in enrollment of 3,850 students on the various campuses of the University. Significant research and other important educational activities of the University are also recognized and supported.

The necessary building expansion of the University of California justifies the recommendation of a total of \$52.2 million for capital outlay projects. This includes a sum of \$5,721,440 as an initial step in the development of a School of Science and Engineering at La Jolla. This project, with the support of private contributions, was launched prior to consideration of a general campus for the University at La Jolla and is justified without regard to the latter. In addition to the actual recommendations for plant development for the coming year, I have expressed my genuine concern for providing an additional medical school, and have called for the development of plans for that as expeditiously as possible.

#### *Educational Television*

I am deeply interested in the contributions that educational television may make to the excellence of our education program at all levels. Pilot work along this line is currently under way in some school districts and at several state colleges. I am recommending that \$250,000 be appropriated to the University of California to permit further experimental work in instructional television at

that institution. I am extremely hopeful that there will be developed an integrated effort on the part of educational institutions at all levels to develop public policies in cooperation with the state both economically prudent and educationally sound.

### ***Mental Health***

This year's budgetary increase of \$9.5 million for the Department of Mental Hygiene not only adds to the traditional program of the State hospital system, but places heavy emphasis on new approaches to an old and complex set of problems. The incalculable human suffering and tremendous expense make it imperative that our full resources be brought to bear on these problems. We are resolved to seek new ways, new techniques and new thinking.

In the forthcoming year, we propose to make a beginning on three new approaches in mental hygiene. *First*, we propose to expend \$450,000 to develop one of the newer concepts in modern psychiatric care, the day hospital. These day hospitals will enable patients who do not require twenty-four-hour hospitalization to receive treatment at an all-day center and to return to their families and homes each night. We fervently hope that this new-look in treatment will live up to its present promise of providing a more effective and more economical alternative to full-time hospital care. The funds proposed will provide three of these day hospitals as an experimental start.

*Second*, we propose to provide funds for new techniques and facilities in the pre-hospital and post-hospital periods which are so important to effective treatment and speedy recovery. \$232,000 is provided for finding foster homes for recovering patients, and strengthening social service care for them; \$220,000 is provided for an after-care clinic at three state hospitals; and \$286,000 is provided for psychiatric care for patients whose recovery permits them to leave the hospital, but who still need occasional treatment and guidance.

*Third*, we want to assist those communities which are assuming responsibility for sharing the load of mental health problems. The budget provides \$50,000 for highly skilled people—few in number, but important—to help local communities undertake mental health

programs to care for patients in familiar surroundings near their homes.

The tremendous demands for treatment services caused by population growth account for \$7 million of the budget increase for mental health. We have also budgeted a \$200,000 increase in the encouraging program of research now being carried on by the Department, a program which has attracted to it a total of more than one million dollars in grants by the federal government. An additional \$240,000 has also been budgeted for the treatment program in mental hospitals to permit purchase of new and improved medicines and drugs. Finally, a \$208,000 increase is provided for training to make present mental health personnel more effective.

### ***Beaches and Parks***

Existing financing for acquisitions and improvements of State beaches and parks does not provide sufficient funds for this important program to go forward. The development and operation of the State's system of beaches and parks is dependent, under existing laws, upon revenues from tideland oil royalties. Unfortunately, there is no longer an adequate amount from this revenue source to support the other demands upon it and all that is required for the beaches and parks program.

The appropriations for acquisitions and improvements made pursuant to a five-year program submitted in 1956 have produced a deficit in the Beaches and Parks Fund. I am recommending in this budget that the Beaches and Parks Fund be augmented by a transfer of \$5 million from the General Fund so that the program can go forward without interruption during the next fiscal year.

As a long-term plan of action, I have asked the Director of Natural Resources to prepare a completely revitalized five-year program for new acquisitions and development and work with the Director of Finance to formulate a sound financing proposal which can be submitted to the 1961 session. This budget includes a major increase in the planning staff in the Division of Beaches and Parks needed for this program. In the increasing age of leisure into which our society is emerging, and in the face of the

increasing population congestion that lies ahead, we must move with vigor and vision to develop adequate recreational facilities for our people.

#### ***Corrections***

Substantial progress is being made on the conservation camp program adopted at the 1959 session. This budget includes funds for constructing the 1,200 man Conservation Center in Lassen County and for branches in the Tuolumne and Mono-Inyo County areas. Five additional Forestry work camps are being established. This program is not only meeting the serious shortage in facilities to house the increase in inmates, it is also a valuable extension of the correctional rehabilitation program and is providing much-needed forestry conservation work. This is an outstanding example of humanitarian and constructive penology.

#### ***Water Development Program***

The budget recommends, pending the voters' action on the water resources development bond issue, appropriations aggregating \$34 million for the following purposes already authorized by legislative action: (a) additional canal and reservoir work on the South Bay Aqueduct, (b) a subsidence feeder canal in the San Joaquin Valley Division, and (c) completion of railroad and highway relocation work at Oroville, except for minor items to follow in 1961-62. We are thus clearing the way and laying the groundwork for the proposed state water program on which the people of California will pass this November—a program as bountiful of ultimate good as the great TVA and Central Valley projects have already proven themselves to be.

#### ***Salary Increases***

Included in this budget is provision for the salary increases for State employees recommended by the State Personnel Board in its annual report to the Governor and the Legislature required by the Government Code. The report recommends a general increase averaging 5 percent for 85,000 employees in the State civil service and 9,500 academic and non-academic personnel of the State colleges. Additional funds are also proposed to make special adjust-

ments for certain groups, principally the lower clerical classes, whose pay requires a greater adjustment to bring it to prevailing rates in comparable employment. Also included are sufficient amounts to grant comparable increases to the 20,000 employees of the University of California and to other groups not under the jurisdiction of the Personnel Board.

#### *Future Benefits*

Rough estimates of future revenues and future expenditure requirements give no cause for complacency regarding the budgets for the immediate years ahead. There is strong indication that even though no new large expenditure programs are adopted and even though reasonably good economic conditions continue, we shall be hard-pressed to meet the State's obligations within prospective revenues. There is one basic underlying fact which we cannot escape and which will make budget balancing exceedingly difficult for many years to come: Our school age population is growing at a faster rate than the whole population and at a faster rate than our economy is expanding. Heavy increases in educational requirements are inevitable. Comparable demands in other fields of well established public responsibility also lie ahead. Frugality, therefore, and increased efficiency in all levels of government are essential.

In conformity with Section 34, Article IV of the Constitution, I submit to you the Budget for the State of California for the fiscal year commencing July 1, 1960, and ending June 30, 1961.

Respectfully submitted,

A handwritten signature in dark ink, reading "Edmund G. Brown". The signature is written in a cursive, flowing style with a prominent initial "E".

## Letter Of Transmittal

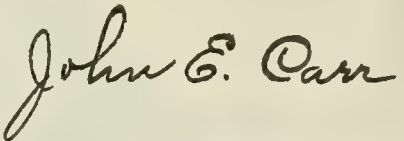

HONORABLE EDMUND G. BROWN  
*Governor of California*  
*State Capitol*  
*Sacramento, California*

DEAR GOVERNOR BROWN:

Transmitted herewith are the summary tables and detailed statements for the Budget of the State of California for the Fiscal Year July 1, 1960 to June 30, 1961, compiled in conformity with your policies and instructions.

The Department of Finance has had excellent cooperation from other departments in the preparation of this Budget.

Respectfully yours,

  
*Director of Finance*

<sup>a</sup> For the 1958-59 fiscal year, the General Fund is combined with reserve funds, all of which have been abolished and have been transferred to the General Fund during the 1959-60 and 1960-61 fiscal years.

<sup>b</sup> The surplus for the separate funds as of June 30, 1959 were:

General Fund	\$18,130,570
Capital Outlay and Savings Fund	\$23,857,050
Flood Control Fund of 1946	\$14,028,142

# Schedule 1-A

## GENERAL FUND ACCUMULATED SURPLUS, JUNE 30, 1960 RECONCILIATION OF THE CHANGES FROM THE PREVIOUS BUDGET ESTIMATE

### INDICATED SURPLUS (—Deficit), June 30, 1960

In accordance with the 1959-60 Budget as submitted to the Legislature ----- —\$268,783,527

#### Changes to Revenues:

Revenue measure enacted for 1958-59 which changed the insurance gross premiums tax due date.....		+ 55,600,000
Revised estimates for 1958-59.....		+13,705,057
Revenue measures enacted for 1959-60:		
Cigarette Tax.....	\$61,750,000	
Personal Income Tax.....	63,500,000	
Bank and Corporations Tax.....	35,250,000	
All other tax measures.....	26,805,000	+187,305,000
Revised estimates for 1959-60.....		+27,820,000

#### Changes to Expenditures:

Legislative action on Budget.....		—4,062,549
Vetoes by Governor on Budget.....		+ 547,750
Special appropriations enacted.....		—8,869,346
Revised estimates and carryover appropriations.....		—9,420,381
Expenditures transferred from abolished funds:		
Revenue Deficiency Reserve Fund.....	\$55,000,000	
Other funds.....	17,343,303	—72,343,303

#### Revised Prior Year Expenditures:

Total expenditures per Budget.....	\$1,262,574,931	
Revised estimate.....	1,245,819,553	+16,755,378

#### Changes to Transfers Between Funds:

Eliminate transfer to Capital Outlay and Savings Fund.....		+ 8,476,814
Eliminate transfer to Flood Control Fund.....		+12,828,578
Increase transfer to Legislative Contingent Funds.....		—1,319,543
Increase transfers from other funds:		
Capital Outlay and Savings Fund.....	\$27,310,764	
Flood Control Fund.....	15,411,176	
State College Fund.....	696,513	
Fair and Exposition Fund.....	16,424,450	
Investment Fund.....	376,109	
Various other funds.....	91,030	+ 60,310,042

Prior year and other adjustments..... +473,759

REVISED ESTIMATE, SURPLUS JUNE 30, 1960 (as reported in the Summary of Financial Legislation dated 8/31/59) ----- \$19,023,729

#### Effect of revised estimates of revenues, expenditures and transfers as reported in the current Budget:

	Previous Estimate	Revised Estimate	
Revised estimate of revenues:			
Revenues for 1958-59.....	\$1,210,363,425	\$1,210,367,820	+ 4,395
Revenues for 1959-60.....	1,433,099,289	1,468,520,895	+35,421,606
Revised estimates of expenditures: <sup>a</sup>			
Expenditures for 1958-59:

CHART 4

# Budget Revenue Estimates

Further expansion in the volume of business activity, with continued improvement in both corporate and personal incomes, will carry State revenues to a record \$2,345,366,051 during 1960-61. Included in this total are receipts from the various tax levies, service fees and other charges collected by State departments and such miscellaneous sources as rents, royalties and earnings on investments. Total receipts in the current fiscal year are estimated at \$2,165,833,418, while actual collections during 1958-59 amounted to \$1,925,108,149. As indicated below, collections during the three years covered by this budget are not strictly comparable, due to the varying effects of recent revenue legislation.

Receipts for the General Fund during the coming year are estimated at \$1,617,146,000 \*, an increase of \$148,625,000 over the indicated total for the current year and \$406,778,000 above actual collections in 1958-59, the last completed fiscal period. Revenue for the various special funds is expected to reach \$728,220,000, an advance of \$30,908,000 over the current year and \$13,480,000 more than was received in 1958-59 when the special fund total was swollen by the receipt of \$55,556,000 in bonus bids for oil and gas leases in tidelands. A summary of principal items comprising the revenue totals for each of these years is given in the accompanying table.

**Table 1**

† Excluding amounts for the General Fund from this source.

See Schedule 3 for additional details.

NOTE: In this and subsequent tables the detail may not add to the totals due to rounding. Percentages have been computed from unrounded numbers.

Almost one-third of all State revenue is generated by the sales tax and only a slightly small proportion

\* This and subsequent dollar amounts rounded to nearest thousand.

(27.0%) from the various levies relating to the ownership and operation of motor vehicles. Taxes on personal income and corporate profits—both up sharply over past years because of the 1959 rate increases—account for 11.6 percent and 10.7 percent, respectively, of the estimated revenue in 1960-61. Below these major levies are a number of others, each contributing two or three percent of the total—the cigarette tax, the insurance tax, alcoholic beverage excises and liquor license fees, the imposts on inheritances and gifts, and horse racing licenses. The proportions of total revenue and of General Fund receipts attributable to each source are shown in the upper charts on pages A-6 and A-7.

Among the major tax levies, the personal income tax will bear the largest proportionate share of the anticipated revenue increase. Compared with the current year, receipts from this source will increase \$32,250,000, or 13.5 percent, and compared with the last full year of this tax at former exemptions, credits and rates the income tax will be up \$111,200,000, or 69.3 percent. In other words, for each dollar of personal income tax collected in 1958-59 there will be \$1.69 in 1960-61, due to the higher levels of personal income and to the revisions in the structure of this levy.

The situation is only slightly different with regard to the bank and corporation tax. Receipts from this source will increase by an estimated \$30,300,000 (13.7%) in 1960-61 and will be \$77,500,000 above the level attained under the lower rates of 1958-59.

At \$768,000,000, sales tax receipts are estimated to increase \$56,500,000 next year (7.9%), due chiefly to a marked improvement in car sales, greater expenditures for industrial plant and equipment and continued growth in California's population. Inheritance and gift tax receipts are expected to increase \$10,300,000, or 20.1 percent, largely as a result of last year's rate revisions, while collections under the several motor vehicle taxes and fees will reflect the anticipated resurgence in new car sales from the recession and strike-bound levels of 1958 and 1959.

It will be noted that cigarette tax collections are estimated to increase only \$550,000 in 1960-61. This is due primarily to the fact that the tax on retail dealers' inventories which returned \$2,670,000 last year will not recur in 1960-61. It is estimated that taxable cigarette sales in California will reach 2.22 billion packages during the next fiscal year, an increase of 5.7 percent over the indicated current annual rate.

## 1959 Tax Program

The tax program adopted last year involved a number of important changes in California's General Fund tax system. These were the increases in the levies upon personal incomes, corporate profits and

bequests to remote relatives and strangers, the imposition of a new tax on cigarettes, a doubling of the beer excise, and a raise in the license fee required for horse race meetings. In addition, the delinquency date for the insurance tax was advanced from November 15 to June 15, which had the effect of requiring two payments under this levy during the 1958-59 fiscal year, adding \$55,168,000 to the total of revenue collections in that period. Other General Fund revenue changes effected last year included laws which provide for (1) the escheat to the State of specified unclaimed property, estimated to produce \$2,250,000 in 1959-60 and \$3,250,000 in the budget year, and (2) the licensing of small water craft by the State. This latter enactment is estimated to provide \$1,250,000 in General Fund revenue this year, when all existing boats must be registered, and \$500,000 in 1960-61, when only new purchases and transfers are subject to the act.

In total, therefore, the tax program and other major revenue legislation of last year added \$55,168,000 to General Fund receipts in 1958-59, are adding an estimated \$187,500,000 in the current year and will add \$234,700,000 in the budget period. These amounts must be taken into consideration in appraising the year-to-year trend in state revenue. Excluding them, the General Fund shows a gain of \$125,821,000 (10.9%) between 1958-59 and the current year and a further \$101,425,000 (7.9%) advance in 1960-61, due to the improvement in economic affairs. A graphic comparison of revenues from principal sources, including the additional amounts derived under the 1959 tax program is shown on page A-8.

### Revenue Revisions

The rapid business recovery from the 1958 recession and the accompanying growth in personal income and spending produced moderately more revenue than had been estimated a year ago. At \$1,210,368,000, General Fund receipts during 1958-59 were \$13,709,000 above the budget prediction made in December 1958. However, \$9,100,000 of this excess was anticipated and announced by the Director of Finance in a release issued June 10, 1959, prior to adjournment of the Legislature. In the aggregate, special fund revenue last fiscal year exceeded the estimates prepared a year ago by \$2,009,000, or 0.3 percent.

General Fund receipts in the current year will also exceed the budget forecast. Adjusted for unanticipated changes in revenue laws, the budget estimate of General Fund revenue in the current year was \$1,398,949,000. The revised estimate of collections from the same sources presented in this document is \$1,468,521,000, an increase of \$69,572,000 or 5.0 percent. Again, a substantial part of this revision—\$30,000,000—was noted in the Finance Director's release of June 10. Hence, the revision here indicated for the first time is \$39,572,000, an increase of 2.8 percent over the original estimate. Aggregate special fund revenues apparently will be somewhat above the budget estimate for this year—\$697,313,000 as now revised against the estimate of \$687,232,000, with virtually all of the difference traceable to interest income.

## ECONOMIC CONDITIONS

General business activity showed two distinct patterns during 1959. The first half of the year was characterized by a rapid rise as the Nation recovered from 1957-58 recession levels. This movement climaxed in a large inventory build-up in anticipation of a possible steel strike at midyear. The second half brought a leveling off as the strike interrupted the flow of steel through the economy. For the year as a whole, gross national production totaled approximately \$480 billion, an increase of \$38 billion over the previous year.

Aggregate personal income, which has pushed upward each year for the last decade, moved to a new record of \$380 billion—an advance of \$21 billion. This rise, coupled with a substantial expansion in consumer credit, carried personal spending to \$311 billion and fostered a resumption of the upward trend in business expenditures for plant and equipment.

Price changes were mixed, with food items registering slight declines and non-foods generally moving up in a 2 to 4 percent range. Wholesale prices were more stable than retail and commodities more stable than services.

### Uncertainties

A framework for prosperity in 1960 was provided by last year's strong recovery trend. The probability of record activity was underscored when this movement was interrupted by a prolonged dispute in steel production which created scarcities and inventory needs in several basic industries. However, there are still at least three important uncertainties in the current outlook. These, together with the assumptions made regarding each point, are:

#### 1. *International affairs.*

Solution of East-West problems and relaxation of international tension undoubtedly would affect the Nation's economy during the transition from cold-war to peace.

Conversely, additional stress in world affairs would change economic trends. Recent evidence of an increase in communist activity in the western hemisphere is particularly disturbing.

While progress toward peaceful solution of international problems is to be hoped, it has been assumed that the immediate achievements would not affect economic conditions materially during 1960.

#### 2. *Industrial disputes.*

Serious labor-management differences are always an economic hazard. It is assumed that 1960 will not be an unusual year in either the number or duration of disputes.

#### 3. *Tax rates.*

A reduction in Federal income tax rates could stimulate spending—both personal and corporate. This, in turn, would have an important effect upon sales tax collections in California. No such tax reductions are anticipated in the assumptions underlying the accompanying revenue estimates.

There are also elements of uncertainty regarding monetary policy and price trends, especially in the latter half of this year. Presumably tight money will

continue during the first six months, while inventories are being accumulated in considerable volume and wage patterns are being determined. Some relaxation of controls is possible after midyear. Complete price stability is not anticipated. Though food prices may be substantially stable, non-food items may rise approximately two percent during the year.

### **Demand Strong**

Almost two-thirds of the Nation's production is used to satisfy consumer requirements for goods and services. About one-seventh represents residential construction and business requirements for plant, equipment and inventories, while the needs of governmental units account for one-fifth. Usually there is, in addition, a net export balance channeling a fraction of the output to other world areas.

Increased demand in each of these major sectors of the economy is expected to contribute to the current year's record production, with most of the impetus provided by business investment in plant and inventories. Stimulated by expenditures for research in products and production methods, by the carryover of planned expansion from last year, and by the upsurge in total demand for goods and services, business investment in plant and equipment is estimated to reach \$50 billion—an advance of \$6 billion (13.6%) over the indicated total for 1959. Replenishment of inventories depleted during the steel strike and the accumulation of stocks essential to the maintenance of this year's higher volume of business will require an \$8 billion addition to inventories, an increase of \$4.1 billion over last year. Combined, these two areas of spending will add \$10.1 billion to the increase in total production. Residential construction—under pressure from both the declining rate of family formation and the tight money policy—is expected to decline moderately this year. Expenditures for this purpose are estimated at \$20.5 billion, a decline of \$1.8 billion from last year's level. In total, residential construction, business expenditures for plant and equipment, and additions to inventories are expected to reach \$78.5 billion, or \$8.3 billion above last year's record level.

The new car market will be another important element in the 1960 national economy. After two successive disappointing years, motor vehicle sales offer promise of rewarding gains, and this outlook is heightened by the introduction of compact models which appear to have earned popularity. New car sales—personal and business, imported and domestic—are expected to exceed 7 million units, with prices of most models slightly higher, due partly to the inclusion of additional optional equipment. The anticipated rise in personal expenditures for new cars, coupled with a slightly greater replacement of household furniture and appliances, is expected to result in a \$4.6 billion improvement in sales of consumer durables.

Purchases of nondurables are estimated to increase somewhat more rapidly than population, reflecting fractionally higher prices for nonfood items and further advances in living standards. Payments for personal services should continue in a strongly rising trend, also the result of a further rise in the standard of living. In the aggregate, personal expenditures for goods and services should reach a record breaking \$329.5 billion—up \$18.3 billion, or 5.9 percent, over the preceding year.

Governmental purchases of goods and services will contribute moderately to the upward pressure of total demand, but the increment is likely to be somewhat less than that recorded last year. Federal expenditures for national defense are expected to be maintained at recent levels, but civilian functions—such as health, education and welfare, aircraft regulation and control, and the census enumeration—will add to the total outgo. Activities of state and local units should continue the recent growth pattern, with possibly some curtailment in expenditures for public works as borrowing becomes more difficult. Total expenditures in the government sector of the economy are projected at \$103.5 billion, or \$5 billion more than the last calendar year.

### **Record Production**

Including a billion dollar net balance of exports in world trade, gross national production this year is estimated at \$512.5 billion, an increase of \$33.4 billion over the indicated total for 1959. At this volume, the American economy will achieve a new record, 7 percent above the output of last year. This should provide a substantial increase in the level of employment, with some lengthening of the workweek—particularly in metal working industries. In preparing the accompanying estimates of aggregate personal income, an allowance of 3.5 percent per worker has been made to cover both increased compensation rates and longer hours. On this basis, aggregate wage and salary income during the current year has been estimated at \$274.7 billion, or 6.6 percent above the 1959 total, and other labor income has been projected at an \$11.1 billion level—over a billion dollars above the 1959 total.

Incomes from businesses and professions should reflect fully the general economic advance, but net farm income is likely to be caught again in the squeeze between lower farm prices and higher production costs. The continuing improvement in farming methods and greater mechanization should help the farm income situation somewhat, but a further drop in net earnings seems probable. Total proprietorship income is projected at \$47 billion—slightly above the 1959 level, with an advance in business and professional income more than offsetting the anticipated decline in the net return of farmers.

Property income—interest, dividends and rents—should make strong gains as a result of the high interest rates, the resurgence in corporate profits last year with a further rise in prospect for 1960, and the relatively high level of residential construction. Receipts from these three sources of income are expected to reach \$51.4 billion, compared with an estimated \$47.6 billion last year. Allowance is made in this forecast for an increase in corporate profits from approximately \$48 billion last year to \$51 billion in 1960, with a proportionate rise in dividend disbursements.

Transfer payments—chiefly retirement benefits, unemployment insurance receipts and similar items—will increase to an estimated \$27 billion, largely as a result of continued growth in social security retirement programs. However, an adjustment in employee contributions for social security, effective January 1, will raise payroll deductions materially, and personal income after these deductions is estimated at \$401.2 billion. This represents an increase of \$21.1 billion

# COMPARATIVE GROWTH

1950=100

\*TAXABLE CORPORATE PROFITS

over 1959. Although personal income tax rates are assumed to remain unchanged, there will be an increase in tax liability as a result of the higher level of income. Thus, disposable income is projected at \$353 billion, or \$18.4 billion above the last year's total. With personal consumption expenditures estimated at \$329.5 billion, savings will amount to \$23.5 billion, about the same level as that indicated by the income data for 1959.

## CALIFORNIA SITUATION

Last year brought a further gain in California's economic position. This State fared considerably better than the Nation in most measures of the 1957-58 recession, and has remained well above the Nation in the recovery.

Most of the difference is attributable to the continued rapid population growth and the industrial development which allowed California to absorb nearly 5.1 million people in the 1950-60 decade. With an increase of 3.6 percent in the twelve months ending July 1, 1959, population reached an estimated 15,280,000 at midyear. The comparative growth rate for the Nation was 1.8 percent.

Civilian employment last year averaged approximately 5,808,000, a gain of 3.5 percent over 1958. The rate of growth in wage and salary workers was slightly greater, 4.3 percent. Civilian employment in the Nation was 2.5 percent above 1958 and wage and salary workers registered a gain of 2.8 percent. California's employment gain last year was distributed throughout all segments of the economy except agriculture and mineral extraction, both of which showed little change from the previous year so far as average employment was concerned. The largest sector, manufacturing, registered a 6.1 percent rise, while trade—second in number of employees—scored a 3.5 percent advance. Governmental units employed 5 percent more people than in 1958, and the construction industry averaged 4.2 percent better, after making spectacular gains in the spring and early summer.

There is no doubt that California last year built the largest number of new homes in its history. Records through October indicate a ten-month total of 205,000 dwelling units—24 percent more than in the same period of 1958. At this rate, the year's total would be 245,000, compared with 214,700 units constructed in 1955, the previous record year. Although a decline in residential construction is anticipated, recent surveys indicate that 1960 could still be the second largest home-building year, with a total slightly above that recorded in 1955.

Perhaps the major uncertainty in this State's prospect for an extremely healthy growth this year is the effect of the aircraft-missile conversion upon industrial development. To date this change has been taken in stride, but further readjustments are in prospect for the airframe industry. Fortunately, growth in the electronics and missile phases of the aircraft industry have expanded, with the result that employment in this important segment of the economy has traced a horizontal line since 1958—a general pattern which is likely to continue this year.

The agricultural outlook for California is slightly better than for the Nation. In the first place, California recorded an increase in cash receipts from farm

marketings last year, compared with a decline nationally. Secondly, although stockmen face the possibility of price declines, the volume of cattle marketed in California this year is expected to be somewhat higher. In addition, there has been an uptrend in bearing acreages of fruit and nut crops. In total, therefore, the net return of California farmers is not expected to drop more than 5 percent.

Personal income from all sources this year is estimated at \$42.3 billion, up \$2.7 billion from 1959. Taxable sales to individuals, building contractors, business and industry are expected to reach \$24.6 billion, a gain of \$1.9 billion, or 8.3 percent over the total indicated for last year, while corporate profits should break through the \$4 billion level for the first time and reach an estimated \$4.19 billion—6.4 percent above the estimated aggregate corporate earnings in 1959.

Continuing the annual growth of more than half a million people each year, California's population is expected to reach 15,830,000 at midyear 1960. These estimates of population, income, spending, profits and other economic factors form the basis of the revenue forecasts presented in this budget.

\* Spendable resources of California residents represents disposable income adjusted for estimated change in short-term consumer credit and estimated change in liquid asset holdings of individuals—e.g., money, bank accounts, savings bonds, etc. Amounts are estimated by the State Department of Finance for use in connection with the analysis and projection of sales tax revenue.

† Index for California has been computed by the California Department of Industrial Relations, Division of Labor Statistics and Research, as the weighted average of the Los Angeles and San Francisco indexes.

SOURCE: National data for 1958 from reports of the Office of Business Economics, U.S. Department of Commerce; preliminary figures for 1959 based on Department of Commerce reports for the first three quarters with fourth quarter estimated by the State Department of Finance; estimates of national data for 1960, estimates of California's population, personal income, personal taxes, disposable income, etc., are based upon studies by the Financial and Population Research Section, Budget Division, State Department of Finance.

## GENERAL FUND REVENUE

More than two-thirds of the aggregate State revenue will accrue to the General Fund. This includes receipts from such broad general levies as the sales tax, the imposts on personal incomes and corporate profits, the alcoholic beverage and cigarette excises, the insurance tax, the inheritance and gift taxes, and other collections.

For the most part, these General Fund taxes are geared directly to business conditions in the State and Nation. The aggregate volume of trade, personal income, corporate profits and other similar economic considerations determine the base for each of these levies. Hence, the estimate of revenue from each source flows directly from the economic assumptions explained above. The influence of these economic factors upon each of the several taxes and the methods used in preparing the budget revenue estimates are outlined below.

### Sales Tax—\$768,000,000

The tax on the sale of tangible personal property has been estimated to yield a record \$768,000,000 in 1960-61, compared to \$711,500,000 anticipated for the current year and \$631,514,000 collected in 1958-59. The \$80 million gain in current year revenue exceeds any growth previously recorded, and while the increase during the budget year is expected to be somewhat lower, it will still be one of the largest in sales tax history.

Sales during 1959, which largely determined current fiscal year collections, rose \$3 billion over the previous year, with more than average growth in cars, building materials and taxable sales of manufacturers and wholesalers. A good part of the total gain, however, represents the contrast in sales during a year of recession with transactions in a period of rising economic activity. Taxable sales for 1960 are expected to advance an additional \$1.9 billion—only two-thirds of the growth recorded in 1959, but still a very substantial gain over a year of high activity. With a sale volume of \$24,600,000,000, the current year will establish a level twice the size of the volume recorded ten years ago.

The estimate of taxable sales for 1960 has been based on detailed analyses of trends in more than 50 types of businesses and on the assumptions outlined above with respect to price increases, motor vehicle sales, residential building and outlays for plant and equipment. Generally, a larger increase has been assumed for California than nationally, reflecting this State's greater population growth and slightly higher projected income. Rough projections were also prepared for 1961, since first quarter and, to a very limited extent, second quarter transactions will contribute to collections in 1960-61.

Sales of nondurable goods have been forecast at \$9,920,000,000 in 1960 and \$10,400,000,000 in 1961, gains of 6.6 and 4.8 percent, respectively, over amounts purchased in the preceding years. Sales of consumer durables have been estimated at \$6,060,000,000 for 1960, but only \$6,025,000,000 for 1961. Excluding motor vehicles, sales of other durables indicate increases of 4.7 percent in the current year and 3.2 percent next year. Motor vehicle sales are expected to show a substantial increase this year

(14.8%), but have been forecast to decline slightly in 1961, accounting for the overall drop in sales of consumer durables. Sales of motor vehicle supplies and parts are expected to parallel the changes projected in registrations, with a small allowance for price increases.

Building activity is expected to provide \$2,700,000,000 in sales of building materials during the current year and \$2,870,000,000 in 1961. Transactions for the current year are again higher percentage-wise than the Nation, but under the assumptions outlined above, housing starts in this State are not expected to fall as much as the rest of the country and industrial construction will rise. In addition, a slight increase has been taken in prices of building materials.

Outlays for plant and equipment have been forecast largely in line with changes indicated by the several national surveys taken on industry plans for capital expenditures. Where data for California indicate a trend differing from that of the Nation, allowances were made. Changes in 1961 approximate the normal trend shown by earlier years.

Total taxable sales by broad groups for 1959, 1960, and 1961 with percentage changes are shown in the table below.

**Table 3**  
**TAXABLE TRANSACTIONS IN CALIFORNIA**  
(In millions of dollars)

	1959	1960	Percentage change over 1959	1961	Percentage change over 1960
Consumer nondurables .....	\$9,309	\$9,920	6.6	\$10,400	4.8
Consumer durables excluding autos .....	1,967	2,060	4.7	2,125	3.2
Motor vehicle sales .....	3,483	4,000	14.8	3,900	-2.5
Motor vehicle supplies .....	895	950	6.1	990	4.2
Building material .....	2,645	2,700	2.1	2,870	6.3
Producers' equipment and supplies .....	4,419	4,970	12.5	5,425	9.2
Totals .....	\$22,718	\$24,600	8.3	\$25,710	4.5

A second method was used in estimating taxable sales for both years. This was based upon the correlations established between total taxable transactions and spendable resources of California residents. The amounts obtained on this basis were substantially the same as those shown in the table above.

To complete the estimates for each fiscal year, sales were allocated by quarters assuming the seasonal pattern shown in preceding years, with specific allowance for changes in the dates of Easter. In 1960, Easter will come after mid-April, but in 1961 Easter Sunday will fall on April 2. Because of the lag between sales and collection of tax, 1960-61 receipts will show the effect of two Easter buying periods, and an allowance was made in the final estimate for this unusual occurrence. Allowances were also made for audit program receipts and for sales tax on gasoline tax refunds.

### Personal Income Tax—\$271,750,000

Revision of the personal income tax law was the most important feature of the tax program adopted by the Legislature last year. Of the \$229,000,000 aggregate increase in annual revenue which resulted from this action, almost one-third will be contributed by the changes in this tax. The principal amendments include a reduction in personal exemptions, a narrowing of tax brackets, an increase in the maximum tax rate and adoption of the Federal definition of taxable capital gains and losses. In the case of many taxpayers, these increases were modified by a greater

credit allowance for each dependent and a raise in the standard deduction.

Primarily because of the features that could result in a lower tax liability (dependent's credit and standard deduction), there will be a slight shifting in the distribution of the tax burden this year. In the aggregate, the proportion of the total tax paid by the wage and salary group will be lightened and the liability of all other groups will be increased. The following table, based on 1956 income, compares the relationship of tax liability under the old and new laws.

	Personal income	Tax assessed		Percent Change
		Old law	New law	
Salaries and wages .....	67.4%	50.6%	47.9%	-5.3
Proprietors' income .....	14.1	22.4	23.9	+6.7
Property income .....	12.8	14.9	15.2	+2.0
Other income † .....	5.7	2.5	2.6	+4.0
Capital gains .....	-	9.6	10.4	+8.3
Totals .....	100.0	100.0	100.0	-

† Not comparable. Chiefly pensions, unemployment benefits and relief in personal income series, and annuities, alimony and income from property other than capital assets in tax assessed columns.

Receipts from this source during the current fiscal year will depend upon the volume of income received by the people of California in 1959. Receipts during the budget year will be determined chiefly by the volume of personal income generated in 1960. Using employment and payroll data, farm receipts, welfare and unemployment payments, and national data on interest, dividends and rents, the Department of Finance has prepared estimates of personal income for 1959. Income for 1960 was projected on the basis of the economic outlook, including a further increase in this State's share of the Nation's income. For both years, the estimates represent a continuation of the United States Department of Commerce series on personal income in California and are comparable with those data. The data underlying the revenue estimates are shown below.

**Table 4**  
**ESTIMATED CALIFORNIA PERSONAL INCOME**  
(In millions of dollars)

Source	1958 *	1959	1960
Wages and salaries .....	\$24,739	\$27,181	\$28,800
Proprietors' income .....	4,643	4,790	5,250
Property income .....	4,714	5,014	5,500
Other income .....	3,446	3,620	3,850
Less: Social insurance contributions .....	850	985	1,100
Totals .....	\$36,692	\$39,620	\$42,300

\* U.S. Department of Commerce estimate, from Survey of Current Business, August 1959.

In general, wages and salaries accrue to persons in the lower and middle income tax brackets, proprietors' income to the middle and upper groups, and receipts from the ownership of property to those with higher incomes. Because of the progressive rate structure of this tax, the type of income, as well as the aggregate amount, is important in estimating income tax revenue. Analysis of income tax data indicates a close relationship between sources of income and the resulting tax payments. The estimates presented in this budget have been prepared on the basis of that relationship, established by using tax data for each of the last six years adjusted to reflect the new rates, exemptions, credits and other changes in the law made last year.

A part of the income tax revenue is generated by factors having no relationship to the personal income series. These are net capital gains and miscellaneous income—primarily annuities, alimony, and gains from property other than capital assets. The estimate of tax from capital gains is based chiefly upon security market data, and the estimate of tax generated by miscellaneous income upon past trends.

The totals include collections resulting from current tax liability, audit operations of the Franchise Tax Board, and amounts due from prior income years. In the aggregate, receipts from this source are estimated at \$271,750,000 during the budget year and \$239,500,000 in 1959-60. Of these amounts, \$73,600,000 and \$60,300,000, respectively, are attributable to the new tax law. Actual receipts in 1958-59 were \$160,553,000.

### **Bank and Corporation Tax—\$251,500,000**

Corporate profits attributable to California activity during 1958, 1959 and 1960 account for the greatest part (96%) of the revenue received from this source during the years covered in this document. The remainder results from the audit operations of the Franchise Tax Board. The estimate of profits for 1959, taxable in 1960, is based upon data received from a carefully selected sample of 382 corporations doing business in all important fields of activity throughout the State. These corporations accounted for nearly half of the total earnings during 1958.

The reports indicated that 1959 corporate profits subject to the State tax totaled \$3,935,600,000, or 6.8 percent above 1958. A summary by major industry groups is given below.

**Table 5**  
**CORPORATE PROFITS BY MAJOR INDUSTRY—**  
**1958 AND 1959**

(In thousands of dollars)

	1958	1959	Percent Change
General Corporations			
Agriculture -----	\$39,200	\$37,000	-5.6
Mining -----	20,450	21,400	+4.6
Construction -----	122,700	97,200	-20.8
Manufacturing -----	1,388,100	1,549,700	+11.6
Oil production -----	210,700	194,200	-7.8
Trade -----	485,100	538,600	+11.0
Services -----	161,000	160,000	-0.6
Miscellaneous -----	2,100	2,200	+4.8
Totals -----	\$2,429,350	\$2,600,300	+7.0
Financials -----	701,950	663,400	-5.5
Utilities -----	552,700	671,900	+21.6
Grand totals -----	\$3,684,000	\$3,935,600	+6.8

As indicated in the discussion of the economic outlook for California, corporate profits are expected to improve moderately in 1960. Earnings of general corporations will increase by approximately the same proportions as anticipated nationally, while income of public utility corporations should parallel California's population growth, with the possibility of some further slight adjustments in rate schedules. It is expected that the largest percentage gain will be recorded by the financial group. Operating profits of most banks last year were offset to a considerable extent by substantial losses on short-term securities which banks found it necessary to sell in order to finance their lending operations. Although there may be some of this in 1960, a repetition on last year's scale is unlikely. Hence, a sharper increase in taxable

bank profits is anticipated. Because of the rise in interest rates paid by saving and loan associations and the likelihood that banks will make a similar adjustment, this year's earnings will probably still fall short of the 1958 record volume. On this basis, aggregate profits of banks and other corporations in California are estimated at \$4,188,000,000 for 1960, an increase of 6.4 percent over 1959—approximately the same gain as forecast for the Nation.

The second most important aspect of the 1959 tax program, in terms of revenue effect, was the revision of this tax law. The tax rate was raised from 4 to 5.5 percent and the minimum tax was increased from \$25 to \$100 a year. However, corporations were permitted to use accelerated depreciation, a feature of the Federal law since 1954. Adoption of these more liberal depreciation allowances will, of course, tend to offset somewhat the larger revenue flow from the higher tax rate.

Application of the provisions of the new tax law to estimated corporate profits, plus the revenue resulting from the audit program of the Franchise Tax Board, results in estimated receipts of \$251,500,000 during the budget year and \$221,200,000 in 1959-60, compared with actual collections of \$174,003,000 received in 1958-59. Of the estimated revenue, \$62,300,000 and \$36,100,000, respectively, are attributed to the 1959 amendments.

### **Cigarette Tax—\$65,250,000**

The cigarette tax adopted at the last legislative session became effective July 1, 1959. Although collections during the first three months fluctuated widely, there is now an indication of the probable annual yield. In addition, data are available on current cigarette consumption trends in the other states levying this tax. Because of the limited period for which California collection data are available, the estimate of receipts from this source has been checked by an analysis of the current yields in other states having similar economic and social structures.

Important revenue features of this levy are the 3-cent rate, the revenue stamp required on each package, the reimbursements of dealers for the cost of affixing stamps, and the nonrecurring tax upon retail cigarette inventories imposed at the time the levy took effect. Gross receipts from this tax during 1960-61 are estimated at \$66,600,000, or \$5,550,000 per month. The dealer discount to cover stamping expenses—limited to a maximum of 2 percent of gross collections—will amount to \$1,332,000. This reimbursement, coupled with minor refunds, will reduce net collections to an estimated \$65,250,000. Compared with \$64,700,000 in the 1959-60 fiscal year, the increase is only \$550,000. However, it must be pointed out that the two amounts are not strictly comparable: (1) The tax on retail stocks which contributed \$2,670,000 to the current year's total will not be repeated in 1960-61; (2) It was necessary for dealers to acquire an estimated \$700,000 initial inventory of stamps in 1959-60; (3) There was some avoidance of the tax in its first few months through advance purchasing on the part of consumers. In addition, there was no discount during the first two months of operation when the tax was administered through reports by dealers based upon their sales invoices. It is estimated that cigarette consumption will reach approxi-

mately 2.22 billion packages in 1960-61, an increase of 5.7 percent over the indicated level of the current fiscal year.

### **Insurance Gross Premiums Tax—\$65,000,000**

During the last legislative session the tax on insurance written in California was converted to a self-assessed levy, and payment was required about five months earlier than heretofore. This change in procedure threw two tax payments into the 1958-59 fiscal year and made collections in 1959-60 and 1960-61 dependent, respectively, upon the amount of premiums collected in 1959 and estimated premiums in 1960.

In preparing the estimate of this tax, data were obtained from 69 principal insurers showing the percentage change in volume of premiums collected in California during 1959, by all major lines of insurance. These reports, when weighted and expanded to reflect total California business, indicated a premium volume 9.3 percent greater than the previous year—\$2,900,000,000, compared with \$2,652,000,000.

All the major lines of insurance except fidelity and surety reported gains for the year, with the most significant increases shown in homeowners' multiple peril insurance—the new and growing package-type coverage—and in title insurance, coincident with the active housing market in 1959. After adjustment for dividends to policyholders and local property taxes paid by insurers on their principal offices in California, the net yield from this source during the current fiscal year is estimated at \$60,400,000.

New techniques were developed to estimate premiums for 1960. Life and disability insurance premiums for prior years were correlated with civilian population and forecast on this basis, using the population projections for the current year. Automobile insurance written in earlier years was related to total vehicle registrations at the end of each period. The forecast for 1960 assumes only a very slight increase in the average premium per registration. The total for all other lines of insurance was extended, using the trend shown by prior years. Total volume of premiums for 1960 using these methods amounted to \$3,128,000,000—7.9 percent higher than last year.

Again, allowance was made for dividends to policyholders and for the property tax deduction permitted insurers. In addition, it was necessary to adjust the estimate for the anticipated revenue under the retaliation provisions enacted by Chapter 2120, and for the reduction in tax rate on qualified pension and profit-sharing plans under Chapter 2174 of the statutes enacted last year.

After these adjustments, the gross premiums tax is estimated to provide \$65,000,000 in 1960-61, compared with the \$60,400,000 for the current year and \$105,832,000 for 1958-59. For the purposes of comparison, this latter amount can be divided into \$50,664,000 attributable to premiums written in 1957 and \$55,168,000 on business done in 1958.

### **Inheritance and Gift Taxes—\$61,500,000**

Inheritance and gift tax revenue depends primarily upon the number and size of bequests and upon the relationship between the decedent or donor and the beneficiary. In general, the rates of tax vary directly with the size of the inheritance or gift and with remoteness of the relationship. Exemptions are scaled

down as the relationship recedes. General business conditions and property values also influence the volume of collections, but there is a lag between changes in property values and the resultant change in tax receipts. Hence, collections should continue for some time to reflect the increases in value of real property and intangibles occurring during recent years.

Currently, inheritance tax collections amount to approximately \$3 per capita annually, a rate which has risen slowly during recent years. Projection of this yield through 1960-61 indicates collections of \$50,000,000 under the tax as it existed prior to June 24, 1959. In addition, an estimated \$8,000,000 is expected as a result of the adjustment in rates on transfers to remote relatives and strangers which took effect on that date. Hence, total collections of \$58,000,000 are anticipated from this source during the budget year, compared with \$48,000,000 in the present year. Of the latter sum, an estimated \$2,000,000 will be generated by the recent change in rates. Actual collections in 1958-59 were \$41,979,000.

Gift tax revenue reached \$2,963,000 during the last fiscal year. Recent monthly collections are running slightly below last year's level, but are expected to pick up again during April and May when most of this year's revenue will be received. The growing tendency toward better estate planning, exhaustion of personal exemptions and application of higher rates to successive gifts to the same donee, as well as the higher rates to distant relatives and strangers, should result in further revenue increases. For these reasons, receipts from this source are estimated at \$3,200,000 in the current year and \$3,500,000 in 1960-61.

### **Alcoholic Beverage Taxes—\$51,450,000**

Beverage tax receipts totaling \$51,450,000 are estimated in 1960-61, and of this total \$41,400,000, or approximately 80 percent, is attributable to the distilled spirits excise tax. The beer tax, which last year was raised from two cents to four cents per gallon, will provide \$9,300,000 (18 percent of the total), with the remaining \$750,000 (1.5 percent) from wines.

Per capita consumption of distilled spirits varied little from 1955 through 1958. The increase from 2.52 gallons per adult in 1955 to 2.60 in 1958 was less than one-tenth of a gallon. However, a significant upward movement occurred in 1959 which raised apparent consumption for that year to a new high of 2.79 gallons. Influenced by a record volume of personal income this year, the high level of consumption is expected to continue. With normal growth in California's population, it is expected that total consumption will reach 27,200,000 gallons in the current calendar year and 28,300,000 in 1961. On a fiscal year basis, the distilled spirits tax revenue is estimated at \$41,400,000 in 1960-61 and \$39,830,000 in 1959-60, compared with actual receipts of \$36,685,000 in 1958-59.

There has been a steady increase in beer consumption per adult since 1954—from 21.87 gallons in that year, to 23.70 gallons in 1959. This growth is expected to continue through the budget period, raising per capita consumption to more than 24 gallons a year. With an increase in the number of adults, aggregate consumption has been projected at 223,700,000 gallons in 1959-60 and 232,500,000 gallons in 1960-61. Both of these figures include allowance for the introduction of the 11-ounce can by certain of the breweries. Revenue

attributable to these volumes will amount to \$8,920,000 in the current year (including \$395,000 in floor tax as a result of last year's rate increase) and \$9,300,000 in the budget year.

Dry wine consumption has been marked by an upward trend which should carry total use to nearly 12,800,000 gallons next year. Use of sweet wine, on the other hand, has been declining and is expected to drop slightly further. After a relatively steady up-trend, sparkling wine jumped significantly in 1959—a 15 percent increase over 1958. Although further increases of this magnitude are not anticipated, total consumption is expected to reach 830,000 gallons in 1961. The tax rates of one cent per gallon on dry wine, two cents on sweet and 30 cents on sparkling are estimated to return \$710,000 in 1959-60 and \$750,000 in 1960-61.

These amounts are summarized below.

	<i>(In thousands of dollars)</i>		
	<i>1958-59 Actual</i>	<i>1959-60 Estimated</i>	<i>1960-61 Estimated</i>
Distilled spirits -----	\$36,685	\$39,830	\$41,400
Beer -----	---	8,920	9,300
Sparkling wine -----	5,129 *	231	261
Dry wine -----	---	120	125
Sweet wine -----	---	359	364
Totals -----	\$41,814	\$49,460	\$51,450

\* Cannot be distributed to source due to audit adjustments and other factors.

### **Private Car Tax—\$1,700,000**

Under this levy, railroad cars owned by companies other than railroads are taxed by the State rather than by the various local governments. Assessed valuations are determined by the State Board of Equalization and the average statewide property tax rate during the preceding fiscal year is applied against the assessment roll.

Although there was a sharp increase in the tax rate applicable to this type of property in the current fiscal year, the number of cars assessed and the average assessed value per unit dropped. The decline in number of cars was due to the recession-induced drop in rail traffic during 1957-58, and greater traffic volume can be expected as a result of the recovery. However, the decline in average values is traceable to a reduction in the assessment ratio to the average used in the several counties. This change was made as part of a general revision in assessment practice and a return to the higher average values of recent years is unlikely. Allowing for a moderate increase in the number of cars assessed and slightly higher tax rates, receipts from this source during the budget year have been projected at \$1,700,000, compared with \$1,613,000 currently and \$1,712,000 in 1959-60.

### **Other General Fund Revenue—\$80,996,000**

Revenues from other tax and nontax sources for the State General Fund during 1960-61 are estimated to total \$80,996,000. These comprise five general types of income: (1) a share of receipts from liquor, horse racing and motor vehicle license fees; (2) departmental collections, such as the charges for care and treatment of pay-patients at State hospitals; (3) interest income; (4) a share of oil and mineral royalties; and (5) miscellaneous receipts, such as the proceeds from sale of property and the surcharge on fines for violation of traffic laws.

Principal recent developments in these categories of State revenue include implementation of the Uniform Disposition of Unclaimed Property Act passed in 1959 (Chapter 1809). It is anticipated that this law will return \$2,250,000 to the General Fund in 1959-60 and \$3,250,000 in 1960-61, with perhaps \$500,000 a year thereafter. Another important 1959 enactment was the legislation requiring that small boats operated in California be licensed by the State (Chapter 1454). This act is expected to return \$1,250,000 this fiscal year and \$500,000 during the budget period.

Additional emphasis upon the immediate investment of idle funds, coupled with substantially higher interest rates, will maintain a relatively constant level of interest from General Fund investments, even though the average amounts temporarily invested may be somewhat smaller than in other recent years.

## **SPECIAL FUND REVENUE**

Provisions of the State Constitution, codes and statutes restrict the use of certain revenue to specified purposes, and under California's financial procedure these receipts are separately accounted in various special funds. In general, these comprise three categories of income: (1) receipts from broad tax levies which are dedicated to specific functions; (2) charges for special services to specific groups; and (3) certain rentals, royalties and other receipts earmarked for particular purposes. Motor vehicle taxes and fees illustrate the first of these classes. License fees for the regulation of businesses and professions are typical of the second, while oil royalty revenue dedicated in part to beach and park development is an example of the third group. Interest earned by the investment of special fund money accrues to the fund for which the investments are held.

Motor vehicle taxes and fees account for more than 85 percent of all special fund revenue, and under provisions of the Constitution and Statutes these receipts must be used for highway purposes—including maintenance and construction of roads and streets, traffic control and motor vehicle regulation. Principal sources of this income are the levies upon motor vehicle fuel, registration and weight fees, transportation tax and the vehicle license fee which is levied in lieu of local taxes on this type of personal property. During the 1960-61 fiscal year \$632,300,000 will be derived from motor vehicle taxes and approximately 40 percent of this revenue will be returned to local governments.

Regulatory fees and charges for special services to industry, business and the professions constitute the second largest source of special fund revenue. Coupled with hunting and fishing licenses and horse racing fees, receipts from these sources will amount to more than \$74,920,000 in the coming fiscal year. This sum includes revenue going to the General Fund from horse racing and liquor license fees.

Royalties from oil, gas and mineral production in publicly owned lands will provide an estimated \$15,768,000—a little less than is expected this year and substantially below the total for 1958-59, when bonus payments for offshore drilling rights raised oil and mineral royalties to \$78,238,000.

## Motor Vehicle Fuel Taxes—\$355,500,000

Estimates of revenue accruing from the 6-cent gasoline tax rest primarily on two considerations: the number of vehicles in operation and average fuel consumption per vehicle. By the end of 1960 vehicle registrations, including those exempt from payment of fees, are expected to reach 8,702,000, compared with an apparent 8,215,000 in 1959. Several factors influence the volume of fuel consumption. On the one hand there are those which tend to raise the average, such as the number of tourists entering this State each year, the rising level of personal income, the continued trend toward suburbanization, traffic congestion, and the increasing use of power equipment on automobiles. In contrast, the influences making for lower consumption include the trend toward smaller cars, the growing number of multicar families, better highways, and the increasing use of lightweight metals in both trucks and autos. It is believed that the gas-saving will outweigh the gas-using factors this year and that average consumption will decline to 638 gallons per vehicle from last year's 642 gallons. Notwithstanding this decline in unit use, the increase in number of vehicles will carry total net consumption to more than 5,550,000,000 gallons and will produce \$333,000,000 in gas tax revenue during the budget year, or \$16,500,000 more than is anticipated for 1959-60 and \$34,026,000 above actual receipts in 1958-59.

Since 1956-57, the consumption of diesel fuel has shown a definite upward trend, and this will be bolstered by a prosperous economy in 1960. The tax on liquified petroleum gas, formerly included with receipts from the gas tax, is now being included with diesel tax collections. Thus, receipts totaling \$22,500,000 have been estimated for 1960-61, compared with \$20,400,000 currently and \$18,735,000 in 1958-59.

A comparison of fuel tax estimates for this year and next with actual receipts in 1958-59 is given below.

	<i>(In millions of dollars)</i>		
	<i>1958-59 Actual</i>	<i>1959-60 Estimated</i>	<i>1960-61 Estimated</i>
Motor vehicle (gasoline) fuel .....	\$299.0	\$316.5	\$333.0
Use (diesel) fuel .....	18.7	20.4	22.5
Totals .....	\$317.7	\$336.9	\$355.5

## Motor Vehicle Fees—\$263,400,000

The registration fee paid by all vehicle owners; weight fees required on trucks, buses and trailers; and the vehicle "in lieu" tax comprise the principal motor vehicle levies. However, some lesser sources of revenue, among which are drivers' licenses, transfer fees, and miscellaneous charges, make a substantial contribution in the aggregate.

After a very poor showing in 1958, new vehicle sales rebounded sharply last year, and all indications point to a banner 1960. Nationwide sales are forecast at 7,000,000 units, an increase of 15 percent over last year's total. California's share in this near record volume is estimated at 690,000 units against a sales volume of 610,000 in 1959. As a result of this surge in new vehicle purchases, *fee-paid* registrations are expected to increase from 8,110,000 at the end of

1959 to 8,590,000 at the corresponding time this year and 8,920,000 in 1961. On the strength of these increases, registration and weight fees will reach a new high of \$125,110,000 in the budget year. The inclusion of drivers' license collections and other revenues will carry the total to \$137,700,000. This represents an increase of \$6,400,000 over the estimated sum for the current fiscal year and \$14,354,000 over actual receipts during 1958-59.

The motor vehicle license fee is patterned after the local property tax which it replaces, and vehicle values must be taken into consideration when estimating this revenue. The increase in both number and value of vehicles during recent years has had a compound effect upon this tax base, with the result that receipts have increased somewhat more rapidly than registrations. However, with a sizable and growing market penetration of less expensive automobiles, average selling prices are likely to drop slightly, with a resulting decline in average fees. This decline in value will be offset by the substantial increase in unit sales, with the result that aggregate revenue from this source will continue to rise. Taking these factors into consideration, receipts in 1960-61 are estimated to total \$125,700,000, compared to \$120,900,000 in 1959-60 and \$112,831,000 in 1958-59.

Comparative data on collections from principal fees during the three years covered by this budget are summarized below.

	<i>(In millions of dollars)</i>		
	<i>1958-59 Actual</i>	<i>1959-60 Estimated</i>	<i>1960-61 Estimated</i>
License (in lieu) fees .....	\$112.8 *	\$120.9 *	125.7 *
Registration and weight fees .....	113.3	120.3	125.1
Drivers' licenses .....	7.1	7.6	8.6
Others fees and charges .....	3.0	3.4	4.0
Totals .....	\$236.2	\$252.2	\$263.4

\* Includes General Fund share.

## Motor Vehicle Transportation Tax—\$13,400,000

Recent amendments have limited the application and reduced the rate of this tax on the gross receipts from transportation of persons and property over State highways, but the increase in activity has tended to offset the effect of these changes. As a result, the flow of revenue from this source has been more constant than might have been expected on the basis of this legislation. Against a peak net yield of nearly \$17 million three years ago, when the tax rate was 3 percent but operators were allowed a credit against this tax in the amount of one-third of their weight fee payments, receipts under the 1.5 percent rate (with no credit offset) during 1960-61 are estimated at \$13.4 million.

There is a close relationship between gross receipts from highway transportation in this State and general business conditions as measured by aggregate personal income of the people of California, and this correlation has been utilized in preparing the estimates of transportation tax revenue for the current and ensuing fiscal years. Thus, it is anticipated that an increase in the volume of highway transportation will result in collections of \$13,400,000 during the budget year, compared with \$12,300,000 in 1959-60 and \$11,171,000 last fiscal year.

### Horse Racing—\$41,203,000

In general, the trend in betting at California racing tracks has paralleled the growth in disposable income of California residents. However, the amount wagered in any fiscal year also depends upon the tracks in operation and the number of racing days programed. With an increase in income and number of racing days, the total pool for the budget year is \$538 million, as compared with \$509 million in the current year and \$487 million during 1958-59. On the basis of projections for specific tracks, receipts from State licenses and related charges during 1960-61 are estimated at \$41,203,000, compared with \$38,770,000 in the current fiscal year and \$28,087,000 in 1958-59. About one-fourth of the anticipated receipts this year and next (approximately \$10,000,000 a year) is attributable to the increase in license fees and the revised formula for computing breakage\* and dividing this money between track operators and the State. These changes were adopted at the 1959 legislative session.

A segregation of the levies on horse racing and the disposition of receipts between the various funds is shown in the following table. It should be noted that breakage revenue formerly going to the State College Fund for support of certain agricultural activities is now deposited in the General Fund, with agricultural courses and specified capital outlay expenditures at the colleges now supported through General Fund appropriations.

<i>(In thousands of dollars)</i>			
	<i>1958-59 Actual</i>	<i>1959-60 Estimated</i>	<i>1960-61 Estimated</i>
Tax on parimutuel pools----	\$26,148	\$32,889	\$34,955
Breakage -----	1,655	5,570	5,925
Unclaimed wagering tickets--	237	258	270
Licenses, fines, and penalties--	48	53	53
Totals -----	\$28,087	\$38,770	\$41,203
General Fund -----	5,967	17,605	18,890
Fair and Exposition Fund--	19,718	20,415	21,563
State College Fund-----	1,652	—	—
Wildlife Restoration Fund--	750	750	750

### Alcoholic Beverage License Fees—\$13,000,000

Assuming that existing laws and present policies of the Department of Alcoholic Beverage Control remain in effect during the years under consideration, only

\* The odd cents by which amounts payable to a winning bettor on each dollar wagered exceeds a multiple of 10 cents.

moderate increases in revenue can be expected from this tax. In fact, any substantial change in the license situation would depend upon a change in the law governing the ratio of licenses to county populations or the types of licenses counted in establishing these ratios. The renewal of on-sale licenses provides for the biggest share of the increase in revenue anticipated for the current and ensuing fiscal years. Renewals for various other categories, along with the issuance of new licenses at about the same rate as in recent months, will carry total revenues to \$13,000,000 in 1960-61. This compares with an estimated \$12,530,000 indicated for 1959-60 and actual receipts of \$11,962,000 in 1958-59. The General Fund share of this revenue includes all application fees and service charges and 10 percent of other collections. The total receipts due this fund, along with the reserved for apportionment to cities and counties, are shown in the following table.

<i>(In thousands of dollars)</i>			
	<i>1958-59 Actual</i>	<i>1959-60 Estimated</i>	<i>1960-61 Estimated</i>
For General Fund-----	\$2,341	\$2,430	\$2,550
For cities and counties-----	9,621	10,100	10,450
Totals -----	\$11,962	\$12,530	\$13,000

### Other Special Fund Revenue—\$65,212,000

Departmental receipts, rentals and royalties, and interest on investments for special funds are estimated at \$65,212,000 during 1960-61. This is approximately the same level as that expected in the current year, but substantially below the \$120,153,000 reached in 1958-59 when bonus payments on tideland drilling operations increased oil and gas royalties by \$55,556,000.

Planned utilization of special fund balances will reduce the amount of money available for investment, with a consequent reduction of \$3,680,000 in interest income.

Departmental income from licenses, service charges, and other items is expected to increase during the coming year, reflecting in general the growth of California businesses and professions and a revision in the charges at certain State parks.

Comparative yields of State tax levies during the last twenty-five years, including the estimates for 1960-61, are shown in the accompanying table. A summary outline of the present tax system is provided for convenient reference.

Table 6  
**SUMMARY OF STATE POPULATION, INCOME OF CALIFORNIA RESIDENTS, AND STATE TAX COLLECTIONS**  
*Excluding Departmental, Interest and Miscellaneous Revenues*

\* Amounts shown during period of World War II represent civilian population, estimated income of civilians, and per capita civilian income.

† Estimated.

# See accompanying statement for estimated effect of recent changes in state tax levies.

Population data, 1936 through 1949, are based on United States Census Bureau estimates; population, 1950 to date, estimated by the State Department of Finance.

Personal income, 1936 through 1958, from estimates by the Office of Business Economics, United States Department of Commerce. Reported totals for 1941 through 1945 have been adjusted to exclude income of armed forces personnel. Data for 1959 and 1960 are estimates by the State Department of Finance.

Income per capita computed from population and income data shown. Amounts differ somewhat from U. S. Department of Commerce estimates.

Taxes per capita computed on the basis of population January 1st, the midpoint of the fiscal year.

<sup>1</sup> Includes the corporation income tax and includes amounts credited to the postwar employment reserve in 1945-46.

<sup>2</sup> Includes the motor vehicle (gasoline) fuel tax, use (diesel) fuel tax, and brokers and producers fees.

<sup>3</sup> Includes registration and weight fees, motor vehicle license fee (in lieu tax) and other fees. Part of the revenue from the motor vehicle license fee is credited to the General Fund.

<sup>4</sup> Motor vehicle transportation tax and permit fees. All revenue from this source accrued to the General Fund in 1945-46 and 1946-47 and the early months of 1947-48.

<sup>5</sup> Includes General Fund share of revenue from horse racing and liquor license fees.

NOTE: Changes in rates and other features of these taxes have affected revenue yields during the period covered by this table; hence, the data shown are not strictly comparable. See accompanying statement for estimated revenue effect of recent tax levy revisions.

(1) Revenue and Taxation Code.

(2) This tax is levied at the rate of \$1.24 per 31-gallon barrel.

(3) State Board of Equalization.

(4) Distilled spirits in excess of proof strength are taxed at double this rate.

(5) Minimum tax \$100 per year, not applicable to banks.

(6) Franchise Tax Board.

(7) This tax is levied at the rate of 1.5 mills per cigarette.

(8) Business and Professions Code.

(9) Ocean marine insurance is taxed at the rate of 5 percent of underwriting profit attributable to California business. A special rate also applies to annuities.

(10) For return to cities and counties.

(11) For payment of administrative costs, highway bond interest and redemption and apportionment to counties, cities and school districts.

(12) For administrative expense and apportionment to State, counties and cities for highways and airports.

(13) For administrative expenses and state highways.

(14) Vehicle Code.

(15) For support of State Department of Motor Vehicles, California Highway Patrol, county roads and state highways.

(16) Average property tax rate in the State during preceding year, which for 1959-60 was \$6.24 per \$100 of assessed valuation.

# COMPARATIVE EXPENDITURES BY FUNCTION AND CHARACTER

1960-61

(Millions of dollars)

CHART 5

# Expenditure Program, 1960-61

The problems of growth and the necessity for progress in the basic activities of government set the scale for the State's program of services in the coming fiscal year. Not only the volume of expenditures, but the increases and the points of emphasis as well have been determined by the exploding attendance throughout the systems of primary, secondary and higher education, by the need for improvements in the care and treatment of patients at mental hospitals and inmates of correctional centers, and by the necessity of meeting current prices for the goods and services required in the discharge of the State's responsibilities.

Two characteristics of this budget must be emphasized at the outset: First, it is completely balanced within current resources in that all operating expense, all assistance to local governments and all new appropriations for capital outlay are financed from revenues of the current or the ensuing fiscal year. No additional appropriations from bond funds for construction purposes are contemplated. Second, so far as it has been possible to do so, expenditure recommendations have been limited to the amounts required for continuation of currently authorized programs. Changes in caseloads of the various agencies and revisions of law effected last year have been fully recognized. In a few instances, however, extraordinary circumstances have demanded cognizance of the need for improvement in the scope and quality of services, principally for mental health and higher education.

Expenditure requirements of State government as recommended in this budget for the 1960-61 fiscal year total \$2,477,121,574. This represents an increase

of \$184,306,946, or 8.0 percent, over the estimated total for the current year, and is more than half a billion dollars above the total of actual expenditures last year. However, in making these comparisons, it must be recognized that \$98,702,000 \* of current year construction needs and \$144,297,000 in 1958-59 were met from bond funds and other borrowing, compared with \$14,820,000 from these sources in the budget year. Since expenditures from borrowings are not included in the budget totals until the money is repaid, the expenditure programs of these three fiscal years are not strictly comparable.

## Three Divisions of the Budget

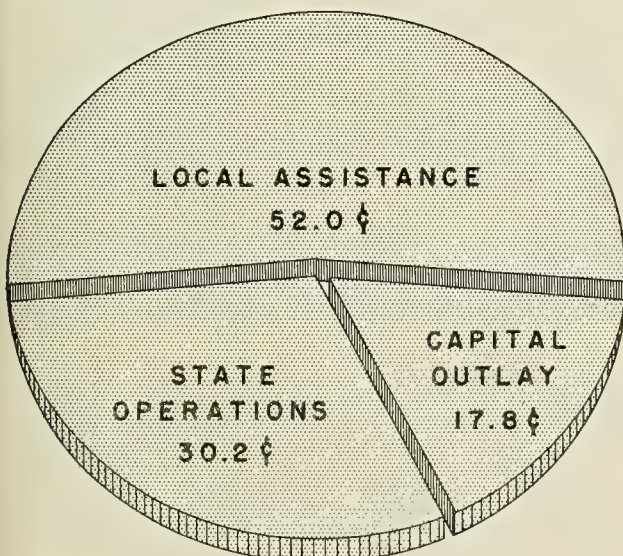

A little more than half of the outgo programmed for the budget year represents State assistance to local governments—chiefly subventions for school support; contributions for aid to the aged, blind, children and the disabled; and allocations of revenue collected on behalf of cities and counties. In the aggregate, these local assistance payments will amount to \$1,287,066,000, an increase of \$53,071,000 over the current year requirement for this purpose.

Approximately one-sixth of the total consists of capital outlay items—chiefly expenditures for new highways, but including as well substantial amounts for the construction of buildings at state colleges, university campuses, mental hospitals and correctional institutions. This broad category of costs will total \$441,753,000, or \$37,620,000 more than in the current year. This net change is not indicative of the broad shifts within the capital outlay total, however. Highway construction will fall \$48,604,000, due to the exhaustion of balances accumulated in prior years, but other capital outlay expenditures will increase \$86,221,000, the result of a shift from the moderate use of bond financing in the current year to reliance on current resources for capital outlay purposes in 1960-61.

The remaining 30 percent of the budget represents the cost of operating state governmental agencies—\$748,302,000, or \$93,616,000 more than will be required for this purpose in the current year. This includes the cost of supporting the activities of all the various departments, boards, commissions and independent offices, including the centers of higher education, hospitals, prisons and other facilities; maintenance of the higher courts of this State; support of legislative activities; and such miscellaneous items as bond interest and redemption, a cost which will show a substantial rise next year. One of the leading factors in the proposed increase for state operations is the 5 percent salary adjustment for state employees recommended for the coming year. Provision for this general raise results from the Personnel Board finding that current pay scales are below the levels paid for work

\* This and subsequent totals have been rounded to the nearest thousand.

CHART 6  
MAJOR DIVISION OF THE EXPENDITURE DOLLAR  
1960-61

of a comparable character, skill and responsibility in private business and other governmental jurisdictions.

The three major divisions of the 1960-61 budget are shown in the preceding circle diagram. Amounts for each of the three fiscal years covered by this document, together with the increases in each category next year are given in the following table.

Table 9

**STATE EXPENDITURES BY PRINCIPAL  
BUDGET DIVISIONS**  
(In millions of dollars)

	1958-59	1959-60	1960-61	Change from	
	Actual	Estimated	Proposed	Amount	Pct.
State operations -----	\$584.9	\$654.7	\$748.3	\$93.6	14.3
Capital outlay -----	254.2	404.1	441.8	37.6	9.3
Local assistance -----	1,092.5	1,234.0	1,287.1	53.1	4.3
Totals -----	\$1,931.6	\$2,292.8	\$2,477.1	\$184.3	8.0

Note: In this and subsequent tables, the details may not add to the totals, due to rounding. Percentages have been computed from unrounded numbers.

*Education Leads*

Viewed purely in fiscal prospective, education is the leading activity of State government. With \$1,052,570,000 earmarked for this purpose next year, education accounts for 42.5 cents out of the average expenditure dollar. This is the latest in a series of increases in relative importance which has carried education from 34 percent of the expenditure total 10 years ago and 39.5 percent in 1955-56 to the current 42.5 level.

Expenditures for highways are second in relative importance, accounting for 20.3 cents of the budget dollar. Included in this category are not only the amounts for highway construction and maintenance, but also allocations for local roads and streets, operation of the California Highway Patrol and support of the Department of Motor Vehicles. The two functions of education and highways comprise 5 of each 8 expenditure dollars.

Below these leading services are social welfare, public health and such related activities as industrial relations and veterans' affairs. In the aggregate, these make up 10.8 cents of each dollar. They are followed by expenditures for mental hygiene and corrections—9.2 cents; conservation and development of natural resources—7.1 cents; fiscal affairs and general administration—1.8 cents; and miscellaneous expenditures comprising 8.3 cents of the 1960-61 dollar. Considerably more than half of the latter represents the distribution of license fee revenue collected by the State for cities and counties. A chart showing these major functional divisions of the State's expenditure program is given on page A-22, while the dollar amounts are summarized in the following table.

Table 10  
**EXPENDITURES CLASSIFIED BY  
PRINCIPAL FUNCTIONS**  
(In millions of dollars)

	Recommended 1960-61	Percent of total	Change from 1959-60	
			Amount	Percent
Education -----	\$1,052.6	42.5	\$150.4	16.7
Highways and related activities -----	502.7	20.3	—48.1	—8.7
Social welfare, health and related activities -----	268.0	10.8	9.4	3.6
Mental hygiene and corrections -----	227.9	9.2	47.8	26.5
Conservation and development of natural resources -----	177.0	7.1	6.3	3.7
Fiscal affairs and general administration -----	44.6	1.8	3.2	7.8
Other expenditures -----	204.3	8.3	15.2	8.0
Totals -----	\$2,477.1	100.0	\$184.3	8.0

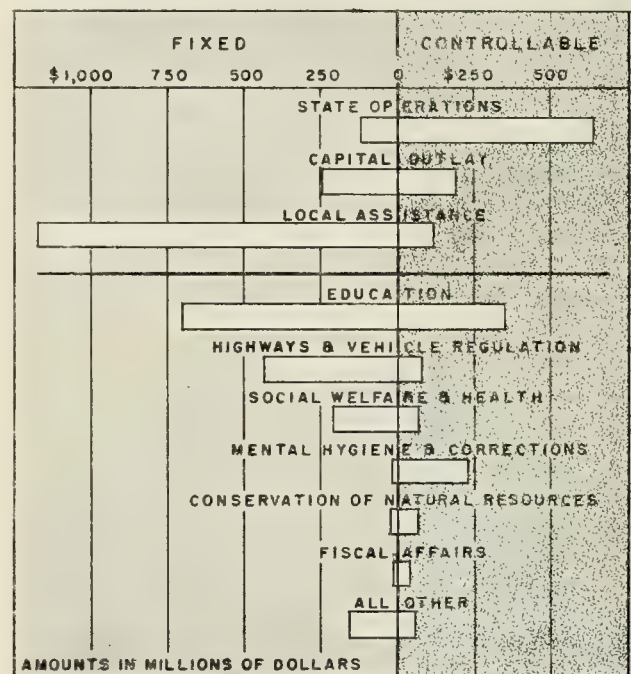

In order to show as accurately as possible the total to be spent for each function of government, the cost of the recommended salary adjustment has been distributed to the various functions in the data presented in the above table and in this analysis. Throughout the remainder of the budget document, this amount is treated as a lump sum. Adjustments in the data have also been made to reflect the unidentified savings anticipated in operating expenses and capital outlay during both the current and budget years. These revisions account entirely for the differences between amounts referred to in this statement and the details shown elsewhere in the budget document.

**Education—\$1,052,570,000**

Long considered to be the most important of all State functions, the operation of the statewide educational system has also made the largest single demand on the financial resources of the State. This situation continues in the 1960-61 Governor's Budget where the educational program requires \$1 out of every \$2.35 projected for expenditure, and 62 cents of every General Fund dollar. This educational program is most diversified, ranging from child care centers to the University of California, one of the truly great teaching and research institutions in the world.

CHART 7

**FIXED AND CONTROLLABLE EXPENDITURES**  
BY MAJOR PURPOSE AND FUNCTION

Approximately two-thirds of the State's expenditures are fixed by provisions of the Constitution or existing statutes; one-third is subject to some degree of control by the Governor in making his budget recommendations. As this chart shows, most of the controllable amounts for 1960-61 are found in the State Operations section of the budget and in the expenditures for such functions as higher education, mental hygiene and corrections, and conservation of natural resources. The degree of control is usually very limited, since it does not extend to the number of people seeking higher education at State institutions, the number of hospital patients and many other factors affecting expenditures.

The State Department of Education is responsible for the operation and administration of the largest segment of the educational system. Among other things, the Department administers the assistance program to local school districts, furnishes free textbooks, operates the special schools and services for handicapped, maintains the State college system, and is the co-operating agency in Federal-State programs in such areas as vocational rehabilitation, national defense education and vocational education.

### Local Assistance

The 1959 Legislature, upon the recommendation of the Governor, increased the apportionment to local school districts from \$193.37 to \$201.10 per pupil in average daily attendance in the preceding school year. Average daily attendance in the current year, which will be the basis for the 1960-61 appropriation for public school support, is estimated at 3,355,000, an increase of approximately 200,000 pupils over the previous year. At the \$201.10 rate, this and other items of school support will require a total of \$678,958,000, or \$40,339,000 more than during the current fiscal year.

Expenditures for furnishing free textbooks to the elementary grades are also affected by the growth in school population. However, the program for 1960-61 reflects not only this growth, but also the adoption of a new series of basic and supplemental texts in reading for all eight grades. The magnitude of this program is illustrated by the fact that contrary to usual practice, only a one-year supply of these books can be printed. In the past, new adoptions have been printed on the basis of a two-year supply to take advantage of the economies inherent in such a procedure. The recommended appropriation for this purpose is \$12,372,000, an increase of \$2,364,000.

As part of the co-operative National Defense Education Act, the Department will administer \$3,309,000 in Federal funds (an increase of \$968,000 over 1959-60) and \$547,000 in State funds (an increase of \$147,000). These programs involve student loans, improvement of instruction; improved guidance, counseling and testing; and a strengthening of statistical services.

### State Colleges

The State college system in California will provide educational opportunities to an estimated 70,760 young men and women in the 1960-61 fiscal period. To meet the educational needs of this projected enrollment, expenditures recommended amounting to \$70,972,000 are contained in this budget proposal. This represents an increase of \$13,791,000, or 24 percent, over the previous fiscal period. This will provide additional instructors necessary to meet the increased enrollment and will afford improvements and expansions within the instructional programs of the various State colleges to meet the changing needs of our society.

In addition to expansion in the instructional area, the administrative structure at many of the state colleges has been strengthened. This has been done to provide adequate leadership in relation to present-day problems of higher education and to plan for expansion inherent in the three-fold increase expected in state college enrollments during the next decade.

Other factors which have contributed to this increased cost are the provision of professional, technical and clerical staff in support of the instructional program, the implementation of a policy requiring full matriculation of all students, completion of new physical facilities which must be placed in operation during 1960-61 to meet enrollment needs, and price increases relating to goods and services necessary for the operation of the state colleges.

In order that classrooms and laboratories for the estimated student enrollment of 88,200 will be available for use during the fall semester of 1962, \$41,726,000 is requested this year to begin construction on new facilities. This amount contemplates the continued development of the two new state colleges in Orange and Alameda Counties, and the initial development of a third, Stanislaus State College.

### University of California

The other organization which operates a large segment of the educational system, and which requires large appropriations of state funds, is the University of California. To maintain its status as a world renowned center of teaching and research activities, \$118,136,000 is required in 1960-61 for current operations, and \$51,281,000 in capital outlay to meet future student enrollments.

This reflects provision for an estimated 47,650 students on the University's 8 campuses, an increase of 3,854, or 8.8 percent, over the current year. Because of its unique legal status, the University has available to it certain sources of funds which may be used for financing its operations. More of these funds were used in 1959-60 than are now available for use in 1960-61. Whereas the total expenditure program increases 13 percent, the amount of University funds shows an increase of only 0.4 percent and state funds show an increase of 19.5 percent.

Included in the increase is \$911,000 for new and improved programs. The major item is \$250,000 for development of television facilities and for experimentation in the direct use of television as a teaching

medium. Provision is also made for additional courses and the strengthening of instruction at the upper division and graduate levels at Davis and Riverside. Departments of instruction and research are also increased for operation of new electron microscopes, a foreign language laboratory and improvements in several medical programs. Also included is a program of research in outer space in co-operation with the Federal Government, operation of an engineering nuclear reactor facility, an African studies center, and an atmosphere research center.

The 1960-61 capital improvement program, some \$51,000,000 in value, is planned to add new facilities to each of the operating units of the University. The largest single allocations are for the most populous campuses, Berkeley and Los Angeles. A total of \$26,400,000 is proposed to add facilities at these campuses to meet added enrollments and to meet the demands for the expanding graduate divisions and highly technical education and research. The other campus receiving a substantial amount is the medical center in San Francisco, where \$10 million is proposed. The major item is for a new \$8.8 million basic science instruction and research building.

The balance of the program is divided among the other campuses to reflect growing enrollments and the development of some of these smaller campuses into full-fledged general campuses of the University.

## Highways, Streets and Motor Vehicle Regulation—\$502,798,000

Motor vehicle traffic in all its ramifications will require an expenditure of just over a half billion dollars in State funds during the coming budget period. This includes the maintenance and operation of the present State highway system, expenditures for the construction of new facilities, support of the Highway Patrol and Motor Vehicle Department, and the distribution of funds to counties and cities for road and street purposes. In addition, an estimated \$227,709,000 in federal aid will be available for work on the interstate system and certain local roads. Although this federal budget money will be expended under State supervision and is detailed in the highway budget, it is not carried in the California budget total.

Expenditures for state highway construction will decline moderately next year as balances carried forward from previous years are depleted. Against an estimated outgo of \$291,000,000 in the present fiscal year, the capital outlay budget calls for \$246,167,000 in 1960-61. The anomaly of a declining program in the face of a growing need arises from the fact that it has been possible to schedule an abnormal outlay program in the current year. The revised volume of capital expenditures from State funds only compares with a figure of \$221,471,000 budgeted for this purpose last year—an acceleration of nearly \$70,000,000. Among the outstanding features of the highway construction program for 1960-61 are further implementations of freeway development in both the northern and southern regions of the State, the by-passing of city bottlenecks on the central valley routes and the acquisition of rights-of-way, preparatory to future highway development.

By means of procedural improvements, the Department of Motor Vehicles plans to register 8,802,000 vehicles, to issue licenses to 3,322,000 of California's 8,216,000 licensed drivers, and at the same time to economize by reducing expenditures \$1,900,000 during the coming year without in any way reducing its service to the public. Only the salary increase item adds to the expenditure program of this department.

While faced with a 400,000 increase in registered vehicles in 1961 and the pressing problem of reducing the 2,200 deaths that occurred in 1959 on California highways, the Highway Patrol is endeavoring to improve its organization and procedures and make better use of its existing manpower and facilities. This is the primary reason for strengthening first-line supervision in the field by the addition of 33 sergeant positions as proposed in the Highway Patrol budget. Including the salary adjustment and accompanying retirement benefit contributions by the State on behalf of patrol personnel, the increase in support of the State Highway Patrol will amount to \$2,724,000. A summary of expenditure amounts for all activities in the field of highways and motor vehicle regulation is given in the table below.

Payments of shared revenues to local governments for highway purposes will continue to grow moderately, reflecting the anticipated increase in highway user tax revenue. Allocations to counties will amount to \$92,329,000—up \$896,000 from the current year and nearly \$6,200,000 more than was paid out for this purpose in 1958-59. Cities will receive \$35,507,000 for street purposes, an increase of \$1,824,000, while the program of grade crossing protection will continue at substantially the current level of five million dollars a year.

## Welfare, Health, and Related Activities—\$268,039,000

As the title to this category indicates, it is concerned with activities affecting the general well-being of the people of California. Included are expenditures for old age security and other public assistance,

health services and aid for local hospitals, industrial relations, and veterans' benefits. The Federal, State and local governments jointly participate in financing a number of these programs. The \$268,039,000 included in the budget represents the total State cost of all welfare and health programs next year.

It should be noted that the unemployment insurance, disability insurance, and job placement activities of the Department of Employment, and the operation of the Compensation Insurance Fund are not included in this group of expenditures. Payments for these purposes are made from Federal or trust funds and are not included in the budget totals, but the details of these programs are reported in the appendix of the budget.

In the field of industrial relations, upward trends in both the labor force and in disabling injuries call for strengthening of industrial safety inspections and the addition of three referee teams in the Industrial Accident Commission. One hundred percent inspection of farm labor camps is also provided in the Division of Housing. The Fair Employment Practices Commission was established during the current year to safeguard the employment rights of all persons, and is continued at the full-year cost of \$270,000 during 1960-61.

### Public Health

Support expenditures for the Department of Public Health will amount to \$8,483,000 in 1960-61, which represents a continuation of the 1959-60 authorized level of service. New programs initiated by the 1959 Legislature include a core unit for radiation surveillance, protection against cancer quackery, and expansion of air sanitation work.

Subventions for public health in 1960-61 will total \$24,160,000, a decrease of \$1,718,000 from the current year. The carry-over from the last fiscal year of a \$2,500,000 unexpended balance in the State appropriation for local hospital construction has raised the current subvention for new hospitals to \$10,687,000. It is anticipated that this program will return to normal levels next year, with the result that expenditures for this purpose will decline by approximately \$3,000,000.

Although grants to counties for treatment and care of persons suffering from tuberculosis show a \$200,000 increase in 1960-61, patient-days are steadily decreasing, due to improved techniques of early case finding and treatment. A 20 percent increase in the patient-day allowance to meet higher costs of care in sanatoria accounts for this upward trend.

The crippled children program now includes polio victims who were formerly cared for by the National Foundation for Infantile Paralysis and nephritis patients. In these and other programs related to the care and treatment of crippled children the State will provide \$7,352,000 in assistance to local agencies, an increase of \$915,000 over the sum provided in the current year.

### Social Welfare

Expenditures for support of the State Department of Social Welfare during 1960-61 of \$3,815,000 primarily continue the present level of service. In order to provide co-ordination between all State depart-

ments concerned with the problems of the aging, a nucleus group is provided for an inter-departmental committee on aging.

Payments of state funds to local government for old age security, assistance to the blind and the disabled, aid to needy children, and other welfare activities will total \$211,130,000, an increase of \$8,872,000 over the current year.

Improvements in the aid programs granted at the 1959 legislative session were fully implemented on January 1, 1960, and will provide additional benefits of \$17,200,000 to recipients during 1960-61. These include:

1. *Old Age Security*: Basic grant increased from \$90 to \$95 and special needs from \$106 to \$115 per month.
2. *Aid to Needy Blind*: Basic grant increased from \$99 to \$104 and special needs from \$110 to \$115 per month.
3. *Aid to Totally Disabled*: Special needs for attendant care increased average grant to \$98. New allowances for medical care of \$6 per month provided.

### Veterans Affairs

Primary responsibility for state assistance to veterans rests with the Department of Veterans Affairs. In addition to maintaining the Veterans' Home, which will care for an average of 1,925 members during the next fiscal year, this Department administers the programs of educational aid to veterans and veterans'

Table 13

dependents and assists them in obtaining Federal benefits to which they are entitled. Expenditures totaling \$7,491,000 are recommended for this purpose, a decline of \$48,000 from the estimated requirements in the current year.

In the educational assistance program, greater enrollment of Korean veterans and rising costs of tuition will require an augmentation in current year funds of \$490,000, continuing at this higher level into the budget year. This increase is partially offset by full year savings of \$378,000 created by transferring claims and rights services for veterans from private service groups to the State.

Additional operating economies have permitted a savings of nearly half a million dollars yearly in the administration of the farm and home loan program. Since this operation is financed entirely from bond funds which are repaid through charges to recipients, these saving will be passed on directly to participating veterans.

## ***Mental Hygiene and Corrections— \$227,913,000***

While differing in many ways, the mental hygiene and correctional programs of the State are aimed at a common goal—the return of persons committed to the care of the State to useful roles in society. The treatment and rehabilitation programs conducted by the agencies in this field are designed to alleviate the conditions which produce mental illness and crime and to assist patients and inmates in making the transfer from institutional to normal life successfully.

### **MENTAL HYGIENE**

The budget for the State's 10 hospitals for the mentally ill reflects a continuation of the leveling off of patient population. The June 30, 1959, population was 36,771 and the estimate for 1960-61 has been continued at this level. Population of the four hospitals for the mentally retarded depends primarily on the availability of beds and related facilities. The June 30, 1959, population of these institutions was 10,125, and this number is expected to increase to 12,120 by June 30, 1961, due to opening of additional facilities. Both of the neuropsychiatric institutes are expected to be in full operation by June 30, 1961, with a total patient population estimated at 305.

In past years, the major part of expenditure increases, other than that required to keep pace with the State's increasing population, has of necessity gone into the treatment program in order to raise it to an acceptable level. Beginning in 1957-58, the State expanded its efforts in the field of mental health to include research, training and the development of community mental hygiene resources, and a further expansion is proposed in 1960-61.

In order to best utilize available resources, the Department of Mental Hygiene has developed a "4-Point Program" to meet the increasing mental health problem. These consist of—

1. Sharing the load of increased services.  
Expansion of state-local mental health services must be encouraged. In this connection, additional personnel are required to provide adequate

consultation in planning and operation of local programs.

2. Increasing efficiency of present operations.  
As mental hygiene services expand, it is necessary that adequate treatment and supporting staff be provided in order to maintain a well-balanced program.
3. Emphasizing the State's pre- and post-hospital services.  
It is anticipated that new or expanded outpatient programs will result in economies. Toward this end additional social workers and after-care facilities, an expanded convalescent leave program, and new day-care treatment centers are proposed.
4. Sharpening the tools.

Expansion of the training program is vital, if fullest utilization of present staff is to be realized. A step-up in the research program is essential, if progress in this area is to be continued.

The budget for the 1960-61 fiscal year provides for the further expansion of convalescent leave and local mental health programs, the establishment of three additional after-care facilities, and the initiation of a day-care treatment program. In addition, the operating plan for 1960-61 provides (1) for additions to the social services staff to reduce the patient-social worker ratio, (2) increases in regular and special drug allowances, (3) greater emphasis upon staff training and (4) expansion of the psychiatric research program.

Proposed expenditures for the administration and operation of the 14 State hospitals, maintenance of clinics, and the two institutes during 1960-61 total \$128,921,000, an increase of \$12,916,000 over the comparable figure for the current fiscal year.

Capital outlay expenditures for the coming year are proposed at \$10,543,000 to continue to meet the demands for specialized facilities and to bring the existing plant up to modern standards. The program includes the construction of a new acute hospital annex, enlarging, modernizing, and remodeling various wards and buildings, and providing necessary related service facilities and equipment.

Provision is made for a further increase in local mental health activities, which in turn require additional state aid. An appropriation of \$2,845,000, an increase of \$963,000 over the amount estimated for the current year, will be required to meet the cost of the State's share of this program. It is expected that 33 local jurisdictions will qualify for aid in the 1960-61 fiscal year as compared to 21 in the current year.

### **CORRECTIONS**

Although custody is generally regarded as the main purpose of a penal system, correctional training of offenders is as important an aspect as custody in California's correctional program. The custodial and training facilities operated by the Department of Corrections and the Youth Authority are designed to permit the assignment of inmates and wards to institutions on the basis of their individual needs for both instruction and control.

These two departments during 1960-61 will operate a total of eight institutions and 29 conservation

camp for adult males, and eight correctional schools and seven camps for Youth Authority wards. In addition, complete supervision is provided for those inmates and wards released on parole. In order to standardize the facilities and the treatment of youthful offenders, the State also assists county governments in the cost of building and operating local facilities for juvenile delinquents.

The Department of Corrections' budget includes a major expansion of the forest conservation camp program which has been emphasized in the current year. This program will provide manpower to carry out fire prevention and control, recreation development, fish and game management, soil conservation and forest and watershed restoration. In addition to offering useful work to persons under confinement, this will contribute materially to the preservation and conservation of California's natural resources.

The treatment program for parolees having a history of narcotic addiction, which was started in 1959-60, is included in this budget at the same level, but will be operating for a full year for the first time. This activity consists of intensive supervision and physical examinations designed to prevent a return to addiction and crime.

In total, the operating expenses for all phases of the adult correction program will amount to \$40,791,000, an increase of \$4,857,000 over the present fiscal year. New facilities to be opened during the budget year include an addition to the new Men's Colony at Los Padres, the reception-guidance center at Deuel Vocational Institution, a sixth cottage at the Institution for Women at Corona, and the adjustment center at San Quentin State Prison.

Provision is made for capital outlay expenditures of \$15,161,000 and an additional \$2,040,000 will be spent from current year bond appropriations for building purposes, primarily to provide a conservation center in Lassen County and branch conservation centers in Tuolumne County and Mono-Inyo counties. These facilities will greatly strengthen the recently expanded conservation camp program.

The Youth Authority will care for an average of 3,612 wards in its institutions during the coming fiscal

year, an increase of 489. In addition, an average of 10,009 individuals will be under parole supervision—796 more than in the current period. This growth, coupled with greater emphasis upon parole and an extension of the special treatment program to the Ventura School for Girls, will carry total operating expenditures to \$18,711,000 in the budget year, an increase of \$3,032,000. Capital outlay requirements are placed at \$6,581,000, chiefly for site acquisition and plans for a new Northern California Youth Center, expansion and rehabilitation of the Fred C. Nelles School for Boys, completion of a new Youth Training School at Ontario, and additional capacity at the Northern California Reception Center and the new Ventura School for Girls.

In addition to maintaining correctional schools and treatment facilities, the Youth Authority offers consultation and other assistance to public and private agencies engaged in meeting and solving the problems of juvenile delinquency. One of its primary aims is the strengthening of juvenile law enforcement and the encouragement of soundly administered probation programs. In this phase of the Department's work, it will distribute \$4,360,000 to cities and counties for the construction and maintenance of local juvenile homes and camps.

## Conservation and Development of Natural Resources—\$176,984,000

Combined within this category are the several State agencies dedicated to conservation, development, and beneficial utilization of our natural resources. The activities covered here include water development and conservation; timber and watershed protection; conservation and management of fish and game; acquisition, development and operation of parks and beaches; assistance in the construction of small craft harbors; and assistance to the agricultural and mining industries of the State.

The aggregate cost of these diverse and varied services will be \$176,984,000, an increase of \$6,291,000, or 3.7 percent over the expenditures for like purposes during 1959-60.

### Beaches and Parks

Demand for recreational facilities throughout the State has been growing for the past several years. Attendance at the beach and park areas operated by the State has increased and the resulting pressure has compounded the operating problems confronting the Division of Beaches and Parks as new areas are acquired and developed. Demand for the development and operation of existing and additional recreational areas, coupled with the major acquisition program authorized by the Legislature in prior years, will require expenditures of \$22,117,000 during the budget year.

The Division will continue to place strong emphasis on the extensive acquisition and development program authorized by legislative acts and appropriations during 1956 and 1957. Looking beyond the needs of this earlier legislation, provision is made for initiation of investigations, studies, surveys and generalized plans of proposed acquisitions and developments which will constitute a new five-year program. Such

plans must be made prior to appropriation of funds for any project.

Provision is made for operation of new facilities, and staff is provided for expanded operation of present beach and park areas. The budget provides for the transfer of Squaw Valley, site of the 1960 Winter Olympics, to the State Park system at the conclusion of the games. Funds are provided to permit operation of this new park during the 1960-61 fiscal year. Significantly, the continuing revenue deficiency which has existed in the State Beach and Park Fund reaches the critical point in the coming year. This deficiency has made it necessary to transfer the sum of \$5,046,000 by transfer from the General Fund to the Beach and Park Fund.

### Other Natural Resources

The budget of the Division of Forestry includes additional staff and facilities for an accelerated conservation camp program which was initiated in the 1959-60 fiscal year in co-operation with the departments of Corrections and Youth Authority. Also included are additional staff and facilities to combat the increasing forest and watershed fire problems. Extension of the use of aerial tankers for fire suppression to all six districts and added emphasis on forestry research are representative of new ways in which these problems are being approached.

The Division of Mines budget includes the second phase of an expanded mineral research and field study function provided initially by legislative augmentation at the last session.

In the Division of Small Craft Harbors the program of boating regulation initiated by Chapter 1454, Statutes of 1959 has been implemented. The registration of small boats will be performed jointly by this Division and the Department of Motor Vehicles. In the

area assistance to local governments, the Division of Small Craft Harbors has projected the processing of loan applications which will utilize the remainder of the \$15,000,000 made available for harbor construction from prior year appropriations and bond sources.

The Department of Fish and Game budget is based on a partial implementation of the five-year wildlife conservation plan approved last year. Proposed increases in the expenditures for this purpose reflect workload factors in the water use and pollution fields. In addition, the department's planning staff is expanded, and the wildlife protection function is strengthened in the training area and in provision for undercover investigation. In total, expenditure recommendations for fish and game and for wildlife conservation amount to \$13,444,000, up \$2,153,000 from the current year.

### Water Resources Conservation and Development

Water conservation and development remains one of the most pressing problems of California State government. Planning is well underway for the major developments necessary to satisfy the rapid and steady increases in the water requirements of this State.

The 1959 Legislature placed on the ballot a water resources development bond issue to be decided in November 1960. Pending this decision, work will continue on projects already authorized by legislative action. Among the projects to be financed in this budget are the completion of railroad relocation work at Oroville, additional work on the South Bay Aqueduct, and site clearance and preparation at the San Luis Reservoir. In addition, provision is made for joint Federal-State construction of a sea water conversion plant at Point Loma, San Diego County. This project will consist of an atomic reactor and distillation plant. Expenditures for this capital outlay program and related costs of investigation, design, and basic data collection by the Department of Water Resources will total \$68,591,000 during 1960-61.

Payments for flood control and watershed protection are included in the local assistance budget. For this purpose, \$19,333,000 is provided, primarily for acquisition or rights-of-way for federally financed construction of flood control projects.

### Fiscal Affairs and General Administration—\$44,553,000

To a great extent this category of costs embraces the housekeeping activities of State government—the overall direction by the Governor and his executive office, personnel management, tax collection, auditing, central purchasing of supplies and equipment, building management, and the many other operations essential to the efficiency of government. Of the \$44,553,000 recommended for appropriation in the next fiscal year, roughly half relates to tax collection and the enforcement of State tax laws. The other half is divided among fiscal management, general administration—including executive direction—and capital outlay for offices and office equipment.

Amounts included in the budget for each of these activities are shown in the table below. In this connection it must be emphasized that an additional

\$12,780,000 to be expended for office building construction will be obtained from trust funds. In accordance with the practice of not including disbursements of borrowed funds in the budget, this item is not contained in the current expenditure total.

One of the major developments in this area is the proposed installation cost of an electronic data processing system for disbursing and accounting in the office of the State Controller. It is estimated that this new procedure will reduce expenditures \$750,000 during the first five years of operation.

Other factors influencing expenditure requirements for administration and fiscal affairs include the cost of printing ballots and ballot pamphlets for the 1960 general election, the full year administration of tax laws adopted in 1959, further assistance to local governments in the improvement of property tax procedures, and the expenses incidental to the operation of additional office buildings.

total, \$135,350,000 represents the return of State-collected revenue and other assistance to local agencies.

Among the items of special interest in the cost of State operation is a further substantial increase (\$5,836,000) in requirements for bond interest and redemption. This is another of the costs of California's rapid growth, since it arises from the use of borrowed money to finance a part of the State's tremendous building construction program.

Now that California purchases 75 percent of its natural gas from sources outside the State, it is imperative that considerable attention be given to the actions of the Federal Power Commission in setting rates on gas produced in areas from which this State imports its supply. To do this, the Public Utilities Commission, as the sole representative of the California consumers' interests in this field, is being provided with \$128,000 for additional staff to be used in gathering cost data from producers and intervening in Federal Power Commission proceedings. The Public Utilities Commission's brief experience in this field to date, indicates that many millions of dollars will be saved to the California gas consumer by strong, aggressive action.

<sup>1</sup> There is \$1,020,874 in the Sacramento State Building Interest and Sinking Fund in excess of the \$3,000,000 necessary to retire all outstanding bonds. Section 16 of Chapter 1300, Statutes of 1959, and Section 20 of Chapter 1, Statutes of 1958, included provisions to transfer the amounts in excess of \$3,000,000 market value as of June 30, 1958 and June 30, 1959 to the General Fund. These transfers were not made in view of an adverse opinion from the Attorney General that such a transfer would impair the obligation of the contracts existing between the bondholders and the State.

<sup>2</sup> Funds were transferred from the General Fund to the Bond Sinking Fund of 1943 to pay the interest and principal on these issues to final maturity; however, \$5,000,000 was loaned to the Highway Fund for the Golden Gate Bridge and Highway District. This loan will not be repaid until after final maturity of the district bonds. Chapter 2071, Statutes of 1959, provided for repayment if sufficient federal funds were appropriated. The enactment of the one cent federal tax on gasoline will not provide the necessary funds for the National System of Interstate and Defense Highways for the fiscal year ending June 30, 1961 and June 30, 1962 to permit the \$5,000,000 transfer from the Motor Vehicle Transportation Tax Fund to the General Fund in accordance with the stipulations of Chapter 2071, Statutes of 1959.

<sup>3</sup> There is \$1,577 in the Olympic Bond Fund in excess of the amount necessary to retire all outstanding bonds.

<sup>4</sup> Money is transferred from the Motor Vehicle License Fee Fund to the General Fund in the amount necessary to pay the interest and redemption costs.

<sup>5</sup> Repayments from school districts are available to pay part of the interest and redemption costs.

<sup>6</sup> Chapter 104, Statutes of 1958, First Extraordinary Session, authorizes bonds to be issued and sold amounting to \$20,000,000. The proceeds from bond sale are authorized to be deposited to the credit of the General Fund. There is no intention to sell these bonds.

<sup>7</sup> The servicing of these bonds is primarily the responsibility of the San Francisco Harbor Improvement Fund and the Veterans Farm and Home Building Fund of 1943. However, the bonds are general obligation bonds of the State of California.

<sup>8</sup> Callable on and after January 2, 1951, in the amount available in the Sinking Fund.

<sup>9</sup> Callable on and after January 2, 1955, in the amount available in the Sinking Fund.

<sup>10</sup> \$500,000 callable on or after March 1, 1971.

<sup>11</sup> Callable on or after January 2, 1941, in the amount available in the Sinking Fund.

<sup>12</sup> Chapter 103, Statutes of 1958, First Extraordinary Session, authorizes issuance of bonds totaling \$50,000,000 for the San Francisco Harbor and \$10,000,000 for development of small craft harbors.

COMMISSION ON UNIFORM STATE LAWS

Office at San Francisco

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61	CHANGE FROM 1959-60
------	------------------------------	-------------------	----------------------	---------------------	------------------------

SUMMARY

TOTAL EXPENDITURES					
Support (General Fund)-----	\$2,743	\$5,450	\$5,850	\$400	(7.3%)

GENERAL ANALYSIS

Objectives

In conjunction with other states the commission drafts and presents to the Legislature uniform laws deemed desirable and practicable by the National Conference of Commissioners on Uniform State Laws. The commission is composed of 4 members appointed by the Governor, the Legislative Counsel as a member ex officio, and 2 legislators.

Program and Performance

Provision is made for attendance of the commissioners at meetings of the national conference and the cost of California's

contribution to the conference. Chapter 1838, Statutes of 1959, eliminated the previous \$1,900 ceiling on the amount this commission can contribute as its proportionate share of expenses of the National Conference of Commissioners on Uniform State Laws and provides that the share shall be based on the population of California in comparison to that of the other states. California's new share of \$2,300 is provided for in the 1960-61 fiscal year.

CONTRIBUTION TO LEGISLATORS' RETIREMENT FUND

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61	CHANGE FROM 1959-60
------------------------------	-------------------	----------------------	---------------------	------------------------

SUMMARY

TOTAL EXPENDITURES				
Budget Act appropriation (General Fund)-----	\$90,000	\$152,000	\$120,000	-\$32,000 (-21.1%)

GENERAL ANALYSIS

The State contributes an amount, as estimated by the Board of Administration, State Employees' Retirement System, equal to so much of the benefits to be paid from the fund during the year as is not provided by the accumulated contributions of the members receiving such benefits.

Re-estimates for the current fiscal year indicate that the 1959-60 appropriation was higher than necessary. Consequently, an offsetting adjustment has been made in the proposed 1960-61 appropriation.

12					
13					
14					
15					
16	<b>GENERAL ANALYSIS</b>				
17	The Judicial Council consists of 11 members: The Chief Justice of the Supreme Court, 1 associate justice of the Supreme Court, 3 justices of district courts of appeal, 1 judge of superior courts, 1 judge of a municipal court and 1 judge of a justice court.				
18	The council surveys the conditions of business in the courts with the view of simplifying and improving the administration of justice. Suggestions are submitted to the courts for expediting business and helping to secure uniformity. The chairman may assign any judge to another court of like or higher jurisdiction to relieve congestion and equalize the workload of the judges.				
19	In order to meet the continuing increase in the workload of the Supreme and appellate courts the chairman assigns pro tem justices to each court. The difference between the salary of justices of the courts to which such pro tem justices are assigned				
20	and the salary of the court to which they had been appointed, plus expenses for travel and subsistence are paid by the State. These costs are included in a separate Budget Act item administered by the Judicial Council.				
21	The council also collects and compiles statistics on all courts and makes many special studies looking to the improvement of the administration of justice, some of which are required by the Legislature and others voluntarily undertaken.				
22	This budget includes provision for 1 legal secretary and for a one-half statistical clerk position increased to full-time in the current year to take care of increased workload in surveys and studies being undertaken by the council.				
23	The major item of increase in operating expenses is the full year cost of rent in the new San Francisco office building.

## GENERAL ANALYSIS

The court has jurisdiction over appeals from superior courts in Fresno, Imperial Inyo, Kern, Kings, Orange, Riverside, San Bernardino, San Diego, and Tulare Counties. It has original jurisdiction to issue writs of habeas corpus, mandamus, prohibition and certiorari. It also handles appeals and original proceedings transferred from the Supreme Court. The court consists

of 1 division of 3 justices. The court meets in Fresno, San Bernardino, and San Diego for 4 months each year.

This budget continues the existing level of service with allowances for increased rentals and moving expenses necessitated by the relocation of the Fresno offices into the new State Building.

## GENERAL ANALYSIS

## Objectives

This office was created by Chapter 1819, Statutes of 1959, which added Chapter 7.5 (commencing at Section 25700) to Division 20 of the Health and Safety Code.

Section 25730 of this code created the position of Coordinator of Atomic Energy Development and Radiation Protection to serve as advisor to the Governor with respect to the development of atomic energy and radiation protection in the State.

The Department Coordinating Committee on Atomic Energy Development and Radiation Protection was created by Section 25750 to assist in the coordination and development programs and activities in this field engaged in by the various state departments. The committee consists of the Coordinator of Atomic Energy Development and Radiation Protection as chairman and the heads of the following state departments and agencies, or the individuals designated by the heads of such departments or agencies to represent them: the Department of Public Health, the Department of Industrial Relations, the Department of Water Resources, the Department of Natural Resources, the Department of Fish and Game, the State Water Pollution Control Board, the California Disaster Office, the Attorney General, the Department of Agriculture, the Department of Public Works, the Department of Education, the Department

of Finance, the University of California, the Public Utilities Commission, and such other state departments or agencies as the Governor may select.

Section 25760 created an advisory Council on Atomic Energy Development and Radiation Protection, consisting of the Coordinator of Atomic Energy Development and Radiation Protection and 9 members appointed by the Governor. 1 member shall be appointed from each of the following fields: industry, labor, medicine, education, science and technology, agriculture, insurance, city government, and county government. The council is to evaluate the programs of the several state departments and agencies and advise and make recommendations to the Governor bearing on the development of state policy in the field of atomic energy development and radiation protection.

## Program and Performance

The expenditures for this office in 1959-60 are included in the support budget of the Governor. Provision is made to continue the existing level of service on a full-year basis compared to a 9-month operation in the 1959-60 fiscal year.

## GENERAL ANALYSIS

## Objectives

This new activity of the Governor's Office, created by Chapter 467, Statutes of 1959, is responsible for advising the Governor on all matters affecting the interests of the people as consumers, and as to methods to increase the competence of the people as purchasers. The Consumer Counsel shall recommend to the Governor and to the Legislature the enactment of such legislation as is deemed necessary to protect and promote the interests of the people as consumers.

## Program and Performance

The counsel makes such investigations and studies as are necessary to accomplish these functions, and render reports to the people of the State thereon. Advisory committees are to be appointed by the Governor to assist the Consumer Counsel.

Provision is made to continue the existing level of service on a full-year basis compared to a 9-month operation in the 1960-61 fiscal year.

14					
15	<b>GENERAL ANALYSIS</b>				
16	<b>Objectives</b>				
17					
18	This agency has the responsibility for planning and co-				
19	ordinating a statewide program for emergency relief in the				
20	event of natural or war-caused disaster, and for providing				
21	leadership and assistance to other state agencies and local				
22	governments in the development of an acceptable state of				
23	operational readiness, as provided in Chapter 1, Division 7, of				
24	the Military and Veterans Code. The objectives of the pro-				
25	gram are:				
26	(1) A fully prepared State Government, with those depart-				
27	ments and agencies having emergency responsibilities prepared				
28	to carry out their assigned emergency jobs under disaster				
29	conditions;				
30	(2) Fully prepared county and city governments;				
31	(3) A co-ordinated and integrated federal-state-local emer-				
32	gency preparedness program;				
33	(4) A well-informed and adequately prepared public.				
34					
35	<b>Program and Performance</b>				
36					
37	This office has been organized with a central administrative				
38	staff and a group of specialists who are responsible for: the				
39	pre-emergency planning, training, organization for disaster				
40	operations, providing technical guidance to other state agencies				
41	and local governments, and specific services that would be re-				
42	quired during an emergency.				
43	A field organization has been maintained under a structure				
44	composed of three regions staffed by coordinators whose assign-				
45	ments are to implement the program on a comprehensive basis.				
46	The budget submitted by the agency for the 1959-60 fiscal				
47	year was reduced by the Legislature by approximately one-				
48	third. In the light of continually changing technological methods				
49	of coping with disasters of all kinds, the agency has thoroughly				
50	reviewed operating practices; and analyzed its responsibilities				
51	for assisting local governments.				
52	A regional structure composed of 6 mutual aid regions is				
53	proposed. The new structure actually reduces the number of				
54	operating or standby field offices from 10 to 6.				
55	Advantages of the proposed reorganization include an im-				
56	proved operating base, and closer liaison between the agency				
57	and local governments. By decentralizing, nonproductive time				
58	spent in traveling over extensive distances on normal work				
59	assignments will be appreciably reduced. A further considera-				
60	tion is that the 6-region plan conforms closely with the orga-				
61	nization plans of major state agencies, such as the Department				
62	of Highway Patrol, with which the Disaster Office works very				
63	closely.				
64	Under the provisions of the California Disaster Act and				
65	Executive Order 58-CD-1, this office is responsible for:				
66	(1) the development and maintenance of the master emer-				
67	gency plans and programs of the State;				
68	(2) the assignment of appropriate emergency roles to the				
69	other agencies of California State Government and to the				
70	local governments in California;				
71	(3) providing direct assistance to state agencies, and to the				
72	local governments of California in programing and plan-				
73	ning, organizing, equipping, and training the necessary				
74	emergency organizations;				
75	(4) effecting the necessary co-ordination between federal,				
76	state and local emergency plans;				
77	(5) representing all agencies of State Government and the				
78	local governments of California in obtaining available				
79	federal funds and equipment to implement approved				
80	emergency plans and programs.				
81					
82					
83					
84					

In addition to performing on a day-to-day basis the functions described in (1) through (5) above, this office must be in constant readiness to perform its own emergency role. During an emergency, the office functions as the immediate staff and co-ordinating organization of the chief executive in carrying out the State's responsibilities under the California Disaster Act and applicable federal statutes.

Emergency equipment which has already been deployed throughout the State in the care of state and local agencies, and under the supervision of the Disaster Office, includes: 115 hospitals; hundreds of thousands of blood procurement sets; 50 sanitation units; 680 first aid stations; 7 emergency communications units; 100 state-owned fire pumps; 29 rescue trucks; 105 radiological monitor trailers; 16 mobile radiological laboratories; 10,815 radiological instruments; 5 fire communications units; 100,000 feet of aluminum pipe; 265 bell and lights receivers; 211 radio transmitter-receivers.

During the current fiscal year the agency has experienced difficulty in meeting existing workload requirements. 4 additional intermediate typist-clerks and one property clerk are proposed in order to properly carry out responsibilities under the federal assistance programs covering surplus property donations, inspection and utilization review, and financial aid to state agencies and local jurisdictions.

Financial aid provided by the Federal Government includes matching funds for construction of emergency operating facilities for state and local governments. One additional intermediate stenographer-clerk is requested to accomplish the detailed reports, analyses, and reviews necessary to properly document the obligation of federal funds for such projects.

Over 4,000 radiological instruments have been assigned to the Southern California area and a request is made to add a senior maintenance technician to assist local jurisdictions and state agencies in performing operational checks and minor repairs and establishing and maintaining calibration and repair schedules.

The agency has entered into contracts with 3 state agencies to perform certain laboratory analysis related to samples provided by these agencies, and to report on data obtained as a result of such analysis. Three additional laboratory positions have been requested to enable the agency to properly perform the work required under these contracts, which are completely reimbursable by the participating state agencies.

3 maintenance positions are included for work required at the headquarters office, in lieu of the current contract for maintenance service now provided by the California Highway Patrol Academy. It is believed that direct employment of maintenance personnel will result in more effective maintenance without increase in over all costs.

3 clerical positions are provided to meet workload within the various staff units.

Several reclassifications are reflected in the budget for the 1960-61 fiscal year at a net savings in that year of \$4,702. These changes are a part of the overall plan to develop a more effective organization structure.

An increase in equipment is primarily the result of modifying existing communication equipment to meet FCC requirements, completing the final increment of installing 19 mobile radios in fire pumps, and extension of the fire communications net to 15 additional counties.

## GENERAL ANALYSIS

## Objectives

The primary purpose of the State Employees' Retirement System is to provide for the orderly retirement of employees who reach an age, or condition of disability, such that they cannot normally be expected to discharge their responsibilities with the desired proficiency, and to provide further that the retirement compensation offered be sufficient to attract and retain personnel of the required caliber. The policy-fixing body for the retirement system is its 8-member Board of Administration, consisting of the Director of Finance, a member of the State Personnel Board, 3 members elected from the members of the system, a life insurance company official, a bank officer, and a representative of the University of California. One of the board's most important functions is to invest money contributed by participants in the retirement system. The board also administers the Legislators' Retirement System.

## Program and Performance

Members of the State Employees' Retirement System consist of state employees (including most University of California employees) and employees of approximately 400 local governmental jurisdictions, participating on a contractual basis. Members of the Legislators' Retirement System consist of legislators and elective state officials who elect membership.

During the 1958-59 fiscal year, a limited number of members (employees of political subdivisions of the state contracting with the system) co-ordinated Social Security coverage with a modified retirement benefit. On November 4, 1959, a co-ordination of Social Security coverage with a modified retirement benefit was made available on an optional basis to some 55,000 noncertificated school employees who were members of the system on that date. Most noncertificated school employees becoming members of the system after November 4, 1959, will be mandatorily covered under the co-ordinated Social Security and modified retirement program. For most school employees who were members of the system on or before November 4, 1959, in addition to the option of selecting co-ordination with Social Security, such members could have elected instead either to remain under their original coverage or to add to their original coverage survivor benefits within the State Employees' Retirement System at a cost of \$2 per month.

Legislation enacted during the 1959 Session of the State Legislature left to a determination by a vote among state employees as to how many choices would be available to state members of the system on November 4, 1959. The results of that vote make available to state employees the choice between remaining under present benefits or adding survivor benefit coverage with the State Employees' Retirement System to their present benefits at a cost of \$2 per month. All state and university employees becoming members after November 4, 1959, will mandatorily have survivor benefit coverage within the system. Additional expenditures during the 1959-60 fiscal year result from legislation enacted in the 1959 Session of the Legislature with 19 positions being added during the year.

A reduction of 8 man-years of temporary help in the 1960-61 fiscal year reflects the completion of the establishment of the coverage and retroactive coverage under Social Security, as well as establishment of the present members who will elect survivor benefit coverage within the State Employees' Retirement System.

Legislation enacted in the 1959 Session of the Legislature also provided that the funding for the operations of the State Employees' Retirement System would come from the excess interest earnings of the State Employees' Retirement Fund. This means that subsequent to the 1959-60 fiscal year, there will be no appropriation from the General Fund for the support of the State Employees' Retirement System and the system will pay pro rata charges as do other special fund activities. As all costs are now paid from this trust fund, administrative costs for local public agencies are included in expenditure totals for the 1959-60 and 1960-61 fiscal years. Of the total cost approximately \$568,000 is attributable to state members and the remainder is chargeable to the trust funds of local contracting agencies.

The 1960-61 Budget includes 14 proposed new positions to meet increased workload resulting from an increase of 14,000 new members, and for processing of payroll deduction reports to the Federal Government. The integration of survivors' benefits into the system and the increased number of contracting agencies eligible for the co-ordinated system with Social Security benefits during the current year will have a first full-year workload effect during 1960-61. Certain 1-time operating expense items related to these changes result in a reduction in this category.

## OLD AGE, SURVIVORS' AND DISABILITY INSURANCE

## Objectives

To act for the State in administering the Old Age, Survivors' and Disability Insurance program for public employees within the State under such coverage.

## Program and Performance

This program is conducted under the Federal Social Security Act and in accord with provisions of state law and a federal-state agreement. The cost of the program is derived from assess-

ment of the political subdivisions participating in the program. Presently there are 998 political subdivisions participating with approximately 62,100 employees covered. It is anticipated in the 1960-61 fiscal year, the number of participating political subdivisions will reach 2,900.

The 1 additional position is provided to handle the estimated increase in number of agencies which will have employees joining the Social Security Program.

### GENERAL ANALYSIS

#### Objectives

Under the State Civil Service Act, the Personnel Board is responsible for serving the personnel needs of state agencies as well as providing leadership for these agencies in improvement of personnel practices and procedures and in personnel management. The board, which consists of 5 members appointed by the Governor for 10-year terms, prescribes, amends, and repeals rules as necessary to administer the State Civil Service Act, and sets the general policies for the Personnel Board. Technical personnel services are provided for political subdivisions on request.

#### Program and Performance

Under the general policies of the Personnel Board, the executive officer directs the various divisions in recruiting, examining, certifying, adopting suitable pay rates, co-operating in training, and establishing standards of health and safety. The functions of the divisions have become more complex during the past few years due in part to the continued growth in number of state employees and the condition of the labor market. More examinations are being given and more applicants are applying for the tests.

More emphasis is being put on research to develop methods to improve and save on time and staff. New procedures have been and are being introduced due to this work. Training courses are being conducted for personnel of various state departments to develop more efficiency and promote better training programs.

This budget includes 3 positions in Administration to provide for a program of personnel management consultation and assistance to departments directed toward obtaining more effective personnel management.

A technical position in Training is proposed to initiate a program of driver safety under direction of the Safety Coordinator.

Increased emphasis in management testing is provided by 1 technical position in Examining Standards to develop better management tests.

Other positions are provided for normal workload increases. Major increases in operating expenses are accredited to increased emphasis in recruiting and rent for the new State Office Building in Los Angeles.

Improved efficiency and purchase of later model equipment permit the abolishment of 3 permanent positions in the central services unit and other economies.

### BOARD

#### Objectives

The board adopts general policies and rules, establishes job classes and pay ranges, and hears and decides appeals from disciplinary and other actions.

The board consists of 5 members appointed by the Governor to carry out the administration's policy and provide effective, economical administration of laws affecting this department.

#### Program and Performance

The board meets once every 2 weeks for 2 days. The meet-

ings are scheduled at Sacramento, San Francisco or Los Angeles.

The hearing officer presides at hearings on appeals concerning civil service status. The number of these hearings has become too numerous for the Personnel Board and its hearing officer, and assistance from the Division of Administrative Procedure is required.

Provision is made in this budget for a public address and recording system for the board hearing room and \$1,000 is thereby dropped from hearing services expense.

## RECRUITMENT AND FIELD SERVICES DIVISION

## Objectives

The primary functions of the division are to attract qualified applicants to compete for positions in the state service; to provide information concerning state employment; to administer continuous testing programs; and to provide assistance in personnel matters to state agencies. Branch offices are maintained in San Francisco and Los Angeles to provide assistance to state departments and the public.

## Program and Performance

The public information counters in Sacramento, Los Angeles, and San Francisco annually give information concerning the state civil service to approximately 250,000 individuals. The number of such contacts is increasing.

The division also supervises the proctoring of state examinations in the metropolitan centers and administers continuous clerical testing. As the result of several studies, a number of other examining programs are being decentralized to the field offices.

The division has programs designed to provide direct and continuing contact with employment sources; such as colleges, labor unions, placement services, technical and professional associations and other organizations, to create favorable long-term interest in state employment as a career in schools and colleges, and to advertise and personally recruit at sources of labor supply. Its function of attracting well-qualified applicants to the state service is made difficult by manpower shortages in many occupations and by the organized competition faced by

the State for available personnel. Workload has increased with the rise in the number of authorized positions in state departments. The division is attempting to measure the effectiveness of various recruitment media and techniques. It is hoped to offset, in part, workload increases and improve recruiting by effecting closer co-operation with operating departments and their field offices throughout the State and through extension of the practice of recruitment through employees.

The proposed budget provides 1 new position and 1 position transferred from Personnel Service in the 1959-60 fiscal year to Los Angeles for increased emphasis in engineering recruiting. 0.5 man-years of temporary help for direct mail is also provided.

In order to obtain critically needed graduate and psychiatric nurses, a program including 2 recruiters and 3 half-time clerical positions and related expenses is provided. 1 recruiter in both Northern and Southern California will allow more personal contact in this pilot program.

1 recruiter and 1 clerical position will also provide a pilot program in the critical field of psychiatric social worker. Particular emphasis will be on conference and college contacts.

1 clerical position for general recruitment workload increases in Sacramento is added, and 1 editorial aide is added for workload in increased advertising and revision of recruitment brochures.

3 clerical positions, 1 in each office, are added for increased workload in continuous and decentralized testing.

Additional rental costs will result from occupancy of the new Los Angeles Office Building.

## Program and Performance

In the 1959-60 fiscal year, 8 positions related to examination policy, standards, and construction were transferred to the newly created Examining Standards Division to form a nucleus for that functional examination construction and standards unit. This division will operate at approximately the present level in the 1960-61 fiscal year with continued emphasis in developing and improving new procedures and programs in classification and pay.

3							
4	of greater management efficiency by providing training and consultative assistance to agency line officials and their staffs. The						
5	division encourages and assists agencies to develop training						
6	aimed at improving work methods, increasing skills, and de-						
7	veloping knowledges which make possible more economical and						
8	efficient operation of departmental programs.						
9	The State Safety Coordinator is assigned to stimulate in-						
10	terest among state agencies in employee safety and accident						
11	prevention. An effective safety program is designed to reduce						
12	accident and injury cause and to improve employee morale.						
13	This budget includes an additional safety coordinator position						
14	to initiate and direct a driver safety program under direction of						
15	the State Safety Coordinator.						
16	1 additional clerical position is based on workload increases						
17	for services to other departments.

42	COOPERATIVE PERSONNEL SERVICES						
43	Objectives						
44	This division provides personnel services to local agencies						
45	on their request and on a contract basis by which all costs are						
46	reimbursed.						
47	service more effective and economical than providing their own						
48	testing service. Methods are being reviewed constantly to lower						
49	these costs without sacrifice of quality.						
50	An increasing number of local agencies have turned to the						
51	State for experienced help in installing and maintaining modern						
52	job classification and standardization plans. During 1958-59,						
53	28 agencies including over 5,000 jobs were studied by this						
54	division.						
55	This budget provides for continuing the activity at the ex-						
56	isting level.						
57	Program and Performance						
58	An increasing trend in local government to employ staff						
59	through merit selection methods has led to this program serving						
60	more than 135 agencies and giving over 1,100 examinations						
61	for such agencies during 1958-59. These agencies find this

27	<b>GENERAL ANALYSIS</b>				
28	<b>Objectives</b>				
29	Examines and files articles of incorporation and amendments				
30	thereto; exercises general supervision of elections; maintains				
31	the Archives of the State and the Central Record Depository;				
32	attests the official acts of the Governor and Legislature.				
33	<b>Program and Performance</b>				
34					
35	Before a corporation can operate in California, its articles				
36	must first be reviewed, and if approved, filed with the Secretary				
37	of State. Likewise, all amendments to corporate articles, as				
38	well as dissolutions, agreements of merger and consolidations				
39	must be filed with this office. In the 1958-59 fiscal year there				
40	were 39,463 corporate documents reviewed. This represents an				
41	increase of 6,542 or 20 percent over those reviewed in 1957-58.				
42	Of this total 31,254 were filed of which 21,638 represented				
43	articles for new corporations in California. Current year and				
44	budget year estimates indicate a marked increase in the number				
45	of corporate documents processed by this office. This is				
46	due primarily to the recovery from the 1957-58 recession plus				
47	the continued increase of new industries on the West Coast				
48	to serve the expanding population.				
49	2 positions, 1 counsel and 1 clerk, are proposed to handle				
50	the estimated increase in review of corporate documents.				
51	2 additional clerical positions are proposed for the handling

## CENTRAL RECORD DEPOSITORY

## Objectives

This bureau has receipt and custody of all records required or permitted by law to be deposited in the Office of the Secretary of State.

## Program and Performance

The Central Record Depository was established in 1947. Modern equipment and the proper use of record center systems, pro-

cedures and techniques enable the Central Record Depository, in many instances, to service records and furnish information therefrom more rapidly than it could have been secured if the records had remained in the depositing agencies' inactive record files. Through the transfer of inactive material to the record center, depositing agencies are able to effect economies due to reduced purchases of filing equipment and the need for less space for records retention.

## GENERAL ANALYSIS

## Objectives

This department is responsible for the protection of plants and animals from infectious disease, pest animals, weeds and injurious insects and the prevention of the introduction and spread of crop and livestock pests and diseases. The department is charged with the administration of programs designed to assist in the marketing of agriculture products, and the protection of the public by assuring quality controls and preventing fraud and deception.

## Program and Performance

The department operates through 4 divisions, field offices, crews, and advisers and consultants operating throughout the State. A major portion of the departmental responsibility is accomplished in co-operation with the 54 offices of county agricultural commissioners. The department gives technical assistance, coordinates various county programs and surveys, and assists in training field personnel.

Increasing workload and program changes require 57.9 additional positions during the budget year. 1 division chief and 1 clerical position are included to provide an overall strengthening of supervisory and administrative functions in departmental administration. 2 additional positions are required due to an increase in number of specimens received for examination in the nematology laboratory. Conversion from rental space to a department-owned greenhouse requires 1 technician. 4 man-

years of additional seasonal help are required to partially restore the predatory animal control program to its former level. 1 additional chemist is needed in connection with the enforcement of Chapter 2009, Statutes of 1959, to prohibit sale of poultry meat containing excess moisture. 4 professional and 1.5 clerical positions in agricultural statistical work are necessary for the county estimates work inaugurated during the past year, and also to pick up an increasing workload in regular field activities. Following enactment of Chapter 714, Statutes of 1957, to provide more complete checking of produce dealers, 3 auditing positions were added. Experience has shown this staffing was inadequate, so provision is made for 1 additional position in the budget year. 2 additional positions provide for the co-ordination of the enforcement activities in connection with milk marketing stabilization.

As a result of action by the Federal Pure Drug and Food Administration, wineries are required to obtain inspection on grapes prior to crushing to insure that deliveries are reasonably free from decay. Arrangements have been made with the Bureau of Fruit and Vegetable Standardization for implementing this work on a fee basis for the first time on a limited number of wineries during the fall of 1959. This required the establishment of 24.5 man-years of temporary help in the current year. An additional 39.4 positions are included in the budget year to expand this service for the 1960 crop to include a larger proportion of the wineries in the State.

## DEPARTMENTAL ADMINISTRATION

## Objectives

The director and his assistants are responsible for departmental policy, and the channeling of the efforts of the operating divisions to insure efficient administration of the agriculture laws.

## Program and Performance

The office of administration provides agricultural and related economic information for the Governor and the Legislature. In addition, it maintains co-operative relations with federal, state, and county agencies and institutions. The accounting office ad-

ministers all fiscal matters of the department relating to budgets, accounts, collections, payrolls and disbursements. The personnel office conducts job classification studies, salary surveys, and investigates cases requiring disciplinary action.

1 division chief is proposed to more effectively plan, supervise and direct the work of the staff in the Accounting Office, Personnel Office and Office Service Unit as well as in other units of the division.

1 senior stenographer-clerk is included to provide the necessary secretarial assistance for the division chief.

## DIVISION OF PLANT INDUSTRY

## Objectives

This division is charged with preventing the introduction and spread of crop pests, and with the protection of the farmer and consumer in respect to plants, and related activities.

## Program and Performance

The first line of defense against the introduction of plant pests, including harmful insects, plant diseases, nematodes, and noxious weeds, consists of agricultural inspection stations maintained at 17 border locations for the purpose of inspecting vehicular traffic and enforcing plant quarantine regulations. Stations are also maintained at San Francisco, San Pedro and San Diego to inspect ships and airplanes. Quarantine enforcement at interior points, consisting largely of the inspection of freight, express and mail shipments, is carried out by county agricultural commissioners.

Leadership, co-ordination, and technical assistance are supplied to the counties. Field surveys are conducted in co-operation with the counties to detect crop pests present, but not yet widely distributed in the State. When they are discovered, particularly in incipient stages, suppressive and eradication measures are initiated.

This division provides identification and classification of pests intercepted during surveys or quarantine inspections.

Co-operative programs are developed with local governments and landowners to control noxious weeds and rodents harboring diseases transmissible to humans. A joint program is carried on

with the United States Fish and Wildlife Service to control predatory animals to protect livestock, poultry, crops such as melons and grapes, and as an aid in the suppression of rabies.

Fruits and vegetables, hays and fodders, are sampled and analyzed to determine whether they contain deleterious spray residue which would be injurious to persons or animals. In co-operation with county agricultural commissioners, regulations are enforced pertaining to injurious herbicides and other injurious materials requiring a permit to use.

The co-ordination of nursery inspection to insure uniformity of inspection procedures in all counties is accomplished through the county agricultural commissioners and county inspectors who are trained by the department in the detection and control of insects, nematodes, plant diseases, and weeds. Nurseries meeting minimum plant pest cleanliness requirements are issued certificates which permit them to ship their stock to 56 of the 58 counties without inspection at destination. During 1958-59, 7,711 nurseries were licensed to sell and ship nursery stock.

This division exercises enforcement in the area of commercial feeding stuffs, grain warehouse inspection, and agricultural warehouses. All commercial feeds must be labeled to show analysis and ingredients. Inspection and laboratory analysis are accomplished for the purpose of maintaining and improving the reputation of California products. Personnel performing these inspections are licensed by the United States Department of Agriculture and are under its technical supervision through a co-operative agreement.

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
		58-59 (Filled)	59-60 (Auth.)	60-61 (Auth.)			
DIVISION OF PLANT INDUSTRY—Continued							
Program and Performance—Continued							
<p>The regulation of livestock remedies is a function which insures factual labeling through sampling and analysis of products. This work involves registration of approximately 650 products and the licensing of over 600 retailers.</p> <p>The registration of economic poisons, commercial fertilizers, agricultural minerals, and auxiliary plant chemicals is to prevent the sale of ineffective, unsuitable or dangerous products. Approximately 6,000 samples, drawn each year from materials offered for sale, are analyzed to check conformity of composition with accepted standards of labeling and chemical content.</p> <p>Agricultural pest control operators are licensed for the specific types of pest control for which they are qualified. During the 1958-59 fiscal year there were 1,387 licensed operators in this State. A further responsibility is the certification of over 700 aircraft pilots for pest control work.</p> <p>In the 1960-61 fiscal year 2 additional positions are necessary in the plant nematology laboratory to handle the increased workload of quarantine and pest detection samples of materials suspected of carrying serious nematode plant pests.</p> <p>In order to centralize and supervise the work of testing plants involved in plant disease free certification and registration programs and enforce provisions pertaining to labeling of seed as to plant diseases, a greenhouse near Sacramento is planned for completion during the 1959-60 fiscal year, to be used in lieu of various rented facilities at several locations in different areas of the State. This facility will require 1 new position, as previously the work has been handled by contracts in connection with rent of greenhouses. The cost of the position and greenhouse, on an amortized basis, will be offset by a reduction in general expenses in the Bureaus of Rodent and Weed Control, Nursery Service, and Plant Pathology.</p> <p>There has been a buildup of the coyote population with increased damage to the sheep industry. The rapid increase of human population in the State has resulted in the curtailment in use of lethal agents for predatory animal control in many areas, and requires the more frequent visitation of traps to remove pets accidentally caught. This reduces the territory an individual trapper can service and increases the number of man-hours that must be expended in the work. Accordingly, provision is made for 4 man-years of additional help in the budget year as required by the increased workload. Other expenditures are continued at the presently authorized level.</p>

## DEPARTMENT OF AGRICULTURE—Continued

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
		58-59 (Filled)	59-60 (Auth.)	60-61 (Auth.)			
1							
2							
3	Objectives						
4							
5	This division is responsible for the protection and improve-						
6	ment of sources of food of animal origin. Further responsi-						
7	bilities are the protection of the public from the sale of poor						
8	quality dairy products and the protection of cattle owners from						
9	theft or loss of animals.						
10							
11	Program and Performance						
12							
13	Prevention of diseases of livestock and poultry is accom-						
14	plished through the enforcement of state restrictions and quar-						
15	antines on livestock and poultry shipped into the State to						
16	prevent the introduction of disease. Control and eradication						
17	are accomplished by veterinarians operating out of 10 regional						
18	offices and by 6 diagnostic laboratories located throughout the						
19	State. Cooperative programs are conducted with the Federal						
20	Government and include the eradication of tuberculosis and						
21	brucellosis in cattle. Veterinarians conduct tests for these dis-						
22	eases, vaccinate calves for brucellosis, and appraise and identify						
23	reacting animals.						
24	A further responsibility is the administration of provisions						
25	of the Agricultural Code pertaining to standards of quality for						
26	dairy products, and the prevention of deception and fraud.						
27	Sanitary inspection of dairy products plants and dairy farms						
28	are conducted. A program of slaughterhouse sanitation is con-						
29	ducted by this division. It also supervises the preparation of						
30	meat products and provides for the prevention of deception and						
31	fraud in labeling. This division enforces the Foreign Cold Stor-						
32	age Meat Act which requires the licensing of importers and						
33	handlers of such meat and its inspection. Increased inspection						
34	costs in the current and budget years are charged to the im-						
35	porters. Imports are expected to increase from 68,000,000						
36	pounds in 1958, to 98,000,000 pounds in 1959.						
37	An inspection program is conducted for sanitation, con-						
38	struction of poultry slaughtering and processing plants, and						
39	the inspection of poultry and rabbits for disease or con-						
40	tamination.						
41							
42							
43	ADMINISTRATION						
44							
45	SALARIES AND WAGES

## DIVISION OF MARKETING

## Objectives

This division is responsible for insuring the propriety of all phases of the marketing of agricultural products.

## Program and Performance

Marketing orders and programs originate upon request of grower and handler groups, and are designed to control surpluses, establish acceptable standards of quality, size, condition, or pack, carry on promotional activities and urgently needed research, and to control or prevent unfair practices in the handling of farm products. This function assists farm groups in the preparation of an acceptable form of marketing order, conducts public hearings upon such proposed orders and programs, and supervises the administration of the programs after they become effective. Surveys are also made of marketing and distribution problems for various agricultural groups of the State to develop new and larger markets. This service reports current price and movement information covering agricultural commodities in intra-state, interstate and foreign markets. Information gathered in California is assembled and released over leased wire systems to other states and markets, and similar information gathered in federal offices pertaining to California crops is received on these leased wires and in turn disseminated to California points. This unit develops and releases, through the Federal Crop Reporting Board, forecasts of production of many of our major agricultural commodities, and prepares and publishes annual estimates of the acreage, production and value of practically all crops in the State. Survey projects are made to improve methodology in forecasting the production of certain important crops, principally by means of improving objective sampling procedures.

The enforcement efforts of this division include enforcement of the minimum standards of the Agricultural Code relating to fruits, nuts, vegetables, honey, eggs, poultry, meat, and poultry products, and are instrumental in maintaining and improving the quality of California products in California as well as in markets throughout the nation, and to protect consumers from fraud, mislabeling and deception. The service also includes the supervision of county weights and measures officials in the inspection and sealing of commercial weighing and measuring devices.

This division carries on surveys of marketing and distribution problems for various agricultural industries of the State to develop new and larger markets, and to expand the sales of California agricultural products. Under the market enforcement function, all persons who deal in farm products are licensed to insure strict adherence to the provisions of the law.

The Bureau of Dairy Service also fixes minimum wholesale and retail prices in each of the marketing areas of the State for fluid milk and cream. Approximately 98 percent of the fluid milk sold in California is subject to these established minimum prices. Milk distributors are licensed, and the sale of dairy products is regulated. A continuing program of promotion and sales stimulation of fluid milk and dairy products is carried on with the cooperation of the Dairy Industry Advisory Board.

During 1958, 2,674,073 tons of canning tomatoes were inspected for quality and maturity and certified for canning. The division also inspects and certifies fields of seed potatoes to provide potato growers in California and elsewhere with disease-free stocks of seed designed to produce more tons per acre of high quality potatoes.

The Federal-State Shipping Point Inspection Service inspected 151,176 carlot equivalents of approximately 58 different commodities during the 1957-58 season. This service is performed at the request of growers, shippers or other financially interested parties, and advice and assistance are given the growers and packers in connection with proper harvesting, handling, grading, size and packing operations. Certificates issued at shipping point are prima facie evidence of the quality of the product, and are used frequently in resolving claims involving shipments of perishable products. Fees are paid by the applicant. A regular permanent staff is maintained which is augmented from time to time by seasonal help.

The regulation, inspection and control of automotive fuels, antifreeze, and brake fluid products are also administered by this division. Advertising media, dispensing outlets, and labeling are watched carefully to insure compliance with the provisions of the Business and Professions Code. Samples of products to be sold are analyzed to insure that they do not contain injurious materials. Public weighmasters are also licensed by this division. Weighing devices are inspected, and the licensee is instructed in the proper service to be rendered as a public weighmaster.

For 1960-1961, 5.5 additional positions are requested for the Bureau of Agricultural Statistics. 1 of the positions is required to put into permanent operation the program of co-ordinating and improving county estimates begun last year on a preliminary basis. 2 positions are needed to provide personnel experienced in the technical phases of crop estimating who can check and review crop conditions in the field and be able to detect gross errors or unusual conditions not fully appreciated by individual producer crop reporters. Provision is also made for 2.5 clerical man-years to provide assistance to the 3 technical positions.

4	DIVISION OF MARKETING—Continued						
5	Program and Performance—Continued						
6	1 additional area supervisor and 1 additional staff enforcement officer are proposed in order to provide an efficient organization for the Bureau of Milk Control.				1959-1960 season which will be expanded further in the 1960-61 season in connection with the inspection of grapes for crushing at the wineries. Upon the recommendation of the Federal Pure Food and Drug Administration, wineries are being required to obtain inspection on grapes prior to crushing to insure that deliveries are reasonably free from decay. Arrangements have been made with the Bureau of Fruit and Vegetable Standardization to begin this work on a fee basis for the first time on a limited number of wineries during the fall of 1959. This service is being expanded for the 1960 crop to include a large proportion of the wineries in the State.		
7	1 additional permanent position is required to provide adequate auditing personnel to carry out legislation amending the Produce Dealers Act in the previous session which necessitates audits of the books of commission firms and produce dealers.						
8	This activity was started on a conservative basis to gain experience which now indicates the need of at least 1 additional auditor to maintain a reasonable level of performance.						
9	A new service is being inaugurated for the first time in the

1959-1960 season which will be expanded further in the 1960-61 season in connection with the inspection of grapes for crushing at the wineries. Upon the recommendation of the Federal Pure Food and Drug Administration, wineries are being required to obtain inspection on grapes prior to crushing to insure that deliveries are reasonably free from decay. Arrangements have been made with the Bureau of Fruit and Vegetable Standardization to begin this work on a fee basis for the first time on a limited number of wineries during the fall of 1959. This service is being expanded for the 1960 crop to include a large proportion of the wineries in the State.

## FEDERAL CO-OPERATIVE MARKETING RESEARCH

## Objectives

The matching funds marketing service work being carried on by the State Department of Agriculture, under the authority of the Agricultural Marketing Act of 1946, has these aims: to help marketing agencies at each level of distribution to put into use the best known marketing practices as they are brought to light by research under the act and by other agencies, both private and public; to provide more timely and better marketing information; and to increase the consumption of farm products.

## Program and Performance

For the operation of marketing service activities on the matched fund basis, allotments are made to states under co-operative agreements between the United States Department of Agriculture and the State Department of Agriculture, bureaus of markets, and similar state agencies. The states engaged in the program submit projects each year to the Agricultural Marketing Service for approval.

In California, advantage of the matched fund program is made available by the provisions of Section 1286 of the Agricultural Code and by cooperation with the Federal Government in marketing research under the provisions of Public Law 733 (79th Congress).

Currently, there are 4 separate projects effective in California, concerned with checks of bearing and nonbearing acreages of fruits and tree nut crops; and surveys of the acreages and production of minor crops. One survey covers improvement of marketing efficiency, overcoming obstacles to distribution and sales, achieving market stability, expanding markets and effecting improvements in quality, packaging, and methods of sales promotion. Another project is directed toward the development of maturity standards, studies of containers, and packaging methods. Studies concerned with the development of a methodology for certification that fruit and nut tree and vine nursery stocks are free of serious virus diseases are also carried on.

11				
12	The California Dairy Industry Advisory Board provides the	Department of Agriculture, who is designated as the administrative and enforcement officer for duties outlined in Division 4 Chapter 14, of the Agricultural Code. The use of dairy products throughout the State is encouraged by providing health education materials to schools and carrying on advertising and research programs. The cost of this program is defrayed entirely from fees paid by producers and handlers of dairy products. The 1960-61 expenditures and revenues are projected on the same basis as the current year.		
13	means for the dairy industry to develop, maintain, and expand			
14	markets for California dairy products.			
15	<b>Program and Performance</b>			
16				
17	The board, made up of 25 industry representatives, nominated			
18	by dairy producers, producer-handlers and handlers, and appointed by the Director of the Department of Agriculture for 3-			
19	year terms, acts in an advisory capacity to the Director of the

the chicken project which is located near Modesto and the turkey project which is located near Keyes. Specific tests, requested by the poultry industry, are conducted to provide a means whereby commercial poultrymen may judge the merits of available strains of chicks and poults. A representative sample, randomly collected, of each entrant's stock, is raised on the testing grounds and periodic reports are made to breeders, hatcherymen, poultrymen, and the general public. Measurements of the productivity and efficiency of each sample are biometrically compared with similar data of all entrants and the results recorded and distributed.

Expenditures are continued at the currently authorized levels.

## GENERAL ANALYSIS

## Objectives

The protection of society is the primary purpose of the Department of Corrections. Since 98 percent of the prisoners are eventually released, adequate protection not only includes segregation from society by imprisonment, but also preparation for release and adequate supervision while on parole. To be most effective, the correctional process must continue throughout both the institutional and parole periods. The aim is rehabilitation of the person in the shortest period possible and restoring him to a constructive life in the community.

## Program and Performance

The Department of Corrections, established in 1944, is presently composed of the Director of Corrections, the Adult Authority, the Board of Trustees of the Institution for Women, the Correctional Industries Commission, and the Board of Corrections. The director and members of all of the boards are appointed by the Governor.

The Director of Corrections is the chief administrative officer of the department. He is directly responsible for management of the state prisons and for the custody, care, treatment, training, discipline, and employment of the prisoners. He is likewise responsible for administration of the Adult Parole Division, which supervises adult male parolees.

The Adult Authority is responsible under California's indeterminate sentence law for determining the sentences of male prisoners and granting or revoking parole. Like responsibility for women prisoners is placed in the Board of Trustees, Institution for Women.

The Correctional Industries Commission recommends industrial and agricultural enterprises to eliminate prison idleness by providing work and training. Such enterprises may be started only when authorized by the commission after a public hearing.

The Board of Corrections is composed of the Director of Corrections, members of the Adult Authority, members of the Youth Authority, members of the Board of Trustees, Institution for Women, and 2 public members appointed by the Governor. It is responsible for the correlation of the State's correctional programs, the study of the entire subject of crime, inspection of jails and the provision of advisory services to cities and counties regarding jail and detention facilities.

During 1960-61, the department will be faced with caring for an estimated average population of 21,140 inmates, including 1,200 male Youth Authority wards over 18, and 932 women. This prison population will be confined in 7 institutional facilities for males, highway and forestry conservation camps.

and an institution for women. Capacity of these facilities and camps will be 18,584. Thus, at year end an excess of 2,556 inmates will be handled by overcrowding existing facilities. This is a reduction of 1,886 in the overcrowding on which the 1959-60 Governor's Budget was prepared.

During 1960-61, an average of 8,760 males and 755 females will be under parole supervision.

The increase in the prison and parole population is primarily a reflection of the increase in the civilian population of the State rather than an increase in the crime rate.

The institutions and camps under the control of the department comprise a diversified correctional system. This means facilities with a planned capacity to allow for varying degrees of custodial control of inmates, providing for special and general programs of training and treatment for different types of prisoner groups.

As maintaining persons under control in prison while treating them until evaluated safe for release is the goal for protection of the public, it is essential to know what the characteristics of these people are, how to control and treat them, and what facilities are required.

The prison population for 1960-61 will represent the most serious behavior problems among the State's felons, since only 25-30 percent of the persons convicted of felonies are committed to the department. The balance serve county jail terms or are granted probation. The prison population may be described in general in terms of the "average" inmate: A white male between 25-29 years old with a prior juvenile, jail or prison record, with about 10 years residence in California, with only a 7th-grade education but normal intelligence, lacking in work skills, and having a serious personality difficulty. In addition to the "average" inmate, groups requiring specialized custody and treatment are included such as the aged, the psychotic, the sex deviate, the tuberculous, the physically defective, the chronic behavior problems and condemned cases.

The program for handling 30,655 individuals daily either in prison or on parole during 1960-61 will include:

Diagnosis: Study of each prisoner upon receipt to recommend an individualized program for his control and treatment.

Classification: Designation of a degree of custodial control, educational assignment, medical care, psychological therapy, religious training, and avocational training for each inmate.

Care: All inmates must be fed and clothed. A basic food ration is maintained in all institutions under the general supervision of the departmental food administrator. Rations are modified to meet age, activeness and health needs of the inmates. Clothing is also controlled on a ration or formula basis.

## DEPARTMENT OF CORRECTIONS—Continued

## GENERAL ANALYSIS—Continued

## Program and Performance—Continued

in several institutions based on recorded usage and actual experience.

**Treatment:** Programs with staff to effect the treatment process. Treatment involves the integrated activities of a number of subsections. Together, and in co-operation with effective custodial control, the treatment programs make possible the operation of a productive correctional process during the time the inmate is confined and prepared for release. The major activities are as follows:

**Academic and Vocational Education:** About 11,000 inmates are in educational programs during the year. Academic education provides elementary and high school courses, both by contracting with the local school district and by institution staff. Vocational training, conducted by the institution staff, is available in approximately 30 trades. Educational services include library programs used extensively by inmates.

**Medical Care:** Hospital facilities exist at all institutions. Virtually any medical or surgical problem can be handled within the department. Complicated surgical procedures are generally performed at San Quentin due to the availability of specialists.

**Psychiatric Treatment:** Specialized psychiatric service is provided principally at the California Medical Facility. Psychiatric positions are also authorized at the other institutions and the parole Out-patient Clinic. Psychiatric treatment includes ward management of psychotics and other highly disturbed persons. Extensive programs for individual and group psychotherapy for more than 2,000 inmates are also provided under psychiatric direction.

**Counseling Services:** Professional staff of correctional counselors at each institution deal with social and personal problems of inmates and families and prepare progress reports for the Adult Authority. 3 specialized units of correctional counselors are engaged in pilot programs of intensive counseling with small caseloads. Around 9,500 inmates currently participate in weekly group counseling sessions conducted by custodial, educational and maintenance staff employees who receive in-service training in counseling.

**Religion:** The religious program includes full-time Catholic and Protestant chaplains at each institution together with part-time services for the other faiths. In addition to conventional religious activities, chaplains participate in case counseling and in total classification and treatment activities of the institution.

**Recreation:** Programs of physical and interest-type recreational activities are maintained at each facility under the leadership of persons trained in recreation. Balance is maintained between spectator and participation programs. Such programs boost morale, encourage constructive use of off-duty time, and teach sportsmanship and teamwork.

**Employment:** The constructive employment of as many inmates as possible is one of the keys to the total treatment program. Prisoners work in factories, maintenance and culinary sections, offices, farms and camps, providing diversified work experience. Constructive use of inmate assignments has economic benefit to the institutions and carryover value for work placement after release. Idleness, on the other hand, results in low morale, and mental and physical degeneration. Conservation Centers and camps operated by the department provide added opportunity for outdoor projects of a type which are also beneficial to the development of California's natural resources.

## MAJOR PROGRAM AUGMENTATION AND COSTS

The following summary by program accounts for the greater part of the proposed increase of \$4,035,907 (11.1%) over the 1959-60 expenditures. These increases provide for the necessary

**Release Procedures:** Each of the nearly 6,000 inmates to be released during 1960-61 will participate in preparole instruction classes to prepare for adjustment after prison. In addition, each releasee will be interviewed regarding release plans and a report prepared to assist with employment and living placements.

**Parole Procedure:** Of the total number released from the institutions, about 80 percent will be released under parole supervision. The institutional treatment process, which is directed toward successful adjustment on release is continued in the parole program. In addition, the jurisdiction of the Director of the Department of Corrections is maintained while the parolee is serving the remainder of his term as a productive member of society.

**Narcotic Treatment-control:** This is the second year of a 5-year experimental program, begun in 1959-60, to study the detection, diagnosis, custody, and clinical treatment of addicts and suspected addicts, in order to develop better methods of rehabilitation of such persons.

## Expanded Program and Additional Facilities

California is a state with vast areas of heavily forested and wooded sections. The Department of Corrections has co-operated with the Department of Natural Resources to benefit the people of the State in conserving this natural resource. The Department of Natural Resources has indicated a continuing great unmet need for manpower to carry out the necessary work program consisting of forest fire prevention and control, forest and watershed management, recreation, fish and game management, soil conservation and forest and watershed revegetation. To meet this need and further benefit the people of California in conservation of her vast natural resources, as well as providing a healthful and gainful program for men about to be released on parole, this budget includes a major expansion of the conservation inmate work program. 4 additional 80-man camps will be activated during 1960-61. There will also be 3 new 40-man mobile camps which will be used to provide conservation work in remote and otherwise inaccessible areas. The work program of the mobile camps will consist of conservation projects in areas which do not require the man-hours commensurate with a complete conservation camp. The mobile camps may also be used in meeting emergencies occasioned by natural disasters. With these additional 440 inmates in camps, the department will have an average population of 1,700 in year-round camps plus 115 in summer United States Forest Service camps.

Provision is made in the Capital Outlay section of this budget for a conservation center in Lassen County with branch centers in Tuolumne County and Mono-Inyo Counties. These 3 conservation facilities provide capacity for 1,520 inmates, primarily for conservation activities, and are scheduled for activation in the 1961-62 fiscal year.

The Men's Colony—East Facility at Los Padres is scheduled for completion in April 1961, and will provide capacity for 2,400 inmates when completed. The new Reception-Guidance Center at the Deuel Vocational Institution will be completed in September 1960 with a capacity of 300 inmates and will process 1,773 inmates during the fiscal year. Completion of a sixth cottage at the Institution for Women will provide housing for 120 additional female inmates.

## Additional personnel for staffing new facilities:

a. East Facility, Men's Colony (164)	\$166,802
b. Reception-guidance Center, Deuel Vocational Institution (51.8)	235,357
c. Sixth cottage, Institution for Women (8)	21,208
d. Activation of new conservation camps:	
Institution for Men, Chino (6.2)	27,500
State Prison at Folsom (6.2)	17,485
State Prison at San Quentin (6.2)	19,972
e. Vocational shops, Correctional Training Facility (1.1)	5,089
f. Adjustment center, State Prison at San Quentin (3)	13,878

\$507,291

## DEPARTMENT OF CORRECTIONS—Continued

## MAJOR PROGRAM AUGMENTATION AND COSTS—Continued

## Additional personnel for institutional workload changes:

a. Increased intake of inmates (4)	\$18,402
b. Population growth (73.9)	410,149
	\$428,551
Additional personnel for improved clinical processing in reception-guidance centers (5)	33,096
Additional personnel for the Adjustment Center, State Prison at Folsom, to improve the counseling and guidance of emotionally disturbed inmates requiring isolation and segregation housing under close custody (7.2)	46,260
Additional personnel for supervision of condemned inmate, Institution for Women (1.6)	5,808
Additional personnel to comply with local ordinance on trash disposal, Institution for Women (1)	4,626
Additional personnel for improved case treatment services for conservation camps (8)	50,880
Additional personnel for planning and administration of conservation program (6)	26,204
Additional personnel for correction of existing staffing deficiencies (23.9)	124,401
Additional personnel for increased numbers of parolees (40)	178,517
Additional personnel for increased workload in Departmental Administration (16.5)	87,819
Net increased cost in authorized positions due to full year costs of positions authorized during the current year, improved employment conditions, and salary changes	365,825
Increase in operating expenses and equipment:	
a. Increases primarily in feeding, clothing, education, and utilities, for price and population changes, and new facilities	\$1,002,459
b. Increase in equipment	143,101
c. Decrease in reimbursements (primarily due to change in rate for services to Division of Forestry)	768,496
	1,914,056
Increase in inmate pay—work projects for population growth and increased camp operations	84,134
Increase in costs of returning fugitives from justice from outside the State	25,000
Increase in costs of transportation of prisoners and parole violators	10,100
Increase in costs of court costs and county charges	10,000
Increase in contributions to State Employees' Retirement Fund	133,339
Total	\$4,035,907

## SUMMARY OF PROPOSED NEW POSITIONS

The following 433.4 new positions totaling \$1,493,453 for the prisons and other correctional facilities and organizations represent standard classes used in all correctional facilities and are, therefore, discussed by program or function.

## Custodial and Personal Care Personnel

## Institution Staffing:

1	Correctional captain	\$7,356
4	Correctional lieutenants	21,463
5	Correctional sergeants	23,326
1	Correctional counselor II	6,360
1	Correctional counselor I	5,772
2	Medical technical assistants	9,252
1	Senior stenographer-clerk	4,484
1	Intermediate typist-clerk (mail)	1,770
1.6	Watchman	5,808
12	Women's correctional supervisors I	39,712
62	Correctional officers	259,939
91.6	Total	\$385,242

Of the 47 positions proposed for Deuel Vocational Institution, 38.6, including 1 captain, 4 lieutenants, 4 sergeants and 29.6 officers, are required for the operations of the 300 capacity reception-guidance center which is scheduled to receive inmates in October 1960. These 38.6 positions, including required relief, are proposed on the generally accepted staffing standards for the maximum custodial management in the other reception-guidance centers. In addition, 2.5 officers are required for the custodial coverage in the second floor of K wing to handle the population to be housed in this area after the reception-guidance center operations move to the new facility; 1 officer is required for the second watch in the isolation wing to bring this coverage to 2 officers for this activity shift which is the standard generally authorized for these maximum security areas; 1 officer is proposed to provide custodial coverage for inmate movement and shakedown of approximately 635 inmates assigned to the academic education and vocational shop areas. This latter position is required partially for increased workload and partially to correct staffing deficiencies; 0.7 officer is included to correct staffing deficiencies by providing vacation, sick

leave and holiday relief for various storekeeper, laundry and plant maintenance positions; and 2.2 officers are for the additional required relief; 1 clerk is included for the mail office as a result of increased workload due to the increased number of inmates.

15.6 positions are proposed for the Institution for Women including 1 counselor to handle an intensive caseload of emotionally disturbed and mentally ill inmates and 1 counselor to handle the specialized counseling for the increased workload of child and family problems of inmates. 5 correctional supervisors are included to provide the standard custodial coverage for the new 120 capacity sixth cottage which is scheduled to house inmates in January 1961; 1 position is included for central yard custodial coverage from 8 a.m. to 5 p.m. to handle the increased workload of inmate movement due to increased population of 190 over the programmed amount; 1 position is included for central yard patrol duty from 10 p.m. to 6 a.m. because of increased workload in custodial management due to the increased population; 1 position is proposed to provide a work program for 20 inmates through supervision of a rear outside grounds crew; 4 positions are for the required relief; 1 watchman position is included on a temporary basis to handle the custodial management activities in connection with a condemned inmate during the main activity watch and 0.6 watchman position is for the required relief.

10 positions are proposed for San Quentin including, 7 officers for work crew supervision to provide some program and custodial management for the increase over the programmed population. These 7 positions are budgeted on a ratio of 1 to each 50 inmates over 3,900 housed in the institution. 1 officer is included for custodial coverage on the third floor of the adjustment center during the second watch and 1 officer is for the exercise yard coverage on the second watch. These 2 positions are based on approved staffing for this maximum security type facility which is scheduled to begin operations in July, 1960; 1 officer is for the required relief.

10 positions are included for the Correctional Training Facility at Soledad. 5 officers are required to correct present staff deficiencies in custodial coverage including 1 officer for the main kitchen in the Central Facility on the third watch to reduce the number of incidents and improve the custodial supervision over approximately 80 inmates in the food preparation, food serving and cleanup activities; 1 officer is proposed for

## DEPARTMENT OF CORRECTIONS—Continued

## SUMMARY OF PROPOSED NEW POSITIONS—Continued

## Custodial and Personal Care Personnel—Continued

the first watch corridor coverage in the Central Facility to permit the carrying out of the usual custodial procedures in controlling the movement of custodial personnel between housing wings; 1 officer is included to provide custodial coverage at the hospital entrance from 2 p.m. to 6 p.m. and in the education wing of the Central Facility from 6 p.m. to 10 p.m.; and is partially offset by a reduction in overtime allowances (0.4) for the education wing; and 1 officer is to handle the custodial coverage in the gymnasium of the Central Facility from 1 p.m. to 6 p.m. all year and in the yard from 6 p.m. to 9.30 p.m. during the summer months while during the winter months this 6 p.m. to 9.30 p.m. coverage would be shifted to the gymnasium; 1 officer is proposed to supervise an outgrounds work crew which will provide a work program for 45 inmates; 1 officer is included to handle the increased workload in connection with the custodial coverage of about 240 inmates assigned to the 12 North Facility vocational shops; 0.5 sergeant is proposed for weekend and holiday coverage for the recreation program in the yard at the barracks area; 1 officer is to correct a shortage of relief in the authorized post assignment; and 0.5 sergeant and 2 officer positions are for the additional required relief.

2 positions are proposed for the Institution for Men at Chino and 1 at Tehachapi. 1 officer at Chino is included for search and escort duties at the reception-guidance center to provide more custodial management required due to overcrowded conditions. This position is proposed on a temporary basis until the new reception-guidance center facilities are activated. 1 stenographic position is to handle the usual clerical duties and type the required confidential reports and other material for the associate warden—custody and the correctional captain at Chino; 1 officer position is included at Tehachapi for increased workload in the supervision of a work crew which will provide program for 20 inmates of the increased population.

3 officers are proposed at Folsom to supervise work crews which will provide some program to partially reduce the idleness factor of the institution population. These 3 positions are proposed on the ratio of 1 officer for each 50 inmates over 2,350 housed in the institution.

2 medical technical assistants are proposed at the Medical Facility at Vacaville, including 1 position for the second floor of Wing G during the second watch, partially to correct a staffing deficiency in this area and partially to handle the increasing number of custodial and treatment problems; 1 position is for the required relief.

1 officer is included for the mail office in the West Facility at Los Padres. This position is required to correct a staffing deficiency in handling the workload on the basis of 1 officer to 340 inmates.

## Conservation Camp Personnel and Camp Supervision

1	Correctional lieutenant	\$6,060
8	Correctional counselor II	50,880
3	Correctional lieutenant	13,130
15	Correctional officer	49,305
0.6	Chaplain	2,522
27.6	Total	\$121,897

1 correctional counselor III is included for each of 8 conservation camps; 3 operated by the Institution for Men; 1 by the Correctional Training Facility; 2 by the State Prison at San Quentin; and 2 by the State Prison at Folsom. These counselors will provide individual counseling, family casework, visiting and welfare programs. A total of 6.2 positions are provided for each of 3 new conservation camps with 1 each operated by the Institution for Men, State Prison at Folsom, and State Prison at San Quentin. A correctional lieutenant is included at State Prison at Folsom to assist the correctional captain in maintaining a continuing level of supervision over the expanding conservation camp program.

## Men's Colony—East Facility

164 Positions ----- \$166,800

164 positions are proposed for staffing the new East Facility Men's Colony. These positions are budgeted on the basis of approved staffing formulas, comparability to staffing authorized for similar functions at other prisons, and if not based on either of these, minimum requirements due to considerations of physical plant, and type of inmates.

The new institution is so planned as to provide 4 segregated areas for 600 men each. Housing, feeding, outdoor and indoor recreation, elementary education, and group counseling facilities are provided within each unit.

The staffing of the new institution utilizes the treatment team concept adopted for the 600-man units of the North Facility at Soledad. A Unit Manager will be in charge of each of the 4 600-man units, and will supervise both treatment and custodial personnel assigned to the unit.

Success of the treatment program within the 4 segregated units will depend to a considerable extent on the proper coordination with the overall operation of the institution. Inmates from the units will participate in training, treatment, recreation, religion, industrial and other work assignments outside of their units. Much of the value of a single administration of treatment and custody within the unit may be lost if there is lack of unity in this regard at a higher level of administration.

This problem will be met by providing a Deputy Superintendent who will make use of the specialized training and knowledge of an Associate Superintendent and the staff members reporting to him in the operations within the 4 units. The Associate Superintendent will have charge of most of the custodial and treatment functions in the overall operations of the institution.

The effective dates of the new positions are based on the scheduled completion of the East Facility in April 1961, the receiving of inmates in July 1961, and the build up to capacity in 1962.

Generally, the positions will be phased to permit 1 month for recruitment, orientation, and training prior to the arrival of the inmates.

## Administrative Office Personnel

1 Deputy institution superintendent (effective January 1, 1961) ----- \$5,700

This position is included to direct the activities of the Men's Colony—West Facility as the superintendent will be devoting the major portion of his time in preparation to activation of the new East Facility in July 1961. This person will assume responsibility for continuing the program of training, treatment and custody of the 1,350 inmates in the West Facility.

1 Deputy institution superintendent (effective March 1, 1961) ----- 3,800

This position is included on a workload basis to plan, organize and direct the activities of the Conservation Center—Lassen County and branches. The organization of the conservation program is to have the superintendent administratively responsible for the center and branches with 1 administrative position directly responsible for each facility. Prior to opening the center and branches, this position will assist the superintendent in formulating detailed operating procedures for the center and the branches. The center and the branches are scheduled for opening in January 1962.

1 Administrative assistant I (effective January 1, 1961) ----- 3,100

## DEPARTMENT OF CORRECTIONS—Continued

## SUMMARY OF PROPOSED NEW POSITIONS—Continued

## Administrative Office Personnel—Continued

This position is proposed on a workload basis to assist the superintendent of the conservation center and branches by attending to many of the details in planning the operations of conservation center, the branch centers and the new camps.

1 Intermediate typist-clerk ----- \$2,700

This position is included on a workload basis to handle the increased clerical workload in the office of the superintendent at Deuel Vocational Institution. The position is effective October 1, 1960, as the increased workload is principally due to the increased number of inmates in the new 300-capacity reception-guidance center.

4 Total ----- \$15,380

## Adjustment Center Personnel

1 Correctional counselor III ----- \$7,008

0.2 Staff psychiatrist ----- 2,400

1 Clinical psychologist II ----- 7,008

4 Correctional counselor II ----- 25,440

1 Senior typist-clerk ----- 4,404

7.2 Total ----- \$46,260

The 7.2 proposed new positions, together with the presently authorized occupational therapist, will constitute the treatment team for the 118-man Folsom Adjustment Center. The adjustment center population is composed of the most seriously disturbed inmates in the department. These inmates are not committable to Mental Hygiene as psychotic patients, but constitute serious institution management problems. Individual and group psychotherapy will be applied to allow these inmates to gain better insight into their problems, to relieve their strong, usually hostile, feelings toward authority and thereby grow in self-control. Upon release from the adjustment center, each inmate will receive a once-a-week group session, and a brief individual interview. This unit is intended as a test unit and in co-operation with the Research Division, the hypothesis of this program will be evaluated.

## Medical Care Personnel

1 Physician and surgeon II ----- \$9,500

2 Dentist II ----- 18,100

2 Medical technical assistant ----- 7,672

These positions are included to meet the increased workload in relation to the increased population at Deuel Vocational Institution. The physician and surgeon II is required to meet the medical needs of an additional 270 average daily inmate population and to eliminate the overtime now required of the existing medical staff. Two dentists are included on the basis of increased inmates processed through the Reception-Guidance Center at the existing level of service of 3.1 hours per inmate. Two medical technical assistants are required to operate the daily clinic line at the new guidance center.

1 Dentist II ----- 10,860

This position is required because of increased inmate population at the Correctional Training Facility. The 1959-60 fiscal year is the inmate build-up period for the new 1200-man North Facility, and the full population will be realized during 1960-61. This will continue the existing level of service of approximately 1 dentist per 950 inmates.

1 Clinical laboratory technologist ----- 5,232

This position is provided at the Correctional Training Facility hospital to perform necessary laboratory tests. This will eliminate the health hazard resulting from use of inmate technicians and eliminate the waste of professional time in diversion of physicians to supervise and perform tasks which can be accomplished by this position.

1 Physician and surgeon ----- 11,400

2 Dentist II ----- 21,720

1 Pharmacist ----- 6,672

These positions are included for the Institution for Men for increased workload in relation to increased population or to correct existing deficiencies. The physician and surgeon will pick up workload which has previously not been done or has been accomplished by the use of nurses or technicians. The dentists are provided for the Reception-Guidance Center to continue the existing level of service of 3.1 hours per inmate. The pharmacist is provided to replace inmates in the pharmacy to eliminate this health hazard.

1 Physician and surgeon II ----- \$12,000

1 Pharmacist ----- 6,672

1 Graduate nurse ----- 4,626

These positions are proposed for the Institution for Women. 1 physician and surgeon is included to handle the increased workload for the increased population. With the activation of the sixth cottage the population will increase by 190 inmates or about 25 percent over the programmed amount for 1959-60. 1 pharmacist is included to handle drugs and narcotics and some storekeeping duties. This position is partially based on the need to correct existing staff deficiencies by freeing the physician and surgeon position from handling drugs.

1 graduate nurse is included for the first shift in the 20-bed contagious disease wing of the hospital. The staff for this wing was originally authorized by the Legislature on a comparable basis with tuberculosis sanatoria. Based on experience the classification of the patients has been changed from tuberculosis to contagious disease so that the staffing for the usual hospital patient is required.

1 Intermediate stenographer-clerk ----- 3,810

This position is included for the medical stenographer pool at the Medical Facility. The increased workload has accrued over several years and results from increased professional staff, additions to the facility, accreditation of the facility and increased inmate movement.

15 Total ----- \$118,264

## Education Personnel

1 Arts and crafts teacher ----- \$6,060

2 High school teacher ----- 12,120

2 Elementary teacher ----- 12,120

These positions will provide additional program for the increased population at Deuel Vocational Institution. The academic positions will provide programs for 60 inmates and will be financed from the funds allocated to the department for academic education and will be shown as a deduction from the overall funds to be allocated to the institution for contractual education purposes. The arts and crafts teachers will provide a program for 20 inmates.

1 Instructor in janitorial services ----- 6,060

2 Instructor in cosmetology ----- 12,120

1 Instructor in commercial power sewing ----- 6,060

4 additional vocational instructors are included for program for the increased population at the Institution for Women. The instructor in janitorial services will provide a program for 20 inmates who have limited capabilities and would otherwise be without a definite objective or trade when eligible for parole or discharge. 2 vocational instructors in cosmetology are included to provide vocational training in cosmetology at the level prescribed by the State Board of Cosmetology. The instructor in commercial power sewing will provide a program for 21 inmates, will benefit the Correctional Industries program, and provide a definite objective or trade for the inmate when eligible for parole or discharge.

0.6 Correctional sergeant ----- 3,140

This position will permit opening of the Folsom State Prison library on weekends in addition to the existing weekday covering. This will permit greater utilization of the library, reduction of long waiting lines, and provide an economical program on Saturday and Sunday.

## DEPARTMENT OF CORRECTIONS—Continued

## SUMMARY OF PROPOSED NEW POSITIONS—Continued

## Education Personnel—Continued

1 Instructor in sewing machine repair-----	\$3,975
This position is included on a workload basis in connection with increased population at the Tehachapi branch of the Institution for Men. This position will provide a program for 20 inmates in the technical procedures in the repair of commercial sewing machines and will provide a skilled trade for inmates upon discharge or parole.	
10.6 Total -----	\$61,655

## Reception-Guidance Personnel

1 Associate Prison Warden -----	\$9,031
1 Instructor in recreation and physical education -----	5,050
1 Instructor in general shop -----	5,050
2 Correctional counselor I -----	10,582
3 Vocational psychologist -----	19,856
2 Intermediate typist-clerk -----	6,790
3 Chaplain -----	19,080
13 Total -----	\$75,439

1 Correctional counselor and one typist-clerk are included for Deuel Vocational Institution and 1 each for the Medical Facility, to handle the estimated increased intake of prisoners. 3 chaplains are included, 1 for each Reception-Guidance Center (Medical Facility, Deuel Vocational Institution and Institution for Men) to increase the clinical evaluation of each new inmate and help inmates take important steps toward the development of more mature religious interests. 1 vocational psychologist is included for each Reception-Guidance Center to provide technical training and consultations to clinicians so that there will be an effective evaluation of a majority of inmates. The psychologist at Deuel Vocational Institution is in lieu of a correctional counselor justified under standards established for increased intake of prisoners. 1 associate prison warden and 2 instructor positions are included as standard staffing for the new Reception-Guidance Center Facility at Deuel Vocational Institution.

## Classification and Parole Personnel

2 Correctional counselor I -----	\$11,544
15 Intermediate typist-clerk -----	54,820
17 Total -----	\$66,364

2 clerical positions are provided at the Correctional Training Facility, 1 clerical position at Deuel Vocational Institution, 2 clerical positions at Chino, 1 clerical position at Men's Colony—West Facility and 1 professional and 5 clerical positions at San Quentin based on the established formula standards to handle the increase in population and inmate movement.

1 professional and 4 clerical positions are included at Institution for Women on the same basis as they are provided at the other institutions in the Department of Corrections. Classification and parole positions have not previously been provided on the formula basis at Institution for Women.

## Group Counseling Personnel

2 Correctional counselor II -----	\$12,720
1 position is proposed for the Deuel Vocational Institution partially for the increased workload related on the additional group on the approved formula basis and partially to improve the counseling by reducing the number of inmates to 12 per group. This lower number of inmates is based on the experience that these young, volatile inmates are more tense and reticent in groups larger than 12 and fail to participate in the counseling and therefore do not receive the benefits of the program. 1 position is included at the Correctional Training Facility to handle the increased workload due	

to the expanded number of groups in accordance with the approved formula.

## Correctional Casework Trainee Personnel

1 Correctional counselor II -----	\$6,360
Correctional counselor—reclassification -----	16,752
1 Total -----	\$23,112

\$16,752 for Correctional Counselor reclassifications is included to provide funds to convert Correctional Counselors I positions into Casework Trainee positions on the basis of 1 regular position to 2 training positions. This will provide a method of recruiting and training new Correctional Counselors to meet a rapidly expanding workload situation. The Correctional Counselor II included is required to provide proper supervision of the training program.

## Business Services Personnel

1 Prison business manager -----	\$10,602
1 Senior stenographer-clerk -----	4,626

These 2 positions are proposed for the Conservation Center and Branches on an increased workload basis to provide initial staff to work with the superintendent and secretary in the development of the plans and programs for these new facilities.

1 Procurement and services officer (effective March 1, 1961) -----	2,336
1 Accounting technician II (effective March 1, 1961) -----	1,660

These 2 positions are proposed on a workload basis for the Conservation Center and branches and will be involved in the ordering, procuring, assembling and accounting for the equipment supplies and personnel for the 3 facilities. It is planned to activate these facilities to receive inmates in January 1962.

1 Storekeeper II -----	5,232
------------------------	-------

This position is proposed at the Correctional Training Facility to correct a deficiency in the initial staffing for the housekeeping supply duties in the central facility. While this position is the usual staffing for this purpose, institution management attempted to operate without it. This has not proved satisfactory and the situation has been met by using a correctional officer which has resulted in the accumulation of considerable overtime.

1 Property clerk II -----	5,232
---------------------------	-------

This position is proposed at Tehachapi Branch of the Institution for Men to correct a staffing deficiency in business services. It is budgeted on a 2-year basis to establish the property records and procedure and to complete an inventory. After the records are established, it is planned to assign the property accounting to a storekeeper who could maintain an established operation with inmate help.

1 Senior stenographer-clerk -----	4,400
-----------------------------------	-------

This position is included at Tehachapi Branch, Institution for Men, partially on the basis of the increased workload due to the increased population and partially to correct existing deficiencies in staffing. This position will provide clerical services to the business manager to correct problems resulting from the use of inmates and the accumulation of overtime.

1 Accounting technician -----	4,400
-------------------------------	-------

This position is included for the State Prison at Folsom on an increased workload basis resulting from the expansion of the camp program and will provide staffing comparable to other institutions with similar size camp programs.

1 Accounting technician (effective November 15, 1960) -----	2,720
---	-------

This position is added at Tehachapi Branch, Institution for Men, on an increased workload basis due to the expanding population with the opening of a new housing unit.

1 Intermediate clerk (effective January 1, 1961) --	1,770
---	-------

This position is included at Deuel Vocational Institution for the trust office duties required to

# DEPARTMENT OF CORRECTIONS—Continued

## SUMMARY OF PROPOSED NEW POSITIONS—Continued

### Business Services Personnel—Continued

meet increased workload due to population increases with the activation of the new 300 capacity reception-guidance center. This proposal is based on comparable staffing with other institutions.

1 Intermediate account clerk----- \$3,630

This position is included at the Institution for Women on an increased workload basis in the accounting office. The increase in workload is partially based on the additional trust account duties and other general accounting work related to an increased daily average inmate population of 399 over the 533 actually experienced during the 1955-56 fiscal year when the last position was authorized.

11 Total ----- \$46,617

### Culinary Personnel

2 Supervising cook I ----- \$7,672

These 2 positions are requested to handle the additional workload of preparation and serving food at the Deuel Vocational Institution Reception-Guidance Center. The requested positions are to assist in preparation of meals in the kitchen, and then proceed to the Reception-Guidance Center to supervise the serving.

### Plant Operation Personnel

1 Stationary fireman ----- \$4,810  
1 Electrician foreman ----- 5,300

These 2 positions are included for the Deuel Vocational Institution on a workload basis in connection with the maintenance program required for the increased physical plant. With the activation of the Reception-Guidance Center, the institution will have a 35 percent increase in floor space.

1 Stationary engineer ----- 5,772

This position is included for the Institution for Women on the basis of additional workload resulting from increased square footage in the maintenance area and additional maintenance services which will be required upon activation of the Sixth Cottage.

1 Correctional officer—truck driver ----- 4,626

The need for this position is based on increased workload in relation to changing the method of the disposal of trash and garbage at the Institution for Women. The change from burning to cut and fill is to conform to the regulations of the San Bernardino Air Pollution Control District. The trash and garbage will be hauled to the Institution for Men for disposal.

1 Locksmith ----- 5,772

This position is included to maintain the various locks and locking devices in the North Facility, Correctional Training Facility. During the activation of the north facility, the lock maintenance was accomplished by the locksmith at the main facility pending determination of workload. The 2 facilities have been in operation for approximately 1 year and experience indicates that this position is required in order to maintain adequate custodial safeguards.

0.4 Correctional sergeant—institution fire fighter ----- 2,098

This position is included for increased workload relative to expanded coverage by the firefighting unit of the Institution for Men. Fire protection is provided to Youth Training School, Institution for Women, and the Institution for Men. With this extended coverage it is necessary to provide supervision to the inmate firefighting crews at all times. This will extend the supervision to weekends and holidays which is the only time the fire crews are not now supervised.

5.4 Total ----- \$28,378

### Adult Authority

4 Adult authority representative ----- \$45,600  
1.5 Intermediate stenographer-clerk ----- 5,715

5.5 Total ----- \$51,315

The 4 Adult Authority representatives are included to meet the increased workload of the Adult Authority and to establish a workload standard of 130 cases a month per board member and per representative. 1 clerical position is included to provide assistance to the 4 Adult Authority representatives. 0.5 stenographer is included to handle increased workload in the executive clemency unit of the Adult Authority.

### Parole Supervision

5 Parole agent III ----- \$29,200  
7 Parole agent II ----- 37,100  
17 Parole agent I ----- 67,340  
6 Intermediate stenographer-clerk ----- 12,920  
2 Women's parole agent I ----- 9,139

37 Total ----- \$155,699

Parole agent positions are included on the basis of increased number of parolees on the overall standard of 55 parolees per professional position. 6 clerical positions are included for the required clerical assistance. 29 agents and 6 stenographers are for the Division of Adult Paroles and 2 agents are for the board of trustees, Institution for Women.

### Administrative Division Positions

1 Fiscal officer ----- \$9,384  
1 Junior staff analyst ----- 5,232

2 Total ----- \$14,616

These positions are included because of the increased workload in the Management Services Division in connection with the overall growth of the department and increased number of institutional budgets. The fiscal officer will supervise and co-ordinate the preparation and management of the budget and accounting services. The junior staff analyst will assist the departmental accounting officer in the fiscal management, guidance, analysis and control of several operating units.

1 Supervising clerk I ----- 4,980

This position is included to correct a staffing deficiency which has been accentuated by overall growth of the department. The department accounting officer will be relieved of supervision of several central services which will permit greater application of time to fiscal management.

3 Intermediate stenographer-clerk ----- 11,430

These positions are added on an increased workload basis and will provide stenographic services for professional positions included in this budget.

2 Intermediate account clerk ----- 7,260

These positions are included based on an increased workload in connection with increased positions in the central office including the Adult Paroles Division. Increased parole population also contributes to the increased workload in the accounting office.

1 Supervisor of Special Treatment Services ----- 9,852

This position is included to improve supervisory services and planning by reducing the span of control of the division chief, thereby freeing him for closer attention to development of present program and planning services to meet future requirements.

1 Assistant supervisor of education ----- 7,728

This position will be provided to increase the supervision of the department-wide education program. The new position would provide staff direction to all institutional and contractual academic education programs, correspondence programs and the educational counseling and selection of students.

## DEPARTMENT OF CORRECTIONS—Continued

## SUMMARY OF PROPOSED NEW POSITIONS—Continued

## Administrative Division Positions—Continued

It would maintain the supervision standards required to attain effective academic education programs in accordance with established Department of Education standards and Department of Corrections policies.

1 Correctional counselor III (Effective January 1, 1961) -----

\$3,504

This position is added on an increased workload basis to assist the existing 4 positions in approving an increased number of inmate transfers between institutions and to carry out survey and special study assignments relative to inmate classification and departmental classification procedures, policies, and techniques.

1 Intermediate clerk -----

3,630

This position is included for the increased workload in the Records Office, based on an approved staffing formula.

1 Senior research technician -----

9,384

The Administrative Statistics function was transferred from the Department of Justice where it was supervised by the Chief of the Bureau of Criminal Statistics. In transferring the function to the Department of Corrections, supervision was assumed by the Chief of Research pending determination of workload. After 1 year of operation it has been determined that this position is required on a workload basis to handle the planning and supervision of the population accounting section. This position will work closely with the division of Administration, Adult Authority, and the Measurement and Program Development Sections of the Research Division in the overall department research program and administrative planning.

1 Assistant statistician -----

\$6,360

This position is provided on an increased workload basis in regard to special reports. Because of the size and complexity of the correctional program and the increased interest expressed in the program by the administration, Legislature and other official groups, the reports cannot be supplied with the existing staff without jeopardizing the existing statistical operation.

1 Intermediate typist-clerk -----

3,630

1.5 Intermediate clerk -----

5,445

These positions are included on a workload basis in the Administrative Statistics Section based on present processing loads and projected increases due to normal prison population growth and parole population loads.

1 Intermediate stenographer-clerk -----

3,810

This position is included on a workload basis to correct a deficiency in previous computation for the Division of Adult Paroles. In revising the Special Intensive Parole Unit, the number of stenographers to be utilized from the regular caseload was overstated.

1 Staff psychiatrist -----

12,000

1 Clinical psychologist -----

7,008

These positions are included to handle a workload increase at the Parole Outpatient Clinic in Los Angeles. Increasing the clinic staff will permit increased release of inmates from prison who would otherwise be denied parole and permits parolees to stay on parole who would otherwise be returned to prison.

19.5 Total ----- \$110,637

33.4 Totals, Proposed New Positions ----- \$1,493,453

## SUMMARY OF OTHER INCREASED EXPENDITURES

## Additional Cost—Authorized Positions

This increased expenditure is occasioned by full year cost of positions authorized during the current year, improved employment conditions and annual merit salary increases -----

\$365,825

## Operating Expenses

Increased average daily population of 1,320 (6.2%) and some increases in prices will require an increase in operating expenses of \$1,002,459 (7.8%). Another factor is that there will be some initial expenses for new facilities preparing to receive inmates. The major areas of increase are for food, clothing and education -----

\$1,002,459

## Equipment

Equipment expenditures reflect the replacement needs and additional equipment primarily due to new positions -----

\$143,101

## Inmate Pay—Work Projects and Reimbursements

Both of these items are increased due to the expanding conservation camp program and the change in the reimbursement rate for conservation camp services rendered to the Division of Forestry. Inmate pay for work projects increases \$84,134 while the loss in reimbursements from forestry is \$821,888 which is partially offset by some increases amounting to \$53,392 to bring the total reimbursement change to \$768,496 -----

\$852,630

## Returning Fugitives From Justice

This uncontrollable reimbursement is to counties for expenses incurred in returning fugitives from justice from outside the State provided that the fugitives so returned are arraigned or placed on trial pursuant to Section 1557, Penal Code -----

\$25,000

## Transportation of Prisoners and Parole Violators

This uncontrollable reimbursement is to counties for expenses incurred in conveying persons to and from state prisons including recalcitrant tuberculars, including costs incurred by the Department of Corrections in transporting prisoners to and between state prisons and the return of parole violators -----

\$10,100

## Court Costs and County Charges

This uncontrollable reimbursement is to counties, pursuant to the provisions of Section 4700, Penal Code, for expenses incurred in the trial of inmates for crimes committed in prisons and expenses due to a hearing on the return of a writ of habeas corpus prosecuted by or on behalf of any prisoner, including reimbursement for coroner's expenses incurred by the counties pursuant to Penal Code Section 4700.5 in connection with the death of a prison inmate -----

\$10,000

## Contributions to State Employees'

Retirement Fund -----

\$133,333

Total, Other Increased Expenditures ----- \$2,542,454

GRAND TOTAL—INCREASES ----- \$4,035,907

## Department of Corrections

## GENERAL ANALYSIS

## Objectives

The Department of Corrections has the responsibility for the confinement, supervision and rehabilitation of persons committed to it by the courts.

## Program and Performance

The director is responsible for the establishment of policies and management of programs to achieve the objectives of the department. The Board of Corrections and Adult Authority act in an advisory and co-ordinating capacity in policy formulation. The Board of Corrections is composed of the director, the members of the Adult Authority and of the Youth Authority, the members of the Board of Trustees of the California Institution for Women and 2 qualified persons appointed by the Governor with the advice and consent of the Senate for 4-year terms. The departmental administration is organized primarily to provide the required staff assistance to carry out the established policies and programs. This is accomplished through the activities of the executive and 5 major divisions, each headed by a chief. These divisions are: Correctional Program Services, Management Services, Research, Conservation, and Correctional Industries. In addition, the Adult Parole Division is also headquartered in Sacramento and provides line and staff direction to the parole service.

The Correctional Program Services Division includes staff responsibility for medical and psychiatric services, custodial activities, employee training, education and library services, inmate classification, casework and other professional disciplines, group counseling, records, recreation, and the chaplaincy services. Each of these is an important treatment activity or service at the institution level. During the past year, significant progress has been made in the selective reception, classification and assignment processing of an exceptionally high intake. Continued progress has been made on new concepts of programing exemplified by planning for the new Men's Colony—East Facility at Los Padres, for the Conservation Centers, and for the Conservation Camps. The new concepts involve a closer merging of custodial and treatment goals, and this is emphasized by adding functional responsibility for custodial services and the training activity to the Correctional Program Services Division in the Central Office. There has been emphasis on the special treatment and handling of unusually violent individuals in adjustment centers and in the general population in the institutions. There has been a co-operative effort with the Research Division

in developing measures of effectiveness in pilot treatment programs and in the vocational and educational programs.

The Management Services Division staff is responsible for general fiscal management including budget preparation and control, prison planning, personnel management, departmental construction and maintenance supervision, the feeding program, accounting, and equipment inspection and control. The administrative analyst function and staff were transferred to this division in 1959-60.

Major accomplishments in planning the Men's Colony-East Facility 2,400 bed expansion and in developing basic plans and site requirements for the California Conservation Center program have been realized in 1959-60.

The Research Division has two major functions: (1) providing an inmate population accounting system; (2) developing specific types of correctional programs for specific types of inmates.

The Conservation Division was established in accordance with provisions of Chapter 1583, Statutes of 1959 in the 1959-60 fiscal year to provide for the central co-ordination and standardization of the center and camp program. This program calls for the expanded utilization of inmates in conservation and further development of California's natural resources. This is accomplished co-operatively with other governmental agencies.

A total of 16.5 positions are proposed in the 1960-61 fiscal year. 1 fiscal officer and 1 junior staff analyst are included to handle increased budgeting and accounting workload; 1 supervising clerk I is proposed to correct staffing deficiencies in the supervision of some central services; 3 clerical positions are included for increased workload in stenographic services; 2 accounting clerical positions are included for increased workload in the accounting office.

1 supervisor of special treatment services is proposed to improve supervision and program planning in the Correctional Program Services Division; 1 assistant supervisor of education is proposed to correct staffing deficiencies in central staff services; 1 correctional counselor position is included for review of increased inmate transfers; 1 clerical position is included in the records office for increased workload due to population growth.

2 professional positions and 2.5 clerical positions are included for increased workload in the Research Division.

These positions are discussed in General Analysis, Departmental Summary. (See pages 67 and 68.)

<sup>a</sup> Includes all parolees supervised by the Adult Paroles Division in California and total costs of the Adult Paroles Division.

<sup>b</sup> Excludes the division chief position, the deputy chief, 2 positions in out-of-state unit, and the additional parole officers required above the 55:1 ratio for the special intensive parole units, and the narcotic parole unit.

## ADULT PAROLES DIVISION

## GENERAL ANALYSIS

## Objectives

The Adult Paroles Division supervises all adults released from state prisons to parole programs in California. In addition, it supervises, on a co-operative basis, adult felons released from prisons of other states to parole programs in California. The supervision of such persons provides for the continuation of the correctional treatment process which begins in the institution, and for the further protection of society.

## Program and Performance

The Adult Paroles Division maintains a headquarters office in Sacramento and 16 field offices throughout the State. For administrative purposes the State is divided into 2 parole regions with the Tehachapi Mountains being the approximate dividing line between the northern and southern regions.

Parole officers are budgeted on the basis of an overall ratio of 55 parolees per professional employee. All professional employees except the chief, Adult Paroles Division, the deputy chief, and the interstate unit are included in the computation of this ratio.

The division maintains a psychiatric outpatient clinic in Los Angeles to provide therapy to those parolees whose previous prison treatment history and program indicate a need for continuing such treatment on an outpatient basis. The Special

Intensive Parole Unit will continue to test the value and results of giving closer and more intensive supervision to parolees.

During the 1959-60 fiscal year there is an unanticipated increase in the average number of adult male parolees to 8,015 or about 765 over the 7,250 originally budgeted. To handle this increased workload 13 professional positions and 1 clerical position have been temporarily approved on the basis of the accepted standard and are included in the proposed new positions for the 1960-61 fiscal year. To finance the increased expenditures for this workload it is estimated that \$73,715 emergency financing will be required for the 1959-60 fiscal year.

During the 1960-61 fiscal year it is estimated that an average of 8,760 adult male parolees will be supervised in California. The number supervised at the end of the year is estimated at 9,250 or an increase of 950 over the revised estimate of 8,300 at the end of the 1959-60 fiscal year. A total of 38 additional positions are included for this increased workload of which 29 professional positions and 7 clerical are provided for regular parole supervision. 1 psychiatrist and 1 psychologist are proposed to handle the increased workload in the outpatient clinic due to the increased number of parolees requiring this type of treatment.

These positions are discussed in General Analysis, Departmental Summary. (See pages 67 and 68.)

## GENERAL ANALYSIS

## Objectives

The Medical Facility is the psychiatric diagnostic and treatment center of the department. It confines and treats adult male felons who are mentally ill or who have severe mental and emotional disorders. These include psychotics, psychopaths, sex offenders, and narcotics addicts. A small number of recalcitrant tuberculars are housed here also.

A reception-guidance center located in facilities adjoining the main institution receives adult male felons from the 47 northern counties for diagnosis, classification, and recommended institutional placement. It also receives male parole violators returned to prison.

## Program and Performance

The Medical Facility occupies permanent facilities in Solano County on a 900-acre site near Vacaville.

The reception-guidance center facilities were completed in the spring of 1957 and began receiving prisoners in July, 1957. This facility will process an estimated 3,940 cases during 1960-61.

Group psychotherapy is the major treatment method at the Medical Facility.

Programs of academic and vocational education, plant maintenance work and training, medical and dental care, library, recreation, and religion are offered to all inmates to the degree to which they can participate. These programs are designed to provide intensive treatment for felons afflicted with major mental illnesses (psychoses) and severe emotional and personality disorders, particularly the latter. A sizeable number of problem cases are also admitted expressly for psychiatric evaluation and recommendation with respect to disposition. Although the overwhelming majority are adult felons, there is a small number of wards from the Youth Authority and tuberculous recalcitrant misdemeanants from the Department of Public Health.

The prison population in 1960-61 may be described in general as follows:

Median age, 32 years; 41 percent prior prison commitments; 22 percent prior escape records; offense groupings will include 21 percent sex offenders, 17 percent burglary, 16 percent robbery, 12 percent forgery and checks, and 7 percent narcotics.

This prison population may also be described in terms of medical classification as follows:

350 psychotics, 120 homosexuals, 30 tuberculars, and 850 men with severe emotional and mental disorders.

Population and release of men from this institution are as follows:

Medical Facility:	1958-59	1959-60	1960-61
Average population-----	1,364	1,370	1,370
Paroled and discharged-----	503	485	510
Reception-Guidance Center:			
Average population-----	661	600	610
Intake for processing-----	3,679	3,825	3,940

A total of 7 proposed new positions are included in the 1960-61 fiscal year. Of this number 3 are for assignment to the Medical Facility proper. These include 2 medical technical assistants for the increased custodial and treatment problems in the hospital; and 1 clerical position for increased workload in the medical clerical pool of the medical care program.

The remaining 4 positions will be assigned to the reception-guidance center as follows: 1 vocational psychologist to provide the services of a specialist in the field of vocational counseling; 1 Protestant chaplain for improved clinical processing services; 1 professional position and 1 clerical position to handle increased clinical processing workload.

These positions are discussed in the General Analysis, Departmental Summary. (See pages 63 and 66.)

## GENERAL ANALYSIS

## Objectives

The Men's Colony protects the public by confining aged, infirm, and other handicapped male felons and by so treating and training them that they can be safely released, many of them to become self-sustaining members of their communities.

## Program and Performance

The Men's Colony—West Facility (California Medium Security Prison) was authorized by the Legislature in 1949. It was established in 1954 in temporary facilities on a 220-acre site in the hospital area of Camp San Luis Obispo. The post office address is Los Padres. The institution will house an average of 1,350 men in 1960-61.

The correctional program is designed primarily for the retraining, rehabilitation and return to civilian life of the elderly and infirm offender. This program includes a small vocational program, an academic program in conjunction with the San Luis Obispo School District, group counseling, organized recreation, alcoholics anonymous assistance, arts and crafts training, and religious guidance. The institution's 1960-61 population may be described in general by the following characteristics:

median age about 54 years, 62 percent with prior prison commitments, 7 percent serving life sentences; offense groupings will include about 22 percent sex offenses, 20 percent forgery and illegal checks, and more than 14 percent homicide. Some will be blind, paralyzed, senile, or lacking limbs.

Population and release of inmates from the Men's Colony are as follows:

	1958-59	1959-60	1960-61
Average population -----	1,271	1,340	1,350
Parole and discharges -----	609	550	575

A total of 3 additional new positions are included in the 1960-61 fiscal year. 1 deputy superintendent is proposed effective in January 1961 to direct the activities of this facility to relieve the superintendent for activities relating to the new 2400 capacity East Facility. This latter facility is scheduled to start receiving inmates in July 1961. 1 correctional officer is proposed to correct staffing deficiencies in the mail office, and 1 clerical position is included for increased workload in the classification and parole function. These positions are discussed in the General Analysis, Departmental Summary. (See pages 64 and 66.)

37	<b>GENERAL ANALYSIS</b>				
38	<b>Objectives</b>				
39	The Institution for Men has as its objective the protection				
40	of the public by confining for training and treatment the more				
41	tractable young male offenders with the majority under mini-				
42	mum custody.				
43	The Institution for Men is composed of the main institution				
44	and Reception-Guidance Center at Chino, a branch institution				
45	at Tehachapi, and an extensive conservation camp system.				
46					
47	<b>Program and Performance</b>				
48					
49	This institution was established in 1941 on a 2,500-acre				
50	tract south of Chino in San Bernardino County. Both tempo-				
51	rary and permanent facilities of the main institution will house				
52	an average 1,535 inmates during the 1960-61 fiscal year.				
53	The Reception-Guidance Center receives all new male com-				
54	mitments from the southern counties. It will operate at a load				
55	of 515 during the 1960-61 fiscal year, processing an estimated				
56	3,400 cases. It will receive a total of 5,029 individuals including				
57	3,650 Adult Authority inmates, 700 parole violators and 679				
58	Youth Authority wards.				
59	The Tehachapi branch was opened in 1955 after the earth-				
60	quake-damaged facilities were repaired. It will operate at a				
61	capacity population of 555 during the 1960-61 fiscal year.				
62	Correctional treatment at the main institution is designed				
63	primarily for carefully screened young male offenders capable				
64	of profiting by the program and accepting its responsibilities.				
65	It covers a broad field of vocational and academic instruction,				
66	plus a wide variety of industrial activities, including an exten-				
67	sive agricultural program. A large number of medium security				
68	men, however, are held at the Tehachapi branch, which was				
69	originally designed as a minimum custody facility. That this				
70	has been successfully accomplished is attributed in large part				
71	to the group counseling program which is particularly empha-				
72	sized at the Tehachapi branch.				
73	The main institution population, excluding camps, in 1960-61				
74	may be described in general by the following characteristics:				
75	median age 29 years; 28 percent prior commitment records;				
76	offense groupings will include about 27 percent forgery and				
77	illegal checks, 20 percent burglary, 20 percent robbery, and 11				
78	percent narcotics.				
79	The Tehachapi branch population in 1960-61 may be de-				
80	scribed in general by the following characteristics: median				
81	age 33 years; offense groupings will include about 20 percent				
82	burglary, 23 percent forgery and illegal checks, 16 percent rob-				
83	-----				
84	<sup>a</sup> Excludes cost of operating reception-guidance center, but include: cost of feeding, housing, medical, and other expenses of the i				
85	mates being processed therein.				

bery, and 20 percent narcotics; 53 percent have prior commitment records.

The institution at present also administers 7 year-round conservation camps in co-operation with the state conservation program, 6 with the State Division of Forestry, and 1 with the State Division of Highways. 1 additional conservation 80-man camp will be activated in September 1960, bringing the year-end camp population total to 610 for 1960-61. The major portion of the increased funds in 1960-61 is due to the impact of the change in rate of reimbursements from the Division of Forestry for conservation work performed by inmates. This change in rate was adopted by the Legislature during the 1958 Session.

Commencing in January 1960, the institution plans to provide services including hospital, laundry, bakery, trash and garbage disposal, as well as sewage disposal, to the new Youth Training School now under construction on the adjacent tract.

Population and release of men from this institution are as follows:

	1958-59	1959-60	1960-61

## GENERAL ANALYSIS

## Objectives

The State Prison at Folsom protects the public by confining chronic male adult offenders, 8 percent of whom require maximum or close custody supervision. The program is designed to protect the public through a treatment process to bring about an adjustment which will permit their safe release to the community. A camp program is provided as an integral part of the rehabilitation process. It is designed to provide useful employment in a minimum custody setting for carefully selected inmates who can be expected to profit from this type of a gradual release experience.

## Program and Performance

This institution was established in 1880 on a 1,700-acre site in Sacramento County. The institution is expected to confine an average of 2,470 inmates in 1959-60 and 2,510 inmates during 1960-61.

Correctional treatment designed to rehabilitate the inmate includes academic and vocational education, industrial work and training, plant maintenance work and training, group counseling, medical and dental care, religious, library, and recreational activities. Because of the overcrowding of the institution some idleness will exist during 1959-60 as well as during 1960-61.

A special unit, the 138 capacity adjustment center, provides control and treatment of many of the department's most severe behavior problem cases.

The institutional population in 1960-61 may be described in general by the following characteristics: Median age 38; 90 percent prior prison commitments; 34 percent prior escape records; 8 percent serving life terms; offense groupings will include over 24 percent robbery; over 6 percent homicide; over 21 percent burglary; over 13 percent narcotics; over 12 percent forgery and illegal checks.

In addition the prison is responsible for the administration of 3 year-round State Conservation Camps as well as 1 which

will be located for approximately 6 months in Calaveras Big Trees State Park and 6 months at Folsom Lake State Park. In addition the institution currently operates 1 camp for the United States Forest Service.

During 1960-61 it is planned to activate a mobile camp having a capacity of 40 in July 1960 and a new conservation camp with a capacity of 80 in April 1961. The addition will bring the year-end camp population to 536 in 1960-61.

These camps, manned by specially selected minimum custody inmates, serve the public through conservation of the State's natural resources by fire fighting and reforestation work. This also provides a valuable work and training experience for the inmates.

Population and release of men from this institution and its camps are as follows:

	1958-59	1959-60	1960-61
Average population, including camps--	3,141	2,831	2,983
Paroles and discharges-----	784	730	770

A total of 21 new positions is proposed in the 1960-61 fiscal year. 1 accounting technician is included for increased accounting duties relative to the increasing number of conservation camps; 3 correctional officers are proposed to handle institution work crews to partially reduce idleness of inmates. These correctional officers are proposed on the basis of 1 officer for each 50 inmates above a population of 2,350. This is a similar ratio to that authorized for San Quentin. 0.6 sergeant is included for weekend, vacation and holiday relief for the librarian; a treatment team of 7.2 positions is proposed on a pilot basis in the adjustment center.

1 correctional lieutenant is included for increased camp supervision duties; 6.2 positions are included as standard staffing of the new 80-man conservation camp; and 2 correctional counselor II positions are included for improved casework services in 2 of the conservation camps. (See pages 64 and 65.)

## GENERAL ANALYSIS

## Objectives

The State Prison at San Quentin protects the public by confining adult male felons under close-medium security and by so treating them as to permit their safe release to the community. A camp program is operated to provide useful work in a minimum custody setting for carefully selected inmates who are expected to benefit from this experience.

## Program and Performance

San Quentin was established in 1852 on a 400-acre site in Marin County. The institution is expected to confine an average of 4,655 in 1960-61. Correctional treatment designed to rehabilitate the inmate includes academic and vocational education, industrial work and training, group counseling, medical and dental care, and religious, library, and recreational activities. Because of overcrowding of the institution some idleness will exist during 1960-61.

A special unit at San Quentin provides custody of inmates sentenced to death and provides for execution of the death penalty.

The 101-capacity adjustment center, a special unit to provide control and treatment of the most severe behavior problem cases, is scheduled to be activated during July 1960.

The institution population for 1960-61 may be described in general by the following characteristics: median age 29.4; about 41.6 percent prior prison commitments, about 25 percent prior escape records, about 5.5 percent serving a life sentence; offense groupings will include 9.8 percent homicide, about 23.6 percent robbery, about 16.1 percent burglary, and about 17.9 percent narcotics.

San Quentin is responsible for the administration of 6 year-round road and conservation camps and 1 seasonal United States Forest Service Camp presently established. It is planned to activate 1 mobile camp with a capacity of 40 during July

1960, and 1 conservation camp with a capacity of 80 in December 1960 which will bring the year-end camp population to 596 in the 1960-61 fiscal year.

These camps, manned by specially selected minimum custody inmates, serve the public by aiding in the conservation of the State's natural resources through fire fighting and reforestation work. The highway road camp inmates perform highway maintenance and construction work in remote areas of Northern California. This provides valuable work and training experience for the inmates. The major portion of the increase in this budget is due to a decrease in the rate of reimbursements for conservation work on the basis of the provisions of Chapter 1428, Statutes of 1959.

Population and release of men from this institution and its camps are as follows:

	1958-59	1959-60	1960-61
Average population	5,030	4,485	5,203
Paroles and discharges	1,394	1,405	1,515

A total of 24.2 new positions are proposed for the 1960-61 fiscal year. 3 correctional officers are included for staffing of the new Adjustment Center which begins operations during 1960, and 7 correctional officers are included for work crew supervision to handle the increase over the programmed population. These latter positions are included at a ratio of 1 officer for each 50 inmates over a total of 3,900 housed in the institution. 1 professional position and 5 clerical positions are included for increased workload in the classification and parole population. 2 correctional counselors are included for treatment services in 2 state forestry camps; 6.2 positions are included for the staffing of the new 80-man conservation camp.

These positions are discussed in the General Analysis, Departmental Summary. (See pages 63, 64, and 66.)

## GENERAL ANALYSIS

## Objectives

The Correctional Training Facility protects the public by confining male prisoners under medium custody, and by so treating them as to permit their safe release to the community. A camp program is operated to provide useful work in a minimum custody setting for carefully selected inmates who are expected to benefit from this experience.

## Program and Performance

This institution was established as the State Prison at Soledad in 1945 and activated in 1946 at its present 907-acre site in temporary military type barracks which will remain in use in 1960-61. The first of the permanent facilities were completed in 1951 while the new North Facility was completed and activated in November 1958. The population was increased through the spring of 1959 and at June 30 the facility was fully occupied. The name of the institution was changed to the Correctional Training Facility by Chapter 936, Statutes of 1959. It is planned to operate the institution at full capacity with an average of 3,385 during the 1960-61 fiscal year.

Correctional treatment planned for inmate rehabilitation includes vocational and academic programs, industrial work, plant maintenance training, and one of the largest agricultural enterprises in the department. Group counseling, religious programs and recreational activities also play an important role. While the institution and program are designed for adult felons, vocational and academic education courses are emphasized in the North Facility area as 600 Youth Authority wards are housed there with 600 of the younger adult felons.

1 cell wing of the Central Facility is used as an adjustment center, housing inmates with severe behavior problems.

Institution population in 1960-61 may be described in general by the following characteristics:

## Adult felons:

Median age 27.4 years; 32 percent prior prison commitments; 22 percent prior escape records; offense groupings will include about 23 percent narcotics, 20 percent burglary, 21 percent robbery, and 14 percent forgery and illegal checks.

## Youth Authority Wards:

Median age over 20 years; 55 percent prior commitments; offense groupings will include 22.9 percent robbery, 28.3 percent burglary, 9.9 percent auto theft and 15.5 percent narcotics.

In addition the institution is responsible for the administration of an expanding conservation camp program. During the 1959-60 fiscal year 3 permanent and 1 temporary state conservation camp will operate with inmate populations totalling 294 men. During September 1960 a new permanent state conservation camp will open with a population of 80 men. On July 1, 1960, a mobile camp with 40 inmates will open for general conservation work. During the 1960-61 fiscal year 4 permanent state conservation camps will operate with 300 inmates, and the mobile camp with 40 inmates.

The camps, manned by specially selected and trained minimum custody inmates, serve the public in the conservation of the State's natural resources through fire fighting and reforestation work. This provides valuable work and excellent training experience for the inmates.

A portion of the increase in funds required in the 1960-61 fiscal year is due to the impact of the change in rate of reimbursements from the Division of Forestry as authorized by the Legislature during the 1959 session.

Population and release of inmates from this institution are as follows:

Average Population:	1958-59	1959-60	1960-61
Adult felons-----	2,268	3,036	3,120
Youth Authority wards-----	299	585	600
Totals-----	2,567	3,621	3,720
Paroles and Discharges:			
Adult felons-----	940	1,045	1,295
Youth Authority wards-----	375	525	561
Totals-----	1,315	1,570	1,856

A total of 18 new positions is proposed in the 1960-61 fiscal year and includes 1 storekeeper for increased workload in distribution of supplies as a part of administration. The following 10 positions are added for custodial and personal care: 0.5 correctional sergeant for weekend and holiday coverage of the barracks recreation program; 0.5 correctional sergeant for shortage in required relief; 1 correctional officer for the required custodial coverage of the feeding and food preparation area; 1 correctional officer for custodial coverage of the new vocational shop area at the north facility; 1 correctional officer for custodial coverage of the housing corridor in the central facility on the first watch; 1 correctional officer for supervision of outgrounds work crews; 1 correctional officer for custodial coverage of the hospital and education areas; 1 correctional officer for custodial coverage of the yard and gymnasium; 1 correctional officer is included to correct a shortage of relief in the authorized post assignment; and 2 correctional officer positions are for the additional required relief.

2 positions are added for the medical care program including 1 dentist for increased workload and 1 clinical laboratory technologist for the laboratory workload. 1 professional position is included for increased workload in the group counseling program; 2 clerical positions are included for increased workload in the classification and parole function while 1 locksmith is added for increased maintenance workload; and 1 correctional counselor is included for improved casework treatment services in 1 conservation camp. These positions are discussed in the General Analysis, Departmental Summary. (See pages 63, 64, 65, and 66.)

22	<b>GENERAL ANALYSIS</b>				
23	Objectives				
24	The Deuel Vocational Institution provides custody, care, industrial, vocational, and other training, guidance and reformatory help for young men too old to be benefited by the programs of correctional schools for juveniles and too immature in crime for confinement in prisons.				
25					
26					
27					
28					
29					
30	Program and Performance				
31					
32	This institution was created in 1945 as the California Vocational Institution. In 1951 the Legislature changed the name to the Deuel Vocational Institution. The institution was originally located at Lancaster in temporary military quarters and moved to the present permanent 780-acre location near Tracy in 1953. A new 300 capacity reception-guidance center is scheduled to begin operations in October 1960. This new facility will provide for the initial processing of an average of 222 persons (152 Youth Authority wards and 70 adult felons) compared to 180 Youth Authority wards in the current fiscal year.				
33	The treatment program which is designed to rehabilitate young offenders committed either to the Youth Authority or the Department of Corrections, emphasizes academic and vocational instruction, industrial work, and training. The research study conducted by the Pilot Intensive Counseling Organization (PICO) to determine scientifically the results of intensive counseling is continued until June 30, 1961, at which time a final evaluation of the program is expected. A special program for young men with severe behavior problems is operated in the adjustment center. A group counseling program staffed generally by volunteer leaders under trained management provides the majority of the inmate population an opportunity to review with their peers the causes of delinquency.				
34	The institution population in 1959-60 has the following general characteristics:				
35					
36	Adult Felons:				
37	22.9 percent under 21 years of age; median age 23.8 years; 3.7 percent serving life sentences; 29.8 percent prior prison commitments; offense grouping will include 25 percent robbery, 17.2 percent forgery and checks, 20.8 percent burglary, and over 12.6 percent narcotics.				
38	Youth Authority Wards:				
39	Median age approximately 19.6 years; 52.5 percent prior commitments; offense groupings will include over 24 percent burglary, approximately 18.2 percent robbery, 12.3 percent auto theft, and about 7.2 percent narcotics.				
40	Population and release of inmates from Deuel Vocational Institution are as follows:				
41	Average Population:				
42	Main Institution	1958-59	1959-60	1960-61	
43	Adult Felons-----	537	795	938	
44	Youth Authority-----	644	595	600

<sup>a</sup> Excluding cost of operating reception-guidance center, but including cost of feeding, housing, and other expenses of inmates being processed therein.

Reception-Guidance Center	1958-59	1959-60	1960-61
Youth Authority-----	139	180	152
Adult Felons-----	2	—	70
Totals-----	1,322	1,570	1,760
Paroles and Discharges:			
Adult Felons-----	166	240	290
Youth Authority-----	787	715	600
Totals-----	953	955	890
Reception-Guidance Center (Intake for processing)-----	1,454	1,444	1,773

Of the total of 72 new positions proposed in the 1960-61 fiscal year, 51.6 are requested to operate the new and larger Reception-Guidance Center. These are summarized as follows:

1	Associate warden
2	Educational staff
1	Correctional counselor—orientation
38.6	Custodial staff
5	Medical staff
2	Supervising cook
2	Maintenance staff
51.6	

Because of the expanded Reception-Guidance Center operations and the increased population, 13 additional positions will be required in the main institution. They include:

4	Custodial officer
1	Typist-clerk (superintendent's office)
2	Typist-clerk (business office)
1	Correctional counselor (group counseling)
5	Teacher

3 positions required under the approved standard staffing for the Reception-Guidance Center and Classification and Parole include:

1	Vocational psychologist
2	Typist-clerk

3.4 custodial positions are added in the main institution to correct existing deficiencies in post assignments and relief. chaplain is included for improved clinical processing in the Reception-Guidance Center.

The above proposed new positions are discussed in the General Analysis, Departmental Summary. See pages 63, 65, 6 and 67. Operating expense increases are related to the new facility and increased population and are primarily food and clothing. Traveling—in-state shows an unusually larger increase due to the cost of transferring state employees from other institutions upon the opening of the added facilities.

## GENERAL ANALYSIS

## Objectives

The California Conservation Center has as its objectives the confining and rehabilitation of male offenders by training and employing them in natural resources conservation practices.

## Program and Performance

This institution was established under the provisions of Chapter 1583, Statutes of 1959 and during the current year sites will be acquired for establishing a center with 1,200 inmate population in Lassen County, with branches located in the Counties of Humboldt, Tuolumne and Inyo or Mono. There will be no inmate population until the 1961-62 fiscal year.

Inmates may be assigned to perform public conservation projects including, but not limited to forest fire prevention and control, forest and watershed management, recreation area development, fish and game management, soil conservation and forest watershed revegetation. The department may by contract with political subdivisions of the State and with local public agencies, furnish the labor for conservation and disaster relief.

When established, the population will consist of minimum and

medium inmates received from the reception-guidance center and from the more secure prisons. They will be given academic and vocational training at the center designed to prepare them for assignment to the conservation camps and their ultimate rehabilitation.

This center and its branches will operate approximately 20 conservation camps.

A total of 6 additional positions are proposed in the 1960-61 fiscal year: 1 prison business manager and 1 clerical position, temporarily approved in the current year, are proposed to assist in the preparation of organizational plan and construction, 1 administrative assistant effective January 1, 1961 to relieve the superintendent of administrative detail, and allow him to devote his time to program development, 1 deputy superintendent effective March 1, 1961 to write rules and regulations and make personnel assignments; 1 procurement and services officer II and 1 accounting technician III to purchase the materials and equipment, and maintain the budget and accounting records. These positions are discussed in the General Analysis, Departmental Summary. (See pages 64 and 66.)

a Composed of savings in salaries and wages, \$49,046; operating expenses, \$74,124; equipment, \$8,089; inmate pay-work projects, \$736; and excess reimbursements, \$1,570.

b Composed of savings in operating expenses, \$4,516; and excess reimbursements, \$2,227.

14					
15					
16	<b>GENERAL ANALYSIS</b>				
17	<b>Objectives</b>				
18	The Institution for Women receives and confines all types				
19	of female prisoners committed to the Department of Corrections				
20	and so treats them as to permit their safe release to the				
21	community.				
22					
23	<b>Program and Performance</b>				
24					
25	The Institution for Women was established in 1933 near				
26	Tehachapi, in Kern County, and in 1952 was moved to the				
27	present permanent 120-acre site in San Bernardino County,				
28	near Corona. The present institution will reach a capacity of				
29	801 inmates during 1960-61.				
30	The correctional treatment program, designed to rehabilitate				
31	the inmate, includes courses of academic and vocational instruction;				
32	group psychotherapy and counseling; medical and dental care;				
33	and religious, library, and recreational activities.				
34	There is also an active industrial program, mainly the manufacturing				
35	of garments, plus such sewing projects as designing, dressmaking,				
36	alterations, and tailoring.				
37	A complete study is made of every woman entering the				
38	institution. A classification committee works with the inmate				
39	to develop an individual treatment program based on her				
40	physical and mental condition, aptitudes and skills, educational				
41	background and social history. There is an active program of				
42	work, education, and recreation in which every woman is required				
43	to participate 8 hours daily. Individual and group therapy for				
44	the more seriously disturbed inmates is conducted by the staff				
45	of psychiatrists and psychologists. The majority of inmates				
46	receive individual and group counseling which is conducted by				
47	other staff members.				
48	The present population of the institution may be described				
49	in general as having the following characteristics: median age				
50	32 years; 20 percent prior prison commitments; 3 percent serving				
51	life sentences; offense groupings include 32 percent forgery				
52	and illegal checks, 25 percent narcotics, over 10 percent homicide,				
53	and over 10 percent thefts other than auto thefts.				
54	While the present capacity of the institution is 681 an				
55	average population of 847 is estimated for 1959-60 which is				
56	anticipated to increase to 932 in 1960-61. The activation of				
57	another cottage raises the rated capacity of the institution to				
58	801 for 1960-61.

## ADULT AUTHORITY

Main Office at Sacramento

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61	CHANGE FROM 1959-60
------------------------------	-------------------	----------------------	---------------------	------------------------

## SUMMARY

## TOTAL EXPENDITURES

Support (General Fund) -----	\$233,252	\$267,155	\$332,317	\$65,162 (24.4%)
Personnel man-years -----	17.8	20.1	25.5	5.4

## GENERAL ANALYSIS

## Objectives

The Adult Authority consists of 7 members, each of whom is appointed by the Governor, with the advice and consent of the Senate, for a term of four years.

The Adult Authority is the term-setting and parole-granting agency under the Indeterminate Sentence Law of California for the adult male felons serving terms in the state penal institutions. It is fundamentally concerned with the correctional treatment and rehabilitation of adult male felons.

They serve as members of the State Board of Corrections and as an Advisory Pardon Board to the Governor on matters of executive clemency. In their regularly scheduled meetings with the Director of Corrections, the Adult Authority advises and recommends general and specific policies and procedures related to the diagnosis, classification and treatment of prisoners.

## Program and Performance

The Adult Authority meets at each of the state prisons regularly and conducts hearings by dividing into 2 or more member panels, meeting simultaneously to set terms, grant paroles, and to consider determination and forfeiture of credits, and for restoration of civil rights to inmates.

The Adult Authority meets weekly to consider reports and recommendations from the Division of Adult Paroles and makes decisions as to: revocation of parole and return to prison, restoration of civil rights, reinstatements, and fixing of terms.

The total number of cases reviewed by the Adult Authority for the fiscal year 1958-59 was 19,220, an estimated 21,000 cases during the 1959-60 fiscal year and approximately 22,000 cases in 1960-61.

4 new Adult Authority representatives and 1.5 clerical positions are included to meet the increase in workload. These positions are discussed in the General Analysis, Departmental Summary. (See page 67.)

Personnel man-years-----	16.8	21.8	23	1.2

**GENERAL ANALYSIS**

**Objectives**

The Board of Trustees, California Institution for Women, is responsible under the Indeterminate Sentence Law for fixing the terms of adult female felons and the granting or revoking of parole to such women. The board is also responsible for administration of the Women's Parole Division which supervises all adult female felons released on parole from the Institution for Women and those women released from other cooperating states to parole programs in California. It also may advise the Director of Corrections on general policies for the maintenance and operation of the California Institution for Women and the care, custody, treatment, training, discipline and the employment of women confined at the institution. The objective of the board is the protection of society by the setting of appropriate terms, careful selection of those women to be released on parole and their proper supervision while on parole.

**Program and Performance**

The Board of Trustees consists of 5 members, 3 of whom shall

be women. They are appointed by the Governor, with the advice and consent of the Senate, for a term of 4 years. The board maintains its office in Los Angeles; the parole division has offices in Los Angeles and San Francisco.

The board meets regularly, reviewing the individual cases and studying the histories of the women prisoners. The increasing workload of the board is reflected in increasing population of the Institution for Women, which has risen from an average of 727 in 1958-59 to an estimated 847 in 1959-60 and 932 in 1960-61.

The board's increasing responsibilities and workload are also reflected in the rise in parole population. Parole agents responsible to the board will supervise an estimated 755 parolees in 1960-61 compared to an estimated 675 parolees in the current year and an actual 610 in the 1958-59 fiscal year.

The increase in this budget is due to the increase in the number of parolees supervised, 2 additional parole officer positions are proposed to meet the increase in total number of parolees supervised by this agency. These positions are discussed in the General Analysis, Departmental Summary. (See page 67.)

## DEPARTMENT OF THE YOUTH AUTHORITY—Continued

## GENERAL ANALYSIS

## Objectives

The objectives of the Youth Authority are first, the protection of society more effectively by substituting for retributive punishment, training and treatment directed toward the correction and rehabilitation of young persons declared wards for delinquent causes or found guilty of public offenses; and second, prevention of the occurrence of delinquency. In addition, the department encourages improvements in juvenile law enforcement and probation and increased use of county juvenile homes and camps.

## Program and Performance

The Department of the Youth Authority was originally conceived as the Youth Correction Authority by the Legislature in 1941. Amendments to the original law in 1943 created the present Department of the Youth Authority and gave it responsibility for the administration of the State's correctional schools and parole program for youths. The law provides that commitments can be made to the Youth Authority by judges of the superior court sitting in juvenile court or in criminal court and judges of the municipal court after they have determined that the youth is under 21 years of age at the time of apprehension, and that there is no program at the county level to meet the special needs of the individual.

The Director of the Youth Authority is the chief administrative officer of the department and chairman of the Youth Authority Board. He is directly responsible for the management of the State's correctional schools, reception center-clinics, Youth Authority conservation camps for boys, and for the operation of the field services and branch offices. He is responsible for the custody, care, treatment, training, discipline, welfare, and supervision of wards committed to the Youth Authority, whether in the institutions or on parole in the community.

The Youth Authority Board is concerned with acceptance or rejection of wards committed to the Youth Authority and with parole and discharge of wards. It also works with the director in the formulation of policies concerning classification, transfer, training, and treatment of wards.

The years between 1941 and 1943 gave the Youth Authority time to develop a plan of organization and a pattern for diagnosis, training and treatment, and community organization. The 3 institutions transferred to the Youth Authority in 1943—Preston School of Industry, Fred C. Nelles School for Boys, and Ventura School for Girls—have increased to 7 institutions, 2 reception center-clinics, and 3 Youth Authority conservation camps for boys. The first 400-bed unit of a new institution for older boys was occupied in January 1960. This new institution, the Youth Training School, is located near Ontario. A new Ventura School for Girls is also planned to replace the present school which was constructed in 1917 as a temporary institution. The first 300-bed increment of this new facility is scheduled for occupancy in January 1962.

The Department of the Youth Authority has centralized parole services by shifting the operation from the 3 original institutions into a separate bureau responsible for continuing the treatment and supervision of the ward after his release from a correctional school and upon his return to the community. Branch offices have been opened in a number of the larger cities to provide for more efficiency and better service. Institution and parole operations are carefully co-ordinated in the interests of maintaining a continuous program of rehabilitation and training for each ward.

During 1960-61 the facilities of the Department of the Youth Authority will have an estimated average daily population of 3,612. These facilities include 2 reception center-clinics, 5 schools for boys, 2 schools for girls, and 4 Youth Authority camps for boys. In addition, an average of 1,376 wards will be in Department of Corrections facilities. Also, during 1960-61 the Youth Authority will supervise an estimated average parole caseload of 10,009 as compared with 8,308 during 1958-59.

The Bureau of Probation and Delinquency Prevention Services conducts a program to develop an awareness of the value of local delinquency prevention programs and the need for adequate community services, and assists in improving them. Training programs are provided for probation officers; counties are assisted in developing plans for new homes, camps and juvenile halls; the Interstate Compact for Juveniles is administered; and publications are developed that are directed toward improving the quality of local services.

The Department of the Youth Authority's institutional program for handling the wards committed to it by the various counties includes:

**Diagnosis:** A diagnostic study and evaluation is made of each ward committed to the Youth Authority. This study and evaluation, made during the ward's stay in a reception center and clinic, is for the purpose of diagnosing the cause of the ward's delinquency and making recommendations for a program of individualized education and treatment to correct the ward's behavior pattern. This study and evaluation results in a recommendation of the degree of custodial supervision required, educational needs, medical and dental care, psychological or psychiatric therapy needed to treat the ward's mental and emotional needs, religious training and other programs that will aid in the ward's return to society as a useful citizen.

**Treatment:** The correctional programs carried on in the institutions are designed to enable the Youth Authority to achieve a high degree of training and treatment in the institutional setting and to guide the ward in the development of good moral standards.

**Special Treatment Program:** The 1957 Legislature gave the Youth Authority the responsibility for the custody and treatment of a group of wards who have severe emotional and behavioral problems and who are in need of professional, psychiatric-type treatment. The department was not previously equipped to handle both a custodial training program and psychological and psychiatric therapy services. Staff was authorized for the Diagnosis and Treatment Division for the planning, control, and supervision of this program. Preston School of Industry, Fred C. Nelles School for Boys and Los Guilucos School for Girls have been authorized staff for the first 3 treatment units.

Expansion of this program to Ventura School for Girls is proposed for the 1960-61 fiscal year. Salaries and wages costs for the 11 positions to be assigned to this program at Ventura total \$61,658. This expansion represents initial, partial staffing only as the full program will commence when the new institution is occupied in January 1962.

Construction of an office building is budgeted for Paso Robles School for Boys in anticipation of budgeting the staff for the special treatment program at this institution in the 1961-62 fiscal year.

Facilities being completed during the 1959-60 fiscal year for additional population include the following: Youth Training School—the initial 400-bed increment; Los Guilucos School for Girls—40-girl special treatment program unit; Paso Robles School for Boys—8-bed addition to admissions unit. Presently financed construction to be completed in 1960-61 includes the following: Youth Training School—second 400-bed increment; Preston School of Industry—2 50-boy special treatment program living units; Fred C. Nelles School for Boys—2 50-boy living units and Washington Ridge Conservation Camp—an additional 80-boy camp.

Funded construction scheduled for completion in the 1961-62 fiscal year includes the third 400-boy increment at the Youth Training School and the first 300-girl capacity facilities at the new Ventura School for Girls.

The department also administers programs to give assistance to counties in the construction and maintenance of juvenile homes and camps. The State shares in the cost of operating county juvenile homes and camps caring for wards who could otherwise be committed to the Youth Authority. At the end of the 1960-61 fiscal year it is expected that there will be 49 county-operated homes and camps. It is estimated that an average of 2,468 boys and girls will be housed in these facilities during this fiscal year. In addition, the 1957 Legislature, to encourage the construction and operation of county juvenile homes and camps, provided for the State to reimburse the counties for one-half the cost of construction not to exceed \$3,000 per bed. The camps are restricted to a maximum capacity of 100 wards. The Youth Authority is charged with responsibility for establishment of standards and the administration of this state aid. Funds already allocated and proposed are sufficient to finance the State's share of 1,730 county camp beds.

## DEPARTMENT OF THE YOUTH AUTHORITY—Continued

## MAJOR PROGRAM AUGMENTATION AND COSTS

The following summary accounts for the \$2,590,090 (16.3 percent) increase in 1960-61 expenditures over 1959-60. Increases are mainly for additional workload due to operation of

new facilities, increased parole caseload, extension of the special treatment program and increase in wards processed through the reception centers.

## Additional personnel for staffing new facilities:

a. Washington Ridge Youth Conservation Camp (15.8)	\$21,031
b. Youth Training School (91.5)	171,940
c. Fred C. Nelles School for Boys—2 additional living units (12.8)	28,313
d. Northern Reception Center and Clinic—additional living unit (8)	32,180
e. Fricot Ranch for Boys—additional living unit (6)	24,098

\$277,562

## Additional personnel for institution workload changes:

a. Positions in accordance with established workload standards and increased population (30.2)	\$131,364
b. Administration and plant operation (11)	43,433
c. Food service and housekeeping (17.7)	50,530

\$225,327

Parole positions for increased parole population (20) 65,039

Special treatment program at Ventura School for Girls (11) 61,658

Increased number of wards processed through clinics (14.4) 81,264

Additional personnel for increased workload in Departmental Administration (9.5) 62,593

Net cost of authorized positions due to full year operation of facilities, merit salary adjustments and improved employment conditions 746,419

## Changes in operating expenses and equipment:

a. Increases in feeding, medical care, parole costs and utilities primarily due to population increases and new facilities	358,286
b. Other items of operating expenses	239,722
c. Increase in equipment	61,777

Decrease in reimbursements 253,898

Increase in contributions to State Employees' Retirement Fund 108,805

Other current expenses reflecting increased number of paroles 47,740

Total \$2,590,090

## SUMMARY OF PROPOSED NEW POSITIONS

The following 247.9 proposed new positions, at a cost of \$773,443, are included in the various institution budgets and Departmental Administration. 91.5 of these positions are proposed for the new Youth Training School and 15.8 positions for the new Washington Ridge Conservation Camp and are discussed in 2 groups. The other positions are discussed in the functional grouping in which they are to be used.

## Youth Training School

91.5 Positions \$171,940

91.5 positions are proposed in the areas of custodial and personal care, classification and counseling, education and religion, medical care, food preparation, plant operation, and business services. Positions are budgeted on the basis of approved staffing formulas, comparability to staffing authorized for similar functions at other institutions, and if not based on either of these, minimum requirements due to considerations of physical plant, type of ward, institution program and organizational structure. The effective dates of the new positions are based on the availability of the second 400-ward living unit and the receiving of wards for this unit beginning in March 1961, and estimated population buildup to 780 by June 30, 1961. Generally, the positions have been phased to permit from 2 weeks to 1 month's time for recruitment, orientation and training prior to the arrival of this group of wards.

## Washington Ridge Conservation Camp

15.8 Positions \$21,031

15.8 positions are proposed in the areas of custodial and personal care, medical, feeding and general administration based on the approved staffing formulas authorized for similar functions at other Youth Authority conservation camps. The effective

dates of the new positions are based upon the receiving of wards in May 1961. Generally, the positions have been phased to permit a minimum time for orientation, recruitment and training prior to the arrival of wards.

## Youth Authority Board

2 Hearing representative	\$22,800
1 Intermediate stenographer-clerk	3,810
3 Total	\$26,610

2 hearing representatives and 1 stenographer are included to assist in meeting the growing workload of the Youth Authority Board. The 1957 Legislature provided for this method of hearing cases by amendment of Section 1711.5 of the Welfare and Institutions Code.

## Parole Services

2 Parole agent III	\$9,344
2 Parole agent II	6,890
10 Parole agent I	33,670
5 Intermediate stenographer-clerk	11,325
1 Intermediate typist-clerk	3,810
20 Total	\$65,039

19 positions are included for the Bureau of Paroles to provide for the increased parole caseload in accordance with currently authorized caseload ratios.

1 intermediate typist-clerk is included in the Interstate Unit to meet the workload created by the increase in out-of-state placement of wards.

## DEPARTMENT OF THE YOUTH AUTHORITY--Continued

## SUMMARY OF PROPOSED NEW POSITIONS--Continued

## Special Treatment Program

1 Staff psychiatrist	\$12,000
1 Supervisor of special treatment	7,728
2 Clinical psychologist II	12,264
1 Supervising social worker	5,830
2 Senior social worker	9,620
1 Senior stenographer-clerk	4,296
3 Intermediate stenographer-clerk	9,920

11 Total \$61,658

These positions are included to permit the extension of the Special Treatment Program to Ventura School for Girls with a partial staff. Full staffing is planned for January 1962 when the new institution is to be occupied. This program is designed to meet the special needs of a group of wards who are regarded as not suited for existing Youth Authority programs because of serious personality problems or because of the need for professional therapy not now provided. Special treatment programs are now authorized at Preston School of Industry, Los Guilucos School for Girls and Fred C. Nelles School for Boys.

## Administration and Personnel

1 Assistant administrative analyst	\$6,360
1 Correctional facilities planning specialist	10,468
0.5 Intermediate stenographer-clerk	1,905

This temporary professional position, with clerical assistance, will provide the necessary guidance in the 1960-61 fiscal year for program development and planning for the Northern California Youth Center which will have an ultimate capacity of 4,800 wards.

The center will be phased to the ultimate capacity as required over a period of years. The population will be housed in 12 individual 400-ward treatment units with centralized facilities for the entire center.

Principles and programs developed for this facility will also have application at the new Southern California Youth Center anticipated within the next few years.

1 Assistant budget analyst	6,360
1 Intermediate account clerk	3,630

This position is proposed to meet the increased workload in the accounting office due to increases in staff, particularly in the parole function.

1 Intermediate typist-clerk	3,630
1 Intermediate file clerk	3,630

The records office workload is directly related to the total ward population. The position included is to meet the increased workload created by institution and parole population increase.

1 Intermediate typist-clerk	3,098
1 Accounting technician II	2,148
0.5 Intermediate typist-clerk	795

These positions are proposed for the accounting unit at Fred C. Nelles School for Boys to provide adequate staff to meet the workload created by additional ward population and staff in the 1960-61 year. These additions will produce a staff comparable to that at Paso Robles School for Boys with approximately the same number of wards.

1 Intermediate stenographer-clerk	1,860
1 Intermediate typist-clerk	1,860

These clerical positions for the administrative unit at Fred C. Nelles School for Boys are included to meet the workload created by the increase in population in the 1960-61 year and provide for specific assignments to correct existing clerical deficiencies.

1 Training assistant	6,360
----------------------	-------

This position is proposed to meet a need for a full-time training person based upon the excessive turnover rate of custodial personnel at Paso Robles School for Boys. In the past 3 years the average turnover has been approximately 40 percent of the custodial staff.

12 Total \$52,104

## Reception Center Diagnosis

1.4 Staff psychiatrist	\$16,560
1 Supervising social worker I	6,360
2 Clinical psychologist II	14,016
4 Senior social worker	23,088
6 Intermediate typist-clerk	21,240

14.4 Total \$81,264

At the Northern Reception Center and Clinic 1 psychiatrist, 1 psychologist, 2 social workers and 3 clerks are proposed to meet the workload produced by the anticipated increase in the number of wards processed. The Southern Reception Center and Clinic proposed additional staff is 0.4 psychiatrist, 1 supervising social worker, 1 psychologist, 2 social workers and 3 clerks to meet the workload also created by the anticipated increased number of wards processed. These positions are governed by workload and organizational yardsticks related to the number of cases processed.

## Custody

2 Assistant head group supervisor	\$9,618
4 Senior group supervisor	13,491
28 Group supervisor	84,184
0.4 Temporary help (visiting)	2,000
0.4 Temporary help (escapes)	2,000

34.8 Total \$111,293

1 senior group supervisor and 7 group supervisors are included at the Northern Reception Center and Clinic to provide 5 post custodial coverage for the new 49-boy dormitory which will be completed in the 1960-61 year. 1 group supervisor at this institution is proposed to provide custodial supervision of ward movements in the hospital and clinical areas.

2 assistant head group supervisors are proposed to provide 24-hour supervisory custodial coverage at Fricot Ranch School for Boys. Also 1 senior group supervisor and 5 group supervisors are included at this institution to provide 4 post custodial coverage for the new 50-boy dormitory which will be completed in the 1960-61 year.

2 senior group supervisors and 10.8 group supervisors are proposed at Fred C. Nelles School for Boys to provide 4 post custodial coverage in the 2 new 50-boy dormitories which will be completed in the 1960-61 year. 3.2 group supervisors are included to provide security and escort coverage of the ward movements which will increase due to increased population and the special treatment program. Also proposed are 0.4 temporary help for visiting and 0.4 temporary help for escapes based on increased population.

1 group supervisor is included at Los Guilucos School for Girls to adjust the sick leave relief allowed in the post assignment.

## Medical Care

1 Dentist II	\$10,860
1 Dental assistant	3,372
3.2 Graduate nurse	14,438

5.2 Total \$28,670

1 dentist and 1 dental assistant are proposed on a formula basis to meet the dental workload at Northern California Reception Center and Clinic produced by the increase in number of wards processed. Also at this clinic 3.2 graduate nurses are included on the basis of increased workload resulting from a 50 percent increase in capacity and the physical design of the hospital.

## DEPARTMENT OF THE YOUTH AUTHORITY—Continued

## SUMMARY OF PROPOSED NEW POSITIONS—Continued

## Education and Religion

7.3	Youth Authority teacher	\$34,180
1	Arts and crafts teacher	2,120
2	Music teacher	12,132
2	Instructor in industrial arts	5,830
1	Instructor in recreation and physical education	2,120
1	Chaplain	7,298
1	Intermediate typist-clerk	3,540
0.2	Pianist—intermittent	1,140
15.5	Total	\$68,360

3 Youth Authority teachers, 1 music teacher and 0.3 teacher vacation relief are proposed at Fricot Ranch School for Boys based upon the population growth at this institution in the 1960-61 year.

2 Youth Authority teachers, 2 instructors in industrial arts, 1 arts and crafts teacher and 1 instructor in recreation and physical education are included at Fred C. Nelles School for Boys in the 1960-61 year. These positions will be phased commensurate with the intake of the additional wards at this institution.

At Paso Robles School for Boys 1 music teacher is proposed based on the workload yardstick for this type of teaching position. Also 1 Youth Authority teacher, outside the ADA formula of 15-1, is included to act as the assistant supervisor of instruction in performing administrative duties and supervising 29 teachers and instructors.

1 Youth Authority teacher is also included at Ventura School for Girls to meet the need created by additional population in the 1960-61 year.

0.5 Protestant chaplain and 0.5 Catholic chaplain are proposed for Los Guilucos School for Girls based on increased population and to provide full-time chaplain services.

1 intermediate typist-clerk is included to perform clerical tasks for the education unit at the Northern California Reception Center and Clinic, due to increased wards processed. Also at this clinic 0.2 pianist is proposed to provide a pianist for Sunday religious services.

## Classification and Counseling

1	Parole agent I	\$5,772
0.5	Intermediate stenographer-clerk	1,860
1.5	Total	\$7,632

These 1.5 positions are included at Paso Robles School for Boys in accordance with the current staffing formula of classification counselors and clerical positions.

## Food Service, Clothing, and Housekeeping

0.6	Supervising cook II	\$3,232
3.4	Supervising cook I	15,003
11.1	Food service assistant	24,328

247.9 Totals, Proposed New Positions \$773,443

## SUMMARY OF OTHER INCREASED EXPENDITURES

## Additional Cost—Authorized Positions

This increased expenditure is occasioned by full-year cost of positions authorized during the current year, improved employment conditions and annual merit salary increases \$746,419

## Operating Expenses

This 16.2 percent increase results from a 15.7 percent increase in average annual population, new facilities and an 8.6 percent increase in parole case-load supervision. The major items of increase are feeding, medical care, utilities and those items related to parole supervision \$598,008

## Equipment

Increased equipment needs are primarily applicable to new positions added because of additional workload due to population increase \$61,777

1	Laundryman	1,475
1	Janitor	3,372
0.2	Overtime (feeding)	940
0.4	Temporary help (cook and baker)	2,180
17.7	Total	\$50,530

0.6 supervising cook II and 0.6 supervising cook I at the Northern and Southern Reception Centers and Clinics, respectively, are included to provide 7-day-per-week supervision of the culinary operation. The 0.6 supervising cook I at Fricot Ranch School for Boys provides the same 7-day-per-week coverage.

2.2 supervising cooks I and 0.4 temporary help (cook and baker) are proposed at Fred C. Nelles School for Boys to provide adequate staff to meet the workload created by additional ward population and inadequate feeding facilities and to provide adequate supervision of the feeding operation.

3 food service assistants and 0.2 temporary help (feeding) are proposed at Fricot Ranch School for Boys based upon increased population and the resulting need for 2 shift feeding. At Fred C. Nelles School for Boys 5.9 food service assistants are included based upon increased population, decrease in average age of wards which reduces the availability of boys for kitchen help and the change from 2-shift to 3-shift feeding. At Los Guilucos 2.2 food service assistants are proposed upon the basis of increased population and to overcome existing deficiencies in the feeding operation. All food service personnel positions are calculated on a post assignment basis.

1 laundryman is proposed at Fred C. Nelles School for Boys based upon the currently existing deficiencies, the decrease in average age of wards and increased population. 1 janitor is included at Los Guilucos School for Girls based upon the accepted ratio of janitors per institutional square footage.

## Plant Operation

2	Stationary engineer	\$11,544
1	Building maintenance man	2,370
1	Electrician	5,772
0.5	Plumber	2,886
1	Automotive equipment operator	4,740

5.5 Total \$27,312

2 stationary engineers, 1 for each of the Reception Center and Clinics, are included on a workload basis to maintain boilers and other related equipment. 1 building maintenance man is proposed for Fred C. Nelles School for Boys to meet the workload created by the increase in physical plant at this institution.

0.5 plumber is proposed for Fricot Ranch School for Boys based upon the workload increase due to the additional facilities.

1 electrician is included at Preston School of Industry to meet the electrical workload created by the newly installed state telephone system, additional structures, and complex electrical systems. Also 1 automotive equipment operator is proposed for this institution based upon the centralization of responsibility for delivering food supplies and laundry to other Youth Authority institutions and camps.

## Reimbursements

Decrease due to discontinuance of reimbursements from Division of Forestry to Youth Authority conservation camps \$253,898

## Contributions to State Employees' Retirement Fund

This item is related to salaries and wages costs \$108,805

## Other Current Expenses

This increased expenditure results primarily from increased parolees placed in foster homes \$47,740

Total, Other Increased Expenditures \$1,816,647

GRAND TOTAL—INCREASES \$2,590,090

## Department of the Youth Authority

## YOUTH AUTHORITY BOARD AND ADMINISTRATION

## GENERAL ANALYSIS

This division provides for the Youth Authority Board, director, administrative services, and supervision of the diagnosis and treatment, special treatment, and departmental research programs.

The Youth Authority Board consists of 6 members, each of whom is appointed by the Governor, with the advice and consent of the Senate, for a term of 4 years. It is concerned with acceptance or rejection of wards committed to the Youth Authority and with classification, length of institutional training and parole periods, and formulation of policies concerning wards. Membership of the board was increased from 5 to 6 members at the 1957 Regular Session and 1 Youth Authority hearing representative was added by the 1959 Regular Session because of the increased caseload of wards committed to the Youth Authority. 2 Youth Authority hearing representatives and 1 clerk are included in the 1960-61 Budget to assist the board in handling the increased number of commitments to the Youth Authority and increased institution and parole population.

The executive group is composed of the director, who is chairman of the Youth Authority Board, and his staff. The director is the administrative head of the department and is charged with those duties and responsibilities of the department in carrying out its objectives not specifically assigned to the Youth Authority Board. The 1960-61 program contains 1 assistant administrative analyst position based on workload.

The Youth Authority clerk and records office maintains the master files on all wards committed to the Youth Authority. This office is also responsible for recording actions taken and for orders issued by the Youth Authority Board. The workload of this office grows with any increase in commitment rate, institution bed capacity, or in the number of wards on parole. 1 clerk is proposed in 1960-61 to meet the increased workload.

The Research Division is responsible for research programs being developed and undertaken by the department. Basic research is planned in the fields of human behavior and in the specific field of delinquency, its causative factors, treatment, and prevention.

Administrative services are furnished in the fields of accounting, budgeting, personnel management, food administration, maintenance and construction, and general administration. The administrative services division also operates as the link between the department and the other agencies concerned with the financial and managerial services of the State Government. 1 professional and 2 clerical positions are requested in the 1960-61 Budget on a workload basis.

The Diagnosis and Treatment Division is responsible for supervision and operation of the department's reception centers, institutions, and conservation camps. This responsibility includes the training and treatment program in the institutions, as well as reception, diagnostic evaluation, and transportation of wards between institutions. It also includes supervision and operation of the department's special treatment program which was started during the 1957-58 fiscal year. This program is designed to meet the needs of special problem delinquents who, because of emotional disturbances or other severe personality problems, do not fit into nor benefit materially from the regular treatment program. 1 temporary professional position and 0.5 clerk are included on a workload basis to plan the new Northern California Youth Center.

All of these 9.5 positions are discussed in the General Analysis, Departmental Summary. (See pages 121 and 122.)

## DIVISION OF FIELD SERVICES

## GENERAL ANALYSIS

The Field Services Division is composed of the Bureau of Probation and Delinquency Prevention Services, the Bureau of Paroles, and the interstate unit which administers the Interstate Probation Compact and the Interstate Compact on Juveniles. The Bureau of Probation and Delinquency Prevention Services provides assistance, leadership and guidance to the counties and cities of the State in studying youth problems, and encourages them to provide more effective programs to meet their needs. It is concerned with the encouragement of improved juvenile law enforcement and probation. It also administers the program for maintenance of juvenile homes and camps.

The Bureau of Paroles provides direct supervision and case-work counseling for wards of the Youth Authority who are on parole. Parole officers make use of all available local services in directing wards toward a normal life in the community.

The integration of these 2 Youth Authority functions into the Field Services Division is recognition of the close relationship between delinquency prevention and rehabilitation, as well as the primary importance of the community in all phases of this work.

The increase in parole caseload will require 14 new parole agent positions which will be established as the increase is realized. This will be in accordance with the overall ratio of 55 parolees per parole officer. 6 clerical positions are also included on a workload basis. Actual parole population for 1958-59 and the estimated caseload for the current and budget years are as follows:

	1958-59	1959-60	1960-61
Average parole population	8,308	9,213	10,009
Parole population end of year	8,709	9,479	10,317

15					
16					
17					
18	Objectives				
19					
20	The Northern California Reception Center and Clinic is a				
21	reception and diagnostic center for boys and girls committed				
22	to the Youth Authority from Northern California. The purpose				
23	of the reception center is to receive, examine, and classify the				
24	boys and girls for transfer to the training and treatment pro-				
25	gram best suited to correct the causes of their delinquency.				
26					
27	Program and Performance				
28					
29	This institution's program is centered in the reception and				
30	diagnostic evaluation of boys and girls committed to the Youth				
31	Authority. A diagnostic study is made on each boy and girl to				
32	determine his delinquency characteristics, mental attitude, and				
33	abilities. Recommendations based on such study are made to				
34	the Youth Authority Board regarding type of training, treat-				
35	ment, and custodial program best suited to correct the causes				
36	of delinquent behavior and to return the boy or girl to society				
37	as a useful citizen. Remedial medical, dental, and initial psychi-				
38	atric treatment is provided if necessary. Wards from nearby				
39	Youth Authority institutions are transferred to this facility for				
40	major surgical and limited psychiatric treatment. Limited use				
41	is made of ward help in the reception center because of the short				
42	length of stay and the intensive diagnostic evaluation program.				
43	A new administration building will be completed and occupied				
44	during the 1959-60 fiscal year. The existing administration				
45	building will be remodeled to provide expansion of hospital bed				
46	space, laboratories, and office space necessary for the antici-				
47	ipated increase in ward population and clinical staff personnel.				
48	A 49-bed dormitory is scheduled for completion in September,				
49	1960. The number of wards to be processed will increase with				
50	this additional number of beds.

Ward movement and average population at this institution are as follows:

Average Daily Population:	1958-59	1959-60	1960-61
Boys-----	161	160	198
Girls-----	52	54	54
Totals-----	213	214	252
Parole Releases and Processed			
Cases Transferred:			
Boys-----	1,224	1,376	1,785
Girls-----	338	375	419
Totals-----	1,562	1,751	2,204

The 24 new positions proposed in this budget are requested for the increase in the number of cases processed and the increased average population due to the opening of the new living units.

The 12.2 positions based on increased caseload are:

- 1 psychiatrist
- 1 psychologist
- 2 social workers
- 1 dentist
- 4.2 nursing staff
- 3 clerks

The 11.8 positions needed to staff for the increased average population include:

- 9 custodial positions
- 1 stationary engineer
- 0.6 cook

12 clerical and technical positions in the teaching and religion functions.

These are discussed in the General Analysis, Departmental Summary. (See pages 122 and 123.)

LINE	SUMMARY AND GENERAL ANALYSIS	GENERAL ANALYSIS		
		ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
1	<b>Objectives</b>			
2				
3				
4	The Southern California Reception Center and Clinic is a			
5	reception and diagnostic center for boys and girls committed to			
6	the Youth Authority from Southern California. The purpose of			
7	the reception center is to receive, examine and classify boys and			
8	girls for transfer to the training and treatment program best			
9	suited to correct the causes of their delinquency.			
10				
11	<b>Program and Performance</b>			
12				
13	This institution's program is centered on the reception and			
14	diagnostic evaluation of boys and girls committed to the Youth			
15	Authority. A diagnostic study is made on each boy and girl to			
16	determine his delinquency characteristics, mental attitude, and			
17	abilities. Recommendations based upon such study are made to			
18	the Youth Authority Board regarding type of training, treatment			
19	and custodial program best suited to correct the causes of delin-			
20	quent behavior and to return the boy or girl to society as a			
21	useful citizen. Remedial medical, dental, and initial psychiatric			
22	treatment is provided if necessary. Wards from nearby Youth			
23	Authority institutions are transferred to this facility for major			
24	surgical and limited psychiatric treatment. Limited use is made			
25	of ward help in the reception center because of the short length			
26	of stay and intensive diagnostic evaluation program.

Ward movement and population at this institution are as follows:

Average Daily Population:	1958-59	1959-60	1960-61
Boys	286	300	300
Girls	45	50	50
Totals	331	350	350
Parole Releases and Processed Cases Transferred:			
Boys	1,957	2,160	2,620
Girls	335	410	410
Totals	2,292	2,570	3,030

A total of 9 new positions are proposed for the 1960-61 fiscal year based on increased workload. These positions are as follows: 0.4 psychiatrist II, 1 clinical psychologist II, 1 supervising social worker I, 2 senior social workers and 3 intermediate typist-clerks for increased cases processed; 0.6 supervising cook I to provide sufficient staffing for 7 days a week coverage of the feeding program; and 1 stationary engineer to meet increased maintenance workload. These positions are discussed in the General Analysis, Departmental Summary. (See page 122.)

## GENERAL ANALYSIS

## Objectives

The Youth Authority conservation camps for boys are conservation camps operated jointly by the Youth Authority and the Division of Forestry. Their primary purpose is the rehabilitation of older delinquent boys through useful work including suppression of forest fires, reforestation, road construction, and general maintenance of the State's forests. Selected boys primarily in the 17 to 21 age group are sent to these camps as an intermediate stage between training in an institution and return to society. These wards include both criminal court commitments transferred from Deuel Vocational Institution and the Correctional Training Facility at Soledad, and juvenile court commitments from the Youth Authority institutions.

## Program and Performance

Three conservation camps are currently operating, emphasizing work programs both in the forest and in the camp. A few boys are held in each camp for operation of the kitchen, dining room, laundry, general housekeeping and building maintenance. A recreation program is conducted after working hours including activities ranging from sports to arts and crafts. A counseling program to aid in removing the causes of delinquent behavior is conducted concurrently with the work and recreation program.

The existing camps are Pine Grove, located east of Jackson; Ben Lomond, in the mountains near Santa Cruz; and Mount Bullion, near Mariposa. Three 20-boy spike camps are operated as branches of the main camps, 1 from Pine Grove and 2 from Mount Bullion.

The activation of a new camp is planned during the 1960-61 fiscal year. This camp is the Washington Ridge Conservation

Camp which will be located near Nevada City, California. The population build-up at the new camp will begin in May, 1961, with 20 boys and increase at the rate of 20 boys per month to a population of 80. Supervision of the Smartsville Spike Camp, currently operated as a branch of the Pine Grove main camp, will be transferred to the Washington Ridge Conservation Camp July 1, 1961. The new camp's activation will increase the total estimated average daily population of these camps to an average of 265 boys during 1960-61, and to approximately 340 during 1961-62.

This new camp plus a change in the manner of charging reimbursements accounts for the 75 percent increase in expenditures for the budget year. Chapter 1161, Statutes of 1959 changed the manner of the payment of reimbursements by the Division of Forestry. Previously, total camp costs were charged whereas now only the excess between costs in the camps compared to costs in regular institutions is counted as a charge against the Division of Forestry. As the per capita cost in the institution exceeds the per capita cost of camps, there will be no reimbursements from the Division of Forestry.

Ward movement and average population are as follows:

	1958-59	1959-60	1960-61
Average daily population-----	241	265	268
Parole releases-----	502	540	540

15.8 new positions are provided in this budget for the operation of the Washington Ridge Camp. These positions are discussed in General Analysis, Departmental Summary. (See page 121.)

## GENERAL ANALYSIS

## Objectives

The Fricot Ranch School for Boys is a correctional school for training, education and rehabilitation of delinquent boys primarily between 8 and 13 years of age. The purpose of the school is to provide a residential treatment center for the youngest and most immature boys committed to the Youth Authority and to return them to society as useful citizens.

50-boy living unit will be available for occupancy in August, 1960.

Ward movement and average population at this institution are as follows:

	1958-59	1959-60	1960-61
Average daily population -----	172	175	203
Parole releases -----	116	150	182

## Program and Performance

This institution places major emphasis upon a program of academic education and counseling. Minimum custodial standards are maintained as part of the treatment program. Because of its location in the mountainous Mother Lode country the school is able to carry on a program of scouting, hiking, and outdoor living as part of its total rehabilitation program. A new

Included in this budget are 17.6 new positions to meet the increased workload. These include 1 typist; 8 custodial positions; 4 teachers with 0.3 vacation relief; and 0.5 plumber. 3.8 food service personnel are included to improve the cleanliness of the kitchen and dining room as well as to meet the workload created by the increase in population. These positions are discussed in the General Analysis, Departmental Summary. (See pages 122 and 123.)

## GENERAL ANALYSIS

## Objectives

The Fred C. Nelles School for Boys is a correctional school for the rehabilitation of delinquent boys, primarily between the ages of 13 and 15. The purpose of the school is to return the youths to society as useful citizens.

## Program and Performance

The Fred C. Nelles School conducts a program of education, training, and treatment designed to guide the delinquent youth into accepted behavior patterns. The educational program covers the elementary and junior high school grades and is remedial in nature. Academic and industrial arts shop programs similar to

the public school programs are conducted to enable wards to return to the public school system at the grade level commensurate with their age. The small farm and gardening project is discontinued in this budget and a flower gardening and landscaping project has been substituted to train youths who would benefit from this work experience.

The average age of the wards at this institution has dropped from 15.3 years in 1956 to 13.8 in 1959. Ward help in the operation of the kitchen, dining room, and laundry, as well as the maintenance program, is planned to be reduced because all wards will receive a full-time school program.

a Composed of savings in salaries and wages, \$9,815; operating expenses, \$10,947; equipment, \$1,943; and increased reimbursements, \$573.

## GENERAL ANALYSIS

## Objectives

The Paso Robles School for Boys is a correctional school for the rehabilitation of delinquent boys primarily between 15 and 17 years of age. The purpose of the school is to rehabilitate these boys and return them to society as useful citizens.

## Program and Performance

The Paso Robles School for Boys was established in temporary buildings on the old Estrella Army Air Base in 1947. The first units of permanent construction were occupied in 1954.

The rehabilitation process is carried out through a program of education, training, counseling, and treatment designed to

guide boys into acceptable behavior patterns. The education program is both academic and prevocational. It is remedial in nature and covers junior and senior high school subjects with provision for graduation from high school for those who successfully complete the required courses. The prevocational phase of the program was expanded during the 1957-58 fiscal year with the completion of additional shop units.

A small farm and garden operation is conducted as part of the education program to train boys interested in this field. The farm program furnishes eggs, poultry, and pork to the school as well as a limited amount of fresh vegetables. Boys are used to help in operation of the kitchen, dining room,

12	Personnel man-years-----	305.7	331.6	343.6	12
13					
14					
15					
16					
17	<b>Objectives</b>				
18	The Preston School of Industry is a correctional school for				
19	the custody, training and treatment of delinquent boys, pri-				
20	marily between the ages of 17 and 21 years. The purpose of				
21	the school is to rehabilitate these youths and return them to				
22	society as useful citizens.				
23					
24	<b>Program and Performance</b>				
25					
26	The Preston School of Industry conducts an educational pro-				
27	gram in 3 general areas. These are:				
28	1. Academic instruction for wards who are from 3 to 5 years				
29	behind the educational level commensurate with their				
30	chronological age. The program is of elementary and high				
31	school level, including graduation from high school for				
32	those successfully completing the necessary courses.				
33	2. Vocational training in various trades such as printing,				
34	auto mechanics, cabinet work, electrical work, sheet metal				
35	and others.				
36	3. Farm program with basic education in the operation of a				
37	dairy, poultry unit, hog ranch and field crops.				
38					
39	Wards are used to help in the operation of the kitchen, din-				
40	ing room, laundry and maintenance program. Training and				
41	supervision are given in these areas as a part of the total				
42	program.				
43	A program of counseling to understand and remove the causes				
44					
45					
46

## GENERAL ANALYSIS

## Objectives

The Youth Training School is a correctional facility for the rehabilitation of delinquent boys primarily between 17 and 21 years of age. The purpose of the school is to rehabilitate these wards through an emphasis on vocational training with meaningful work experience and to return them to society as useful citizens.

## Program and Performance

The Youth Training School is located near Ontario, California. The first units of permanent construction will be occupied January 1, 1960. The total construction program is planned in 3 phases which when completed will provide housing and program for 1,200 wards. Phase I provides for 1 2-story, 400-bed housing unit; administration and hospital building; vocational

<sup>a</sup> Composed of savings in salaries and wages, \$39,795; operating expenses, \$45,117; equipment, \$2,657; and excess reimbursements, \$11,027.

<sup>b</sup> Composed of savings in operating expenses.

<sup>c</sup> Excluding moving expenses and inventory requirements, but includes all other cost of operating the institution.

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61	
1	GENERAL ANALYSIS—Continued				
2	Program and Performance—Continued				
3	shops; academic school; kitchen and commissary; boiler plant				
4	and other related buildings. Phase II scheduled for completion				
5	and occupancy in March 1961, provides for the second 400-bed				
6	housing unit and expanded facilities for the vocational shops,				
7	auditorium, chapel and academic classrooms. Phase III provides				
8	for the third 400-bed housing unit, expanded facilities for office				
9	space in the administration building and additions to the com-				
10	missary. Completion of Phase III is scheduled for the 1961-62				
11	year, and will provide for the full 1,200 capacity program.				
12	The rehabilitation process is carried out through an intensive				
13	program of education, training, counseling and treatment de-				
14	signed to guide young adults into acceptable behavior patterns.				
15	The program is designed to give wards pre-employment training				
16	in the various vocational fields and to provide an opportunity				
17	for completion of the requirements for high school graduation.				
18	The vocational training program consists of 2 major divisions:				
19	(1) formal vocational instruction; and (2) related work experi-				
20	ence in maintenance and operation of the institution. The work				
21	experience program will be conducted in 2 major areas: (1)				
22	plant maintenance and operation, and (2) food service. The				
23	auxiliary functions vital to institutional administration will be				
24	performed by wards under close supervision of journeyman				
25	instructors in a program generally consisting of one-half day				
26	vocational training in the shops and one-half day related work				
27	experience.

Average population in each quarter in 1960-61 is as follows:

## 1960-61 FISCAL YEAR

1st Quarter	2d Quarter	3d Quarter	4th Quarter
390	390	420	695

A total of 538 wards will be released on parole in the 1960-61 fiscal year.

91.5 new positions are included in the 1960-61 fiscal year and are predicated upon the opening of the second 400-boy living unit.

They are briefly classified by function as follows:

Business services	1
Unit administration	1
Custodial and personal care	53
Medical care	3.5
Education and religion	17.5
Classification and counseling	7.5
Feeding	7
Plant operation	1

These positions are discussed further in the General Analysis, Departmental Summary. (See page 121.)

## GENERAL ANALYSIS

## Objectives

The Ventura School for Girls is a correctional school for rehabilitation of the older delinquent girls, primarily in the 16 to 21 age group. The purpose of the school is to rehabilitate girls and return them to society as useful citizens.

## Program and Performance

The Ventura School for Girls conducts a program of educational training and counseling to treat the causes of delinquent behavior. The education department offers a remedial program at the junior and senior high school level, with graduation from high school for those who successfully complete the required courses.

A vocational training program is emphasized to prepare girls for employment when paroled. Training is given in practical nursing, laundry operation, production sewing, stenography, accounting and related clerical work. A cooperative effort with the State Department of Employment seeks to make the educational program fit these girls for work when paroled.

The girls at this school live in cottage-type dormitories which

are equipped with individual kitchens and dining rooms, the cooking being done by girls under supervision, instead of the central kitchen standard in other Youth Authority institutions.

The present plant is old and in very poor condition requiring continuing maintenance. Custodial costs are high because of this and because of the relatively small capacity of the dormitories. A new institution is under construction and is planned for activation during the 1961-62 fiscal year.

Paroles and average ward population at this institution are as follows:

	1958-59	1959-60	1960-61
Average daily population -----	183	187	200
Paroles -----	294	315	347

The only additional staff proposed for the increase in population is 1 teacher position. There is included on the initial staff, 11 positions for the activation of the Special Treatment program at this institution. These positions are discussed in the General Analysis, Departmental Summary. (See page 123.)

## GENERAL ANALYSIS

## Objectives

The Department of Education, under the direction of the Board of Education, seeks to insure that all children of the State have an opportunity to attend the Public School System, and that once enrolled, they receive adequate instruction by qualified teachers. The Superintendent of Public Instruction, an elected official, is ex officio Director of Education and secretary and executive officer of the State Board of Education. The board is the policy determining body of the department. There are 10 members appointed by the Governor for 4-year terms. The department also operates a statewide system of colleges to offer qualified students instruction leading to careers in teaching and vocations. Preliminary training in the professions is also offered. Physically handicapped children and adults may receive an education, physical rehabilitation services or sheltered employment through the special schools and institutions operated by the department.

The department also administers joint federal-state programs dealing with the distribution of surplus commodities for educational purposes as well as administering jointly financed educational programs.

## Program and Performance

The department is divided into 6 divisions to handle specific areas of responsibility; Departmental Administration, Public School Administration, Instruction, State Colleges and Teacher Education, Special Schools and Services, and the Division of Libraries which for budgetary purposes is a separate unit. The program of each division is discussed in conjunction with its detailed budget presentation.

## DIVISION OF DEPARTMENTAL ADMINISTRATION

## GENERAL ANALYSIS

The Division of Departmental Administration, headed by a deputy superintendent of public instruction, furnishes executive, accounting, personnel, research and legal services to the Department of Education, and administers the program of teacher certification for the public schools.

All applicants for credentials must file fingerprints with this division, and reports are furnished by the Bureau of Criminal Identification of the Department of Justice on those applicants who have arrest records. This record is reviewed by a field representative to determine if the applicant's record is such that he cannot hold a California teaching credential. Since the reports generally indicate only the arrest record of an applicant, it is necessary to secure reports of the disposition of the case. In addition, the division is responsible for the investigation of noncertificated personnel.

An additional responsibility of this division is the program to assist and advise local school districts in problems relating to discrimination on the basis of race, religion or other grounds in connection with the employment of certificated personnel, as directed by Section 187 of the Education Code.

The Accounting Office of the division administers certain trust funds, and provides budgeting, purchasing, and internal auditing services. The accounting functions for the state colleges, special schools and California Industries for the Blind are performed by those respective agencies. The expenditures of the State Board of Education are included and administered through the departmental budget.

The Personnel Office exercises general direction over the personnel program of the Department of Education.

The Administrative Advisor's Office acts as legal advisor to the Superintendent of Public Instruction and his staff, the State Board of Education, and to the staffs of the state colleges, special schools and special service agencies in the department. It represents these agencies and officers in disciplinary actions, both contested and uncontested, involving disciplinary action against public school teachers and employees of the department and the state colleges. During general sessions of the

Legislature, the office prepares department-sponsored legislative bills, and prepares recommendations to the Governor on those bills of concern to the department. It drafts and passes on the legal adequacy of contracts, including those for the purchase of state-adopted textbooks, leases, deeds, easements, and probate documents affecting the department and the agencies under its jurisdiction.

The Bureau of Education Research is responsible for studies in the evaluation of public school curriculum, educational measurements, and in the area of school administration, such as finance, teacher preparation, class size and enrollment data. It also furnishes consultant services to school districts in advising and planning test programs. The tabulating machine section renders services to the various bureaus and divisions of the department. In the annual apportionment, the bureau assumes the responsibility for the mechanical computations for the school apportionment.

The Credentials Office evaluated 126,411 applications for credentials during 1958-59. It is estimated that 145,000 evaluations will be made during 1959-60 and 155,000 evaluations during 1960-61.

The 1960-61 Budget proposes 10.8 new positions in this division. These new positions are for the following purposes: 1 assistant field representative is proposed to meet the growing backlog of investigations on credential applicants. 1.5 accounting technicians are proposed on a reimbursement basis in the accounting office for workload increases caused by the administration of the National Defense Education program and the State College Dormitory program. This is reflected in the pro rata departmental administration charges. 1 assistant personnel analyst and 1.5 clerical positions are proposed in the personnel office for increased workload caused by additional employees throughout the educational function. Increased workload in the administrative advisor's office requires 1 counsel and 1 clerk. Increased workload, measured by the increase in the number of evaluations requires 1 additional credential technician and 2.8 clerks in the credentials unit.

<sup>a</sup> Expenditures from bond funds not included in overall budget totals.

<sup>b</sup> Federal grants and expenditures therefrom not included in overall budget totals.

## DIVISION OF PUBLIC SCHOOL ADMINISTRATION

## GENERAL ANALYSIS

The Division of Public School Administration assists school districts by rendering assistance in noninstructional areas. The services furnished include school planning, school district organization, school lunch, free textbooks, surplus federal property, the child care program, approval for veterans' training and advisory service in school finance and attendance and federal financial assistance under Public Laws 874 and 815.

The Administrative Services Bureau advises school districts on financial and administrative matters including child care centers. The bureau also reviews the audit reports of all school districts and takes appropriate action as indicated by the review.

The Bureau of School Apportionments and Reports verifies reports of school districts and compiles data for use by the public schools. The apportionments are made in 5 major stages to local jurisdictions by this unit. The bureau prepares for publication such materials as are necessary to establish and maintain uniformity of practices and procedures throughout the State in public school financial accounting. (See Local Assistance Section of the Budget for the apportionment of public schools.)

The school lunch program and the school milk program are federal grant-in-aid programs in which cash reimbursement and commodities are allocated to participating schools. The expenditures in the school lunch program and the school milk program are shown in the Local Assistance for Education portion of the budget.

The Bureau of Textbooks and Publications is responsible for the editorial policy of all department bulletins and for administration of the free textbook program.

The Bureau of Readjustment Education approves and supervises veteran training. Federal law (P-L 550) requires that each course for which reimbursement from the Veterans Admin-

istration is sought must be specifically approved. In return for performing this service, the Bureau of Readjustment Education is reimbursed by the Veterans Administration for a portion of its salary and travel expense. In addition, Sections 24201 through 24220 of the Education Code require that investigations be made to determine compliance with the requirements for authorization to issue specified diplomas as well as investigations that are necessary to determine whether or not there has been compliance with the provisions of the law in order that reports can be made to the Attorney General.

The Bureau of School Planning assists and advises school districts in regard to acquisition of sites and construction of school buildings.

The Bureau of School District Organization assists county committees with district reorganizations, taking into account population, transportation, economic and school building facilities. Some degree of the measure of success of the program is the steady decline in the number of elementary and high school districts and an increase in the number of unified districts. There has been a steady decrease in the total number of school districts. These facts are shown in the table below.

Year	Elementary	High School	Junior College	Unified	Total
1955-56	1,533	233	22	90	1,878
1956-57	1,499	232	23	95	1,849
1957-58	1,463	232	26	97	1,818
1958-59	1,402	229	27	103	1,761

No changes in program are proposed in 1960-61 and no additional positions are proposed.

## DIVISION OF INSTRUCTION

## GENERAL ANALYSIS

The Division of Instruction is the operating division through which the Department of Education co-ordinates the instructional program in the State's public school system. In addition, the department's services for upgrading and improving the statewide instructional program are provided through this division. Although the 2 major functions of this unit are the co-ordination and improvement of instruction, its functions in specific fields vary widely. In the field of adult education, the division, as required by law, approves all adult courses offered by local districts. In connection with special education programs and in certain vocational fields, the division provides classroom supervision services and in 2 programs, police officer training and fire training, division staff members regularly organize and conduct classes.

The Bureau of Elementary Education is responsible for the co-ordination and improvement of instruction in the elementary grades of the 1,505 elementary and unified districts in the State. The efforts of the bureau staff are concentrated on working with key personnel in state and regional meetings and on the preparation of instructional materials such as teachers' guides and similar publications. No staff time is required for programs of inspection and approvals, for accreditations, or for direct instructional services.

The Bureau of Secondary Education is responsible for the co-ordination and improvement of instruction in high schools and in this capacity works with the county superintendents and the high schools and unified school districts maintaining junior, senior, and 4-year high schools. In addition, the bureau is required by law to approve the courses of study of all secondary schools. It collects and analyzes annual reports from high schools and represents the department in the accreditation of high schools.

The Bureau of Junior College Education was established July 1, 1957, and is now in its third year of operation. The work of this unit was formerly carried on by the Bureau of Secondary Education. The bureau is responsible for the co-ordination and improvement of instruction in the public junior colleges.

The Bureau of Adult Education has the responsibility for co-ordinating and improving programs of adult and continuation education. In addition, this unit is required to approve more than 20,000 adult classes annually and to approve forum and lecture series, continuation high schools and special and evening classes and summer sessions in elementary schools.

The Bureau of Audio-Visual Education is responsible for the co-ordination and improvement of programs of audio-visual education in counties and school districts. The bureau is also a service unit for the department and for other state agencies and maintains materials and equipment to be used on a loan basis by departmental staff members and other state agencies where necessary.

The Bureau of Guidance is responsible for the co-ordination and improvement of guidance programs in counties and school districts and represents the department in working with other state agencies that provide services related to the guidance and placement of school pupils.

The Bureau of Physical Education, Health Education and Recreation is assigned the responsibility for the co-ordination of physical and health education and recreation programs in counties and districts. This includes responsibility for athletic services, medical and nursing services and school district co-operation in community recreation programs of various types.

The Bureau of Special Education is the unit through which the department co-ordinates, improves and supervises the various programs for pupils with special needs. These include programs on speech difficulties, hearing losses, sight limitations and crippling conditions. Because such programs carried by counties and school districts must meet specific requirements in order to qualify for special state reimbursements, this bureau has certain responsibilities for program approvals. Many of the counties and districts are unable to provide qualified supervisors for such specialized programs and in these cases, members of the bureau staff engage in classroom supervision. Also, instructional materials available to blind pupils through the American Printing House for the Blind are requisitioned and made available to California school districts by this unit.

<sup>a</sup> Expenditures from bond funds are not included in overall budget totals.

## DIVISION OF INSTRUCTION—Continued

## DIVISION OF STATE COLLEGES AND TEACHER EDUCATION

## GENERAL ANALYSIS

The primary functions of the Division of State Colleges and Teacher Education are: (1) to provide headquarters administrative services and coordination for the 14 state college campuses, and 3 off-campus centers; (2) to provide leadership to all teacher education institutions of the State, both public and private, in the preparation of more and better qualified teachers; (3) to carry forward, through the specialist in higher education and joint staff member, the planning and reports necessary to the development of an adequate but economical system of higher education in California; and (4) to provide administrative services to the California Maritime Academy, whose policies are determined by its own board of governors.

The Division of State Colleges and Teacher Education is administered by an associate superintendent as division chief. The staff provides central administrative services to the state college system employing over 9,500 persons and serving 52,874 full-time and 28,156 part-time students in fall, 1959. This division provides predominantly administrative rather than consultant services to the state colleges.

The specialist in teacher education provides consultant services not only to the state colleges but also to the private teacher education institutions presently accredited by the State Board of Education. Assistance is also given to institutions seeking accreditation for the first time.

Within the division there is provision for participation in the study of the immediate and long-range problems of higher education in California. The specialist in higher education is the Department of Education's representative on the Joint Staff of the Liaison Committee of the California State Board of Education and the Regents of the University of California. The 2 joint staff members continuously appraise, study, and document California's present and future needs in higher education. Their reports and recommendations are presented to the University Regents, the State Board of Education, and the Legislature.

The balance of the staff functions of the division are coordinated by the assistant chief of the division. These functions are grouped under 4 offices.

The educational planning office, under the supervision of the specialist in state college curricula, assists state colleges to develop educational programs, curricula, instructional standards, and in other related matters.

The facilities planning office, under the direction of a specialist in college facilities planning, assists state colleges and special schools to plan campuses and buildings; to develop building space, utilization, and maintenance standards; to prepare budgets for capital outlay projects for the state college system and the special schools.

The fiscal office is responsible for reviewing all fiscal matters affecting the state college system and to insure operational adherence to approved expenditures, divisional standards, and conformance with good business practice. The total 1959-60 support budget for the state college system is nearly \$65,000,000.

Proper administration of both the Division of State Colleges and the state college system is based on the assembly, analysis, and interpretation of reliable and appropriate data. The administrative planning office provides such data to the state college administrators and to the other units of State Government. An additional function of this unit concerns research and assistance on management problems within the Division of State Colleges and the state college system.

The 1960-61 Budget proposes 4 new positions in this division: 1 associate research technician is provided for work on the Liaison Committee of the Regents of the University of California and the State Board of Education. 1 administrative analyst is proposed for analysis and research necessary to meet the needs of a rapidly expanding state college system. 2 clerical positions are proposed for workload needs in the division typing pool including support of the proposed professional positions.

DIVISION OF SPECIAL SCHOOLS AND SERVICES

GENERAL ANALYSIS

The Division of Special Schools and Services provides administrative and educational supervision for the State residential schools for deaf, blind and cerebral palsied children and directs the programs of the California Industries for the Blind, Field Rehabilitation Services for the Adult Blind, the Opportunity Works Centers for the Blind, the Oakland Orientation Center for the Blind, and the Vocational Rehabilitation Section.

The data for the State residential schools, the California Industries for the Blind, the Opportunity Work Centers and the Oakland Orientation Center are shown in that section of the budget containing the detail of their requests.

The Home Teacher Counselor Service for the Blind acquaints blinded adults with the State services available and assists with an orientation program designed to each individual's particular needs. All blind persons are eligible for such services notwithstanding their financial status. Instruction is given in braille, typing, travel training, techniques of daily living and home economics. Close liaison with the Vocational Rehabilitation Section, Oakland Opportunity Center and Department of Social Welfare is maintained to eliminate duplicate services.

Totals, Salaries and Wages

During the 1958-59 fiscal year, Home Teacher-Counselors made 17,497 home calls. The Teacher-Counselors gave 10,091 lessons in braille, orientation, typing, etc., and provided clients with 6,806 counseling sessions. As of July 1, 1958, there were 845 clients under instruction and on June 30, 1959, 932 blind persons were receiving service. Of the total number of persons served during the year approximately one-half reside in rural areas.

The program of vocational rehabilitation is to assist disabled persons to achieve the maximum degree of self-support. It is based upon a co-operative plan between the State Department of Education and the United States Office of Vocational Rehabilitation and is administered by the Vocational Rehabilitation Service through its 2 regional, 9 district, and 14 branch offices. The total program is financed by State and federal funds. Expenditures for this program are reported in the budget for vocational rehabilitation.

No changes in the program of this division are proposed for 1960-61 and no new positions are requested.

During the 1958-59 fiscal year, Home Teacher-Counselors made 17,497 home calls. The Teacher-Counselors gave 10,091 lessons in braille, orientation, typing, etc., and provided clients with 6,806 counseling sessions. As of July 1, 1958, there were 845 clients under instruction and on June 30, 1959, 932 blind persons were receiving service. Of the total number of persons served during the year approximately one-half reside in rural areas.

The program of vocational rehabilitation is to assist disabled persons to achieve the maximum degree of self-support. It is based upon a co-operative plan between the State Department of Education and the United States Office of Vocational Rehabilitation and is administered by the Vocational Rehabilitation Service through its 2 regional, 9 district, and 14 branch offices. The total program is financed by State and federal funds. Expenditures for this program are reported in the budget for vocational rehabilitation.

No changes in the program of this division are proposed for 1960-61 and no new positions are requested.

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
		58-59 (filled)	59-60 (Auth.)	60-61 (Auth.)			
1	NATIONAL DEFENSE EDUCATION ACT TITLE II, STUDENT LOAN PROGRAM						
2	Objectives						
3	Title II provides loans to worthy and needy students in institutions of higher learning within the State. By means of forgiveness of a portion of the loans to those who engage in the profession of teaching, there is special emphasis to encourage students to enter the field of teaching.						
4	Program and Performance						
5	In order to continue the Student Loan Program, authorized by Chapter 952, Statutes of 1959, and financed in the current year by Chapter 1263, Statutes of 1959, \$200,000 is included						
6	EXPENDITURES						
7	General Fund				-	\$1,000,000	\$2,000,000
8	Federal funds <sup>a</sup>				-	100,000	200,000
9					-	900,000	1,800,000
10	NATIONAL DEFENSE EDUCATION ACT TITLE III, IMPROVEMENT OF INSTRUCTION						
11	Objectives						
12	Title III of the National Defense Education Act is concerned with the improvement in instruction in the fields of science, mathematics and modern foreign languages. During the current and budget years federal funds for this program must be matched on an equal basis.						
13	This program provides federal funds to be matched dollar for dollar by local districts for the purchase of equipment, materials, and minor remodeling for instruction in science, mathematics, and modern language, and provides federal funds to be matched dollar for dollar by the State for the administration and supervision of the program.						
14	Before a state can participate in the provisions of Title III, it must prepare and have approved by the U. S. Commissioner of Education a state plan which in fact becomes the State's contract with the Federal Government for participation under the provisions of Title III. Federal funds are then released to the State in accordance with the approved state plan and on the basis of the state allocations determined by the U. S. Commissioner. These allocations are made on the basis of a formula as described in Section 302(a) of the act.						
15	School districts file applications for funds for the purchase of equipment, materials, and minor remodeling with the State Department of Education and certify local matching funds are available. The state department reviews the applications in terms of the act and the state plan, and approves or disapproves. Upon approval by the state department the local district is authorized to proceed to make purchases as outlined in their project proposal. Upon expenditure of funds by local district, the district then submits claim for reimbursements to the State Department of Education for one-half of the expenditure.						
16	2 intermediate stenographer-clerks are proposed in the budget year to process the increased number of local district applications for federal project funds. An increase is also proposed to purchase additional instructional materials and services for demonstration and workshop for the local districts.

38	Before a state can participate in the provisions of Title VA,						
39	it must prepare and have approved by the U. S. Commissioner						
40	of Education a state plan which, in fact, becomes the state's						
41	contract with the Federal Government for participation under						
42	the provisions of Title VA. Federal funds are then released to						
43	the state in accordance with the approved state plan and on the						
44	basis of state allocations determined by the U. S. Commissioner.						
45	These allocations are computed from a formula described in						
46	Section 502 of the act.

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61	CHANGE FROM 1959-60
------	------------------------------	-------------------	----------------------	---------------------	------------------------

GENERAL ANALYSIS—Continued

Program and Performance—Continued

Federal funds available for vocational education under the Smith-Hughes and George-Barden Acts must be matched on an equal basis by local or state funds. The George-Barden funds may be used for the reimbursement of salaries, traveling expense and instructional equipment while the Smith-Hughes funds allow for reimbursement of salaries only.

In addition to an administrative unit the state agency for vocational education is divided into 4 services which offer assistance and guidance to the local districts. These services include:

1. Agricultural education, which assists persons who are planning to enter, or have already entered the occupation of farming. In 1958-59 a total of 18,629 persons enrolled in such courses.
2. Industrial education is designed to help the person who is contemplating entering a trade or has already done so. The 1958-59 enrollment in this activity totalled 123,790.
3. Homemaking education, which operates a program of helping local school districts to assist persons engaged in the duties and responsibilities of the home. Enrollment in these courses for 1958-59 totalled 138,264, the largest of the 4 services.
4. Business education deals only with the distribution occupations phase of business education. This program is limited to part time, day, and evening classes and the 1958-59 enrollment totalled 84,522.

In addition to the basic vocational education program, there are 2 state-financed programs which augment the joint federal-

state-local program. These are the Fire Training Program and the Apprenticeship Instructional Materials Program. In the Fire Training Program, there are 6 itinerant instructors to provide service to local departments by in-service training. In addition several institutes are held each year as a means to train officers in modern fire fighting techniques. During 1958-59, 243 schools were held and 6,117 men were registered in the classes taught by itinerant instructors. A total of 4,716 class hours of instruction were given. In addition, 1 workshop and 1 arson seminar was held.

The Apprenticeship Instructional Materials Program prepares instructional materials for use by apprentices in trades where there are a minimum of 100 apprentices. There are currently 28 such trades. The materials prepared include, in addition to textbooks, such instructional aids as examinations, progress charts and teacher handbooks. These publications are sold to the apprentice at a price calculated to recover the direct costs of such publications.

The Practical Nurse Training Program was instituted in 1956-57 by the Federal Government for the purpose of developing curricula and programs in this field, and is carried on at the same level in the budget year.

Title VIII of the National Defense Education Act of 1958 appropriated funds for Area Vocational Education, or technical education. Positions established on an interim basis in 1959-60 for this program are proposed to be continued into the budget year. This program is entirely supported by federal funds and is for the purpose of stimulating the training of technicians.

The budget proposes to carry forward the existing level of service.

## GENERAL ANALYSIS

## Objectives

The Vocational Rehabilitation Section encourages and assists physically and mentally handicapped persons to achieve the maximum degree of self-support.

## Program and Performance

The section offers vocational guidance and placement services throughout the State. In many cases this takes the form of corrective surgery, the furnishing of prosthetic devices as well as psychological tests and placement. Other specialized activities include the business enterprise program for the blind which sets up vending stands for qualified blind persons, a research program on the rehabilitation of the industrially injured, and a federally reimbursed program dealing with incapacitated persons under the Social Security Law. The work of the section is divided into 6 functions or programs. These are all commented upon in the material below.

## Administration

Central program direction and housekeeping functions are carried on by this unit. This is the second year in which the so-called "bridge provisions" of the financing formula in Public Law 565 have been in effect. The agency is presently budgeted on a ratio of roughly 56 percent federal and 44 percent state funds. Beginning in 1959-60, the State had 4 years in which to adjust to the new financing formula which will be very close to 50-50 federal-state funds. The "bridge provisions" allow for a progressive reduction in federal support between approximately 58 percent (the former rate of participation by the Federal Government), and 50 percent over this 4-year period on the basis of 25 percent reduction of the difference each year.

As a part of administration, there is included a program of encouraging the establishment and operation of sheltered workshops for the disabled. Chapter 2030, Statutes of 1959, authorized the Vocational Rehabilitation Section to provide consultative services to public and private organizations to aid them in establishing and operating sheltered workshops for the disabled. Existing legislation provided that the State could establish and operate these centers. However, local participation was considered to be most valuable in making the program effective. It was therefore deemed advisable to aid the development of the workshops under local sponsorship rather than operation through the State Department of Education. The 1960-61 Budget continues the level of service to the workshops as authorized by the 1959 Legislature.

## Vocational Guidance and Placement

This unit comprises the main body of the program. It is divided into 9 district and 14 branch offices throughout the State.

In 1952 the Vocational Rehabilitation Service took steps to implement legislative intent by establishing a system of priorities for acceptance of eligible cases. Public assistance cases were placed high on the priority list and since that time a

substantial number of recipients of public relief have been rehabilitated into employment.

In 1954 the agency instituted an adequate statistical recording and reporting program so that careful records have been kept since that time on the nature and characteristics of the people served. In the 5-year period ending June 30, 1959, the agency rehabilitated 2,955 individuals who had been on public assistance. Since the average grant for these families was approximately \$1,500, the savings for 1 year would be \$1,432,500 in relief payments. If they remained self-supporting for 5 years, the savings would amount to \$22,162,000.

The following table presents the movement of the active caseload during the fiscal years 1956-57 through 1958-59:

	1956-57	1957-58	1958-59
Active caseload-----	4,919	5,554	7,126
Accepted during year-----	3,787	5,151	6,370
Total active-----	8,706	10,705	13,496
Closed, rehabilitated-----	1,567	1,528	1,790
Closed, unemployed after plan developed-----	507	615	617
Closed for other reasons before rehabilitation plan developed-----	1,078	1,436	2,144
Total closed-----	3,152	3,579	4,551
On hand at end of year-----	5,554	7,126	8,945

While the number of rehabilitations accomplished by the Bureau of Vocational Rehabilitation is numerically low compared to results in other states, evidence indicates that in many states the emphasis is placed upon serving only those disabled applicants who may be brought to employment most quickly and cheaply, often at the expense of more severely involved cases which have a greater need for service. The past experiences of the California program, when primary emphasis was placed on numbers served, created a condition where all staff efforts were directed toward bringing into the caseload persons whose needs were superficial and who might have been served through agencies such as the public employment service for community health services. California's present program gives priority to those cases whose need, broadly defined, is greatest and who, without assistance from the State, would become permanent public charges. Although such a policy is incompatible with the present national trend of serving large numbers of undifferentiated cases, the ultimate returns to this State are much greater.

## Business Enterprise Program for the Blind

This program assists blind persons to become self-supporting by providing equipment for the establishment of vending stands, snack bars, and cafeterias, in public buildings and industrial plants. Assistance is also furnished by a staff of Business Enterprise Officers to insure that such establishments are properly operated.

The agency has established a maximum allowance of \$4,000 to install any 1 stand.

a Neither receipts nor expenditures of federal funds are included in overall budget totals.

## VOCATIONAL REHABILITATION SECTION—Continued

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
		58-59 (Filled)	59-60 (Auth.)	60-61 (Auth.)			
GENERAL ANALYSIS—Continued							
1	Industrially Injured Project				Staffing for counselors has previously been provided on the basis of an adjusted formula of 1 vocational rehabilitation counselor for each 82,500 members of the population within the age group of 16 to 64. A minor adjustment is proposed of 1 counselor to each 80,830 members of the population. This will enable the agency to accept additional eligible cases and to help meet demands for services from the many referral agencies throughout the State. On the basis of population growth, the agency would be entitled to an additional 4 counselors using the old formula, while the new formula allows 6.8 clerical positions are proposed for workload increases in the budget year. 1 vocational psychologist whose salary has been offset by a reduction in case service funds is also proposed.		
2	Chapter 1738, Statutes of 1955, provided funds for conducting research and demonstration projects in connection with the problem of rehabilitation of disabled workers. For the past 4 years the agency has been carrying on a project of working directly with insurance carriers and self-insured in the rehabilitation of the industrially injured. This project has been financed 66 percent from federal funds and 34 percent from state funds.				Approximately \$95,000 additional case service funds are proposed to compensate for the discontinuance of the National Foundation for Infantile Paralysis' paying a portion of the cost of clients afflicted with polio. A deficiency of \$19,992 in state funds was provided in the current year to meet this situation. This was matched by \$20,008 in federal funds. The balance of the increase in case service funds is required by increased population to be served in the budget year.		
3	Chapter 2031, Statutes of 1959, continued the project through the 1959-60 fiscal year, at which time a report will be presented to the Legislature.				In the Disability Certification Program, 8 new positions were authorized by the Social Security Administration after the 1959-60 Budget was approved by the Legislature—4 to handle the increased workload in the current year and 4 for the budget year. All 8 are shown as proposed new.		
4	Disability Certification Program				Unless there are liberalizing amendments accepted by the Congress, the present and proposed staffing will be adequate for the 1960-61 fiscal year. If the program is liberalized and additional staff is needed, the necessary funds will be made available from the Federal Government.		
5	This program is completely financed from the Federal Social Security Trust Fund. It involves the disability certification program connected with the Old Age and Survivors Insurance.						
6	1960-61 Program						
7	The 1960-61 program provides for an increase in the vocational rehabilitation section. In administration 1 administrative assistant and a related clerical position are proposed in order to assist the chief of the section in meeting the increased workload demands. 1 supervising counselor II is proposed to head up a new district office in Van Nuys. The additional cost will be partially offset by reduced travel costs. District supervisory personnel and costs are carried in administration.						
8	In the vocational guidance and placement unit, 1 additional supervising counselor I is provided to maintain the supervision level for the 6 proposed new counselors to be added in 1960-61.

## GENERAL ANALYSIS

## Objectives

The State Library has several responsibilities in addition to maintaining the collection of books, documents, reference materials, and other items of historical or artistic value. These include: furnishing basic reference service to the State Legislature and the executive branch of the State Government; assisting and stimulating the development of public library services throughout the State; representing the interests of the State in the accumulation and preservation of historical material regarding the State; and providing supplementary library materials and informational and reference service to the libraries of the State.

## Program and Performance

The State Librarian, who is appointed by the Governor, directs the activities of the State Library which, in addition to the Administration Section, is composed of 3 operating bureaus. These are Field Services, Reader Services, and Technical Services.

The Field Services Bureau is responsible for the stimulation and development of public library facilities and service throughout the State, for the making of studies and surveys of library needs and certain delegated responsibilities in relation to the supervision of the county libraries.

In 1958-59 assistance was given by the Field Office staff to county and municipal libraries and special studies of library problems were made or begun in 4 communities. Staff time was directed also toward areas where counties are without county library service.

The entire field program has been accelerated by the Federal Library Services Act through which reimbursed projects have been or are demonstrating improved library services and systems in the following rural areas: The Butte County Bookmobile Demonstration was completed and the bookmobile and its contents were turned over to the county in November 1958; the Amador County-Stockton project which called for a demonstration of co-operative services was renewed by the board of supervisors and city council; the Santa Barbara co-operative project also ended in the 1958-59 fiscal year. The San Diego Bookmobile project was begun toward the end of the 1958-59 fiscal year and is being carried into 1959-60; preliminary plans were made for the San Joaquin Valley Co-operative Reference project in 1958-59 and are being further developed in 1959-60. The small exhibit bookmobile, purchased with federal funds, began operation in 1958-59. It was taken to Kings County for National Library Week and is being used in counties without library service or with inadequate service.

An additional field consultant and the necessary clerical assistance are being added as part of a 3-year program to

strengthen the development of public library facilities throughout the State.

In 1958-59 the Reader Services Bureau opened a Legislative Reference Branch in the State Capitol to provide a more convenient reference service to the Legislature and its staff. To meet the increased workload and to maintain the existing level of service 0.8 additional man-years are proposed in 1960-61. The Government Publications Section co-operated with the State Department of Finance in the latter's study of the depository system for California state publications and a field survey of 10 depository libraries in the San Joaquin Valley. As a result of that study, 1 librarian III and a varitypist are being added to transfer to the State Library the administration of the depository system. An intermediate typist-clerk authorized on a temporary basis in 1957-58 for the Law Section classification project is continued on a permanent basis until the end of the project. It is planned to move the Sutro Branch from its present location in the San Francisco Public Library to leased quarters in the University of San Francisco Library during the 1959-60 fiscal year as provided for in the 1959 General Session of the Legislature. An intermediate typist-clerk was set up in the current year temporarily to handle the anticipated workload in the genealogy section of the library. This position is shown as proposed new in 1960-61 in anticipation of continued workload increase.

The 1960-61 proposal contains 1.5 positions in the Circulation Unit to handle the increased workload which is anticipated. 1 position is proposed for the project of transferring the serial and periodical records to the more efficient visible file form.

In addition to the proposed new positions above there is included in this budget a \$36,610 increase in funds available for book purchases to meet the basic responsibilities of the library and anticipated increased demands. The continuing increase in services rendered by the Books for the Blind Section of the Technical Services Bureau is exemplified by the significant passing of the 100,000 mark in circulation of materials for blind borrowers during the current fiscal year. 1 librarian II is proposed in the Books for the Blind Section to provide adequate professional coverage as well as some relief for the California Section backlog. 0.5 intermediate clerk is added for workload increases in the Blind Section. 2 clerical positions are proposed to handle the increased workload connected with the 48 percent increase in total book budget proposed in the budget year. 0.5 stock clerk is proposed in the Property and Shipping Section for workload increases. 2 limited term positions are proposed for a major realignment of the library collections to provide for future growth and to make collections more accessible.

<sup>a</sup> Neither federal funds nor expenditures therefrom are included in the overall budget totals.

<sup>b</sup> Neither receipts nor expenditures of federal funds are included in the overall budget totals.

a The Divisions of Agriculture at Chico State College and Fresno State College were supported from the State College Fund in 1958-59. From 1959-60 they will be supported from the General Fund.

b California State Polytechnic College was partially financed from the Fair and Exposition Fund until September 1959. From that time it will be supported entirely from the General Fund.

**GENERAL ANALYSIS**

**Objectives**

There are 14 state colleges with 15 campuses located strategically throughout the State. The state colleges with the exception of Stanislaus State College, Orange County State College, and the State College for Alameda County offer 4- and 5-year programs in teacher education, liberal arts, occupational, technical and preprofessional curricula. Fresno, San Diego, and San Francisco State Colleges operate off-campus centers in Bakersfield, El Centro and Santa Rosa, respectively, and offer instructional programs and upper division education courses leading to an elementary teaching credential.

The California Maritime Academy, controlled by an autonomous board of governors, is a technical-vocational institution of higher education.

This institution, which is supported in part by the Federal Government, trains qualified young men to become licensed officers in the Merchant Marine and offers courses leading to a bachelor of science degree in either nautical science or marine engineering.

**Program and Performance**  
**Enrollment Trends**

The following tables reflect the tremendous growth in students (FTE) during the period 1951 through 1959. 1 area of particularly heavy growth has been in the number of limited students enrolled. In 1959-60 the number of limited students is 5 times greater than the number reported in 1951-52, while during the same period of time, total student enrollment increased about 2½ times.

**Annual Full-Time Equivalent\* Enrollment of Regular and Limited Students in California State Colleges, Regular Sessions,† 1951-52 Through 1959-60 (Exclusive of California Maritime Academy)**

Year	Regular students	Limited students	Total students	Percent limited
1951-52 -----	22,584	1,666	24,250	6.9
1952-53 -----	23,638	2,147	25,785	8.3
1953-54 -----	26,777	2,804	29,581	9.5
1954-55 -----	31,269	3,236	34,505	9.4

<sup>a</sup> After deduction of reimbursements of student fees, charges to employees, federal payments and payments from other agencies for services rendered by the college.

<sup>b</sup> Includes summer quarter FTE.

<sup>c</sup> After deduction of expenditures for summer session and extension only.

Year	Regular students	Limited students	Total students	Percent limited
1955-56 -----	36,496	3,808	40,304	9.4
1956-57 -----	41,577	5,086	46,663	10.9
1957-58 -----	46,014	6,228	52,242	11.9
1958-59 -----	49,360	7,284	56,644	12.9
1959-60 -----	54,601	8,240	62,841	13.1

\* Full-time equivalent students are computed on the basis of 15 semester units of instruction representing 1 student enrollment.

† Includes enrollment for summer quarter at California State Polytechnic College which is financed by the State.

**Teacher Education**

The state colleges are the most important source of trained teachers in the State of California. The following table illustrates the importance of the state colleges in the field of teacher education.

**Comparison of Credentials Issued on Institutional Recommendations by Types of Accredited Institutions in California, 1951-52 Through 1958-59**

	State colleges percent	Univ. of Calif. percent	Private colleges and Univ. percent
1951-52 -----	46.4	17.5	36.1
1952-53 -----	52.3	15.3	32.4
1953-54 -----	49.7	18.5	31.8
1954-55 -----	53.6	14.9	31.5
1955-56 -----	59.8	13.5	26.7
1956-57 -----	57.5	14.5	28.0
1957-58 -----	59.8	13.0	27.2
1958-59 -----	64.3	11.4	24.3

It is apparent that a large portion of the program of the state colleges is oriented toward teacher training. This is corroborated by a comparison of the number of credentials recommended by the state colleges with the total number of students securing degrees and/or credentials through the state colleges as shown in the table following:

Department of Education

STATE COLLEGES—Continued

GENERAL ANALYSIS—Continued

Number of Credentials Recommended\* by the California State Colleges, 1951-52 Through 1958-59

Year	Total students securing degrees and /or credentials	Number of credentials recommended by the state colleges	Percent recommended for credentials
1951-52	7,358	2,776	37.7
1952-53	6,926	2,800	40.4
1953-54	7,285	2,869	39.4
1954-55	8,110	3,488	43.0
1955-56	9,968	4,403	44.2
1956-57	11,654	4,570	39.2
1957-58	13,063	4,539	34.7
1958-59	14,957	5,838	39.0

\* Issued on institutional recommendation.

Pilot internship programs have been inaugurated in several of the State colleges with the objective of recruiting into the teaching profession persons without preparation for teaching, but who hold a baccalaureate degree. These internship programs are designed to prepare persons as either elementary or secondary school teachers. Individuals are first enrolled in a summer session for the purpose of orientation to the job of teaching. Following this, the candidate is placed in a regular teaching position during which time he also attends a weekly seminar at a college or university. A second summer session consists of work in professional education. At the end of the second summer session, the candidate is issued a regular teaching credential. San Francisco State College and San Diego State College have had several years of experience in carrying on programs of this nature.

Degrees Granted and Graduate Programs

There has been a marked growth in graduate programs in the state colleges since 1951; however, in more recent years, this growth has reached a plateau with a decrease in master degrees granted in 1958-59 as reflected in the following table.

Number of Bachelor's and Master's Degrees Granted in California State Colleges, 1951-52 Through 1958-59

Year	Bachelor's degrees	Master's degrees	Total degrees	Percent masters
1951-52	5,691	434	6,125	7.1
1952-53	5,272	653	5,925	11.0
1953-54	5,423	752	6,175	12.2
1954-55	5,840	975	6,815	14.3
1955-56	6,878	1,270	8,148	15.6
1956-57	8,709	1,447	10,156	14.2
1957-58	9,737	1,761	11,498	15.3
1958-59	10,770	1,668	12,438	13.4

Programs Offered

The following table indicates the scope of the programs offered in the state colleges in the spring semester of 1959 and their relative size is expressed as full-time equivalent enrollment.

Full-Time Equivalent Enrollment by Subject in California State Colleges, Spring, 1959

Subject	Full-time equivalent enrollment	Percent
Aeronautics	52	0.1
Agriculture	1,094	2.0
Art	1,725	3.1
Biological sciences	2,823	5.1
Business	4,998	8.9
Education	8,453	15.1
Engineering	2,733	4.9

Subject	Full-time equivalent enrollment	Percent
English and literature	4,415	7.9
Foreign languages	719	1.3
Health and safety education	967	1.7

Social sciences	9,112	16.3
Speech and drama	1,730	3.1
Totals	55,824	100.0

New Colleges

A state college for Stanislaus County was established by Chapter 2172, Statutes of 1959. The Governor's budget includes an instructional staff to serve an estimated enrollment of 120 students (FTE) as well as a planning staff for developing curricula and facilities. It is anticipated that the college will begin instruction in the fall of 1960 in rented facilities in much the same manner as Alameda and Orange County State Colleges began their instructional programs. (See pages 241 and 242 for the detailed budget for this college.)

State College Faculty

The increase in numbers of full-time and part-time faculty members needed to carry on the instructional programs of the state colleges from the years 1951-52 through 1958-59 is shown in the table below:

Teachers in California State Colleges, 1951-52 Through 1958-59

Year	Individuals			F. T. E. Teachers	
	Full-time	Part-time	Total	Total	Increase prior year
1951-52	1,306	406	1,712	1,436	43
1952-53	1,343	505	1,848	1,494	58
1953-54	1,553	539	2,092	1,674	180
1954-55	1,689	566	2,255	1,845	171
1955-56	2,037	726	2,763	2,231	386
1956-57	2,501	823	3,324	2,729	498
1957-58	2,991	665	3,656	3,197	468
1958-59	3,282	903	4,185	3,569	372

Over and above the additional faculty needed each year to handle enrollment increases and new programs, new faculty members are needed to compensate for normal turnover which runs 6 to 8 percent per year. A total of 235 new full-time faculty members were appointed in 1954-55, 416 in 1955-56, 580 in 1956-57, 606 in 1957-58, and 547 in 1958-59. According to a recent study of the demand for new faculty in the state colleges, it will be necessary to recruit an average of over 1,186 such new full-time equivalent faculty members per year throughout the period 1960 to 1975.

## Department of Education

## STATE COLLEGES—Continued

## MAJOR PROGRAM AUGMENTATION AND COSTS

The total increase in 1960-61 over the revised amounts budgeted in 1959-60 for the state colleges in 1959-60 is \$8,560,730 or 14.8 percent. The major portion of this increase results from increased workload arising from an estimated enrollment growth of 12.1 percent and the addition of approximately 925,000 sq. ft. of new facilities. It should be pointed out that

the budgets are based on existing policy and do not contain any recommendations of the master plan committee as established by Assembly Concurrent Resolution No. 88 which will be presented to the Legislature during the 1960-61 Session.

This increase can be further identified as follows:

## Salaries and Wages:

Merit salary adjustments for existing positions	\$2,360,393
Additional teachers per faculty staffing formula	2,290,000
Administrative positions recommended in the Department of Finance's Management Survey No. 828	170,000
Professional, technical and clerical personnel for enrollment growth in accordance with staffing standards	2,091,181
Professional and clerical positions for implementation of policy requiring full matriculation of all students	103,000
Professional and clerical positions for student loan program (including adjustment of counselors from 10 to 12 month salaries)	35,000
Cost of adjustment from 10 to 12 months salaries for division chairman, graduate coordinators and placement officers	56,000
Provision of half-time housing coordinators for off-campus housing	17,000
Maintenance personnel for new facilities in accordance with accepted staffing standards	628,000
Increase in estimated salary savings	—341,550

## Operating Expenses:

Increase in allowance for out-of-state travel	47,500
Increase in allowance for special lecture services	13,500
Special allowances for library books in order to provide minimum libraries for new colleges and new curricular offerings	148,000
For price increases, growth of enrollment, growth of new facilities	951,071

## Equipment:

For price increases, growth of enrollment, growth of staff and opening of new facilities	331,085
Increase in contributions to State Employees' Retirement Fund	431,247

## Reimbursements:

Increased reimbursements, including student fees	—770,697
--	----------

Included in the above tabulation is \$355,492 for Stanislaus State College which will provide a planning staff for development of a new curricula and facilities and an instructional staff based upon a budgeted enrollment of 120 students (FTE) for 1960-61.

The increase in allowance for out-of-state travel reflected above provides an allowance of \$10 per faculty member and instructional and noninstructional professional position (FTE) and \$700 per college for travel related to recruitment of new faculty. A basic minimum allowance of \$2,000 is provided for the 3 new colleges for meeting recruiting difficulties.

Special lecture service expense is increased from \$1,000 to \$2,000 per college in order to allow for the increased cost of employing outstanding lecturers. There has been no substantial increase in budgeted allowances for this service in the last 5 years.

Each of the state colleges charges employees and students a parking fee which has been established by the Superintendent of Public Instruction. An estimated amount of \$733,243 will be collected in the current fiscal year. Expenditures of \$220,630 are budgeted for the complete operation of these facilities and includes security personnel, rental and/or purchase of automatic control devices, maintenance and repair of parking areas, the collection and accounting of fees, and other miscellaneous expenses. Expenditures for the above purposes are budgeted in the amount of \$228,786 for the 1960-61 fiscal year; gross reimbursements from this source are estimated to increase to \$804,676. The capital outlay program for 1960-61 contains provisions in the state colleges for a program of constructing parking facilities in an amount approximating the total net reimbursements for 1959-60 and 1960-61.

The presently accepted library book acquisition formula is based on enrollment. By so basing it, the acquisition rate fails to provide a basic minimum library for colleges that reach a high enrollment in a relatively short period of years. The budget includes over-allowances for the following state colleges: Alameda County, California State Polytechnic (Kellogg-Voorhis Campus), Orange County, San Fernando Valley and Stanislaus County. Neither does the formula provide adequate libraries for new graduate programs. For this reason special allowances are included at Long Beach, Los Angeles, Sacramento and San Jose State Colleges to provide adequate subject libraries for graduate programs recently approved by the Board of Education.

Student fees in the state colleges are budgeted at the same annual rate as the 1959-60 Governor's Budget, which are as follows:

a. Full-time regular students (more than 6 units a semester)	\$66
b. Limited students (6 units or less a semester)	17
c. Nonresidents	250

The budget includes a proposal to increase student fees for the California Maritime Academy to \$600 per year. This will cover the cost of room, board, health services, and certain instructional expenses and will result in a higher annual charge to each student of \$195. In addition, out-of-state students pay a tuition fee of \$270 per year.

## Proposed New Positions:

The 1960-61 Budget includes a total of 1,055.7 proposed new positions (both temporary and permanent). The following table shows the distribution both by college and principal function:

Department of Education

Positions are budgeted on the basis of staffing formulas and standards. Workload units are applied to the formulas and standards and all resulting increases are presented as proposed new positions.

INSTRUCTION FUNCTION

Teachers:

a. The need for teachers is determined by application of a faculty staffing formula which was first adopted as a budgetary tool in 1953-54. The formula determines the number of full-time teaching positions based upon a 45-hour workweek for instructors. The formula allows 9 hours a week for nonteaching assignments (such as student advising, committee work, administrative duties, etc.) and 36 hours per week for teaching assignments including class preparation as well as actual instruction. The number of hours of actual instruction in relation to class preparation varies between 12 and 24 hours per week depending upon the type of instruction; e.g., lecture, activity and laboratory.

In order to compute the need for teachers, the number of sections is determined based upon distribution of the total estimated campus enrollment among the various subject offerings. This distribution is arrived at largely on the basis of past experience, anticipated shifts in program emphasis, and expansion of curricular offerings. According to the formula, a total of 409.9 additional teachers are required to meet the instructional demands in the budget year for the State Colleges. 2 teachers are also added to the staff of the Maritime Academy.

Supervision:

- a. The following positions are provided in the budget in accordance with the recommendations contained in the Department of Finance's Management Survey No. 828.
- California State Polytechnic College (K-V)—Dean of College
  - Orange County State College—dean of educational services and summer session
  - Long Beach State College—administrative assistant to the dean of the college
  - Sacramento State College—dean of instruction
  - San Fernando Valley State College—dean of instruction

San Diego State College—administrative assistant to the dean of the college

b. Division Chairman, Curriculum Supervisors, Evaluators and Coordinators.

The 30.4 positions added in the budget have the responsibility of supervising various aspects of the instructional program. The need for each division chairman is measured by the number of teaching positions within a homogeneous grouping of curricula. Curriculum evaluators and supervisors are fractional teaching positions released from instructional responsibilities in order to develop a new curricula or supervise the offerings in a large existing curriculum. Curriculum coordinators, also fractional teaching positions released from instructional responsibility, supervise students doing internship work away from the college. These are used primarily for the supervision of practice teachers.

c. Technical and Clerical

Technical and clerical positions are budgeted on a ratio to teachers, the need for clerical positions by supervisory positions, and the requirements for positions based on the accepted audio-visual staffing formula. 137.9 new positions are required for these responsibilities.

LIBRARY

74.1 new positions, including 36.5 professional positions, are added, based upon the library staffing formula. This formula allocates staff on the basis of accepted workload standards for technical processing of new volumes; mending, inventorying and discarding existing volumes; sorting and shelving volumes; and manning public service desks and checkout points.

ADMINISTRATION AND BUSINESS MANAGEMENT

a. The following positions are provided in the budget in accordance with the recommendations contained in Management Survey No. 828 which bases the needs on the size of the campus enrollments.

- Chico State College—half-time administrative assistant to the president
- Fresno State College—administrative assistant to the president

## Department of Education

## STATE COLLEGES—Continued

## PROPOSED NEW POSITIONS FOR STATE COLLEGES—Continued

ADMINISTRATION AND BUSINESS MANAGEMENT—  
Continued

Humboldt State College—half-time administrative assistant to the president

Long Beach State College—administrative assistant to the president and an administrative assistant to the business manager

Los Angeles State College—vice president

Sacramento State College—administrative assistant to the president

San Fernando Valley State College—administrative assistant to the president

San Diego State College—administrative assistant to the president

San Francisco State College—administrative assistant to the president

- b. In addition, 91.5 new positions are added in the executive and business management function in order to provide professional, technical and clerical assistance in accordance with staffing formulas. A new formula for business management staffing is being only partially implemented in order to allow further testing of the various workload factors during the ensuing year. Included in this total of positions are 1.2 clerical positions in order to handle the business office workload for the residence halls. The expenses of these positions will be fully reimbursed from the Dormitory Revenue Fund.

## STUDENT PERSONNEL

- a. The following positions are provided in the student personnel function in accordance with the recommendations contained in Management Survey No. 828.

Alameda State College—associate dean (activities), associate dean (admissions and records)

Humboldt State College—half-time associate dean (admissions and records)

Los Angeles State College—administrative assistant to the dean of students

Orange County State College—associate dean (activities)

California State Polytechnic College, Kellogg-Voorhis Campus—associate dean (admissions and records)

- b. 23.8 clerical positions are provided in order to assist in the increased workload resulting from the new admissions policy which will be in effect in all state colleges during the budget year and will require full matriculation of all students.

- c. The student loan program, authorized by the National Defense Education Act, has caused increased workload problems resulting from the processing of individual loans. To meet this increased workload, 5.1 clerical positions are included in the budget. In addition, funds have been provided for the adjustment from 10-month to 12-month salaries for 12 counselors.

- d. Half-time housing coordinators are included in the budget for all the state colleges excepting Alameda, Los Angeles, Orange, San Fernando Valley and Stanislaus in order to assist in the monitoring of off-campus housing.

- e. The remaining 69.2 positions are based on accepted workload criteria.

## HEALTH SERVICES

25.8 new positions have been added in the health service area in accordance with the presently accepted formula. This includes doctors, nurses, laboratory technicians and clerks as required to provide a full health program in all of the state colleges, except Alameda and Orange County State Colleges which at present only have limited health service programs. Stanislaus State College will not have a complete health program in 1960-61.

## MAINTENANCE AND OPERATION OF PLANT

During the 1959-60 Budget Year it is estimated that a total of 24 new buildings will be put into operation in the state colleges and the California Maritime Academy. These new facilities will increase the total size of the physical plant by approximately 925,000 square feet. In order to provide adequate maintenance and security of these facilities, 153.3 new positions are included in the budget.

Included in this total of new positions are 62.2 custodians, based on the formula of 1 position per 15,000 square feet of building space, 28.6 groundsman positions in order to provide adequate maintenance of grounds in accordance with the accepted formula and 2.5 positions for maintenance of residence halls. These latter positions will be reimbursed from dormitory revenue funds.

## COLLEGE FARM

4.8 positions are added in the budget of Chico State College in order to operate and maintain the college farm which will be available for instructional purposes for the first time in 1960-61. These positions, which include a dairyman, an automotive equipment operator and general laborers, will provide a minimum level of service for maintenance of the college farm. 4.5 of these positions were included in the 1959-60 Budget; however, because of the problems of site acquisition, these positions were never established and have been deleted from the current year of the Governor's 1960-61 Budget.

## SUMMER SESSION AND EXTENSION

These programs are fully financed by students' fees. The 7.4 new positions included in the budget are offset by increased reimbursements.

## GENERAL ANALYSIS

## Objectives

The State College for Alameda County, established by Chapter 1681, Statutes of 1957, is an upper division institution offering programs in elementary teacher education, secondary teacher education, and business administration. The college is being planned to serve as a primary enrollment area consisting of Alameda County and portions of Contra Costa and San Mateo Counties.

## Program and Performance

The State College for Alameda County offered classes for the first time in the fall of 1959 in rented facilities in the City of Hayward. Course offerings for the first year of operation were limited to upper division education courses leading to an elementary teaching credential.

The 84.6 proposed new positions for the fiscal year 1960-61 are based upon an enrollment of 700 students (FTE) and continuation of operations in rented facilities.

Based upon the faculty staffing formula, 42.4 additional teachers are required. Other staff increases in the instruction function based upon accepted workload formulas include 1 audio-visual coordinator, 0.7 of a division chairman, 0.3 of a coordinator for elementary education, 0.3 of a coordinator for secondary education and 9.9 technical and clerical positions.

9.5 new positions are added for the administration and busi-

ness management areas including a half-time vocational instructor to assist in the planning of permanent college facilities, a half-time publications manager and an assistant personnel analyst. The remaining positions are technical and clerical in nature and are based upon accepted workload criteria.

9 new positions are added in the student personnel function including 2 associate deans, 1 for counseling and testing and the other for activities; a registrar; and 6 clerical positions.

Based upon the library staffing formula, 9 new positions are added to the library, principally for processing new volumes to establish a minimum facility.

Only 1 position, a laborer, is included for plant operation inasmuch as the cost of maintenance to the college is included in rental cost.

Instructional expense is allowed on the basis of \$29 per student (FTE). The allowance for out-of-state travel is budgeted on the basis of \$10 per faculty and professional position. In addition \$700 is budgeted to provide for out-of-state travel related to recruitment of faculty. \$2,000 is budgeted for special lecture service, this is an increase of \$1,000 over present allowances to other colleges in the past. All other operating expenses and equipment are allowed on the basis of enrollment, price levels and the establishment of the new college program.

## GENERAL ANALYSIS

## Objectives

Chico State College is a 5-year fully accredited college with programs in teacher education, occupational and pre-professional curricula designed to meet the needs of seven counties in the upper Sacramento Valley and in the contiguous mountain regions.

## Program and Performance

Chico State College was founded as a normal school in 1889, and is the second oldest of California's state colleges. Its primary responsibility is for the training of teachers for the public school system of the State. Its effectiveness in this respect is demonstrated by the fact that 50 percent of its students are enrolled in courses with teacher training objectives as shown by the following table:

	1956-57	1957-58	1958-59
Credentials recommended -----	238	277	396
Degrees granted -----	358	480	563

In recent years, the college has expanded its program into liberal arts, occupational, and pre-professional areas. Occupying an important place in the offerings are such curricula as agriculture, nursing, business, engineering and social work. Chico was one of the first state colleges to offer a degree program in Nursing.

The Agriculture program which was supported from the State College Fund prior to 1959-60, but is now supported from the General Fund, has expanded from an original terminal 2-year program to a 4-year degree program. During 1960-61, it is anticipated that the agriculture program will be operating on the new farm site which is to be acquired in the current year.

The enrollment figure for 1959-60 included in the Governor's 1959-60 Budget was 3,200 students (FTE). Recent re-estimates indicate that the enrollment for 1959-60 will approximate 2,880, a reduction of 320 students (FTE). Where possible, reductions are reflected in the current year in the 1960-61 Budget for all areas that are directly related to enrollment. These reductions include 7.7 instructors, 1.8 technical and clerical positions in student personnel, 5.5 technical and clerical positions in the instruction and library areas, and 4.6 in agriculture. Also oper-

ating expenses were decreased by \$26,744, including \$8,845 and \$1,725 in instructional and library expenses respectively.

The 20.3 proposed new positions for the 1960-61 fiscal year are required for the estimated enrollment of 3,000 students (FTE) and the completion of the new humanities building.

Based upon the faculty staffing formula, there is no increase in the present number of instructors. The only increase in the instructional function is a half-time clerical position for the agriculture curriculum. The 1960-61 Budget reflects an adjustment from a 10- to a 12-month salary for 1 division chairman in recognition of the annual workload.

A half-time administrative assistant to the president, based upon the recommendations contained in the Department of Finance's management survey No. 828, and a clerical position, are the only increases in the administration and business management areas.

1.3 new positions are included for the student personnel function including a half-time housing coordinator and a 0.3 clerical position to assist in processing student loans recently authorized by the National Defense Education Act. An adjustment from 10- to 12-month salaries is contained in the budget for the placement officer and 1 counselor in order to provide adequate staffing in these areas equal to the yearly workload. The increased workload for the counselor is directly related to the student loan program.

2.5 positions are added to the library staff in order to man the library during the extended hours of operation for 1960-61.

The largest increase in staff is in plant operation where 9.7 new positions are added, including 5.3 custodians based upon the accepted staffing formula, and 2.5 new positions for maintenance of new agricultural facilities to support the new farm program at the college.

4.8 new positions including a dairyman are included in the budget to assist in the operation of the college farm.

Instructional expense is allowed on the basis of \$29 per student (FTE). Special lecturer expense is budgeted at \$2,000. Out-of-state travel is allowed on the basis of \$10 per professional and faculty position plus an allowance of \$700 for travel related to recruitment of faculty. All other operating expenses and equipment are budgeted on the basis of enrollment, price levels, and maintenance of the physical plant.

<sup>a</sup> The college agriculture program was financed from the State College Fund prior to 1959-60, but it is now financed from the General Fund.

<sup>b</sup> After deduction of expenditures for summer session and extension.

<sup>c</sup> After deduction of reimbursements of student fees, charges to employees, federal payments and payments from other agencies for services rendered by the college.

## GENERAL ANALYSIS

## Objectives

Fresno State College is a 5-year accredited college, with programs in teacher education, agriculture and other occupational and preprofessional curricula, and the liberal arts designed to meet the needs of the San Joaquin Valley.

## Program and Performance

Fresno State College, established in 1911, is now located on sites totaling 1,286 acres adjacent to the City of Fresno. At this new site the college continues to carry out its traditional functions. The performance of the college in fulfilling its responsibilities toward the area it serves is illustrated by the number of successful teacher training candidates produced by the college and the number of degrees conferred. This is shown below:

	1956-57	1957-58	1958-59
Credentials recommended -----	381	407	375
Degrees Granted:			
General and professional -----	606	1,027	1,180
Agriculture -----	73	80	71

The 3 most important programs at Fresno State College, from the standpoint of enrollment, are teacher education, business, and engineering. Approximately a third of the total enrollment of the college can be attributed to the various teacher education programs. Agriculture, which is a relatively high cost program is fourth.

Other programs of significance in the total offerings of the college include biology, criminology, fine arts, home economics, humanities, industrial arts, nursing physical education and social science.

Fresno State College is one of the state colleges which has been authorized to conduct an off-campus resident center. This center is located in Bakersfield and offers programs for resident credit in elementary teacher education only. The enrollment anticipated at the center for the 1960-61 fiscal year is 200 students (FTE).

The total estimated enrollment for the fiscal year 1959-60 included in the 1959-60 Governor's Budget was 5,450. Current re-estimates indicate that the actual enrollment for 1959-60 will approximate 4,870. In order to adjust the 1959-60 Budget

<sup>a</sup> Support of agriculture program financed through the State College Fund in 1958-59 and the General Fund thereafter.

<sup>b</sup> After deduction of expenditures for Summer Session and Extension.

<sup>c</sup> After deduction of reimbursements of students' fees, charges to employees, federal payments, and payments from other agencies for services rendered by the college.

------	------------------------------	-------------------	----------------------	---------------------

## GENERAL ANALYSIS—Continued

## Program and Performance—Continued

for this reduction of 580 students (FTE), reductions have been made, where possible, in expenditure areas that are related to enrollment. These reductions include 10 teachers, a half-time vocational instructor (building program), 2 clerical positions, and operating expenses of \$33,146, including instructional expense of \$11,240, health expenses of \$6,650, and library expenses of \$4,195. Salary savings have been increased by \$108,868 in anticipation of further reductions in staff.

The 29.1 proposed new positions included in the budget for the fiscal year 1960-61 are based upon a total enrollment of 4,950 students (FTE) including 200 in agriculture and 200 at the Bakersfield off-campus center.

Based upon the faculty staffing formula which takes into account changes in program emphasis as well as expansion of curricular offerings, 7 new instructors are required in addition to those carried forward from the previous year. Other increases in the instructional area include 0.3 of a curriculum coordinator, 0.3 of an audio-visual coordinator and a half-time curriculum supervisor. Funds are included in the budget for the adjustment from 10 to 12 month salaries for 2 division chairman in recognition of the year-around workload.

3 new positions are added in the administration and business management functions including an administrative assistant, to serve the college president, as recommended in the Department of Finance's management survey No. 828. The remaining positions are clerical positions based upon accepted formula.

2.5 new positions are provided in the student personnel area including an admissions officer and a half-time clerical position based upon the increased workload resulting from the college's policy of requiring full matriculation of all students. Also included in this total are a half-time housing coordinator and a half-time clerical position. The last position is provided to

assist in processing student loans authorized under the National Defense Education Act. The budget provides funds for the adjustment from 10 to 12 month salary for the placement officer and a counselor in order to provide staffing in these areas based on the year-around workload. The increased workload on the counselor is directly attributable to the student loan program.

There are no increases in staff in the following areas: library, health services, and the college farm. Also there are no increases in staff for the summer session, extension and agriculture programs.

The largest increase in staff for 1960-61 is in plant operation where 15.5 new positions are added to meet the maintenance demands of the expanded physical plant. 4 new buildings are planned for completion in the budget year including a science wing, women's gymnasium, ROTC building and the speech-arts building. Included in this total of new positions are 12 custodians based upon the accepted standard of 1 per 15,000 square feet of building space. Other increases in staff include a plumber, a groundsman, a clerk, and a half-time stationary fireman.

Instructional expense is allowed on the basis of \$29 per student (FTE). The allowance for out-of-state traveling is budgeted on the basis of \$10 per faculty and professional position. In addition \$700 is budgeted to provide for out-of-state travel related to recruitment of faculty. \$2,000 is budgeted for special lecture service; this is an increase of \$1,000 over present allowances which have not changed substantially in the past five years. All other operating expenses and equipment are based upon enrollment, price levels and the maintenance demands of the physical plant.

**GENERAL ANALYSIS**

**Objectives**

Humboldt State College is a 5-year, fully accredited college with programs in teacher education, occupational, and pre-professional curricula designed to meet the needs of the north-western counties of the State.

**Program and Performance**

Humboldt State College was established in 1913 as a state normal school to carry out the function of teacher training. Although since 1935 Humboldt has been a state college it still has as its primary function the training of teachers. The performance of the college in meeting the needs of the area it serves is illustrated by the number of teacher training candidates produced by the college and the number of degrees conferred. This is shown as follows:

	1956-57	1957-58	1958-59
Credentials recommended -----	108	81	122
Degrees granted -----	164	170	250

The college has active programs in the social and natural sciences, fine arts, language arts and business.

Among its occupational curricula, Humboldt State College, because of its unique location, has offerings in fisheries, game, and forestry management. These programs occupy an important place in the offerings of the college.

At the time the 1959-60 Governor's Budget was prepared, the estimated 1959-60 enrollment for Humboldt State College was 1,850 students (FTE). It now appears that this estimate was too high since recent re-estimates place the enrollment at 1,590, a decrease of 260 students (FTE). To adjust the 1959-60 Budget for this decrease in enrollment, reductions, where possible, have

a Composed of savings in salaries and wages of \$152,410; operating expenses, \$63,497; equipment, \$23,035; decreased reimbursements of \$4,001 and \$60,000 appropriated by Item 78.5, Chapter 1, Statutes of 1958.

b Composed of savings in salaries and wages of \$14,520; operating expenses, \$9,455; equipment, \$2,370 and increased reimbursements of \$1,452.

c Composed of savings in operating expenses \$36,696 and equipment, \$2,040.

d After deducting expenditures for summer session and extension.

e After deduction of reimbursements of student fees, charges to employees, federal payments, and payments from other agencies for services rendered by the college.

4				
5	been made in certain areas and are reflected in the current year			
6	(1959-60) of the Governor's 1960-61 Budget. 5 teacher positions			
7	and 1 clerical position approved by the Legislature have been			
8	deleted in the current fiscal year and salary savings have been			
9	increased by \$28,041 in anticipation of further staff reductions;			
10	and reductions of \$11,246 have been made in operating expenses			
11	for instruction, health services, and the library.			
12	The 22.7 proposed new positions included in the budget for			
13	the fiscal year 1960-61 are based upon an enrollment of 1,670			
14	students (FTE) and the opening of the natural science and			
15	health service buildings.			
16	Only 2.3 additional instructors are included in the budget			
17	based upon the faculty staffing formula which takes into account			
18	changes in program emphasis as well as expansion of curricular			
19	offerings. 2.4 new supervisory positions are provided including			
20	1.3 production managers for supervision of game pens, fish			
21	ponds, and college forests. Other additions within the instruc-			
22	tional function include 0.3 of a coordinator of graduate studies,			
23	a 0.3 audio-visual coordinator, and a half-time curriculum super-			
24	visor. Funds are provided in the budget for the adjustment from			
25	a 10- to a 12-month salary for 1 division chairman in recogni-			
26	tion of the year-round workload.			
27	2.5 new positions are required for the administrative and			
28	business management areas including a half-time administrative			
29	assistant to the college president as recommended in the De-			
30	partment of Finance Management Survey No. 828. The remain-

ing positions are based upon workload standards and will provide clerical assistance in the business management office.

3 additional positions are included in the student personnel function including a half-time associate dean of admissions and records also recommended in Management Survey No. 828, a half-time coordinator of housing and, a half-time clerical position to assist in processing student loans authorized by the National Defense Education Act. The budget also reflects an adjustment from a 10- to a 12-month salary for 1 counselor to handle the yearly workload resulting from the student loan program.

The 11.5 new positions in plant operation are based upon the increase in size of the physical plant (natural science and health service buildings) and the attendant increase in maintenance requirements. Included in this total are 6.5 custodians and a campus security officer.

Instructional expense is allowed on the basis of \$29 per FTE. \$2,000 is budgeted for special lecture service; this is an increase of \$1,000 over present allowances which have not changed substantially in the past five years.

The allowance for out-of-state travel is budgeted on the basis of \$10 per faculty and professional position. In addition, \$700 is budgeted to provide for out-of-state travel related to recruitment of faculty. All other operating expenses and equipment are based upon enrollment price levels and the demands of the physical plant.

## GENERAL ANALYSIS

## Objectives

Long Beach State College is a 5-year fully accredited college with programs in teacher education, occupational and pre-professional curricula designed to meet the needs of southeast Los Angeles County.

## Program and Performance

Long Beach State College was established in 1949 to meet the demand for a teacher training institution in the Long Beach area. Since its establishment, Long Beach has grown to one of the largest of the state colleges and now offers a variety of courses, not only in teacher training, but also in occupational and pre-professional fields. The performance of the college in meeting the needs of the area it serves is illustrated by the number of teacher training candidates produced by the college and the number of degrees conferred. This is shown below:

	1956-57	1957-58	1958-59
Credentials recommended-----	414	510	677
Degrees granted-----	758	1,310	1,471

Long Beach State College has developed areas of emphasis in occupational programs which include biological science, busi-

ness, English, industrial arts, music, physical education, social science, and sociology.

The 1959-60 Governor's Budget estimated an enrollment of 7,470 students (FTE). It now appears that the enrollment will approximate 6,390, a decrease of 1,080 students (FTE). 30 teacher positions approved by the Legislature have been deleted in the current fiscal year and salary savings have been increased by \$132,140 in anticipation of further reductions in staff. Operating expenses and equipment that are directly related to enrollment have also been reduced by \$30,290 and \$12,000, respectively.

The budget for the fiscal year 1960-61 includes 43.6 new positions based upon the estimated enrollment of 7,140 students (FTE) and the increase in the size of the physical plant, including the new engineering building and the administration building addition. This increase in plant operation accounts for 8.8 of the new positions requested.

Based upon the faculty staffing formula, which takes into account shifts in enrollments from lower division to upper division and graduate work as well as changes in subject matter offerings, an additional 7.1 teachers are required. Other additions in the instructional function include an administrative

<sup>a</sup> Composed of savings in salaries and wages, \$58,871; operating expenses, \$23,777; equipment, \$3,231; and decrease in reimbursements of \$3,613.

<sup>b</sup> Composed of savings in operating expenses of \$610.

<sup>c</sup> After deduction of expenditures for summer session and extension.

<sup>d</sup> After deduction of reimbursements of students' fees, charges to employees, federal payments, payments from other agencies for services rendered by the college.

LINE	SUMMARY AND GENERAL ANALYSIS	GENERAL ANALYSIS—Continued		
		ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
1	Program and Performance—Continued			
2	assistant to the dean of the college, as set forth in the Department of Finance Management Survey No. 828, and 4.4 clerical			
3	and technical positions including 2.8 positions to staff the recently enlarged audio-visual facility. Funds are also provided			
4	for the adjustment from 10 month to 12 month salaries for 4			
5	division chairmen and a coordinator of graduate studies.			
6	8 new positions are included in the budget for the administration and business functions, including 2 administrative assistants,			
7	1 for the college president and the other for the business manager as recommended in Management Survey No. 828. The			
8	remaining positions, which are technical and clerical in nature, are allowed on the basis of accepted workload standards.			
9	7 new positions are added in the student personnel area, including an administrative assistant to the dean of students,			
10	again recommended in Management Survey No. 828, and a half time clerical position in order to process student loans authorized under the National Defense Education Act. 3.4 of these			
11	positions are clerical positions added to handle the increased workload resulting from the college's policy of requiring full			
12	matriculation of all students. The remaining 2.1 positions are based upon normal workload standards. Funds are also included			
13	for the adjustment from 10 month to 12 month salaries			
14	in recognition of the year-round workload for the placement officer and 1 counselor. The need for the latter is a result of the student loan program.			
15	4 positions in the college library are based on increased workload and increased hours of operation to accommodate student demands for the first time the library at Long Beach State College will be open for a half day on Sunday.			
16	Increases in staff in other areas are based upon standards of staffing based on enrollments, physical plant or services to be rendered. These include, 1 position in health services and 2 additional clerical positions for the summer session program, which are completely reimbursed from student fees.			
17	As in the current year, instructional expense is allowed on the basis of \$29 per student (FTE). \$2,000 is budgeted for special lecture service; this is an increase of \$1,000 over present allowances which have not changed substantially in the past 5 years. The allowance for out-of-state traveling is budgeted on the basis of \$10 per faculty and professional position. In addition \$700 is budgeted to provide for out-of-state traveling related to recruitment of faculty. All other operating expenses and equipment are budgeted on the basis of enrollment, price levels and requirements to maintain the physical plant.

GENERAL ANALYSIS						
Objectives						
The Los Angeles State College of Applied Arts and Sciences is a 5-year fully accredited multipurpose institution offering a wide variety of curriculums in liberal arts education, occupa-				1956-57	1957-58	1958-59
Credentials recommended -----				717	659	1,061
Degrees granted -----				1,054	1,904	1,680

<sup>a</sup> After deduction of expenditures for summer session and extension.

<sup>b</sup> Composed of savings in salaries and wages, \$136,308; operating expenses, \$83,428; equipment, \$35,775; and a decrease in reimbursements, \$10,975.

<sup>c</sup> Composed of savings in operating expenses, \$40,453; and equipment, \$14,379.

<sup>d</sup> After deduction of reimbursements of students fees, charges to employees, federal payments and payments from other agencies for services rendered by the college.

Some of the aspects of the program of this college include its labor and industrial institutes for the training of workers in the field and a work-study program which relates practical work experience with classroom instruction.

The college offers 40 fields of concentration or major programs for the various baccalaureate degrees and 28 fields of concentration or programs for the Master of Arts or Master of Science degree.

The 166.7 proposed new positions for the 1960-61 fiscal year are required for the estimated enrollment of 9,220 students (FTE), an increase of 1,250 students (FTE) or 16 percent over the budgeted total for 1959-60.

GENERAL ANALYSIS—Continued

Program and Performance—Continued

Based upon the faculty staffing formula, 74.9 additional instructors are included in the budget. Other additions in the instructional function are 5 division chairmen, 1.8 audio-visual coordinators, 31 technical and clerical positions, and funds for the adjustment from 10- to 12-month salaries for 4 division chairmen in recognition of the yearly workload.

6.5 additional positions are required in the administration and business management areas including a vice president as recommended in the Department of Finance Management Survey No. 828. The remaining positions, all of which are clerical in nature except for a junior staff analyst, are based upon accepted workload standards.

18.5 new positions are required for the student personnel area which, like the instructional area, has a workload that is closely allied to fluctuations in student enrollment. This total includes an administrative assistant to the dean of students, also recommended in Management Survey No. 828, an admissions officer and 1.5 counselors. 6.7 clerical positions are allowed for the increased workload resulting from the policy of requiring full matriculation. All of the remaining positions are based upon accepted workload formulas. Funds are included in the 1960-61 Budget for the adjustment from 10- to 12-month salaries for a placement officer and a counselor, for the student loan program, in order to provide staffing on a year-round basis in recognition of the workload in these areas.

13 positions, including 4.5 medical officers, are required to man the new student health center so as to implement the health service program.

6 additional positions are provided for plant operation based upon the maintenance demands of the physical plant.

7 new positions for the library are in accordance with workload factors in the library staffing formula.

3 additional positions for the summer session program are reimbursed by student fees.

All instructional expense is allowed on the basis of \$29 per student (FTE). The allowance for out-of-state traveling is budgeted on the basis of \$10 per faculty and professional position. In addition \$700 is budgeted to provide for out-of-state traveling related to recruitment of faculty. \$2,000 is budgeted for special lecture service; this is an increase of \$1,000 over present allowances which have not changed substantially in the past 5 years. All other operating expenses and equipment are based upon enrollment increases, price levels and the maintenance demands of the physical plant.

## GENERAL ANALYSIS

## Objectives

Orange County State College is an upper division institution offering programs in elementary teacher education, secondary teacher education and business administration. This college is being planned to serve a primary enrollment area consisting of portions of Orange, Riverside and Los Angeles Counties.

## Program and Performance

Established by Chapter 1681, Statutes of 1957, Orange County State College offered classes for the first time in the fall of 1959. The opening programs of the college were confined to elementary education. In the 1960-61 academic year, the offer-

ings will be expanded to include secondary education and business administration.

Enrollment growth and the addition of the 2 new programs results in an anticipated enrollment of 700 FTE students in 1960-61. This is an increase of 520 or almost 300 percent over 1959-60.

101.3 new positions are included in the 1960-61 Budget in order to provide adequate staff for an estimated enrollment of 700 FTE and maintenance service for state-owned temporary facilities which will be available on the permanent college site in the fall of 1960.

Based upon the faculty staffing formula, 44.2 new instructors are required to meet the expanded enrollment. In addition, 1.8

<sup>a</sup> After deductions of expenditures for summer session and extension.

<sup>b</sup> Composed of savings in salaries and wages, \$89,690; operating expenses, \$83,364; equipment, \$6,620; and excess reimbursements, \$16,400.

<sup>c</sup> Composed of savings in operating expenses.

<sup>d</sup> After deduction of reimbursements of student fees, charges to employees, federal payments, and payments from other agencies for services rendered by the college.

## SACRAMENTO STATE COLLEGE—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
------	------------------------------	-------------------	----------------------	---------------------

## GENERAL ANALYSIS—Continued

## Program and Performance—Continued

Of major importance among the occupational fields at Sacramento State College are the programs in business administration, public administration, biological sciences and the social sciences.

The 1959-60 Governor's Budget estimated an enrollment of 4,200 students (FTE) in 1959-60. Recent re-estimates indicate that the 1959-60 enrollment will approximate 3,900, a decrease of 300 FTE. 5 teacher positions approved by the Legislature have been deleted in the current fiscal year, salary savings have been increased by \$58,300 in anticipation of further reductions in staff, and reductions in instructional expense and library expense amount to \$4,246.

The 45.6 proposed new positions are based upon an estimated enrollment of 4,220 students (FTE) for the 1960-61 fiscal year. Included in this total are 14.9 new teachers, based upon the faculty staffing formula. A dean of instruction is established in accordance with the Department of Finance's Management Survey No. 828. Also included in the instruction function are 1.5 additional division chairmen and 8.3 clerical and technical positions based upon accepted workload criteria. Funds are provided for an adjustment from 10-month to 12-month salaries for 2 division chairmen in recognition of the increased workload which requires staffing throughout the year.

Included in the 4.9 additional positions for administration and business management, is an administrative assistant to the

college president as recommended in Management Survey No. 828.

8 new positions are included in the budget for the student personnel function, including a half-time housing coordinator to handle problems related to off-campus housing and a half-time clerical position to assist in processing student loans authorized under the National Defense Education Act. 2.6 of these positions are provided to handle increased workload resulting from the college's policy of requiring full matriculation of all students. Funds are provided for the adjustment from a 10-month to a 12-month salary for the placement officer in view of the annual workload in this area.

Increases in staff in other areas are based upon accepted workload standards, including 2.5 positions for the library, 4 positions for plant operation and 0.5 position for the health service program.

Instructional operating expense is allowed on the basis of \$29 per student (FTE). \$2,000 is budgeted for special lecture service; this is an increase of \$1,000 over present allowances which have not changed substantially in the past 5 years. The allowance for out-of-state traveling is budgeted on the basis of \$10 per faculty and professional position. In addition, \$700 is budgeted to provide for out-of-state traveling related to recruitment of faculty. All other operating expenses and equipment are based upon enrollment increases, price levels and maintenance of the physical plant.

GENERAL ANALYSIS

Objectives

San Diego State College is a 5-year fully accredited college with programs in teacher education, occupational, and pre-professional curricula designed to meet the needs of the southern counties of the State.

<sup>a</sup> Composed of savings in salaries and wages of \$73,392; operating expenses, \$41,950; equipment, \$21,922; and decreased reimbursements of \$4,591.

<sup>b</sup> Composed of savings in operating expenses of \$14,810; and equipment, \$3,490.

<sup>c</sup> After deduction of expenditures for summer session and extension.

<sup>d</sup> After deduction of reimbursements of student fees, charges to employees, federal payments and payments from other agencies for services rendered by the college.

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61	
1	GENERAL ANALYSIS—Continued				
2	Program and Performance				
3	San Diego State College, first established in 1897, has a long				
4	history of providing teachers for the public schools of the				
5	State of California. More recently it has met the needs of the				
6	southern counties for people trained in various occupational				
7	programs. The performance of the college in fulfilling these				
8	responsibilities is illustrated by the number of successful				
9	teacher training candidates produced by the college and the				
10	number of degrees conferred. This is shown below.				
11					
12

17					
18					
19	Other than teacher training, the important offerings at San				
20	Diego include accounting, business administration, engineering,				
21	liberal arts, physics, psychology and social science.				
22	The 92.7 proposed new positions included in the budget for				
23	1960-61 are based upon an enrollment of 7,620 students (FTE)				
24	and the opening of the new men's physical education building.				
25	Based upon the faculty staffing formula, the 1960-61 Budget				
26	includes 31.2 new instructors for the main campus and 3.0 new				
27	instructors for the off-campus center in Imperial County.				
28	Other additions in the instructional area include a division				
29	chairman, an administrative assistant to the dean of the college				
30	as recommended in the Department of Finance's Management				
31	Survey No. 828, and 16.5 technical and clerical positions based				
32	upon accepted workload formulas. Funds are also provided in				
33	the budget for the adjustment from 10- to 12-month salaries for				
34	3 division chairmen in recognition of the year-round workload.				
35	6.5 positions are added in the administration and business				
36	management areas including an administrative assistant to the

president which is also recommended in Management Survey No. 828.

3 new positions are included for the student personnel function including a half-time housing coordinator and a clerical position to assist in processing student loans authorized by the National Defense Education Act. Funds are also provided in the budget for the adjustment from 10- to 12-month salaries for the college placement officer and 2 counselors in order to provide staffing commensurate with the yearly workload in these areas. The increased workload for the counselors is also attributable to the student loan program.

1.6 positions are included for the health services program. 7.5 positions are included for the library based on the workload and resultant need for additional staff.

20.6 new positions are added for plant operation based upon the increasing maintenance demands of the physical plant. These include 10.6 custodians based upon the allowance of one custodian per 15,000 square feet of building space, 2 campus security officers and 1 watchman are included in the total of new positions in order to provide supervision of parking facilities and 24-hour security coverage of the entire campus, including the new student dormitories.

Instructional expense is allowed on the basis of \$29 per student (FTE). \$2,000 is budgeted for special lecture service; this is an increase of \$1,000 over present allowances which have not changed substantially in the past 5 years.

The allowance for out-of-state travel is budgeted on the basis of \$10 per faculty and professional position. In addition, \$700 is budgeted to provide for out-of-state travel related to recruitment of faculty. All other operating expenses and equipment are based upon enrollment, price levels and the maintenance demands of the physical plant.

<sup>a</sup> 0.2 position in the current year and 0.6 in the budget year have been authorized because of the new dormitory program and are reimbursed from the Dormitory Revenue Fund.

<sup>b</sup> 3.5 positions authorized in current year for reimbursed projects.

## GENERAL ANALYSIS

## Objectives

San Fernando Valley State College is a 5-year institution offering programs in teacher education and occupational and pre-professional curricula designed to meet the needs of the San Fernando Valley portion of Los Angeles County.

## Program and Performance

San Fernando Valley State College, which began operation as a separate state college on July 1, 1958, conducted its first commencement program in June, 1959. The first graduation class consisted of 293 students who were granted degrees and 121 students who received teaching credentials. Previous to its establishment as a separate state college, the institution conducted classes on its present site as the San Fernando Valley campus of Los Angeles State College.

The San Fernando Valley State College serves the San Fernando Valley section of Los Angeles City, the county of Ventura, the cities of Beverly Hills, Burbank, Glendale, and Santa Monica. A population of well over one million is located in the described area. Extension courses are offered in the Antelope Valley area. This college is the only 5-year collegiate institution located in the San Fernando Valley portion of Los Angeles County.

San Fernando Valley State College is in the midst of a phase of extremely rapid growth in enrollment, staff, and physical facilities. The science, speech-drama, and cafeteria buildings will be completed and operating during 1960-61. Planning and/or construction will be carried on during 1960-61 for the classroom, physical education and administrative buildings.

Many additions to the college curriculum have been approved for 1960-61, including approval to develop an engineering program. It is planned that freshmen engineering students will be admitted in 1960 and sophomores will be admitted in 1961. Baccalaureate degrees are planned in 1961 for the first time in foreign language, chemistry, geology and social welfare majors. In addition, new master's degree offerings in physical education, mathematics, geography and political science are planned.

Based upon current re-estimates the enrollment for the 1959-60 fiscal year will be 2,660 (FTE) students, which is 340 less than the original estimate of 3,000 (FTE) students used as a basis for the Governor's 1959-60 Budget. In order to adjust the budget for this decrease in enrollment, the 1959-60 Budget reflects the following reductions for the current year 1959-60: 10 teachers, 2.5 clerical and technical positions, an increase of salaries savings of \$32,649 in anticipation of further staff reductions, decreases of \$34,620 in operating expense and \$4,000 in equipment.

The 152 proposed new positions included in the budget for the 1960-61 fiscal year are based upon an enrollment of 3,680 students (FTE) and the completion of the science building, cafeteria and the speech-drama building.

In the instructional area, 48.4 new teachers are included on the basis of the faculty staffing formula. Other positions included for the instruction function are 22.5 technical and clerical positions based upon accepted workload criteria, and 5 supervisory positions including a dean of instruction, 2.5 division chairman, a half-time coordinator of the evening program and a curriculum supervisor. Funds are included in the budget for the adjustment from 10 to 12-month salaries for 3 division chairman in recognition of the annual workload in this area.

10 new positions are included for the administrative and business management functions including a half-time publications manager and an administrative assistant to the college president as recommended in the Department of Finance's Management Survey No. 828.

In order to meet the increased workload in the student personnel area, 11.3 additional positions are added based upon workload standards. 0.7 of these positions are for the increase in workload resulting from the policy of requiring full matriculation of all students and 0.3 of a clerical position is added to assist in processing loans authorized under the National Defense Education Act. Also included in the total for student personnel are a half-time placement officer, on a 12-month basis, and a half-time counselor. Funds are included in the budget to convert a counselor position from a 10-month to a 12-month salary in order to meet the year-round workload resulting from the student loan program.

The tremendous growth in the size of the physical plant and the attendant maintenance requirements are responsible for the large increase of 41.5 positions for plant operation.

10 new positions are included in the budget for the library based upon the library staffing formula. 2.1 positions added for the summer session and extension programs are fully reimbursed from student fees.

Instructional operating expense is budgeted on the basis of \$29 per (FTE) student. \$2,000 is budgeted for special lecture service; this is an increase of \$1,000 over present allowances which have not changed substantially in the past five years.

The allowance for out-of-state travel is budgeted on the basis of \$10 per faculty and professional position. In addition, \$700 is budgeted to provide for out-of-state travel related to recruitment of faculty. All other operating expenses and equipment are based upon enrollment, price levels and increases in the physical plant.

26					
27	<b>GENERAL ANALYSIS</b>				
28	<b>Objectives</b>				
29					
30	San Francisco State College is a 5-year fully accredited				
31	college with programs in teacher education, occupational and				
32	preprofessional curricula designed to meet the needs of the				
33	counties in the San Francisco Bay and peninsula area.				
34					
35	<b>Program and Performance</b>				
36					
37	San Francisco State College, originally established in 1899 as				
38	the San Francisco Normal School, has been operating on its				
39	present Lake Merced Campus since 1954. This college, like the				
40	majority of the state colleges, has 3 principal responsibilities.				
41	The first is the providing of teacher training; the second is the				
42	offering of preprofessional and occupational programs; and the				
43	third is the offering of general liberal arts programs. The success				
44	of the college in fulfilling these responsibilities can be seen from				
45	the following:				
46		1956-57	1957-58	1958-59	
47	Credentials recommended -----	802	924	968	
48	Degrees granted -----	1,613	1,677	1,781	
49					
50	Of the state colleges that have had full 5-year programs, San				
51	Francisco State College has granted the largest number of				
52	master degrees. In 1958-59 the college granted 358 master de-				
53	grees. A downtown center is operated as an administrative				
54	center for its extension programs and as a teaching center for				
55	the School of World Business.				
56	The college has assumed leadership in programs in art, biological				
57	science, business, English, industrial arts, music, physical				
58	education, psychology, social science and social welfare. The				
59	college operates an off-campus center program in Santa Rosa.				
60	This center is designed to offer residence credit for courses in				
61	teacher education only, and is projected for an enrollment of 110				
62	FTE in 1960-61.				
63	San Francisco State College is also unique in its development				
64	of programs for the training of teachers of exceptional children.				
65	The budget includes an allocation of \$86,651 received from the				
66	Federal Government for the development of programs for training				
67	teachers of the mentally retarded. The college has the additional				
68	advantage of being located adjacent to the School for				
69	Cerebral Palsied Children, Northern California, which serves as				
70	a laboratory school for the training of special credential candi-				
71	dates.				
72	In 1959-60 the college began giving courses in a newly ap-				
73	proved engineering curriculum. Of future importance will be the				
74	newly approved master programs in mathematics, recreation				
75	and humanities. In addition, an industrial arts credential major				
76	has been approved.				
77	Since the re-estimate of enrollment for 1959-60 represents				
78	a decrease of 170 students (FTE) from the total enrollment				
79	originally budgeted, the following reductions are reflected in the				
80					
81	<sup>a</sup> After deduction of expenditures for summer session and extension.				
82	<sup>b</sup> After deduction of reimbursements of student fees, charges to employees, federal payments, and payments from other agencies for				
83	services rendered by the college.				
84					

current year: 8 teachers, 1 medical position, 2.2 clerical and technical positions, \$2,610 in instructional expense and \$1,636 in library expense.

The 1959-60 proposed new positions for 1960-61 are required for the estimated enrollment of 8,490 students (FTE) and the opening of an addition to the health center.

Based upon the faculty staffing formula, 58.3 instructors are provided to meet the demands of the increased enrollment and expanded curricular offerings. Also included in the instructional function are 2 additional division chairmen and 13.2 technical and clerical positions. The budget reflects an adjustment from 10-month to 12-month salaries for 4 division chairmen and 1 graduate studies coordinator since the workload requires year-round staffing.

5 new positions are included in the budget for the administration and business management functions, including an administrative assistant to the president as prescribed in the Department of Finance's Management Survey No. 828. Also included is a half-time position, on a reimbursable basis, for handling certain business functions of the residence hall program.

7.5 positions are added for the student personnel function, including a half-time housing coordinator, 4.3 clerical positions for the increased workload resulting from the college's policy of requiring full matriculation of all students, and a clerical position to administer the student loan fund program promulgated under the National Defense Education Act. Funds have also been included in the budget for adjustments from 10-month to 12-month salaries for 1 placement officer and 2 counselors in order to recognize the year-round in these areas. The adjustment for the counselors is again a recognition of the workload resulting from the student loan program.

7 positions are added for the library based on the library staffing formula and the need for staffing for one-half day operation on Sundays. This will be the first year of Sunday operation.

Increases in other areas in accordance with workload formula are health services, 2.2 positions; and plant operation, 7.7 positions. Included in the 7.7 positions for plant operation is 1 position, on a reimbursable basis, for maintenance of residence halls.

Instructional operating expense is budgeted on the basis of \$29 per student (FTE). \$2,000 is budgeted for lecture service. This is an increase of \$1,000 over present allowances which have not changed substantially in the past 5 years. The allowance for out-of-state travel is budgeted on the basis of \$10 per faculty and professional position. In addition, \$700 is budgeted to provide for out-of-state travel related to recruitment of faculty.

Other operating expenses and equipment are based on enrollment, price levels and increases in the physical plant.

## GENERAL ANALYSIS

## Objectives

San Jose State College is a 5-year, fully accredited college with programs in teacher education, occupational, and pre-professional curricula designed to meet the needs of Monterey, San Benito, Santa Cruz, Santa Clara and San Mateo Counties.

## Program and Performance

San Jose State College, the largest of the state colleges, is also the oldest. Established in 1857, it was the first institution for higher education established by the State.

While San Jose offers courses leading to 33 major public school credentials it can no longer be characterized as solely a teacher training institution because it confers bachelor's and master's degrees in 141 areas of specialization. 2 out of every 3 graduates enter fields other than teaching.

The performance of the college in carrying out its responsibilities is best illustrated by the following:

	1956-57	1957-58	1958-59
Credentials recommended-----	911	885	932
Degrees granted-----	1,978	2,045	2,164

The 49.9 proposed new positions included in the budget for the 1960-61 fiscal year are based upon an enrollment of 11,400 students (FTE). In addition to the increase in enrollments the college will also open new facilities.

Based upon the faculty staffing formula, 14.1 new instructors are required. Other increases in the instruction function are 1.3 supervisory positions, and 3.5 technical and clerical positions are added based upon accepted formulas. In addition, 5 technical positions are allowed for 1 year to meet the workload caused by new facilities and curricula. Funds are included in the budget for the adjustment from 10- to 12-month salaries for 4 division chairman and the coordinator of graduate studies to provide staffing commensurate with the yearly workload in these areas.

4.4 new clerical positions are added in the administration and business management areas including 0.7 of a position which is reimbursed from residence hall fees to assist in the business functions related to them.

9.4 positions are required for the student personnel function including an admissions officer, a half-time housing coordinator and 0.3 of a counselor. Also included in this total is a clerical position to assist in processing student loans authorized under the National Defense Education Act. The remaining positions, which are clerical, are based on accepted formulas and include 2.6 positions to handle the new workload resulting from the college's policy of requiring full matriculation of all students. Funds are provided in the budget for the adjustment from 10- to 12-month salaries for the placement officer and 2 counselors in recognition of the year-around workload in these areas. The increased workload for the counselors is attributed to the student loan program.

Increases in staff based upon the accepted workload formulas for the library and health service program are 5.4 and 1.3 positions respectively. The increase for the library is due to the increased enrollment and the increased hours of operation since this library will be open on Sundays for the first time.

5.5 new positions are added in plant operation in order to provide adequate maintenance of the increased physical plant. 1.5 of this total are reimbursed positions to be financed from residence hall operating funds for maintenance services.

Instructional expense is allowed on the basis of \$29 per student (FTE). \$2,000 is budgeted for special lecture service; this is an increase of \$1,000 over present allowances which have not changed substantially in the past 5 years. The allowance for out-of-state traveling is budgeted on the basis of \$10 per faculty and professional position. In addition, \$700 is budgeted to provide for out-of-state traveling related to recruitment of faculty. All other operating expenses and equipment are budgeted on the basis of enrollment, price levels and the maintenance demands of the physical plant.

approximately 1 mile north of the City of Turlock to be the permanent home of the college. However, it is proposed that the college open in the fall of 1960 in rented facilities and that 2 functions be authorized, the carrying on of the general instructional program and long- and short-range planning in relation to the necessary physical plant requirements.

An instructional staff is proposed on the basis of an estimated enrollment of 120 full-time equivalent students and the planning staff is the same as provided all new colleges recently established.

## CALIFORNIA STATE POLYTECHNIC COLLEGE—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61	CHANGE FROM 1959-60			
1	GENERAL ANALYSIS							
2	Objectives							
3	California State Polytechnic College is a 4-year accredited							
4	college with programs in agriculture, engineering, arts and							
5	sciences, and business. Because of the unique programs offered							
6	by the college, California State Polytechnic College has objec-							
7	tives different from the other state colleges. The college has been							
8	authorized to operate two campuses and is considered to be a							
9	statewide institution.							
10	Program and Performance							
11	The campus of California State Polytechnic College at San							
12	Luis Obispo has the largest undergraduate agriculture program							
13	in the 13 western states and enrollment in the engineering pro-							
14	grams constitutes it as the second largest engineering school in							
15	the West. Agriculture, engineering, arts and sciences, and busi-							
16	ness programs are designed to meet the needs of the entire State							
17	and emphasize the learn-by-doing approach. The Kellogg-Voorhis							
18	campus has similar programs. Throughout its occupational cur-							
19	riculum, the college uses the "upside-down" approach by which							
20	the student begins work in his major department in his fresh-							
21	man year and is given instruction in the practical phase of his							
22	field of specialization during the first two years of his program.							
23	California Polytechnic also provides nondegree technical pro-							
24	grams at its San Luis Obispo campus in all agricultural fields.							
25	The performance of the college with regard to degrees con-							
26	ferred and credentials recommended in the various areas of							
27	specialization is shown below:							
28	Degrees Granted:	1956-57	1957-58	1958-59				
29	Agriculture	236	254	256				
30	Engineering	194	341	405				
31	Arts and Sciences	216	168	234				
32	Credentials recommended	77	69	71				
33	Enrollments for the San Luis Obispo and Kellogg-Voorhis							
34	Campuses in 1959-60 failed to meet original estimates by 370							
35	and 160 (FTE) students respectively. Reductions in certain							
36	expenditure areas have been made in the current year of the							
37	Governor's 1960-61 Budget in order to adjust to the reduced							
38	workload resulting from this decreased enrollment. These reduc-							
39	tions include 27 teacher positions, \$28,999 in operating expense							
40	and an increase in salary savings of \$20,062, in anticipation of							
41	additional staff reductions.							
42	The 36.2 proposed new positions included in the budget for the							
43	1960-61 fiscal year for the San Luis Obispo Campus are based							
44	upon an enrollment of 5,080 students (FTE) and the opening							
45	of the new Music-Little Theatre Building and the corporation							
46	yard.							
47	Based upon the faculty staffing formula, 21.6 additional in-							
48	structors are required. Other increases in the instructional area							
49	include 1.6 supervisory positions and 0.6 of a position for tech-							
50	nical and clerical assistance.							
51	7.7 new positions are added in the administration, business							
52	management and general office functions based upon accepted							
53	workload measurements. Increases in staff in other areas are:							
54	2.2 positions in student personnel including a half-time housing							
55	coordinator, 1 position for the library and 1.5 positions in plant							
56	operation.							
57	63.6 new positions are included in the budget for the Kellogg-							
58	Voorhis Campus based upon an estimated enrollment of 2,350							
59	students (FTE) and the opening of the Health Service and							
60	Agricultural Engineering Buildings.							
61	31 new instructors are added based upon the faculty staffing							
62	formula. Other new positions in instruction include a half-time							
63	division chairman and 4.5 technical and clerical positions based							
64	upon accepted staffing allowances.							
65	10 new positions are added in the administration and business							
66	management areas including a dean of the college recommended							
67	in the Department of Finance's Management Survey No. 828.1							
68	and an equipment and materials coordinator in the business							
69	office. The remaining positions, which are clerical and technical							
70	in nature, are based on workload criteria.							
71	6.9 positions are required for the student personnel function							
72	including an associate dean (admissions and records) as recom-							
73	mended in Management Survey No. 828.1, a counselor, a half-							
74	time placement officer, a half-time activities adviser, a half-time							
75	housing coordinator, and 3.4 technical and clerical positions.							
76	Increases in staff for the library and the health service func-							
77	tions are 2.7 and 2.5 respectively, based upon the staff formulas							
78	for these areas.							
79	5 new positions are added for plant operation including a half-							
80	time stationary engineer, 2 groundsman and 1.3 custodians.							
81	No increases in staff are included in the budget for the agri-							
82	cultural program.							
83	Instructional expense at both campuses is allowed on the basis							
84	of \$32 per student (FTE). \$2,000 and \$1,500 for the San Luis							
85	Obispo and Kellogg Campus, respectively, is budgeted for special							
86	lecture service. This is an increase of \$1,750 over present allow-							
87	ances which have not changed substantially in the past 5 years.							
88	The allowance for out-of-state travel is budgeted on the basis							
89	of \$10 per faculty and professional position. In addition, \$700 is							
90	budgeted to provide for out-of-state travel related to recruitment							
91	of faculty. All other operating expenses and equipment are							
92	based upon enrollment, price levels, the maintenance demands of							
93	the physical plant and the operation of the college farm.

GENERAL ANALYSIS

Objectives

The Maritime Academy trains qualified young men to become licensed officers in the Merchant Marine. The course is 3 years and leads to the Bachelor of Science degree with a specialization in either the deck or engineering fields.

Program and Performance

The 3-year training program during which the student attends school 11 months of each year, is culminated by the United States Coast Guard examination for a license as either third mate or third assistant engineer. The student must pass the license examination before he can receive a degree.

The program at the academy is supplemented by a training cruise each year of 3 months' duration aboard the Golden Bear, a merchant type ship loaned to California by the Federal Maritime Administration. An accepted schedule of cruises has been developed on a 3-year cycle. This cycle includes a cruise to the west coast of South America, one to the Pacific Northwest and Alaska, and one to the mid-Pacific Ocean area.

These cruises provide training in celestial navigation, in both the northern and southern hemispheres, piloting, and midocean ship operation. The 1960-61 Budget provides funds for a cruise to the mid-Pacific Ocean area.

The Maritime Academy Act of 1958 revised the method by which federal grants and subsidies are made to the various state-supported maritime academies. In the case of the California Maritime Academy this change in the law has increased the federal contribution from \$81,424 in 1958-59 to \$154,326 in 1959-60. The new law permits an outright grant of \$25,000 to

academies operating in accordance with prescribed standards and an additional payment of \$50,000 for academies that accept out-of-state students. The aid also provides for payments of \$600 per student per academic year to assist in defraying the cost of uniforms, books, and subsistence for each student. Of the total of \$600 the state receives \$400 and the remaining \$200 goes to each midshipman.

In addition to providing the ship for the training cruise, the Federal Government also provides for the annual drydocking, overhaul and major repair of the California Maritime Academy ship at an estimated cost of \$50,000. This amount, however, is not reflected in the budget.

The budget for 1960-61 includes 2 additional instructors based upon increased enrollment and other workload factors, 2 additional clerical positions are also added based upon workload criteria to provide assistance to the instructional staff and the business office and 1 additional mess attendant is proposed to handle the increased workload in the messhall. The advancing age of the training ship has increased the maintenance requirements and the budget includes 1 additional marine machinist to meet this increased workload.

The 1960-61 Budget also includes an increase in reimbursements of \$56,857 to reflect a proposed increase in student fees to cover operational costs of feeding, dormitories, health services and certain instructional expenses. This proposed fee attempts to equate fees to certain direct services or benefits to each midshipman in much the same manner as has been done in the case of the state colleges.

a After reimbursements from students, employees and the Federal Government.

b Composed of savings in salaries and wages, \$221,956; operating expenses, \$57,952; equipment, \$22,043; and increased reimbursements of \$129,400.

14					
15	<b>Objectives</b>				
16					
17	This school provides for the education of blind children so				
18	that they may gain a knowledge of the world around them and				
19	confidence and competence to cope with their environment.				
20	<b>Program and Performance</b>				
21	This residential school offers general education to blind, parti-				
22	tially blind, and deaf-blind children through the elementary and				
23	high school levels. In addition to special teaching methods and				
24	techniques, special equipment such as Braille writers, Braille				
25	books, embossed maps and globes, geometric models, models for				
26	nature study, audio and various types of other equipment are				
27	also used. The Helen Keller deaf-blind unit provides a full edu-				
28	cational program for these doubly handicapped children.				
29	In addition to the residential aspects, field service is available				
30	for preschool blind children, graduates, and expupils. The school				
31	also administers reader service for blind college students.				
32	During the fiscal year 1960-61, the program will provide				
33	general education for 166 resident children, field services for				
34	120 preschool children, guidance services for approximately 55				
35	former pupils, and reader service for approximately 70 blind				
36	college students.				
37	2 new positions are added in 1960-61 to compensate for				
38	the higher ratio of students with no vision due to retrolental				
39	fibroplasia. Students blinded by this physical defect are now in				
40	the primary grades at the school. This is a temporary increase				
41	and the former teacher-pupil ratios will be re-established in 4 or				
42	5 years when these children reach the upper grades and can be				
43	absorbed in the normal teacher-pupil ratios.				
44	The funds for readers for college students will be carried as				
45	operating expense instead of salaries and wages as a result				
46	of legislation enabling the agency to contract for this service				
47	instead of hiring the readers as was necessary in past years.				
48	Additional funds (\$8,500) for readers for blind college students				
49	have been added in the budget year to meet the need for this				
50	service of 54 blind college students who do not qualify for voca-				
51	tional rehabilitation aid.

## GENERAL ANALYSIS

## Objectives

This residential school educates mentally normal deaf children from the elementary through the high school grades with special emphasis on the development of language concepts.

## Program and Performance

The California School for the Deaf, Berkeley, is a residential school admitting mentally normal deaf children from 5½ to 21 years of age. Students are given elementary and high school general education. Students are given special speech instruction using oral techniques as well as finger spelling and lip reading. Opportunities are provided for learning a trade in one or more of the following fields: home economics, commercial art, printing, cabinetmaking, shoe repair, baking, business techniques, and metal shop. Opportunity is provided for the students to qualify for attendance at Gallaudet College

in Washington, D.C., the only college in the United States providing collegiate instruction for deaf people. Of the students from California attending this college, 30 are graduates of this school. Other graduates have been placed in business firms, construction, printing and allied trades, shoe repair, bakeries, and in self-employed business ventures.

While academic and vocational subjects constitute the main program at this school, the problem of teaching these handicapped children to adjust to society and everyday problems is met to a large extent by the use of psychologists and counselors.

This budget includes a half-time temporary help position to handle the increased number of meals to be served at the school. Otherwise the school is budgeted at the same level as in 1959-60.

## GENERAL ANALYSIS

## Objectives

This residential school educates mentally normal deaf children from elementary through high school grades with special emphasis on language concepts.

## Program and Performance

The curriculum of this residential school is similar to that found in public day schools but with special instruction for all students using oral techniques as well as lip reading and finger spelling.

The vocational education program is an important part of the curriculum. A student may receive a certificate of proficiency in any one of the following fields: home economics, commercial art, printing, cabinetmaking, body and fender repair, spotting

and pressing, business education, baking, electric motor re-winding and electric appliance repair.

The school also offers a college preparatory course for students to complete for entrance in Gallaudet College in Washington, D.C. 11 students from this school are attending Gallaudet College in 1959-60.

In addition to the academic and vocational programs offered, the problem of teaching these handicapped children to adjust to society and its everyday problems is met to a large extent by the employment of psychologists and counselors.

For the 1960-61 fiscal year a half-time stationary engineer is proposed in plant operations to correct deficiencies in the level of staffing, provide coverage for the new gymnasium, and provide preventative maintenance for a plant which is approximately 10 years old.

## GENERAL ANALYSIS

## Objectives

This is a residential school designed for the diagnosis and treatment and the determination of an educational program for children from Northern California afflicted with cerebral palsy or other similar handicaps. It serves also as a demonstration laboratory school for the training of teachers of handicapped for the education department of the San Francisco State College. In January 1959 the school was designated a Medical-Educational Diagnostic Center for the Neurologically Handicapped Child by Crippled Children's Services, and has been functioning in that capacity.

## Program and Performance

The school served a total of 156 children during the past year, by differential diagnosis, treatment, and training. Of the 89 children studied in the Diagnostic Center, 44 were enrolled for longer periods in the school for further study, or for treatment and training. Neuromuscular involvement (cerebral palsy) was present in varying degrees in 102 of the children seen, and 79 of the total had been referred because of language retardation the cause of which might be brain damage. 16 of the cerebral palsied children had visual impairment sufficient to interfere with normal education, and 3 of these were totally blind. 14 of the cerebral palsied were also aurally impaired in sufficient degree to interfere with speech, but 4 of these were able to gain some help from hearing aids. 1 client of Vocational Rehabilitation Services was provided training opportunities and 1 cerebral palsied young woman enrollee is now a client in training by these services. In addition, 18 other young people were counselled, and given opportunities to learn various job skills at the school.

6 physical therapists received clinical training at the school, and there are regularly scheduled visits from the senior nursing classes of 6 San Francisco hospitals. Approximately 30 student teachers spent observation and practice periods at the school.

Crippled Children's Services held 2 medical conferences for doctors engaged in the cerebral palsy program at the school, with an enrollment of 60 in one case and 130 in the other.

Approximately 40 more children were served than during the previous fiscal year and this is accounted for by the increase from 45 to 89 in the children seen in the Diagnostic Center. This represents Crippled Children's Services use of the facility.

Study of the referrals made to the Medical-Educational Diagnostic Center reveals that local agencies are now seeking detailed information about the children who are difficult to place in any of the present "special education" classrooms. Less than one-third of the cases seen are children requiring only intensive therapy or other medical aid. Instead the physical difficulty is complicated by an additional physical handicap or by reading, or arithmetic, or other learning problems.

In order to meet this need a skilled teacher from the school staff serves on the diagnostic team with the school psychologist, to determine the problem and to formulate an educational program for the child.

## Average length of enrollment:

Diagnostic study-----	10 days
Vocational assessment:	
Vocational Rehabilitation Service clients---	11 months
Younger enrollees-----	7½ months
Neuromuscularly involved students-----	6 months
Language retarded children-----	7 months
Aurally or visually handicapped cerebral palsied children-----	7 months

The 1960-61 Budget includes \$1,770 in temporary help for workload in the Medical Section to process and return the various reports to the school districts in a reasonable time.

## GENERAL ANALYSIS

## Objectives

This is a residential school designed for the diagnosis and treatment and the determination of an educational-therapy program for children from Southern California who are crippled by cerebral palsy or other similar handicaps. It serves also as a demonstration laboratory school for the training of teachers of handicapped children for the education department of Los Angeles State College of Applied Arts and Sciences.

## Program and Performance

The children enrolled in the school are referred by the Crippled Children Services of the Department of Public Health and from the local school districts of the 13 counties of Southern California. The students are enrolled for less than a year's study depending upon the severity of the handicap, the degree

of difficulty in establishing an educational, medical, and therapy program, and the response to parent education and counseling. Upon completion of the residential program, the child is either returned to his local community for continued medical supervision, treatment, and special education, or is referred to a state hospital for the mentally retarded or for the emotionally disturbed. During the 1958-59 fiscal year, a total of 58 children were enrolled.

In the 1959 summer session, Los Angeles State College taught 6 courses at this school in which 65 students were enrolled in 113 class registrations.

While the program for 1960-61 is extended at the same level as in 1959-60 there is an increase in medical services offered by the school staff that is offset by a decrease in contractual services.

16					
17	<b>Objectives</b>				
18					
19	The Oakland Orientation Center admits blind persons as				
20	trainees in an intensive program designed to assist them in				
21	becoming more self-sufficient, and in cases where feasible, par-				
22	tially prepares them for useful and remunerative work.				
23					
24	<b>Program and Performance</b>				
25					
26	In meeting the objectives, the center offers a program de-				
27	signed to deal intensively with problems arising from blind-				
28	ness. First, a blind person must learn new means of performing				
29	the various tasks and functions connected with the whole range				
30	of living, including new techniques of travel, communication,				
31	habits of daily living, and the use of the senses other than				
32	sight in orienting himself to the physical world about him. To				
33	accomplish these ends, the center offers courses in travel,				
34	Braille and typing, shop, home economics, daily living, physical				
35	conditioning and the like.

85					45,034

The program is designed to help the enrollee regain a feeling of competence and self-confidence, to the end that he may return to the pattern of life which he would have followed in the absence of blindness. Almost without exception, all of the 114 students admitted or terminated during the fiscal year ending June 30, 1959, gained a confidence for self-help, many becoming entirely self-supporting, others returning to their functions as homemakers, and still others enrolling in courses of further training leading to vocational or professional goals.

The center also provides a residence for blind persons admitted prior to the separation of the orientation functions and the workshop manufacturing functions in 1951. The number of such blind persons being cared for is now reduced to 35.

A new intermediate account clerk position is proposed for 1960-61 which will be partially offset by a reduction in temporary help. In other respects the program for 1960-61 reflects the same general service as in 1959-60.

center, excluding administrative costs borne by the General Fund, are summarized in the table below:

Year	Sales	Total wages paid to blind and handi- capped workers	Total other operative costs	Net profit
1954-55 .....	\$806,000	\$195,431	\$588,263	\$22,306
1955-56 .....	987,660	202,705	729,665	55,290
1956-57 .....	944,019	239,509	659,051	45,459
1957-58 .....	1,313,147	276,261	996,099	40,787
1958-59 .....	1,432,605	277,838	1,038,476	116,291

In keeping with recommendations of the Coordinating Council on State Programs for the Blind, an attempt is being made to make the California Industries for the Blind more competitive. This will be done by the transfer of substandard workers to an Opportunity Work Center and by increased mechanization.

The program as proposed contains no increase in level of service over that authorized for the 1959-60 fiscal year.

## GENERAL ANALYSIS

## Objectives

This center provides sheltered employment to blind, visually handicapped, and physically handicapped persons in the Oakland area to enable them to contribute to their own support.

## Program and Performance

This center specializes in the manufacture of domestic and industrial types of corn brooms. Other products manufactured at this center are staple set street brooms, pillowcases, mailing bags, sewn domestic cotton items, sanitary brushes, rubber mats, and commissary items for the Federal Government.

The California Industries for the Blind Manufacturing Fund is charged with all manufacturing costs and the General Fund is charged with administration costs not directly related to the manufacturing process.

The financial transactions of the manufacturing fund for this center, excluding administrative costs which are borne by the General Fund, are summarized in the table below:

Year	Sales	Total wages paid to blind and handi- capped workers	Total other operative costs	Net profit
1954-55-----	\$865,000	\$209,174	\$625,877	\$29,949
1955-56-----	712,624	200,967	489,587	22,070
1956-57-----	909,452	228,263	649,579	31,610
1957-58-----	861,182	205,988	652,564	2,630
1958-59-----	820,022	222,924	556,467	40,631

In keeping with recommendations of the Coordinating Council on State Programs for the Blind, an attempt is being made to make the California Industries for the Blind more competitive. This will be done by placing the less productive workers in the opportunity work center program. The effect of this policy is reflected in the reduction in both the number of workers and the full-time equivalent of workers projected for the 1960-61 fiscal year.

This program is budgeted for the same level of service as in 1959-60.

## GENERAL ANALYSIS

## Objectives

The State Scholarship Commission, consisting of 9 members appointed by the Governor, administers a statewide system of competitive scholarships that enables a group of qualified students to attend the college of their choice. These students, because of financial considerations, would be unable to attend the particular college without the scholarship assistance. The program terminates on July 1, 1964.

## Program and Performance

The regular program reached the maximum number of scholarships to be awarded each year (2,560) in 1958-59 and this number will be awarded each year for the duration of the program. Tests are given and the awards made in the spring of each year while the payment of the awards is made after July 1 and is a charge against the subsequent fiscal year. In 1959-60 tests will be given and awards made for 2,560 scholarships, payments for which will be made in 1960-61.

The awards are made both on the basis of scholastic ability and the need for financial assistance for the student to attend

the college of his choice. This is done by means of a standardized aptitude test administered by the Educational Testing Service and an evaluation of financial need by teams of analysts employed on a temporary basis by the commission.

The regular program continues the same level of service with additional temporary help and data processing services for an estimated increase of 1,000 applicants applying for the fixed number of awards. It is estimated that a total of 11,000 applications will be processed during 1960-61, compared to 10,000 in 1959-60.

A new program of scholarships for the study of agriculture was established by Chapter 2049, Statutes of 1959. Both candidate selection and administration of 100 agriculture scholarships during 1960-61 will be carried in addition to the regular program. 1 intermediate stenographer-clerk was provided to June 30, 1960 for the new program. This position is shown as proposed new so that the budget will reflect the increase in program. The 288 high schools which offer courses in agriculture will provide 288 applicants for the 100 agriculture scholarships.

<sup>a</sup> Composed of savings in salaries and wages, \$1,676; operating expenses, \$585; and equipment, \$70.

14	<b>GENERAL ANALYSIS</b>				
15	<b>Objectives</b>				
16					
17	The function of this system is to provide monthly allowances				
18	to public educational personnel who are qualified to retire for				
19	services or disability in accordance with the provisions of the				
20	Teachers' Retirement Act and policies established by the State				
21	Teachers' Retirement Board. The board consist of the State				
22	Board of Education plus 2 additional members who represent				
23	teachers in the system.				
24					
25	<b>Program and Performance</b>				
26					
27	The present Teachers' Retirement System was established by				
28	Chapter 13, Statutes of 1944, 4th Extra Session, and is pro-				
29	vided for in Section 13801 through Section 14415 of the Educa-				
30	tion Code. It was intended to provide retirement allowances for				
31	service or disability, and other related benefits for the California				
32	public school teachers.				
33	The law provides for the collection of contributions from				
34	members by payroll deduction, from the counties, school districts,				
35	and other employing agencies. These funds consist of members'				
36	contributions which are based on an individual rate applied to				
37	the earned salary, and also employer contributions of \$12 per				
38	year for each member employed, and an amount equal to 3 per-				
39	cent of the certificated payroll of each district or a lesser amount				
40	determined by applying an appropriate rate to the assessed valua-				
41	tion of the district's property. Additional members' contributions				
42	are received directly by the system for payments of redeposits				
43	and arrears, and for the purchase of additional annuities above

those provided by the application of the normal retirement benefit formula to the individual case. The member's contributions are credited to his account to be used to provide a retirement allowance or to be refunded upon withdrawal from membership or death; they are invested in qualified securities in accordance with the system's investment program. The employer contributions, plus the appropriation from the General Fund, are used to pay current benefits to eligible persons.

There were approximately 170,000 contributing members during the year 1958-59. In addition to these persons, there were over 35,000 members who had elected to leave their money on deposit since they were either then eligible for a retirement benefit upon attainment of age 55, or they intended to return to a contributing status in the future.

In July 1956, legislation became effective that resulted in major changes in the retirement system. Only within this last year has the full impact been felt in the system because of the delayed reporting from the counties, which is attributable to the annual reports. This budget will reflect for the first time the full effect of this legislation.

Rapid growth of the system and legislation providing for survivors benefits and hospitalization insurance have created additional workload requiring 5 additional positions and 2.5 man-years of temporary help which are provided in the 1960-61 Budget. An additional \$5,000 in temporary help and \$30,000 in contractual services are provided for an actuarial valuation required by Section 13858 of the Education Code.

## GENERAL ANALYSIS

## Objectives

The commission was charged with the responsibility of making a study of all public libraries in the State as to organization and services and to make recommendations regarding improvements in these areas. The commission also was to make recommendations as to whether there was need for state participation in the financing of local public libraries.

## Program and Performance

The commission was created for a 2-year period by Chapter 2328, Statutes of 1957, which also contained an appropriation of \$25,000 for support of the commission for 1957-58. The commission was composed of 9 persons appointed by the Governor, and 4 members of the Legislature, who also comprised a joint investigating committee. On January 7, 1959, the committee's report was transmitted to the Governor and the Legislature.

a Current funds available for general and specific purposes, including endowments and donations for support of continuing activities; does not include funds for services under contracts. Neither the revenues nor the expenditures of university funds are included in the overall budget totals.

b Gross current expenditures (including contributions to the State Employees' Retirement Fund). Excludes expenditures, income, and enrollment, if any, for the following activities and functions, together with the proportionate amount of general administration, general institutional services and expense, maintenance and operation of plant and statewide expenditures attributable thereto:

(1) Summer sessions, extension, vocational education.

(2) Organized research activities, such as the Agricultural Experiment Station, the Scripps Institution at La Jolla, Lick Observatory, the Institute of Geophysics, etc. However, expenditures for research and investigation carried on by academic personnel under departmental auspices are included; these are particularly significant in the medical centers at San Francisco and Los Angeles.

(3) Auxiliary enterprises, such as dormitories and dining halls.

(4) Organized activities of educational departments, such as the University Creamery at Davis, and the Optometry Clinic at Berkeley, which are supported out of their own income. However, teaching hospital expenditures in excess of their income are included in computing expenditures per student.

(5) Student aid.

<sup>c</sup> Net current expenditures equal gross expenditures less current revenue from sources other than state appropriations.

## UNIVERSITY OF CALIFORNIA—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61	CHANGE FROM 1959-60
1	GENERAL ANALYSIS				
2					
3	Objectives				
4					
5	The University of California is a statewide institution of				
6	higher learning which has 4 major functions.				
7	These are:				
8	1. Research directed toward advancing the understanding				
9	of the natural world and the interpretation of human				
10	history and of the great creations of human insight and				
11	imagination.				
12	2. Instruction of able young people, not merely by trans-				
13	mitting to them established knowledge and skills, but by				
14	helping them to experience with their teachers the actual				
15	processes of developing and testing new hypotheses and				
16	fresh interpretations in many fields.				
17	3. Training for professional careers—a training not merely				
18	routine, but grounded in understanding of relevant sciences				
19	and literature, and enlightened by some experience in the				
20	methods by which the boundaries of knowledge are pushed				
21	back.				
22	4. Various sorts of expert public service.				
23					
24	Program and Performance				
25					
26	In keeping with these general purposes admission require-				
27	ments at the University of California are more selective than				
28	those of the junior colleges and state colleges, even though the				
29	content of introductory courses at the freshman and sophomore				
30	levels may be closely comparable for students planning to go				
31	on to a bachelor's degree, by transfer or otherwise. The program				
32	of the University of California develops greater differences in				
33	the upper division, and goes on to levels of professional or				
34	general scholarly training not duplicated in other public				
35	institutions.				
36	The University operates on 7 major campuses and a number				
37	of experiment stations. Major campuses are situated at				
38	Berkeley, San Francisco, and Davis in Northern California,				
39	and at Los Angeles, LaJolla, Riverside and Santa Barbara in				
40	Southern California. Its full-time resident enrollment has been				
41	the largest in the country for a number of years. It reaches				
42	the people directly in all parts of the State through its agricul-				
43	tural extension service, including 4-H clubs, and through				
44	university extension classes, correspondence courses and confer-				
45	ences. It maintains off-campus services through which practicing				
46	doctors, lawyers, dentists, engineers, etc., may renew and				
47	deepen the value of their services to the public throughout life;				
48	a university press for the publishing and distribution of				
49	scholarly books; and diagnostic and treatment centers to which				
50	doctors may refer citizens of the State suffering from particu-				
51	larly dangerous or obscure ailments.				
52	In carrying out these programs the University has attained a				
53	ranking that places it among the greatest institutions of learn-				
54	ing in the world. As a natural part of this development the				
55	University has tended to devote its energies to advanced studies				
56	and large amounts of fundamental research. As a consequence				
57	the student body is heavily weighted in the upper division and				
58	graduate schools.				
59	One measure of this is the number and type of degrees				
60	granted. The table below shows the distribution of degrees				
61	granted in 1950-51 and 1958-59. This table also illustrates the				
62	growing trend toward the more advanced types of work.				
63					
64	YEAR UNDERGRADUATE DEGREES GRADUATE DEGREES				
65	1950-51 ----- 84.0% 16.0%				
66	1958-59 ----- 69.5% 30.5%				
67					
68	Another measure of this shift to advanced standing and grad-				
69	uate work can be shown by considering the composition of				
70	the enrollment. The table below shows the trend for the years				
71	1956-57 through 1960-61.				
72					
73	1956-57 1957-58 1958-59 1959-60 1960-61				
74	Lower division (%) 33.3 31.8 31.8 31.9 32.4				
75	Upper division (%) 42.2 43.4 41.4 40.2 39.1				
76	Postgraduate (%) 24.5 24.8 26.8 27.9 28.5				
77					
78	The budget for 1960-61 contains provision in recognition of				
79	these trends in enrollment both as to size and shifts between				
80	lower and upper divisions. The allowances for academic posi-				
81					
82					
83					
84					
85					
86					

tions have been made on the basis of a weighted teacher-student ratio which recognizes the differences in requirements for instructing at the lower division, upper division, and postgraduate level.

The 1960-61 Budget provides for an increase of \$13,780,252 appropriations. This increase is equivalent to 13.8 percent over the amount of state funds provided for the 1959-60 fiscal year.

A great part of the increase is due to a change in the method of financing rather than program expansion or workload increases. Due to an uncertain and stringent financial condition existing at the time the 1959-60 Budget was prepared, several unusual measures were taken to finance the University's budget.

Rather than applying savings and carryover balances to the second subsequent year, as had been the case previously, the 1959-60 Budget was financed by using all available and estimated savings from 1958-59. These were computed at \$2,724,765, including excess student fees of \$724,765, and an estimated amount of \$2,000,000. This is more fully discussed on page 242 of the 1959-60 Governor's Budget. These savings, now estimated at \$2,782,229, could only be considered as a one-time means of financing and could not be counted on each year. Therefore, the General Fund financing requirements for 1959-60 were understated by this amount.

Additional savings in 1958-59, over and above those applied in the 1959-60 Governor's Budget, amounted to \$905,914. This amount has been applied against the University's request for salary increase funds in 1959-60 thereby again understating the need for General Fund financing in the current year and disproportionately increasing the need in the budget year while the total program of the University remains unchanged.

In addition to this, the program calls for a reduction in the amount of overhead funds from research contracts with the federal government to be used for support expenditures from \$1,500,000 to \$1,000,000. The difference is to be used for the construction of the Ernest O. Lawrence Memorial Center. These overhead funds ordinarily are taken into account as a means of financing. As they will not be available, the difference is to be made up from the State General Fund. Giving consideration to these 3 funding transactions the total increase in State Support, amount to \$9,392,109 or 9.4 percent which does not compare unfavorably with an increase in student enrollments of 8.8 percent.

Revenue to the University is estimated to increase \$6,129,488, or 15 percent, and bring in a total of \$46,808,765. Significant changes are for the following:

	Increases
Auxiliary Enterprises -----	\$2,931,857

The principal increase in auxiliary enterprises is largely made up of additional income from new residence and dining halls.

Student Fees -----	\$1,111,393
--------------------	-------------

Student fees will increase \$1,111,393 as the result of increased enrollment in regular sessions, summer sessions and extension programs. The incidental fee is assumed to remain at its current level of \$60 per semester.

University extension fees are increased \$882,008 to a total of \$6,462,008 reflecting increased enrollment. Fees will continue to cover all except 9 percent of extension expenses.

Sales and Service -----	\$1,740,889
-------------------------	-------------

Income from sales and service will increase by \$1,740,889 due primarily to a full year's operation of the University Hospital at the San Francisco Medical Center as an acute general hospital, plus a more favorable income outlook for the teaching hospitals.

Endowments -----	\$328,473
------------------	-----------

Income from endowment fund principal.

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61	CHANGE FROM 1959-60
1					
2					
3					
4					
5	This part of the budget includes the statewide and adminis-				
6	trative expenditures for the University as a whole. In addi-				
7	tion, it also contains the operating budgets for units which				
8	function on several campuses or outside of the jurisdictions of				
9	chief local administrative officers. These include Lick Observa-				
10	tory, statewide Agricultural Sciences, Graduate Division, Univer-				
11	sity Extension, etc. The statewide budget is also the temporary				
12	resting place for miscellaneous lump-sum provisions for contin-				
13	gencies and salary changes, which will later be allocated to				
14	appropriate detailed budgets on the various campuses.				
15	The salary and budgetary savings realized in recent years				
16	have averaged approximately 2 percent of expenditures of the				
17	normal salary savings. Based on this experience this budget				
18	contains a similar deduction totaling \$3,000,000.				
19	The budget for this function is prepared on the basis of				
20	maintaining the present programs with adjustments for work-				
21	load increases and improving the level of service in certain				
22	areas. The increases needed to maintain the present level of				
23	service are as follows:				
24	Staff Benefits: The \$205,563 increase for contributions to				
25	Pensions and Retiring Annuities System is due to the 5 per-				
26	cent academic salary range increases effective September 1,				
27	1959, and for new positions contained in the budget.				
28	Departments of Instruction and Research: The \$155,870 in-				
29	crease provides \$26,628 to Agricultural Field Stations for field

(\$5,247), Institute of Social Sciences (\$5,028), Marine Research Station (\$7,438). In addition, an amount of \$27,216 is provided to allow \$360 per regular faculty member for research activities. This increase is based on the increase in the number of regular faculty members. Decreases in several projects result in the above net increase.

Libraries: \$162,939, including staff and \$62,000 for books and binding to meet enrollment increases.

Increases for new programs include:

Electron microscope operation (\$8,036), the equipment for which is to be purchased in capital outlay, to serve several biological science departments; Space Sciences Laboratory operation (\$30,000), to inaugurate a program of research in outer space in co-operation with the Federal Government; Computer Center, additional rental (\$12,560), for improved equipment; and a foreign student adviser (\$5,960) for increased foreign student population.

In 1959 the Regents designated the University of California at Davis, as a general campus of the university, thereby authorizing the performance of the accepted university functions of teaching, research, and public service in a number of academic and professional disciplines. However, it will continue to be the university's major center for research and teaching in agriculture.

## LA JOLLA

The La Jolla campus in the City of San Diego has been a center of research in oceanography since the Scripps Institution of Oceanography became a part of the University in 1912. Activities include the Scripps Institution of Oceanography, which has sent its ships over the Pacific Ocean in quest of detailed scientific information about the ocean; and the School of Science and Engineering established in 1957-58 to provide graduate instruction and research in mathematics, physics, chemistry, the earth and biological sciences, and engineering. The School of Science and Engineering, which will enroll its first class of graduate students in 1960-61, is increased \$436,077.

Included in this increase is provision for 21 additional academic and 26 nonacademic positions for staffing the departments of physics, chemistry and earth sciences. Because of the high degree of professional competence required for a school at the graduate level it is necessary to recruit more of the faculty at higher ranks than would ordinarily be done. Of the 21 new academic positions 15 are to be recruited at the professor and associate professor level. Other increases provide \$47,000 for an augmented rate of acquisition of books and periodicals for the library.

## LOS ANGELES

The Los Angeles campus has the second highest enrollment in the University. It is located in the western part of Los Angeles about 5 miles from the Pacific Ocean, and includes both a general campus and a medical center.

General campus (excluding medical center):

This budget proposes a workload increase of \$2,182,644 and new and improved programs of \$167,263, excluding auxiliary self-supported enterprises.

The Departments of Instruction and Research are increased \$793,696 for maintenance of the present level of the student teacher ratio for an increase in enrollment of 1,003 additional students.

Libraries: an increase of \$210,777 provides for maintenance of present standards of staffing and acquisitions for the increased enrollment.

New and improved programs include the following: Organized Research; \$17,942 for operation of an engineering nuclear reactor facility which has been made available by the Atomic Energy Commission; \$12,116 for an African Studies Center which recognizes Africa as an area of increasing importance and an area which will require a greater degree of understanding, it is hoped that this modest beginning will provide the basis for obtaining private grants; \$43,980 for a minimum administrative staff and support for the first year of operation of an Atmosphere Research Center for basic research in the area between the Earth and outer space. Libraries are increased \$93,225 as the second step of an accelerated book acquisition program designed to bring the acquisition level to that of the Berkeley Library.

## Medical Center:

The Los Angeles Medical Center is located on the Los Angeles campus and provides instruction in the Schools of Medicine, Nursing, and Public Health.

Student enrollments for 1957-58 to 1960-61 are as follows:

School of Medicine:	1957-58	1958-59	1959-60	1960-61
Medical students-----	195	209	218	222
Postdoctoral				
interns and residents---	135	155	199	210
Graduate, academic-----	58	68	81	90
Totals, School of				
Medicine -----	388	432	498	522
School of Nursing -----	180	176	171	190
School of Public Health----	54	50	29	44
Totals, Medical Center--	622	658	698	756

A School of Dentistry was authorized in 1959-60 and planning activities are provided in the budget to prepare the school for enrollment of the first students by 1962.

The Medical Center includes the University of California Hospital which provides facilities for teaching, research, and health services. The budget provides for the increased enrollment; and also includes \$9,000 for the funding of a new Brain Research Institute, which is to identify and co-ordinate the interdisciplinary research and research training in this area supported from extramural sources.

		58-59 (Filled)	59-60 (Auth.)	60-61 (Auth.)				
1	RIVERSIDE							
2	The Riverside campus since 1913 has been the site of the							
3	Citrus Experiment Station conducting research and graduate							
4	instruction in agriculture. In addition, since 1954, on land ad-							
5	jacent to the experiment station, a College of Letters and							
6	Science has operated to meet the educational needs for under-							
7	graduate facilities, offering a 4-year liberal arts curriculum.							
8	The workload increase of \$512,691, excluding auxiliary self-							
9	supported enterprises, is accounted for as follows:							
10	Departments of Instruction and Research: \$91,501 in College							
11	of Letters and Science for increased enrollments.							
12	Citrus Experiment Station: \$79,429 for maintenance of pres-							
13	ent programs due to the ever increasing complexity and diversity							
14	of agricultural production.							
15	Libraries: \$22,808 for acquisitions needed because of increas-							
16	ing enrollments and improving the quality and quantity of books							
17	and periodicals.

Maintenance and Operation of Plant: \$145,945 for additional building and landscaped area to be maintained.

New and improved programs require \$50,476 for the following: Departments of Instruction and Research—College of Letters and Science: \$13,032 for upgrading three assistant professors positions to professor to enable the campus to better plan and carry out its responsibilities due to a recent change by the regents in designating the campus as a general campus. Also, \$8,716 is requested to permit inauguration of a Ph.D. program in chemistry.

College of Agriculture: \$16,728 increase for avocado root rot research to initiate additional studies on chemical treatments, selection of resistance by toxin testing and to find a basis for resistance.

Libraries: \$12,000 increase in acquisition of books, periodicals, and backfiles due to the change in status to a general campus.

<b>SAN FRANCISCO</b>								
1	The San Francisco Medical Center offers instruction in the							
2	Schools of Dentistry, Medicine, Nursing, and Pharmacy. In addition the Hooper Foundation for Medical Research is a renowned center of investigation in epidemiology. The Medical							
3	Sciences Building, University Hospital, Medical and Dental							
4	Clinics offer facilities for teaching, research, and service.							
5	Student enrollments for 1957-58 to 1960-61, by school, are as follows:							
6		1957-58	1958-59	1959-60	1960-61			
7	School of Medicine:							
8	Medical students.....	323	337	356	377			
9	Postdoctoral interns							
10	and residents.....	230	258	334	405			
11	Graduate academic.....	75	47	52	70			
12	Technicians.....	60	48	50	82			
13	Totals, School of							
14	Medicine.....	688	690	792	934			
15	School of Nursing.....	243	232	230	257			
16	School of Dentistry							
17	Dental students.....	287	286	285	289			
18	Dental hygiene.....	37	43	46	48			
19	Post graduates.....	7	8	8	28			
20	Totals, School of							
21	Dentistry.....	331	337	339	365			
22	School of Pharmacy.....	286	300	286	303			
23	Totals, Medical Center..	1,548	1,559	1,647	1,859			
<p>The workload budget increase of \$1,658,015, excluding auxiliary self-supported enterprises, is largely offset by an increase in university hospital income and provides principally for the projected enrollment increase of 212 students. In addition to these enrollment increases there are requirements to increase organized research activities to meet the growth in faculty and to continue projects already under way.</p> <p>New and improved programs amount to \$62,850 and include the following: Departments of Instruction and Research; Microbiology \$6,076, for teaching assistants to improve the program for graduate academic students; General Medicine \$5,172, for meeting the needs of the chest clinic due to recent important advances in pulmonary physiology; Physiology \$18,631, for initiating laboratory instruction for students of physiology in the School of Pharmacy; other departments: \$7,020 for Pediatrics for an associate professor previously funded partially from outside sources, and Pharmacology for closer laboratory supervision required with increasingly complex electronic equipment.</p> <p>Organized Research: Cardiovascular Research Institute \$10,551, for additional nonacademic assistance for the ease progress index and the research program of the institute.</p> <p>Organized Activities: Audio-visual center television facilities \$15,000, for part of the cost of a color television unit, the balance is to be financed from outside sources. This unit is for use with a federal grant for experimentation and development of new and more effective techniques and methods of presenting academic subject matter and for training teachers in the health sciences through the special media of television and video tapes.</p>

1	SANTA BARBARA							
2	The Santa Barbara campus is situated on a 408-acre sea-							
3	shore site, adjacent to the community of Goleta, 7 miles north-							
4	west of the City of Santa Barbara.							
5	The regents have also designated Santa Barbara as a gen-							
6	eral campus. Accordingly, the program which has included a							
7	4-year liberal arts undergraduate program leading to the bach-							
8	elor of arts degree, and graduate work in certain specialized							
9	fields, is being extended to include engineering and additional							
10	fields of graduate work.							
11	The workload budget provides no increase for enrollment							
12	since the anticipated enrollment in 1960-61 is approximately							
13	the same as that on which the 1959-60 Budget was based.

New and improved programs include the following:

Departments of Instruction and Research: School of Engineering, \$27,286, a minimum provision for a dean, staff, and related support for this new school. Improvement of master's degree programs, \$85,644, to begin the recently authorized transition to a general campus of the University by providing additional staff to strengthen present masters' programs in Departments of English, History, Mathematics, Philosophy, Political Science and Psychology; and help initiate new masters' programs in art, education, foreign languages, music, sociology-anthropology and speech. Library, \$25,453, for purchase of books and expense to provide for the increased graduate study that goes with the change to a general campus.

## GENERAL ANALYSIS

## Objectives

Hastings is a fully accredited institution offering systematic and thorough instruction in those branches of law which will best prepare the student for the practice of the profession of law.

## Program and Performance

Hastings College of Law is the largest publicly supported law school in California. While it has its own board of directors, it is designated by statute as the law department of the University of California, and degrees are issued in the name of the Regents of the University of California.

The college was founded in 1878 by S. C. Hastings with a grant of \$100,000 to the State through the Regents of the University of California. By stipulation in the original agreement the State must pay to the school the sum of 7 percent interest on the grant or repay the \$100,000 in full to a Hastings heir.

One of the noteworthy parts of the program at Hastings is the "Sixty-five Club." Practically all members of the instruc-

tional staff are superannuated in terms of retirement requirements in most institutions. Many faculty members are former deans of other law schools or are distinguished teachers who have been obliged to retire upon reaching retirement age. A very distinguished faculty has been assembled at Hastings by employing these men.

The 1960-61 program provides for an enrollment increase of 37 students while the current year has had an increase of 56 students. It is proposed to establish an additional clerical position to handle workload from increased enrollments and to reduce overtime of the administrative staff. Instruction expense is increased because larger enrollments require the second year class to be divided into 2 sections. Plant operation expense includes the first one-third of a painting program which has become necessary after 7 years of occupancy of the college building. The major item in equipment is \$7,000 to replace movable tablet armchairs with fixed tables and chairs in one classroom.

## GENERAL ANALYSIS

## Objectives

The board, consisting of the Director of Finance, the State Controller, and 1 other member appointed by the Governor, makes rules and regulations governing the presentation and auditing of claims, allowances for traveling on official business, and the issuance of merit awards. Other functions include considering, auditing, and recommending to the Legislature claims against the State for which no appropriation has been made, and hearing appeals in accordance with the purchasing procedure under the provisions of Section 13391 of the Government Code.

## Program and Performance

Each year the board considers approximately 800 claims arising because no appropriation is available or because the

settlement of the claims was not otherwise provided for by law. Claims approved by the board are, with the sanction of the Governor, referred to the next session of the Legislature with a recommendation that an appropriation be made in payment thereof. The board subsequently pays all claims for which funds have been provided and the Governor has approved. The board meets semimonthly to conduct business, consider appeals, establish rules and regulations concerning state travel and per diem expenses, and hear claims.

The board appoints members to the Merit Award Board on a 2-year basis and monthly considers the recommendations for awards of that board.

In the 1960-61 fiscal year, temporary help funds are budgeted to provide vacation relief for the 2 permanent employees.

## GENERAL ANALYSIS

## Objectives

The State Controller is the accounting and disbursing officer of the State. As the State's fiscal officer he maintains the accounts of all funds and appropriations, which involves determination of the legality of all receipts of moneys by the State and all payments withdrawing moneys from the Treasury; makes various apportionments of state revenues; administers the state payroll system, including the United States Savings Bond program; he accounts agency trust moneys in the custody of the Treasurer; supervises the administration of state inheritance and gift taxes; collects motor vehicle fuel license tax, motor vehicle transportation license taxes, petroleum and gas assessments and insurance premiums tax; administers the tax refunds to nonhighway users of motor vehicle fuel; collects state and county sales and use taxes on fuel not used on a public highway; administers laws concerning county budget procedures; reports state, county, city, district, and street and highway financial transactions; prescribes the scope and content of the annual audit made of all California special districts; supervises the general procedures concerning delinquent property taxes and administers property tax-deeded to the State; and, field audits expenditures by local governments for programs involving state subventions.

## Program and Performance

The Controller serves on 17 boards and commissions. Staff service is rendered to him by his Administration Division in respect to these memberships.

In addition to the Administration Division, there are 7 other major divisions which assist the Controller in carrying out his duties and responsibilities as State Controller:

1. Accounting Division maintains the control accounts, makes financial analyses and apportionments and prepares the annual report of the Controller, and administers unclaimed property. A more accurate method of determining actual interest yield of securities, using punchcard methods, will be started in the 1959-60 fiscal year.
2. Audits Division audits all claims and conducts a field audit program related to claims. The proposed budget reflects a realignment of the claim audit function involving a reduction in the intensity of claim review.

3. Disbursements Division makes all disbursements, administers the state payroll system and performs electrical machine accounting services for the entire office and other agencies. Installation of electronic data processing is provided for in 1960-61 which is estimated to save \$350,000 a year operating costs over present methods after equipment costs are amortized.

4. County Budgets and Reports Division prescribes forms for county budgets, is responsible for reviewing and reporting on the use of state gas tax funds, consolidates and publishes the annual reports of transactions concerning cities, counties, and special districts.

5. Tax Collection and Refund Division makes tax collections for 4 different taxes and audits claims for refund of fuel taxes paid for nonhighway use of fuel. On such fuel, state and county sales and use taxes are collected.

6. Inheritance and Gift Tax Division administers inheritance and gift tax laws and controls the flow of inheritance and gift tax moneys into the State Treasury. Inheritance tax refunds formerly made by the counties will be handled by this division starting in the 1959-60 fiscal year as a result of recent legislation.

7. Tax-deeded Land Division has general supervision over the procedures for collection of property taxes, including sales and deeds to the State for delinquent taxes, redemptions from such sales, and sales of tax-deeded property.

The total support for the office of State Controller is financed from 5 funds, namely: (1) General, (2) Motor Vehicle Fuel Fund, (3) Motor Vehicle Transportation Tax, (4) Redemption Tax, and (5) State School Building Aid.

Relocation of offices and initial supply costs for electronic data processing account for the major portion of the increase in operating expenses in 1960-61. Full year rent costs are reflected for the first time in 1960-61 for the divisions occupying space in the new Oakland and San Francisco state buildings, and increased costs will occur during 1960-61 upon moving into the new Fresno and Los Angeles buildings. The Accounting and Disbursements Divisions will vacate space in the State Capitol during 1959-60 and move into rented space. Total costs for these moves amount to an increase of \$67,988.

## ADMINISTRATION DIVISION

## Objectives

This division provides general administration of the Controller's office and staff assistance to the Controller pertaining to his responsibilities as a member on boards and commissions. It also performs the auxiliary services for the entire Controller's office.

## Program and Performance

The Controller's general administrative staff includes the

deputy controllers, administrative assistant and accounting officer and his staff. These people are responsible for the general administration of 8 divisions, including the claims file, personnel and accounting, and miscellaneous auxiliary services. They also assist the Controller with his duties on boards and commissions. The workload of this division is expected to continue at the present level through the budget year. A new position of senior research technician (Finance) is requested to provide needed staff assistance to the Controller.

## ACCOUNTING DIVISION

## Objectives

The principal functions of the Division of Accounting are to maintain the control accounts covering the receipts, disbursements, resources, liabilities and balances of all state funds, to audit and designate the fund of all deposits into the State Treasury; to prepare various financial statements and reports covering the State's condition and operations; to make various apportionments of revenues to local government; to administer the unclaimed and escheated property laws; and to administer the Judges' Retirement Fund.

## Program and Performance

In addition to the administrative staff, there are 3 bureaus within the division. They are the Bureau of Control Accounts, the Bureau of Financial Analysis, and the Bureau of Unclaimed Property.

The Bureau of Control Accounts maintains the accounting records of receipts, disbursements, resources, liabilities and balances for 157 funds in the State Treasury. This involves maintenance of approximately 28,455 accounts. It is also responsible for the auditing of all deposits into the State Treasury to determine the legality of the receipt of the money and its proper disposition. It also maintains accounts for bond investments held by the various state funds for the pooled money operation and for interest-bearing bank accounts. It maintains accounts for all agency funds deposited in trust with the State Treasurer. It superintends the collection of the State's share of fines and forfeitures levied by judges under various state laws.

The scientific method of amortizing bond premium, discount and accrued interest was initiated in the 1959-60 year. In that year, additional temporary help of 1.5 man-years was provided for accountants to convert this investment accounting. A related reduction in temporary help has been budgeted for 1960-61. The new procedure, utilizing punched card accounting methods,

will provide the most accurate distinction between corpus and income for all funds, resulting in more accurate operating statements and balance sheets.

The Bureau of Financial Analysis has, as its major responsibility, the preparation of the annual report of the State Controller. This bureau also publishes a preliminary annual report; a monthly statement of collections of all major taxes, receipts and expenditures of the General Fund, reserve funds and school construction funds; and several other periodic reports of a topical nature. It also compiles data and makes computations for the apportionment to local agencies of various revenues, such as the motor vehicle license fees, highway users taxes, and moneys received from the Federal Government. It compiles estimates of future cash receipts and expenditures which are used in connection with the Pooled Money Investment Program. In addition to the above functions, the bureau administers the Judges' Retirement Fund and makes computations of the annual repayments due from school districts on loans made to them under the school building aid programs.

The Bureau of Unclaimed Property administers the Controller's duties relating to unclaimed money or property received from dormant bank accounts, abandoned property and unclaimed estates of deceased persons. As a result of enactment of a Uniform Disposition of Unclaimed Property Act, Chapter 1809, Statutes of 1959, 3 limited term positions expiring June 30, 1960, and 4 permanent positions were established to provide staff for processing abandoned property reports and auditing claims, under the law. This law is expected to yield new General Fund revenues in excess of \$3,000,000 during 1959-60 and more than \$2,000,000 during 1960-61. After the initial work of establishing records has been completed a smaller staff will probably be adequate. On this basis the 3 limited term positions are being terminated at the close of the current year and have been eliminated from the budget for 1960-61.

## AUDITS DIVISION

## Objectives

The Division of Audits administers the Controller's responsibility of assuring that public money is expended for the purposes for which appropriated. The Constitution and statutes require the Controller to determine the legality and validity of all payments from the State Treasury.

The division passes upon the legality and propriety of state expenditures before disbursement from the Treasury. It approves the payment of expenditures found to be correct and valid and refuses to allow any withdrawals which are contrary to law or public purpose. Under various statutes which establish subvention programs for assistance to local jurisdictions by the State and by the Federal Government through the State, funds are advanced to such local agencies by the Controller. Claims presented often contain only information necessary to authorize an advance. The division makes postaudits of the accounts of local agencies in order to determine that accountability has been established for the funds advanced and that expenditures were legal and proper.

a Includes 1 position established during 1959-60 to service unclaimed property program.

b Includes 3 positions established during 1959-60 to service unclaimed property program.

c Includes 2 positions to expire June 30, 1960.

## Program and Performance

The auditing activity is divided between the Bureau of Claim Audits and the Bureau of Field Audits.

Bureau of Claim Audits: Government Code Sections 12410 and 16003 provide that the State Controller shall audit all claims against the State and shall not draw his warrants therefor until they have been audited by him.

9 positions are being abolished in 1959-60 as a result of the Department of Finance and State Controller's office having reached a mutual understanding as to the claim audit function of the State Controller, the manner in which that function would be performed, and the staff required to perform the function on a workload basis.

Bureau of Field Audits: 1 governmental auditor III position and 1 junior accountant-auditor position are eliminated effective June 30, 1960, thus reducing the field auditing of flood relief programs by 2 auditors beginning with the 1960-61 fiscal year.

## COUNTY BUDGETS AND REPORTS DIVISION

## Objectives

This division administers the laws relating to county budgets; the reporting of city, county, and district financial transactions; provisions of the Collier-Burns Highway Act requiring local jurisdictions to report city and county street and road financial transactions, and prescribes uniform accounting procedure for counties.

## Program and Performance

This division's staff gathers the data and reports on the financial transactions of counties, cities, school and special districts, irrigation districts, and streets and roads of California. The Controller prescribes forms for the use of county auditors in compiling county budgets and certifies irrigation and water district bonds. County municipal and district officials send their financial reports to the Controller, who consolidates and publishes them annually.

Under the Collier-Burns Highway Act of 1947, the Controller is responsible for reviewing and reporting on the use of state gas tax funds apportioned to local government to insure an adequate accounting from the cities and counties. Twice a

year, the division makes a settlement of financial accounts between the State and the counties. Assisting the division is a 7-man advisory committee all representing local government and serving without pay.

Under Section 30200 of the Government Code the Controller must devise and supervise the installation of uniform accounting procedures for all counties. This program has been undertaken in conjunction and co-operation with a committee of the County Auditors' Association. The position required to accomplish this objective was created in 1958-59 and filled as of March 16, 1959. The position as created was continued in the 1959-60 Budget with a provision for its termination June 30, 1960. In July 1959, the Personnel Board created a new class of consultant on uniform accounting for counties. This existing position of consultant on uniform accounting for counties is proposed as a new permanent position in lieu of the existing limited term position which will expire June 30, 1960, to complete the devising and installing of uniform accounting, budgeting and reporting for counties and maintain the system thereafter.

## DISBURSEMENTS DIVISION

## Objectives

This division issues the Controller's warrants drawn on the State Treasury and maintains the records of outstanding warrants; administers the Uniform State Payroll System including the United States Savings Bond deduction program; and provides electronic data processing service for the maintenance of the State's central control accounts and the treasury trust accounts.

## Program and Performance

Electronic Data Processing: A total of 157.2 man-years are requested for 1960-61. This is 3.5 less than the number required for the 1959-60 fiscal year. It is anticipated that a further substantial reduction in the positions will be accomplished in the following, 1961-62 fiscal year, when only 107.2 man-years will be required—a reduction of 50. These reductions in both years will primarily result from the installation of Electronic Data Processing in lieu of the present punched card methods.

By a major work improvement effort, it has been determined that the Controller can obtain substantial economies and provide improved services to other departments by adoption of electronic data processing in fund accounting, payroll accounting and writing, and disbursing.

The change was presented to the 1959 Legislature which accepted it and made the necessary initial appropriation of \$45,610. As a result, an electronics crew has been organized and work is progressing on the project as scheduled.

The Controller's plan called for an appropriation of \$45,610 for programming the new operations in 1959-60, and approximately \$245,200 more than would be required for the former methods in 1960-61 for installation of the new E.D.P. system in that year. These additional funds in the 1960-61 year were the differences between such factors as savings from reduced rental for present equipment and the abolishment of positions intermittently during the year and at the close of the year offset by the costs of site preparation, purchase of communication equipment, the overlap of the new system rental against the salary and punched card machine costs prior to their abolishment or release, and purchase of initial magnetic tape supplies and equipment.

The plan indicated that if the State makes the above-mentioned initial investment, the Controller can operate at estimated average savings of more than \$100,000 annually in the four-year period 1961-62 through 1964-65 and savings of approximately \$350,000 annually beginning in 1965-66. Thus, the general fund support of the Controller's operations during the first five years of operations is expected to be \$750,000 less than the cost which would be incurred in the same period under former methods. Therefore, by the investment of less than \$300,000 in the two-year period ending with the budget year, the State, in addition to recovering this initial outlay, will realize net savings of \$457,158 by the close of the 1965-66 fiscal year and save approximately \$350,000 every year thereafter.

Investment Accounting: The Controller, in the interest of improved investment accounting, is adopting scientific methods for amortizing premium, discount and interest. This will result in more accurate financial statements and uniformity of investment accounting practices since this method is presently employed by the retirement systems in accounting investments. The Auditor General and Department of Finance also recommend this improvement. This division will assist in this improvement by furnishing machine accounting services beginning January 1, 1960.

Gas Tax Refunds: Beginning April 1, 1960, this division will furnish machine accounting services to the Tax Collection and Refund Division under a plan for improvement of the gas tax refund auditing and payment processes. This plan involving an investment of approximately \$11,000 in 1959-60 will produce savings of \$11,000 annually beginning in 1960-61 and continuing each year thereafter. 1 clerical position is abolished for 1960-61 as a result of the improved program.

Unclaimed Property: Chapter 1809, Statutes of 1959, charged the Controller with the performance of additional duties in relation to administration of the Unclaimed Property Laws. On October 1, 1959, this division began providing machine accounting services for this program involving the establishment and indexing of records for 50,000 accounts and preparation of lists for publication of related notices.

State Employees' Retirement System—Survivors' Allowances: The enactment of Chapter 2066, Statutes of 1959, requires the Controller to make additional payroll deductions and perform the related machine accounting. On November 15, 1959, the division commenced work which will culminate in payroll deductions being made from payments for the January, 1960 and subsequent pay periods.

California Industries for the Blind: The Statutes of 1959 provide coverage under the Federal Old Age and Survivors Insurance Law, the State Unemployment Insurance Law, and the State Disability Insurance Law for the blind and handicapped workers in the California Industries for the Blind. This division performs the resulting payroll accounting and reporting. Deductions for the state insurance plans will begin with salary payment issued in October 1959. Deductions for O.A.S.D.I. will begin with salary payments for the October 1959 pay period.

The 1960-61 Budget includes 10 new positions to service the new programs of Survivors' Benefits deductions, Unclaimed Property, and Investment Accounting improvements. 7 positions are added for the key punch operation to meet increased workload until electronic data processing can be put into effect. The remaining 11 proposed new positions are for planning and installation of the EDP System.

The effect of the electronic data installation is reflected in the 18.8 man-years being abolished in 1960-61 which reflects the elimination of 61 various positions during the latter part of the fiscal year.

1	INHERITANCE AND GIFT TAX DIVISION							
2	Objectives	WORKLOAD DATA						
3								
4	This division administers the state inheritance and gift tax laws.							
5								
6								
7								
8	Program and Performance							
9								
10	The staff in this division works out of offices in Sacramento, San Francisco, and Los Angeles. Their basic functions are to represent the State's interests at the local level and, through centralized supervision, to control the flow of inheritance and gift tax moneys into the State Treasury. This division affords the taxpayer an opportunity to have his case heard at home in the local courts.

73								

	Actual			Estimated	
	1956-57	1957-58	1958-59	1959-60	1960-61
Gift tax returns	5,401	5,319	5,710	6,100	6,500
Inheritance tax returns (taxable)	20,157	20,790	21,817	22,817	23,817

There has been an overall workload increase in this division. Along with the growth in number of returns, inheritance tax revenues have increased. In the 1958-59 fiscal year, inheritance tax revenues for the State were \$44,142,081 and gift tax revenues for the State were \$3,011,412 with the combined total being \$47,153,493. Effective September 18, 1959, the division assumed the duty of issuing inheritance tax refunds formerly made by counties (Chapter 1684, Statutes 1959). These will number about 100 monthly, 5 additional positions are included to meet the increased workload and additional refund duties.

STATE CONTROLLER—Continued

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
		58-59 (filled)	59-60 (Auth.)	60-61 (Auth.)			
1	TAX COLLECTION AND REFUND DIVISION						
2							
3	Objectives						
4							
5	This division enforces the collection provisions of the Motor						
6	Vehicle Transportation License Tax Act, the Motor Vehicle						
7	Fuel License Tax Act, the tax on insurance companies, the						
8	petroleum and gas production assessments and the Subsidence						
9	Act; and administers the refund of motor vehicle fuel license						
10	taxes to nonhighway users, collecting, in the process, state						
11	and county sales and use taxes on the purchases subject to such						
12	taxes.						
13							
14	Program and Performance						
15							
16	Through this division with offices in Sacramento, Los Angeles,						
17	Fresno, and San Francisco the Controller carries out 2 major						
18	functions:						
19	1. Collecting 5 major classes of revenue to the State which						
20	are assessed by other agencies—the motor vehicle fuel						
21	license tax and the motor vehicle transportation license						
22	tax, assessed by the State Board of Equalization; the						
23	insurance premium tax, self-assessed by insurance com-						
24	panies; petroleum and gas assessments, levied by the De-						
25	partment of Natural Resources; and the subsidence abate-						
26	ment assessments levied by the Department of Natural						
27	Resources. Under these tax laws, the Division of Tax						
28	Collection and Refund enforces the collection provisions,						
29	keeping an account with each individual taxpayer. The						
30	motor vehicle fuel license tax is the 6 cents per gallon						
31	gasoline tax imposed on distributors. This revenue is ear-						
32	marked for construction of state highways and roads.						
33

## GENERAL ANALYSIS

## Objectives

The State Board of Equalization is composed of 4 members elected from areas of the State known as equalization districts and a 5th member, the State Controller, who serves as an ex-officio member, is elected at large.

The board administers the following General Fund revenue sources: the sales and use taxes, the cigarette tax, the alcoholic beverage excise taxes, and the private car tax. It participates in the administration of the insurance company taxes. It administers 3 Highway Users Fund revenues—the motor vehicle fuel (gasoline) license tax and the motor vehicle transportation

license tax with assistance from the Controller, and the 3d, the use fuel (diesel) tax in its entirety. It licenses and regulates itinerant merchants. It hears appeals from the Franchise Tax Board on personal income and bank and corporation franchise taxes. In addition, it administers or assists in administration of the major local government revenues—the property tax and sales and use taxes. Its local property tax responsibilities include the assessment of state-assessed properties, supervision of the assessment of all locally taxable properties, and equalization of the average assessment levels in the counties.

## BOARD OF EQUALIZATION—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61	CHANGE FROM 1959-60
------	------------------------------	-------------------	----------------------	---------------------	------------------------

## GENERAL ANALYSIS—Continued

## Program and Performance

The board's administration of state taxes involves the licensing of 318,000 sellers of tangible personal property operating at 341,000 outlets, and of 38,500 highway-users and members of the petroleum products industry and 294 licensed cigarette distributors. Tax return forms are distributed to, and tax remittances are received from, these licensees and from 1,700 licensed manufacturers and wholesalers of alcoholic beverages. 45,000 tax payers are audited each year, and collections are enforced when not voluntarily tendered (with assistance from the Controller in the case of the motor vehicle fuel license and motor vehicle transportation license taxes). The board appraises the railroad rolling stock of 98 car lines and other non-railroad owners of cars, assesses this property, computes the tax rate that is applied to it, and collects the tax. It receives recommendations from the Insurance Commissioner for assessment of taxes on the State's 685 admitted insurance companies, makes the official assessments, and hears appeals from its actions. These state taxes yielded in excess of a billion dollars in the last completed fiscal year.

The board handles 125 appeals a year from actions of the Franchise Tax Board.

In the local tax field, the Board is now administering for 54 counties and 329 cities sales and use taxes that are yielding \$225,000,000 a year; it assesses property that produces property taxes and ad valorem special assessments amounting to \$227,000,000 a year; and it assists county assessors who are responsible for the distribution among property owners of an

additional \$1,750,000,000 of taxes and ad valorem special assessments. It also makes some 6,000 appraisals of secured and unsecured property holdings each year, involving over 5,000 parcels of real property and 3,000 personal properties, to test the assessment levels of approximately one-third of the counties and estimates the assessment levels of the remaining counties by reference to the results of prior-year appraisals.

A relatively small increase in expenditures during 1960-61 will result from the normal growth of the agency's workload, the new cigarette tax, salary increases for employees who have not yet reached the top steps of their salary ranges, and the higher level of rents and of materials prices.

The Itinerant Merchants Fund is being abolished June 30, 1960, and will be made part of the Motor Vehicle Transportation Tax Fund.

Of the 20 additional positions proposed in the budget, 4 are to enable the legal staff to meet increased workload and bring backlogs to an acceptable level. 16 positions will provide for increased workload in the property tax field and permit additional assistance to county assessors to help them comply with recent legislation as well as improve the quality of state assessments of public utility properties.

A Training Officer is proposed as a reclassification of an existing auditor position and will be used to initiate training programs for the staff of the board.

28 of the 55 positions provided for the cigarette tax have been eliminated in the current year by the board as the workload and procedures for the new tax are being evaluated.

## ADMINISTRATION

## Objectives

This division includes the board with its staff and in addition, the administrative, legal, and service functions of the agency.

## Program and Performance

The reorganization of the Board of Equalization has resulted in the combining of the legal staffs into a single unit in administration, in the interest of greater flexibility.

The Research and Statistics Section has been integrated in the Administrative Service Division. It was deemed advisable due to the general nature of the services they perform to transfer this section from property taxes.

The reclassification of an auditor position for the establishment of a training officer under the direction of the Administrative Service Officer will make possible employee development programs. The training officer should more than pay his way by improving the efficiency of the board's personnel.

To perform current work and reduce backlog, 3 attorneys and 1 stenographer are proposed. 2 attorneys are for Franchise Tax Board appeals and 1 attorney is for sales tax and highway taxes hearings. This would put Franchise Tax Board appeals on a current basis in 5 years barring further workload increases. This is also true for sales tax and highway taxes hearings.

A major increase in operating expenses is attributed to rent, \$65,791, which results primarily from occupancy of space in the new State Buildings in Oakland and Fresno. An additional \$29,000 is provided for alterations of present space in several district offices. An additional \$48,756 is provided to purchase certain tabulating equipment recommended by the Department of Finance in lieu of continued rental. This expenditure for equipment will be partially offset by a net reduction in operating expenses of \$25,362.

## PROPERTY TAXES

## Objectives

The Property Tax Section, now under the direction of the Assistant Executive Secretary for Property Taxes, is comprised of 3 divisions. The Division of Assessment Standards acts as a general staff organization to assist, advise, and direct county assessors in the development of efficient and acceptable assessment procedures, and to promote uniformity in the ratio of assessed value to market value of all locally assessable properties within a county (intracounty equalization). The Division of Intercounty Equalization makes annual estimates of the ratio of total assessed value to total market value of locally assessable property in each county for the board's use in performance of its intercounty equalization duties. The Valuation Division provides the board with the data required for the assessment of state-assessed property and administers the Private Car Tax Law.

## Program and Performance

16 additional positions are being proposed because of the greater workload resulting from the continuing increase in taxable properties in California and from the enactment of important property tax legislation at the last general session.

Chapter 1682, Statutes of 1959, requires an intercounty equalization appraisal survey in every county at least once in a triennium whereas such surveys have been made at greater

intervals in a few counties in the past. It also requires publication of county assessment ratios, and this will focus greater attention on the Intercounty Equalization Division's work and require more complete documentation and support of its findings than has been required heretofore. Chapter 1786, Statutes of 1959, provides that these findings shall be used in the allocation of school equalization aid and the calculation of repayments of school construction loans, thus adding to the importance of accuracy and thorough documentation. 2 additional appraiser positions are required for this program.

Chapter 1682 also increases the workload of the Division of Assessment Standards because its publication provisions will greatly augment the pressures for intracounty equalization. Assessors have been increasing their appraisal staffs rapidly and have been turning with increasing frequency to the board for training and advice. The board believes that the cost of the proposed addition of 1 clerical and 4 technical positions will be more than offset by larger repayments to the State of school construction loans than would occur in the absence of a strong program of assistance to assessors.

The proposed addition of 1 clerical, 6 appraiser, and 2 delineator positions in the Valuation Division reflects increased workload and the board's attempt to reduce the frequency of the reappraisal cycle in order to avoid assessing below local assessment levels. Holdings of state-assessed taxpayers have increased

GENERAL ANALYSIS

The Department of Finance has general supervision over all matters concerning the financial and business policies of the State. In addition, numerous services are performed centrally for the various other departments, offices, boards, and commissions.

The director is immediately responsible to the Governor, acts as his adviser on fiscal matters, assists in the formulation of administrative policies, and is charged with responsibility for the execution of the State Budget. In addition, the department performs services for other state agencies, such as centralized purchasing, real property acquisition, automotive management, printing, and office building maintenance.

The Director of Finance is a member of 19 boards and commissions. By law he is Chairman of the State Board of Control, and serves as chairman of many other boards on an elective basis.

Under the executive office of the director, the department is organized into 12 major divisions. 4 of these—Audits, Budget, Fairs and Expositions, and Local Allocations—supervise the expenditure of state funds, acting as staff agencies for the Director of Finance in the discharge of his responsibilities in the execution of the Governor's fiscal policies. 8 divisions—Administrative Service Office, Buildings and Grounds, Communications, Organization and Cost Control, Planning, Printing, Property Acquisition and Purchasing—are essentially service units assisting other state agencies in such matters as procurement of property, equipment and supplies; building management and space utilization; organization and operating procedures; and other management matters.

The budget for the Printing Division appears in the Appendix.

The Economic Development Agency within the Department of Finance promotes and encourages the development of business, industry and commerce in California.

Due to completion of, or in preparation for moving into new state office buildings, 123.3 additional positions have been provided. The remaining positions are due to increased workload of the divisions concerned. A summary of the new positions and the amounts involved are shown below:

New Positions:

EXECUTIVE OFFICE

Program and Performance

This office provides a number of specialized advisory services to other divisions of the department and agencies of state and local government. The director, and, as delegated by him, the 2 deputy directors and 2 assistant directors, assign and coordinate their work.

Under the law, the Director of Finance is responsible for approval and execution of many types of contracts, property transactions, and other legal documents. An administrative adviser assists with this function, and provides advice in legal matters involving the department.

The director is also charged by law with responsibility for investment of certain funds and for approval of transactions in securities by designated state agencies. He is assisted in this function by an investment officer. The portfolios supervised

consist of over \$2,092,000,000 in bonds, and income from investments supervised approximates \$75,000,000 annually. Consultative service is rendered on state bond issues and investment matters of other state agencies.

In a similar manner, the Director of Finance assumes responsibility for the conduct of the State's insurance program. This involves the procurement of insurance and public official bonds for the State's protection. He is assisted in this function by an insurance officer.

An additional professional and an additional clerical position are provided in the Legal Section to meet increased legal workload, primarily due to the increased activity in the state water program.

a Expenditures from bond funds are not included in overall budget totals.

32	AUDITS DIVISION						
33	Program and Performance						
34							
35	This division examines and verifies the accounts of every state						
36	agency as well as all district and county fairs, after transac-						
37	tions are completed. The purpose is to discover and report any						
38	unauthorized, illegal, or irregular expenditures; any financial						
39	practices that are unsound; and whether the agencies have						
40	faithfully discharged their responsibilities.						
41	In addition, the division supervises the examination of the						
42	records of all school districts, and makes special audits at the						
43	request of the Legislature, the Director of Finance, or other						
44	state officials. It also authorizes destruction of records and						
45	occasionally renders expert accounting assistance to state agen-						
46	cies on a contract basis. There is continuing co-ordination be-						
47	tween the Audits Division and the Auditor General in order to						
48	avoid duplication.						
49	6 new positions have been provided in this division to meet						
50	statewide growth in the various departments and new workloa-						
51	created by recent legislation. The primary areas of the increased						
52	workload are in the auditing of construction contracts in the						
53	Division of Highways, administration and collection of taxes in						
54	the Board of Equalization, Printing Division delivery of war-						
55	rents, construction contracts in the Toll Bridge Authority and						
56	Division of San Francisco Bay Toll Crossings, and in the De-						
57	partment of Social Welfare for the medical aid to needy disabled.

12	Program and Performance						
13							
14	The service and control functions affecting budgetary activi-						
15	ties in all state agencies are performed by this division through						
16	its preparation and administration of the annual budget. Each						
17	state agency prepares detailed estimates of proposed expendi-						
18	tures and anticipated revenues for the coming fiscal year which						
19	are analyzed by the division staff in terms of policies set by the						
20	Governor and the Director of Finance. After legislative action						
21	on the budget, this division continuously reviews and approves						
22	each agency's financial operations. The budgetary process and						
23	the operations of the division receive continuing management						
24	review from a policy viewpoint by a procedures unit established						
25	within the Budget Operations Section.						
26	Another unit of the division conducts economic and population						
27	research, prepares the budget estimates of revenue from major						
28	taxes and licenses, and provides the basic data on population						
29	and income essential for long-term financial planning. Beginning						
30	in July 1958, a new service was extended to local governments

3	<b>Program and Performance</b>						
4							
5	This division is responsible for maintaining and operating						
6	all state-owned buildings under the jurisdiction of the Depart-						
7	ment of Finance, in addition to other privately owned buildings						
8	in which the State has rented office space for the several						
9	agencies in connection with the various operations involved.						
10	Currently it is responsible for maintaining and operating 53						
11	buildings with a total floor space of approximately 6,599,549						
12	square feet, including some 60 acres of grounds in Sacramento,						
13	Oakland, San Francisco, and Los Angeles. In addition, there						
14	are a number of other locations both state-owned and leased						
15	where the division is called upon from time to time to perform						
16	miscellaneous services. This division also operates maintenance						
17	shops covering all phases of building maintenance and operation						
18	in San Francisco, Los Angeles, and Sacramento—the main						
19	shops being located in the City of Sacramento.						
20	A professional staff in the Space Utilization Section of this						
21	division analyzes and determines space requirements including						
22	types, amounts, and special facilities; studies space require-						
23	ments for state agencies for long-range building programs and						
24	prepares programs for design and construction of state office						
25	buildings; co-ordinates space needs, allocates and assigns space						
26	to state agencies occupying state buildings; prepares lease						
27	exhibit plans and specifications for construction of new leased						
28	facilities and also for alteration and improvement of existing						
29	leased office areas.						
30	There is also provided through this division a California State						
31	Police service which provides protective service in the various

86							

locations set forth above. Additional police service is provided upon request.

The division also has responsibility for an interdepartmental mail service, maintenance of the Governor's Mansion, and the telephone exchanges in state buildings in Sacramento, San Francisco, Oakland and Los Angeles.

A total of 130.3 additional positions have been provided in this division to meet the expanded workload anticipated during 1960-61. During this fiscal year new state-owned office buildings will be completed for which additional positions must be established. The estimated completion dates of these buildings are as follows:

Fresno State Building ----- July 1, 1960  
Los Angeles Office Building ----- October 1, 1960

Remodeling and alteration projects will be under contract in 3 existing buildings during 1960-61—the San Francisco State Building, the Los Angeles State Building, and the former Compensation Insurance Building. These projects will require temporary reassignments of the maintenance staffs.

7 elevator operators previously budgeted to be abolished are extended through 1960-61 due to the delay in installing automatic equipment in the East Wing of the State Capitol. 2 elevator operator positions are scheduled to be abolished in 1960-61 in the Public Works Building as a result of automation. 3 telephone operator positions are being abolished in the Los Angeles Building as a result of installing improved switchboard equipment.

## ECONOMIC DEVELOPMENT AGENCY

operation of publicly owned radio, telephone, and teletype systems. The findings and recommendations of the staff are made available both to the board and to the public agencies concerned. The division also provides, on a reimbursable basis, centralized maintenance service for most state agencies utilizing radio equipment. The budget for this activity appears in the appendix under the Purchasing Revolving Fund. The 1960-61 Budget continues the same level of service as in the current year.

for California products, and the development of new business in the State. It studies conditions affecting California business, industry and commerce, plans and develops an effective business information service, encourages and develops commerce with other states and foreign countries, and makes periodic reports and recommendations to the Governor and the Legislature for improvement of conditions affecting the development of business, industry and commerce.

The increase in the budget for this activity is due to full year operation compared to 9 months in 1959-60.

## LOCAL ALLOCATIONS DIVISION

## Program and Performance

This division serves as the technical staff to the Director of Finance and the State Allocation Board in the administration of several programs of state aid to local government agencies. The major programs are: to review and analyze applications for state aid and related documents to determine that eligibility requirements have been met; prepare reports and make recommendations to the Director of Finance and to the State Allocation Board in respect to these programs; maintain records of official actions of the Director of Finance and the State Allocation Board; administratively approve construction contracts and release of funds in accordance with the rules of the State

Allocation Board, and performs other functions authorized by the Director of Finance.

5 positions established on a temporary basis during the current year are now provided on a permanent basis. 1957 legislation gave authorization to purchase furniture and equipment for school districts with state funds. Workload increases due to these applications have made necessary these new positions.

The Organization and Cost Control Division is currently conducting a study of the School Building Aid Program as administered by the Local Allocations Division and Department of Education.

## ORGANIZATION AND COST CONTROL DIVISION

## Program and Performance

This division provides consultation services on management problems and makes studies of organization, procedures, administrative policy, records management, and accounting systems, as requested by any state agency or as determined by the director. Results of its surveys are usually submitted to the requesting agency as a written report with recommendations for improvements. Over 100 surveys are made annually to find better ways to do the government's work.

In the field of accounting, the division prescribes the State's uniform accounting system based on studies of methods and procedures ranging from relatively simple accounting systems applications to large and complex automated data processing systems.

The division prepares and maintains the *State Administrative Manual* which serves as a reference source for policies,

procedures, regulations, and information on management responsibilities.

It exercises the approval powers of the Department of Finance to fix and adjust salaries and establish class titles for certain positions exempt from the Civil Service System.

Some of its staff are assigned full time under contract to other state agencies to provide them management research and advisory services.

The staff of the Merit Award Board is also a part of this division. Employees' suggestions received by the board are processed for evaluation. Awards are given to employees for suggestions that are adopted.

3 additional positions are provided to meet increased workload in the tabulating systems section, clerical pool, and suggestion systems unit. The impact of the Work Improvement Program has created the need in the latter unit.

## SALARIES AND WAGES

44	Program and Performance							
45								
46	This office is responsible for the administration of Chapter 1.5,							
47	Title 7 of the Government Code which provides that the office							
48	will prepare, maintain and periodically revise a comprehensive							
49	state development plan; co-ordinate the public works programs							
50	undertaken by state, federal and local agencies; give planning							
51	assistance to local, district, and regional planning agencies and							
52	to other public agencies upon request; and undertake such other							
53	physical planning and co-ordination studies and activities as will							
54	implement the policies and intent of the Legislature.							
55	The State Development Plan is to be based on studies of							
56	physical, social, economic, and governmental factors, conditions							
57	and trends, and aimed at the co-ordinated physical development							
58	of the State. It will embody state policy regarding the State's							
59	physical growth and development and will include by discussion							
60	and agreement between the agencies involved, the projects and							
61	other improvement proposals of the departments and divisions							
62	of the State Government, the projects and improvements pro-							
63	posed by the Federal Government, and the major aspects of							
64	master or general plans of regional and local agencies of govern-							
65	ment. Upon approval by the Director of Finance and the Gov-							
66	ernor, the plan is to be transmitted to the Legislature for							
67	adoption in principle. A biennial report to the Legislature on							
68	the status of the plan is required.							
69	The office is to ascertain from each state department, board							
70	or agency, from each local jurisdiction, and where possible, from							
71	federal agencies all proposed public improvements or projects							
72	which are, in its opinion, of statewide concern. The office is to							
73	encourage conferences between state and federal agencies con-							
74	templating projects within the State and the local planning							
75

82								
83								
84								
85								
86								

agencies having jurisdiction over the territory in which such projects will be located. Whenever conflicts in proposed public works projects are determined to exist, the office is to notify the agencies concerned and recommend appropriate action to eliminate such conflicts.

The provision of local planning assistance is quite broad but in practice is largely confined to the administration of urban planning assistance grants made possible by Section 701 of the Federal Housing Act. Other assistance in terms of planning information from the library and procedural advice is provided local planning agencies.

The office encourages regional planning and, in accordance with the recommendations of the State Planning Advisory Committee, divides the State into regional planning districts.

The office also maintains a file of all plans and reports pertaining to the physical growth and development of the State and prepares an annual report on planning for distribution to state and local agencies.

The State Planning Advisory Committee provides advice and guidance to the office in the planning function. This committee is appointed by and serves at the pleasure of the Governor; however, appointments must be made from the ranks of local legislative, planning, and school officials.

3 additional positions are provided this office to adequately carry out the programs assigned to it by the Legislature. The increased program involves preparation of the State Development Plan, contacts involving state departments for the function of plan co-ordination, and the publishing of an annual report planning activities and the compilation of "California Plans."

16	PURCHASING DIVISION						
17	Program and Performance						
18	The State Purchasing Agent has sole authority to contract for						
19	the purchase of supplies for every state department, commission,						
20	board, institution, and official, with the exception of the State						
21	University.						
22	Bids are requested from dealers, jobbers, and manufacturers						
23	who are engaged in the various lines of business, and award is						
24	made to the lowest responsible bidder meeting minimum speci-						
25	fications, taking into consideration price, quality and fitness.						
26	A program of quality control and standardization has been						
27	developed for materials purchased by the State which has per-						
28	mitted negotiation of contracts for many commodities purchased						
29	in quantity. Service to the many departments and institutions						
30	has been further improved by delegating authority to place						
31	direct orders for limited amounts, noncompetitive items, and						
32	emergency supplies, in addition to contract items.						
33	Specifications are prepared and deliveries are carefully						
34	checked on all foodstuffs purchased for the patients at the state						
35	hospitals. Items purchased for the state agencies under standard						
36	specifications are checked at the Testing and Research Labora-						
37	tory of the Division of Highways at Sacramento.

1	<b>SUMMARY</b>				
2	TOTAL EXPENDITURES				
3	Support (State Fair Fund)-----	\$2,126,993	\$2,210,737	\$2,329,954	\$119,217
4					(5.4%)
5	Personnel man-years-----	202.2	208.9	204.9	-4
6	<b>GENERAL ANALYSIS</b>				
7	<b>Objectives</b>				
8	This agency conducts the annual State Fair and Exposition				
9	and during the interim period makes full utilization of the				
10	grounds for other activities.				
11	<b>Program and Performance</b>				
12	The Agricultural Code directs that the State Fair Board,				
13	subject to the approval of the Department of Finance, shall				
14	"Provide for and manage an annual fair or exposition at Sacra-				
15	mento of the industry and industrial products of this State and				
16	of the commercial products exported and imported through the				
17	ports of this State." There is a 12-day fair held for this purpose				
18	in the latter part of August and the first part of September				
19	each year.				
20	Since the inception of the State Fair in 1854 there has been				
21	continuous growth. At the present time exhibits are shown from				
22	12 foreign countries and 44 of the State's counties. In addition				
23	these economic interests are represented: livestock exhibits,				
24	poultry, rabbits, dairy products, and other agricultural products,				
25	floriculture, forestry and lumber, textiles, minerals and mining,				
26	the arts, home economics, junior division, horse show, fashions,				
27	wines, horse racing, and many others. This fair portrays Cali-				
28	fornia as a whole and shows its economic, governmental, and				
29	social life and its relationship with the world.				
30	The use of the fairgrounds for nonfair activities is growing				
31	and conventions, dances, roller rink, auto racing, cattle sales,				
32	winter quartering of race horses, and storage use contribute to				
33	the fair's revenues and helps affect the maintenance and upkeep				
34	cost of the fairgrounds.				
35	During the 1959-60 fiscal year, the staff of the new fair plan-				
36	ning function was reduced, and the unit will be eliminated by				
37	the end of the year. No funds are proposed for this unit during				
38	1960-61.				
39	Provision is made for expanding the clothing fashion program				
40	at the 1960 fair. This proposal contemplates an increase of				
41	approximately \$40,000 to be financed from additional revenues--				
42	\$15,000 to come from entry fees and \$25,000 from admission				
43	charges for the fashion show.				
44	The major items of increase are in the amount of paid adver-				
45	tising which has been restored to the same dollar amount that				
46	was provided for the 1958 fair without provision for increased				
47	rates. Other increases result from price changes and a higher				
48	percentage of premiums and awards earned. The increases are				
49	partially offset by reductions in temporary help, elimination of				
50	the cooking school and a reduction in contests, special attrac-				
51	tions and special days.				
52	A minimum equipment replacement is provided which includes				
53	two wornout automotive vehicles, deteriorated stage curtains for				
54	Governor's Hall which are a potential fire hazard, awnings for				
55	exhibit areas and waste receptacles.				
56	The largest policy change reflected in this budget is the in-				
57	crease in estimated revenues from admissions to the grounds.				
58	This increase in revenue is based on raising the admission				
59	charge from 50 cents to \$1.

## SIXTH DISTRICT AGRICULTURAL ASSOCIATION

Located at Los Angeles

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61	CHANGE FROM 1959-60
------------------------------	-------------------	----------------------	---------------------	------------------------

## SUMMARY

TOTAL EXPENDITURES				
Support ( <i>Sixth District Agricultural Association Fund</i> )-----	\$495,398	\$349,429	\$443,091	\$93,662 (26.8%)
Personnel man-years-----	43	46.8	57.5	10.7

## GENERAL ANALYSIS

## Objectives

Administer, maintain, and operate the facilities of the association including the California Museum of Science and Industry, and the adjacent land thereto known as "cultural area," Exposition Park; parking lots for the Los Angeles Memorial Coliseum and the Los Angeles Memorial Sports Arena; and shares in the management of the 2 latter mentioned sports stadia. The association was formed under the provisions of Chapter 69, Statutes of 1880.

## Program and Performance

The California Museum of Science and Industry contains permanent exhibits and temporary displays of the natural industries and industrial enterprises of the State. During the 1959-60 fiscal year, there will be 24 temporary exhibits ranging in tenure from 5 days to 6 weeks. Commitments to date indicate that the temporary special exhibit program for the 1960-61 fiscal year will be equal or greater in scope.

In May 1959, the Omnibus Room was officially opened to the public. This room features small compact exhibits representing industrial and scientific areas. All of the exhibits were furnished and are being maintained by private industry.

In June 1959, the \$50,000 Hall of Electronic Communications had its official opening. This entire exhibit is sponsored by the Pacific Telephone and Telegraph Company. Present plans call for a much larger telephone exhibit to be located in the new exhibit building addition now in the construction stage.

In August 1959, the Shirley Temple doll collection comprising over 500 dolls from throughout the world, opened to the public.

Plans are progressing rapidly on the Aviation Exhibit financed one-half by the industry and one-half by the State. It is anticipated that final research and design will be completed during the 1959-60 fiscal year and that construction will begin in the early part of the 1960-61 fiscal year.

In June 1959, the first step in the development of the Exposition Park Master Plan got underway with construction starting on a new 14,000 square foot outdoor exhibit courtyard for the museum. The courtyard is planned for the presentation of exhibits of an outdoor nature.

In July 1959, construction began on the exhibit wing addition totaling approximately 35,000 square feet and is scheduled

for occupancy during the 1960-61 fiscal year. The new museum area will be devoted exclusively to up-to-the-minute exhibits on electronics, mathematics, the human body, physics, chemistry, telephone, and the mechanical sciences. It is anticipated that private industries and professions will provide \$1,675,000 for the museum addition exhibits. The new wing will also contain lecture classrooms which will permit the museum to launch a science education program in connection with organized school tours and adult education groups.

728,341 persons visited the museum during 1958-59 which represents a 77 percent increase in attendance during the past 4 years. Indications are that the attendance will be in excess of 900,000 persons during the 1960-61 fiscal year. Over one-half the visitors are school age children.

Exposition Park, consisting of 104 acres owned by the association, is partly under lease to the Coliseum Commission, the City of Los Angeles, and the County of Los Angeles; the remainder being under the immediate control and jurisdiction of the association. Certain portions of the north half of the park (known as cultural area) were removed from the lease to the City of Los Angeles and returned to the association to permit the expansion of the museum and development of the park in accordance with the approved master plan. During the latter part of the 1959-60 fiscal year, the entire area still leased to the City and County of Los Angeles will revert to the association. It is planned to renew the ground lease with the County of Los Angeles which will provide for the county to pay 40 percent of the maintenance costs for the cultural area of the park. The city will continue to lease the Swimming Stadium and the sunken Rose Garden areas.

The association owns approximately 26 acres surrounding Exposition Park, which are operated as parking lots for patrons of the Los Angeles Memorial Coliseum, Los Angeles Memorial Sports Arena, and the Municipal Swim Stadium. The lots were acquired by loans from the General Fund and the State Beach and Park Fund. These advances, together with interest are being repaid from receipts from the use of the parking lots. A substantial increase in use is being experienced during the 1959-60 fiscal year from the Sports Arena and the increased attendance at football and baseball games in the Coliseum. A much greater increase is anticipated for 1960-61 based upon advance scheduling of events of the Los Angeles Memorial Sports Arena and the return of major league baseball to the Los

Code, was held in April, 1959, in the facilities of the 48th District Agricultural Association. The association has canceled the second fair scheduled for 1960.

The 1960-61 Budget provides for continuation of 2 additional positions in administration to meet increased workload primarily due to increases in the parking lot program and museum expansion. 3.9 positions are added for janitorial, maintenance, and custodial staffing for the new addition scheduled for completion by 1960-61. A supervisor, payroll clerk, and temporary help funds are provided to operate the state-owned parking lots previously operated under contractual arrangements.

## GENERAL ANALYSIS

Regional agricultural societies first received financial assistance from the State in 1861. After the adoption of the new Constitution of 1879, the regional agricultural societies were succeeded by district agricultural associations authorized by the Legislature of 1880 as state agencies. Section 80 of the Agricultural Code fixes the boundaries of 51 agricultural districts. There are 50 districts organized and holding fairs in addition to the Sixth District which maintains a permanent exhibit in Los Angeles.

The 51st Agricultural District was abolished effective January 1, 1960 by Chapter 1733, Statutes of 1959. The remaining assets of the association were transferred to the Department of Finance for liquidation.

Each of the district agricultural associations is a state institution administered by a board of 8 directors appointed by the Governor. The organization and operation of district agricultural associations are governed by Sections 80 to 93 of the Agricultural Code. District agricultural associations are subject to the laws and administrative regulations which apply to state agencies generally and to specific rules and regulations which apply only to district agricultural associations or to district and county fairs. District fairs are conducted under budgets ap-

proved by the Department of Finance and practically every action taken by an agricultural association requires departmental approval. The Audits Division of the Department of Finance audits the premium awards made at the fairs and makes post-audits as well.

Revenues received by the Sixth District Agricultural Association, Los Angeles, are deposited in a special fund in the State Treasury and this association operates out of this special fund under appropriations by the Legislature. This district does not receive an allocation under the provisions of Section 92 of the Agricultural Code.

The 1-A District Agricultural Association, San Francisco, receives an annual appropriation of \$250,000 and the 48th District Agricultural Association, Los Angeles, receives an annual appropriation of \$125,000 under the provisions of Section 19622 of the Business and Professions Code. Neither of these associations receives an allocation under the provisions of Section 92 of the Agricultural Code.

The remaining 48 district agricultural associations receive annual allocations on the basis of premiums paid at their respective fairs.

## GENERAL ANALYSIS

## Objectives

Administers policies established by the State Lands Commission in managing the public lands belonging to the State, consisting of school land, swamp and overflowed land, salt, marsh, tide and submerged lands, and other sovereign lands comprising approximately 3,500,000 acres. Principal revenue-producing function is the leasing of the public lands for the extraction of oil, gas, and other minerals.

The commission is composed of the Director of Finance, the Lieutenant Governor, and the Controller.

## Program and Performance

Activities in the administration of state lands have increased in scope and value with passing time, ranging from the original activity of selling and leasing proprietary lands to the present expanded duties, which include oil, gas, mineral, grazing, agricultural, commercial and recreational leasing and leases for use and occupancy of swamp, overflowed and tide and submerged lands.

As previously reported, the provisions of Division 6 of the Public Resources Code now provide for unrestricted leasing of the State's tide and submerged lands for oil and gas production. Leases may be let on either a cash bonus or a royalty bid factor basis, whichever returns the greater revenue to the State. 5 leases let during 1958 west of Gaviota, Santa Barbara County, are currently under exploratory development. Active wells on production, located on leased tide and submerged lands in the Huntington Beach and Santa Barbara areas, total 728, an increase of 29 during the past year. Revenues from this source averaged approximately \$900,000 per month for the period.

Under the provisions of Chapter 29, Statutes of 1956, First Ex. Sess., the commission accounts for oil and gas revenues derived from tide and submerged lands granted to the City of Long Beach. This is a major program involving complex engineering, auditing, and legal problems. Revenues from this source for the past year totaled \$8,689,000. These revenues were markedly lower than the previous year's \$15,000,000 as the result of the diversion of more than \$5,000,000 to pay the costs of an intensive program of water repressurization designed to alleviate subsidence. The Long Beach boundary problem for which the Legislature appropriated \$50,000 under the provisions of Chapter 2000, Statutes of 1957, remains unsolved. The commission is endeavoring to settle this matter without resorting to litigation.

Sales of public lands (school and federal) continue active as the result of public demand. Revenues from this source totaled \$558,000 during the past year, compared to \$99,100 during 1954-55. New applications filed during the past year exceeded those for any previous fiscal period, indicating accelerated activity in this field.

Land rental revenues show a continual increment, having jumped from \$34,000 in 1948 to \$188,000 for the past year.

Barometers indicative of agency activity forecast an all-time high during 1960-61 as the result of: (1) an increase in workload indicated by a 12 percent increase in backlog as of July 1, 1959; (2) new duties assigned by 1959 legislation. The 1960-61 Budget proposal provides for 9 new positions. 3 of these positions relate to oil and gas development; 2 to auditing; 1 to commercial and recreational leasing; 1 to legal functions; and 2 to administrative services.

13 bills containing legislative mandates to the commission to perform work were passed at the 1959 Session. 3 of these, Chapters 1457, 1464, and 1465, assigned new duties to the agency in the exercising of surveillance over the leasing activities of cities and other public agencies throughout the State. Chapter 1201 places jurisdiction in the commission respecting the conduct of salvage operations upon ungranted tide and submerged lands. 7 bills were passed which require the agency to survey and record the boundaries of tide and submerged lands granted to political subdivisions of the State. Taken together, the foregoing enactments represent a substantial increase in the agency's workload.

In addition to 136 minor cases, the commission is involved in 2 important and complicated litigatory actions in which millions of dollars are at stake. Most important is Orange County v. State in which the county lays claim to the tide and submerged lands along its entire coastline as a grant from the State under Chapter 526, Statutes of 1919. These lands contain the major portion of the oil and gas leases producing state oil revenues.

In the other action the United States is suing the City of Long Beach, the State, and numerous oil producers for claimed irreparable damage in the amount of \$70,000,000 to the Long Beach Naval Shipyard as a result of land subsidence. This action is quiescent pending a determination as to whether the water repressurization program will alleviate subsidence. If it does not, we may anticipate the Federal Government will revive the issue.

## GENERAL ANALYSIS

## Objectives

The Franchise Tax Board is composed of the State Controller, the Director of Finance, and the Chairman of the State Board of Equalization. It guides and reviews the overall operations of the department through an executive officer. The board receives all personal income, and bank and corporation franchise taxes, audits and assesses additional taxes where deficiencies occur, and collects delinquent taxes in accordance with the Bank and Corporation Tax Law and the Personal Income Tax Law.

## Program and Performance

This budget anticipates a continuing upward trend in the number of returns filed and overall workload of the department as indicated above. It is estimated that there will be 500,000 additional personal income tax returns received in the current year due to changes in the law in 1959 in addition to normal increases of approximately 210,500 total returns. The impact of this increase will be felt primarily in the 1960-61 processing workload.

Use of a new tab card short form return will facilitate processing of approximately 1,000,000 lower bracket returns. This accounts partially for an increased number of returns processed per man year from an estimated 7,858 in 1959-60 to 8,534 in 1960-61.

The addition of 41.6 man years of temporary help will provide for these increases and allow increased emphasis in 2 compliance programs—(1) the Federal Comparison Project and (2) the Information-at-Source Program. In 1958-59, the Federal Comparison Project returned \$8.05 per dollar of cost and the Information-at-Source Program \$2.63 per dollar of cost.

Continuation of the Federal Comparison Project on an annual basis is enhanced by the project initiated in April 1959 of duplicating federal punched cards at the Western States Service Center at Ogden, Utah. Approximately 4,150,000 returns were duplicated, providing the basis for comparison with state returns plus providing names and addresses of taxpayers and enabling mechanical addressing of returns. This program has the additional benefit of aiding enforcement in light of new filing requirements.

## ADMINISTRATION DIVISION

## Objectives

This division performs the cashing and accounting, the statistical analysis, bank tax computation, legal functions, hearings on appeals by taxpayers from staff decisions, and special investigations as well as overall supervision of the activities of the board.

## Program and Performance

The Accounting Section keeps the fiscal records for the agency, performs the cashing function, maintains the corporate and individual taxes receivable ledgers, and performs the service and supply function. 2.6 man-years of temporary help are proposed to handle the expected increase in workload.

The Statistical Section is responsible for computing annually the rate of tax applicable to banks and financial corporations. No additional staff is requested despite anticipated workload increases.

1 additional attorney is added in the Appeals and Review Section for increased workload in proposed tax assessments, increasing the staff to 1 hearing officer and 5 attorneys.

The Legal Section requests 0.1 man-years of temporary help to facilitate workload increases. Appeal cases are continuing to increase.

The Special Investigations Section was augmented by 3 agents and 1 clerk in the current year to double efforts concerning fraud, evasion, and illegal activity regarding state income and franchise taxes.

30							
31							
32	OBJECTIVES						
33							
34	This division performs the line functions relative to the re-						
35	sponsibilities of the board including the clerical processing of						
36	tax returns and related reports, desk and field auditing of such						
37	returns, and collection of delinquent taxes.						
38							
39	Program and Performance						
40							
41	The Preliminary Examination Unit checks the computations						
42	and scans the personal income tax returns for completeness, and						
43	also checks the computation of tax on all corporation returns.						
44	The Drawer Audit Section performs a general audit on per-						
45	sonal income tax returns and trains new auditors. This section						
46	returned a net revenue of \$2.22 per dollar of cost in 1958-59.						
47	Continuation of this audit is planned.						
48	The in-state personal income tax field audit program recovered						
49	\$4.21 in net increased assessments for each dollar spent in						
50	1958-59 while bank and corporation tax audits recovered \$12.47.						
51	Included in the bank and corporation tax audit program is the						
52	out-of-state auditing, which includes 18 auditors and 2 clerks						
53	divided evenly between the Chicago and New York offices. Each						
54	of these offices is concerned with the audit of corporations lo-						
55	cated within a 1,000-mile radius of such office. This program in-						
56	volves a field type audit of the corporation's tax base for state						
57	purposes and the application of the allocation formula thereto.						
58	The average recovery over the past 7 years has been in excess						
59	of \$20 for each dollar of cost. In 1958-59 the recovery was						
60	\$7.80.

## OPERATIONS

A comprehensive compliance program is carried out by the 599 Unit which involves comparison of employer information returns with the income reported by the respective employees. This activity returned a net revenue of \$2.63 for each dollar spent in 1958-59. Continuation of this program is planned and increased temporary help is provided for this purpose. The second Federal Comparison Project resulted in a return of \$8.05 per dollar of cost in 1958-59 and provision for expansion of this program in the budget year is planned. Duplication of federal returns at low cost makes this program practical on an annual basis.

44.4 additional man-years of temporary help, 41.6 in Sacramento, 1.9 in Los Angeles, and 0.9 in San Francisco, are proposed to keep pace with the 1960-61 fiscal year workload, which is based primarily on the processing of returns, the receipt and processing of information at source reports and the continuation and expansion of the Federal Comparison Project.

In addition to the headquarters office in Sacramento, the division maintains several offices throughout the State for the convenience of taxpayers, and to provide greater efficiency in field audit of returns. The district offices are grouped under the 2 regional offices, 1 in San Francisco and the other in Los Angeles.

Provision is made for moving into the new State Office Buildings in Los Angeles and Fresno in 1960-61. The board will also occupy space in the new buildings in San Francisco and Oakland in 1959-60.

## GENERAL ANALYSIS

## Objectives

The State Treasurer is charged with the responsibility for the custody of all moneys and securities belonging to or held in trust by the State; investment of surplus General Fund moneys, other designated surplus funds together with funds of the State and public agencies deposited in court under condemnation proceedings; administration of the sale of state bonds, their redemption, and interest payments; and pays warrants drawn by the State Controller.

## Program and Performance

The Pooled Money Investment Program is supervised by the Pooled Money Investment Board and administered by the treasurer.

<sup>a</sup> Composed of savings in salaries and wages, \$56,620; operating expenses, \$68,109; equipment, \$11,430; and excess reimbursements, \$2,086.

<sup>b</sup> Expenditures from bond funds are not included in overall budget totals.

<sup>c</sup> Composed of savings in operating expenses.

ury cashier. Members of the board are the State Treasurer, the State Controller, and the Director of Finance.

Earnings on pooled money investments for the fiscal year 1958-59 were \$16,370,656. This was accomplished even though funds available for investment were substantially less than during the 1957-58 fiscal year. Although net earnings decreased \$789,074 from the previous year there was an increase in the rate of return on invested funds.

Redemption of warrants and checks issued by the State Controller and state agencies is estimated to increase from 3,848,854 in 1958-59 to an estimated 4,150,000 in 1959-60 and 4,550,000 in the 1960-61 fiscal year.

## GENERAL ANALYSIS

## Objectives

The California Highway Patrol is charged with the responsibility of providing adequate patrol of the highways at all times of the day and night for the prevention of accidents, control of traffic, and all laws regulating the operation of vehicles and the use of the highways.

## Program and Performance

The department is headquartered in Sacramento and has 1 or more field offices in all but 3 of the State's 58 counties. Traffic in the 3 counties where no office is maintained is patrolled by resident officers. A fleet of approximately 1,600 mobile units operate in excess of 55,000,000 miles annually for patrol, enforcement of weight, height, length, brakes, lights of commercial vehicles, school bus inspection, school crossing guard supervision, removal of abandoned vehicles, supervision, service, administration, and training.

The Field Operations Division is responsible for attaining the objectives of the department and is supported by the Administration, Technical Services, and Training Divisions, all operating within policy established by the commissioner.

The Administration Division discharges the business affairs of the department; prepares the departmental budget; conducts studies to develop cost data; administers the personnel program; provides general file, messenger and reproducing services; leases real property and co-ordinates capital outlay and maintenance projects; prepares specifications for and develops prototype mobile equipment; records data relative to mobile equipment operations; tests accessories and tires used on mobile equipment; maintains an inventory of all equipment; supplies all materials used from a central stores system; and supervises radio and wire communications.

The Technical Services Division determines the distribution of budgeted uniformed strength; co-ordinates disaster planning with the disaster office; prepares statistical data; develops and distributes radio and television programs, traffic safety information, and news releases; controls permits for emergency equip-

ment; issues light and brake station licenses; tests accessories for compliance with state law; issues orders and bulletins and analyzes new techniques.

The Training Division conducts cadet and in-service training for uniformed personnel.

An additional 33 traffic sergeants are included in the 1960-61 budget to return first-line supervision to its previously authorized level. 6.5 additional clerks, 1.5 additional janitors, 2 automotive servicemen and 1.2 additional dispatchers are included to provide necessary supporting staff for the patrol operations in the field. Workload increases in the Division of Administration require 1 clerk in accounting and 0.5 mechanic for new vehicle equipping. 1 additional automobile electrician position is included as an economy measure to eliminate the necessity for costly repairs to electrical circuits currently being accomplished on a contractual basis. 1 painter is proposed to repair helmets and results in an offset savings in operating expenses. 1 teletypewriter operator and 2 key punch operators are included for the Division of Technical Services, the former to assist in the transmission of increased teletype traffic and the latter to record increased citations and accident reports. 1 automobile equipment testing engineer is proposed to handle increased requests for certification of automobile devices. 1 automobile mechanic and 0.5 temporary help is proposed for the Training Division as additional supporting staff for the academy operation.

The recent reorganization of the department is reflected in this budget. The Division of Field Operations has been divided into 6 zones; the training academy has been made the responsibility of the newly created Training Division; responsibility for departmental communications has been transferred from the Technical Services Division to the Division of Administration; and the commissioner's office has been expanded to provide necessary executive assistance. In the budget year, provision is made for the Division of Organization and Cost Control to review methods and procedures on a contractual basis.

## GENERAL ANALYSIS

## Objectives

It is the objective of this department to promote and develop the welfare of the wage earners of the State, improve their working conditions, and advance their opportunities for profitable employment.

## Program and Performance

The department through its 8 line divisions, negotiates with parties in disputes when a work stoppage is threatened; adjudicates claims under the Workmen's Compensation Law; establishes, enforces and promotes standards of safety for all phases of industrial activity; enforces labor laws and issues and enforces orders relating to men, women and minors; promotes opportunities for apprentices; enforces laws relating to housing; and promotes fair employment practices through the Fair Employment Practices Commission established by the 1959 Legislature. The Divisions of Administration and Labor Statistics and Research service the line divisions.

The downward trend in work injuries since 1956 and continuing through 1958 has started to turn upward with 47,219 disabling work injuries reported during the first 4 months of 1959. This is an increase of 7.9 percent over the same period in 1958. Employment during the period increased 6 percent and number of employers 4 percent. These injury and labor force trends are reflected in an estimated 10 percent workload increase for the Industrial Accident Commission during the current and budget years. A corresponding increase in industrial safety workload is also anticipated based on a 4 percent increase in number of employers and places of employment.

Complaints regarding wages, hours, and employment conditions affecting industrial welfare and labor law enforcement workload increased 10 percent during the 1958-59 fiscal year and further increases of 5 percent annually are projected for the current and budget years based on continuing labor force growth.

Labor camps, principally for migrant workers and Mexican nationals, requiring inspections in compliance with laws will reach a total of 8,740 during the 1960-61 fiscal year.

New programs put into effect in the current year include trailer coach regulation prescribed by Chapters 1191 and 1328, Statutes of 1959, and per diem wage rate and collective bargaining agreement reporting as required by Chapters 1787 and 2173, Statutes of 1959.

The Division of Fair Employment Practices and the Fair Employment Practices Commission created by Chapter 121, Statutes of 1959, to safeguard the rights of all persons to seek, obtain, and hold employment without discrimination was organized and became operative in September, 1959.

Revision of the budget for a single working woman, and adoption of an order for minimum wages and working conditions for women and children in agriculture require 5.1 man-years of technical and clerical personnel during the 1960-61 fiscal year.

Effective in 1960-61, an additional 4 positions are proposed to audit records of self-insurers for compliance with the workmen's compensation law. Implementation of the program is contingent on the passage of legislation authorizing a fee schedule that will make the function self supporting.

The increase in rent, building maintenance, and moving expenses provide for relocation of the department to state buildings in Los Angeles, San Francisco, Oakland and Fresno during the current and budget years.

Other 1960-61 budget provisions for workload increases are as follows:

		Positions
1. Administration—clerical assistance for director's office and central mail and stock services at Los Angeles	4	4
2. Conciliation services	2	2
3. Industrial accident referee teams	15	15
4. Industrial safety inspections	12	12
5. Welfare and labor law complaint services	22	22
6. Apprenticeship consultants	9	9
7. Housing inspection services	8	8
8. Labor statistics and research	4	4

## DIVISION OF ADMINISTRATION

## Objectives

To carry out the administration's policy and provide effective, economical administration of the laws affecting this department.

## Program and Performance

This division performs policymaking, housing, procurement, accounting, personnel and duplicating functions for the department.

The efforts of the operating divisions are guided through formulation and administration of the budget.

Additional positions proposed for 1960-61 include 1 additional intermediate stenographer-clerk for workload increases in the administration office; and a storekeeper plus temporary

help to staff and operate a central mail and stockroom in the new Los Angeles State Building to serve all divisions located there.

In recent years the number of workers covered by self-insurers under the Workmen's Compensation Law has increased by one-third to a total of about 600,000 and compensation cases for this group have increased nearly 200 percent. 2 claims adjusters, 1 investigator and 1 clerk are provided to audit records of self-insurers to determine that worker's claims have been properly handled. Provision of this service is proposed, contingent upon the establishment of appropriate charges by the Legislature that will reimburse the State for costs.

## DIVISION OF CONCILIATION

## Objectives

To promote sound union-management relationships.

## Program and Performance

The Conciliation Service adjusts labor-management disputes through conciliation, mediation, and arbitration procedures; referees the conduct of representation elections; prevents critical disputes and work stoppages through investigation, and aids in the solution of labor problems which threaten curtail-

ment of production or services and also administers arbitration, election and grievance provisions of the Los Angeles Metropolitan Transit Authority Act.

Based on an increased caseload in the current year with a further increase to 700 cases projected for the budget year 1 additional conciliator and 1 intermediate stenographer-clerk are proposed for the 1960-61 fiscal year. The stenographer position will also provide clerical services for a branch office in San Diego.

DIVISION OF INDUSTRIAL ACCIDENTS

Objectives

To obtain for the injured workman and his dependents with the least possible delay all the benefits they are entitled to by law.

Program and Performance

The Industrial Accident Commission in its judicial function is a court of limited jurisdiction to adjust litigated cases arising under the workmen's compensation laws. A staff of 67 referees assists the commission in deciding claims brought before the commission. Original decisions are made by the referees, except for a few special types of cases. If a party is dissatisfied with the referee's decision, he may then petition the commission or 1 of its panels for a reconsideration, or the commission, itself, on its own motion, may grant a reconsideration. Following are the anticipated number of claims to be filed, disposed of, and pending:

Fiscal Year	Filings	Number of Referees	Rate of Production	Number Disposed	Cases Pending
Actual:					
1957-58 -----	44,320	52	775		
		10	400	44,384	9,849
1958-59 -----	49,436	52	800

Dispositions

Fiscal Year	Filings	Number of Referees	Rate of Production	Number Disposed	Cases Pending
Estimated:					
1959-60	54,380 <sup>a</sup>	62	800		
		5	650	52,850	10,357
1960-61	59,818 <sup>a</sup>	67	850		
		3 <sup>b</sup>	450	58,300	11,875

<sup>a</sup> Projected as 10 percent increase. Actual increase in 1958-59 over 13 percent.

<sup>b</sup> Proposed new referees.

The rate of production per referee is expected to continue to improve, primarily due to the pretrial method of handling selected cases and the decentralization of personnel and workload, resulting in reduced travel for referees and hearing reporters. In addition to the increased rate of production, it will be necessary to provide 3 additional referee teams and supporting staff to handle an expected 10 percent increase in case filings.

Objectives

Administration and enforcement of the minimum wage and labor standards for women and minors.

Program and Performance

The jurisdiction of the Division of Industrial Welfare extends to the administration and enforcement of all laws and regulations for women and minors which pertain to their minimum wage, the maximum hours, and the standard conditions of labor as prescribed by the Labor Code and the regulations adopted by the Industrial Welfare Commission. Currently all employments are covered except agriculture and domestic service. Responsibilities of the division are to license and regulate industrial homework for men and women; license and regulate the employment of handicapped women and minors at special wage rates; investigate requests for defense production permits and administer their operation; issue special exemptions from the Industrial Welfare Commission regulations and enforce the equal pay law for women.

During the 1958-59 fiscal year 10,165 complaints were registered compared to 9,178 in 1957-58. \$199,388 was collected, representing minimum wages and penalty overtime pay under the hours regulations. \$121,533 was collected in 1957-58. Investigations and hearings totaled 9,882 for the 1958-59 fiscal year with the result that 27,456 violations were found and corrected. 119 homework licenses were issued to employers and \$59 permits to individual homeworkers. 1,949 special minimum wage permits and 135 exemption permits were processed and issued.

For 1960-61 the budget proposes to continue these services at the current level by the addition of 6 industrial welfare agents, 1 senior stenographer-clerk, and 4 intermediate stenographer-clerks for the increasing complaint workload. A total of 10,700 complaints are estimated for the current year, an increase of 535 over 1958-59, with 11,235 projected for 1960-61.

In addition, 4 one-half-time intermediate stenographer-clerk positions are proposed to extend 4 authorized one-half-time positions to full-time. This will permit offices located at San Jose, Bakersfield, Stockton and Eureka to remain open a normal day while the welfare agent is in the field.

5 additional positions limited to 9 months average duration are provided to bring up to date the cost-of-living budget for a single working woman which was compiled in 1950. The budget is used by the Industrial Welfare Commission to establish the minimum wage for women in California industry and is no longer sufficiently valid for this purpose.

The budget also includes a technical assistant for 9 months, and 0.3 man-year of temporary help to prepare and issue a minimum wage and hours order for agriculture when adopted by the commission. Adoption of this order would leave domestic service as the only industry not covered by Industrial Welfare Commission orders pertaining to employment of women and minors.

2							
3	Objectives						
4							
5	To protect the rights of the employee under provisions of the						
6	Labor Code.						
7							
8	Program and Performance						
9							
10	This division has responsibility for enforcement of all labor						
11	laws not specifically delegated to other agencies. The greater						
12	part of its work consists of investigating complaints of unpaid						
13	wages and enforcing payment of claims which it finds to be						
14	valid. Other major groups of laws enforced by the division						
15	include those relative to payments to health and welfare funds,						
16	employment of minors, employment on public works, bonding of						
17	employers in certain industries, workmen's compensation insur-						
18	ance, registration of unloaders of farm products, and regulation						
19	of private employment agencies and farm labor contractors.						
20	Complaints and controversies received by the division in the						
21	1958-59 fiscal year totaled 40,234, an increase of 9.9 percent						
22	over the previous year. Wage complaints alone, numbered 30,078						
23	in 1958-59, while a record amount of \$2,371,456 in unpaid wages						
24	was recovered for California workers.						
25	Licensing action showed a substantial rise as the division						
26	issued 1,351 licenses to private employment agencies, heard and						
27	determined 4,618 controversies relative to fees claimed by these						
28	agencies. In connection with farm labor contractors, a total of

## DIVISION OF APPRENTICESHIP STANDARDS

## Objectives

To promote and develop apprentice training.

## Program and Performance

The law provides for an apprenticeship council of 16 (2 ex officio) members representing labor, management, and the general public. The council sets standards and rules to improve the conditions of the apprentice and industry. The division, working under the voluntary provisions of the apprenticeship law, pro-

vides consultative service and assists employers, employees, and their organizations.

The 1958 uptrend in apprentice registration has continued into 1959 with 19,604 active apprentices on July 1, 1959. Extending this trend the division estimates a total of 21,254 active apprentices during the 1960-61 fiscal year. To provide for this increase in workload at the present level of service 6 additional apprenticeship consultant and 3 clerical positions are included in this budget.

## DIVISION OF HOUSING

coaches sold in California manufactured after September 1, 1958, in accord with Section 18370, Health and Safety Code.

Increased efforts towards adoption and enforcement of city and county building codes and trailer park ordinances. As of January 1959, 30 of the 58 counties have building codes and 18 cities and 3 counties have adopted comparable trailer park ordinances.

During the current year 1 area supervisor, 8 district representatives, and 4 clerical positions were established and are continued for the budget year to perform inspections of all trailer coaches sold in California for compliance with health and safety regulations. Program costs are fully reimbursed by fees charged manufacturers and sales agencies for services.

Continuation of the programs outlined above during the 1960-61 fiscal year to provide for inspection of an additional 740 labor camps; increasing trailer coach manufacturing and sales; and construction plan approval and inspection of new motels and trailer courts will require 8 additional positions. 4 district representatives for labor camp inspection workload, 2 district representatives (1 each) for trailer coach inspections and motel-trailer court construction approval, and 2 intermediate stenographer-clerks at the established ratio for increased clerical duties are proposed for the budget year.

19	DIVISION OF LABOR STATISTICS AND RESEARCH						
20	Objectives						
21	The Division of Labor Statistics and Research has legal responsibility for compiling labor statistics for the State of California and administrative statistics for the department.						
22	Program and Performance						
23	The division compiles and publishes monthly statistics of employment, earnings, and hours, by industry, for California and 8 major metropolitan areas and, in co-operation with the Department of Employment, prepares monthly estimates of civilian employment and unemployment in the State. Employment, earnings, and hours statistics for nonagricultural industries are collected under a co-operative program with the United States Department of Labor, Bureau of Labor Statistics. The division compiles statistics of work injuries to provide information for use in accident prevention work—to make known how, where, and why accidents occur. It makes studies and investigations in the field of industrial relations; also studies of wages and hours in industries employing women for minimum wage determination. Administrative statistics are compiled regularly for the department.						
24	Increases in the population and labor force of California have substantially increased the workload of the division. Furthermore, as the volume of work of the department increases the workload of this division increases in connection with the compiling of their administrative statistics and the performing of operating services. Much of this additional load has been carried on through greater utilization of punchcard and tabulating machine techniques.						
25	2 research technicians, 1 tabulating machine operator, and intermediate clerks were established in the current year, and continued for 1960-61, to establish per diem wage rates for public works contracts as prescribed by Chapters 1787 and 2173 Statutes of 1959.						
26	This budget proposes 4 additional positions for the work in jury statistics and employment and payroll statistics sections where major workload increases have taken place.

## GENERAL ANALYSIS

## Objectives

The principal function of the State Fire Marshal is fire prevention and protection.

## Program and Performance

A co-ordinated program for administering state fire safety laws, rules and regulations has been established between the office of the State Fire Marshal and local city, county, and district fire officials. This co-ordinated program was made possible by the creation of the State Fire Advisory Board in 1945. The State Fire Marshal, with the assistance of this board, develops fire safety standards and administers and enforces these standards. Through the board, it has been possible to develop uniform statewide standards of fire safety and provide for their administration and enforcement without creating overlapping authority and duplication of effort, and at the same time preserve local autonomy. It is the general policy of the Fire Marshal to administer laws and regulations on a consultative basis rather than by direct enforcement.

The Fire Marshal's program includes: general fire prevention work; inspection of hospitals, schools, public assemblies,

fairs, and state institutions; and enforcement of laws pertaining to fireworks, flammable materials, and explosives.

Fire prevention and inspection work covers such matters as the height, area, and fire resistiveness of buildings for different types of occupancy; adequacy of exits; fire alarm and fire extinguishing equipment; availability of water supply for fire control; and fire hazards related to different types of occupancy. Reports are issued listing corrections, alterations, and additional protection needed to meet minimum standards.

The Fire Marshal operates a laboratory to test various materials in order to set fire safety standards.

This budget provides for the continuation of 3 positions established in the current year to perform the services required by Chapter 1634, Statutes of 1959. These positions will be reimbursed in full from the sale of bulletins listing safe or approved building materials. There is also included 1 deputy position established in the current year to June 30, 1961, to establish regulations for the transportation of radioactive materials in accordance with Chapter 1810, Statutes of 1959.

2 additional positions are provided in this budget to continue the general fire prevention work at the current level of service.

a Composed of savings in salaries and wages, \$60,680; operating expenses, \$154,450; equipment, \$55,194; and excess reimbursements, \$12,986.

b Composed of savings in operating expenses, \$56,850; and excess reimbursements, \$6,497.

## GENERAL ANALYSIS

## Objectives

The Department of Justice, under the direction of the Attorney General, is the senior law office of the State. The Department is responsible for interpreting laws, rendering opinions, and representing the State in civil and criminal proceedings. To assist in law enforcement, the department maintains a fingerprint file for identification purposes, compiles statistics pertaining to crime, assists peace officers in civil and criminal investigations, and participates in direct enforcement in the use, possession, and sale of narcotics.

## Program and Performance

Under the direction of the Attorney General, the Department of Justice provides legal advice and assistance to the various state departments, boards and commissions. The department passes on the constitutionality of each law passed by the Legislature for the final consideration of the Governor, and represents the State on all criminal matters before the Appellate and Supreme Courts. Another important function is the identification of criminals through current fingerprint and criminal record files and by related technical aid and assistance to local agencies. Closely allied with this service is the co-ordination of requests from local enforcement agencies, and assistance in the location of deserting parents.

The State Narcotics Act is enforced through offices located in San Francisco, Fresno, Sacramento, Los Angeles, and San Diego. Agents operating from these offices investigate known and suspected persons for illegal sale, possession, or use of narcotics. Prosecution of violators is accomplished through the district attorney in each county.

Chapter 1823, Statutes of 1959, created in the Department of Justice, the Commission on Peace Officers' Standards and Training consisting of the Attorney General and 9 members appointed by the Governor. Estimated expenditures for the current and budget years are reflected in detail in the budget for Commission on Peace Officers' Standards and Training.

During the budget year, new positions include 5 attorneys to handle increased workload. 4 attorneys are included as existing and 2 additional attorney positions are provided in lieu of

services being obtained through contract in 1959-60 to continue the investigation of alleged violations of fair trade practices as provided in Chapter 2083, Statutes of 1959. 1.5 man-years of temporary help is provided to employ second year legal students during summer vacation as a recruitment measure. 3 administrative assistant positions are included to provide administrative assistance in the 3 legal offices of the Attorney General, so that more attention can be devoted to important litigation by the legal staff. 4 stenographers will be required in accordance with the ratio of 2 stenographers to 3 attorneys. An additional 4 stenographers were established in the current year for the investigation of illegal trade practices.

1 administrative analyst, 1 accounting officer, 1 personnel officer and 6 clerks are proposed for the Division of General Administration to strengthen administrative control and to handle increased workload. 1 librarian is provided for the Los Angeles office to insure maximum efficiency from the legal library.

2 investigators were established in the current year for Criminal Law in order to continue the investigation of alleged violations of illegal trade practices. 2 clerks are included in the Bureau of Criminal Statistics to process additional work occasioned, for the most part, by the recently inaugurated narcotic users statistical program. In addition, 1 tabulating machine operator is required to provide service for correctional studies conducted by the Department of Corrections and Youth Authority.

Workload increases in the Bureau of Criminal Identification and Investigation require 8 positions in the Fingerprint Section, 19 positions in the Record Section and 6 positions in the Special Services Section.

Certain specialized items of enforcement equipment are included in the Bureaus of Criminal Identification and Investigation and Narcotic Enforcement to provide more efficient techniques.

The current and budget year items for rent—building space provide for occupancy of the new San Francisco State Building, February 1, 1960, and the Fresno State Building by the Bureau of Narcotic Enforcement July 1, 1960.

## DIVISION OF GENERAL ADMINISTRATION

## Objectives

This division is responsible to the Attorney General for the maintenance of the general services necessary to the operating divisions of the department, and for the operation of the State Teletype System.

## Program and Performance

This division, through the Accounting Office, maintains fiscal control, budget preparation, purchasing, internal management, and personnel administration.

The State Teletype System is a communication service primarily for police offices with secondary use by the state governmental agencies. Departmental control centers are located in Sacramento, Los Angeles and San Francisco.

Stenographic assistance for the legal staff is provided through this division.

On the basis of the additional attorneys included in the 1960-61 Budget, 4 additional senior legal stenographers are required. An additional 4 stenographers were established in the current year for the investigation of alleged illegal trade practices.

2 clerks are proposed for the Los Angeles office, 1 to act as receptionist on the fifth floor, and 1 to maintain the legal library. 1 clerk is included for the Sacramento legal office on a workload basis. 7 positions are included for the Administrative Office for workload and to strengthen the office to provide the analytical studies, personnel services, and research necessary for better management and controls.

2							
3	Objectives						
4							
5	This division insures criminal justice in California through						
6	periodic meetings with local law enforcement agencies. Prosecu-						
7	tion is assumed when local enforcement is negated.						
8							
9	Program and Performance						
10	The legal staff of this division represents the State on all						
11	criminal proceedings when appealed from trial courts, prepares						
12	documents for extradition of fugitives, and processes forfeiture						
13	of vehicles for violation of State Narcotics Act. The compila-						
14	tion of crime statistics is a responsibility of this division. This						
15	is accomplished by the Bureau of Criminal Statistics located						
16	in Sacramento which maintains detailed statistics of all crimes						
17	committed in California, records of turnover rate of prisoners,						
18	and juvenile delinquency figures. A new program was institu-						
19	tuted during the current year to include a reporting system						
20	for narcotic violations.						
21	This division functions as a clearing house for information						
22	concerning criminals and as a source of technical aid and as-						
23	sistance in the investigation of crime and the apprehension of						
24	criminals. Fingerprint files are maintained on a 24-hour basis						
25	to provide maximum service to local police jurisdictions. A						
26	laboratory and a staff of qualified technicians including spe-						
27	cialists in the operation of the polygraph provide assistance to						
28	local agencies and other state agencies when requested.

Special training is given local law enforcement personnel in the aspects of narcotic enforcement. Specially trained inspectors, operating under cover, contact known informers and purchase evidence or information leading to the arrest of narcotic users and suppliers. Pharmacist inspectors insure the legitimate use of drugs by professional people.

For the budget year, 3 attorneys are proposed to provide proper staffing for the increased workload of the division and 2 deputies are included in lieu of a contractual agreement for the illegal trade practices unit established under Chapter 2083, Statutes of 1959. 4 attorneys and 2 investigators were established in the current year and are continued in the budget year for this purpose.

2 statistical clerks are proposed for the Bureau of Criminal Statistics to handle increased workload. 1 tabulating machine operator is included to provide machine service workload required by the Departments of Corrections and Youth Authority. 33 additional positions are required for Bureau of Criminal Identification and Investigation workload to provide the level of services needed by law enforcement agencies. The areas of increase are 8 positions for fingerprint identification, 6 positions for the Special Services Section, and 19 positions for the Record Section.

a 2 positions established in 1959-60 for purposes of Chapter 2083, Statutes of 1959.  
b 1 position established in 1959-60 for purposes of Chapter 2083, Statutes of 1959.

SERVICES RENDERED COLORADO RIVER BOARD

GENERAL ANALYSIS

The trial of the Arizona vs. California litigation was concluded in August 1958, and it is anticipated that the special masters report will be released by the end of the current fiscal year. If so, there will be exceptions filed with the Supreme Court by one or both parties. The master may convene further proceedings in New York or Washington for arguments on the more controversial issues.

Legal action in the suit, Arizona vs. California before the United States Supreme Court has required intensive legal service as well as extensive engineering studies and research since the initial step in the long legal process was taken by the State of Arizona in August 1952. This suit has involved both the Department of Justice and the Colorado River Board.

Estimates of expenditures by both agencies directly related to the legal action follows:

	Actual	Estimated	
	1957-58	1958-59	1959-60 1960-61
Department of Justice	\$521,095	\$558,205	\$510,222 \$408,318
Colorado River Board	\$109,330	\$78,500	\$45,320 \$24,256
Totals -----	\$630,425	\$636,705	\$555,542 \$432,574

A more detailed statement of the related program is shown in the budget of the Colorado River Board.

Expenditures for this program are reduced in anticipation of diminishing activity.

SALARIES AND WAGES

(See page 184, Salary Supplement)

	1	1	1				
Assistant attorney general -----				\$15,600	\$16,200	\$16,200

## FEES TO SPECIAL COUNSEL EMPLOYED PURSUANT TO SECTION 12520, GOVERNMENT CODE

50	GENERAL ANALYSIS							
51	These special counsels provide for making investigations for							
52	discovery and recovery of property to which the State may be							
53	entitled by escheat and to conduct criminal prosecutions in							
54	counties where the district attorney is disqualified to conduct							
55	the prosecution.							
56	No change is anticipated from the current year.							
57	OPERATING EXPENSES							
58	Fees to special counsel				\$1,033	\$8,500	\$8,500	—

## FEDERAL POWER COMMISSION PROCEEDINGS

62	GENERAL ANALYSIS							
63	Actual and estimated current year expenditures are for con-							
64	sultants and other expenses related to participation by the							
65	Department of Justice in natural gas rate proceedings before							
66	the Federal Power Commission on behalf of the California con-							
67	sumer. In the budget year full responsibility for this program							
68	will rest with the Public Utilities Commission and its ex-							
69	panded staff of engineers and attorneys.							
70	OPERATING EXPENSES							
71	Consulting services and expenses				\$25,462	\$25,000	—	—

## REHABILITATION OF NARCOTIC ADDICTS

## GENERAL ANALYSIS

Chapter 2129, Statutes of 1959, provided an appropriation to encourage each county to make use of synthetic opiate, anti-narcotics and other testing procedures to determine narcotic

addiction or the absence thereof, and to foster research in means of detecting the existence of narcotic addiction and in medical methods and procedures for that purpose.

## OPERATING EXPENSES

Rehabilitation of narcotics addicts	-	\$50,000	-	-\$50,000
TOTAL EXPENDITURES	\$6,055,074	\$6,883,853	\$7,258,041	\$374,188 (5.4%)

## RECONCILIATION WITH APPROPRIATIONS

## General Fund

## Appropriations:

Budget Act appropriation (Support)	\$5,280,584	\$5,754,780	\$6,450,798
Allocation from Salary Increase Fund (Support)	-	158,675	-
Budget Act appropriation (Additional Support)	247,181	-	-
Budget Act appropriation (services rendered Colorado River Board)	645,616	500,116	400,116
Budget Act appropriation (fees to special counsel)	8,500	8,500	8,500
Budget Act appropriation (Federal Power Commission proceedings)	25,000	25,000	-
Allocation from Emergency Fund (Federal Power Commission proceedings)	2,000	-	-
Chapter 2046, Statutes of 1959	-	8,000	-
Chapter 2083, Statutes of 1959	-	90,000	-

## DEPARTMENT OF MENTAL HYGIENE—Continued

## Objectives

The objectives of the Department of Mental Hygiene are to care for, treat and rehabilitate mentally ill, mentally retarded, and emotionally maladjusted patients so that they may return to society as productive citizens, and to prevent mental illness through an active program to foster mental health.

## Program and Performance

The present Department of Mental Hygiene was established as a separate entity in 1945, and since then has developed a diversified program of care and treatment, research and training, and mental health education. The program that today provides treatment specifically designed for the clinic patient, the mentally retarded patient, and the mentally ill patient is one that has been a gradual development in which the old custodial concept has been abandoned.

2 institutes are operated by the department in conjunction with the University of California as teaching and research centers for both the University and the department and provide care and treatment for patients with early curable types of mental disorders. To carry out such a program, they care for and treat a limited number of inpatients and operate a large outpatient program as part of the teaching and research programs.

In the 4 hospitals for the mentally retarded, the program is based on the knowledge that mental retardation alone does not produce a socially unacceptable person, and that many of the mentally handicapped can be integrated into society. With treatment, habit and character training in this controlled environment, the patient develops to the fullest his intellectual capacities, and many are capable of returning to their homes and communities as self-supporting, or partially self-supporting citizens.

The treatment programs in the 10 hospitals for the mentally ill show a marked emphasis on active therapy, bringing more treatment to more patients. In modern receiving and treatment units, newly admitted acutely ill patients are provided the intensive treatment most effective during the onset of mental illness. Increasingly, active therapy has reached all wards.

Juvenile units at Camarillo and Napa State Hospitals provide the special type of care needed by children suffering from mental disease or severe behavior disorders. They also operate as facilities for observation and treatment requested by the State's juvenile courts or Youth Authority.

Special treatment and facilities for tuberculous patients, as well as special treatment for alcoholics and drug addicts are also provided in the hospitals. Patton State Hospital has been designated as the special tuberculosis center for Southern California, and Napa for Northern California. Alcoholics and narcotics addicts are provided special treatment throughout the hospitals for the mentally ill. Great care is taken to correctly

diagnose both these types of patients since their difficulty is frequently symptomatic of some more deep-seated disorder.

Special treatment for the rehabilitation of sexual psychopaths is provided at Atascadero State Hospital. Persons diagnosed as criminally insane are also committed to this maximum security hospital. Some of the patients at Atascadero are committed for observation by the courts.

The department's new continuous research program has developed rapidly. Thus far, state appropriations have amounted to \$1,502,000 and these have been supplemented by more than a million dollars in federal funds granted by the National Institute of Mental Health. The state allocation for research, recognized as part of the "efficient start" originally recommended to the Legislature, is being divided equally between hospital level and project support phases to insure a comprehensive program that includes both applied and basic research. A research team at each of the hospitals is the ultimate goal with 7 teams having been formed thus far. All hospital research teams carry out their own research projects in the hospital and assist other staff members with their investigations. The balance of the funds are used to support research investigations undertaken by departmental, hospital, and clinic staff personnel.

The beneficial results of the department's public information program continued to be apparent in growing public interest in the field of mental health. The educational program uses almost every communication medium: newspapers, television, speakers, films, public meetings and forums, exhibits, pamphlets, magazine articles, publications and reports. The section also acts in an advisory capacity to community groups when requested.

One of the most important recent developments in the mental health program is the establishing of 13 programs of community mental health services under the provisions of the Short-Doyle Act. Under the act, cities and counties can set up local programs with practical assistance from the state that includes reimbursement on a matching basis for local money expended. Ultimately, these local mental health services are expected to prevent large numbers of citizens from ever having to leave their home communities because of mental illness or handicap.

The financial soundness of these philosophies and programs was illustrated when the number of mentally ill patients treated and released increased to a point of balance with admissions. The end of fiscal 1957 saw the first small but significant drop in patient population in the hospitals for the mentally ill. This occurred despite the increasing rate of general population in the state, and increasing admissions to the hospitals, and this same balance between admissions and releases has been estimated to continue in the 1959-60 and 1960-61 fiscal years. The admission and release factors are a measure of the total performance of the department and are set forth in tabular form as follows:

## MENTALLY ILL HOSPITAL POPULATION MOVEMENTS BY FISCAL YEAR

	1953-54	1954-55	1955-56	1956-57	1957-58	1958-59	Estimated 1959-60	Estimated 1960-61
First admissions	12,269	12,254	12,632	12,378	13,706	13,737	13,963	14,292
Readmissions <sup>b</sup>	3,500	4,068	4,443	4,970	5,654	6,181	6,417	6,628

Total Net Releases	17,371	18,378	20,295	20,551	22,977	23,357	24,605	25,430
Net resident increase	808	750	—246	162	—22	474	—	—

The all-out modern attack on mental ills is made on 4 basic fronts—treatment, training, research and prevention. By far the greater part of past increases in the department budget, that is, increases other than those necessary just to keep up with state population growth, have of necessity gone into improving the treatment program, essentially by providing additional numbers of physicians, therapists, social workers, nurses, technicians and psychologists, food personnel and others. In the 1958-59 fiscal year the financial position of the State indicated

that available moneys could be more wisely expended on the other 3 methods of attacking the problem—research, training, and community development of mental hygiene resources. These 3 areas were again emphasized in the 1959-60 Budget. The 1960-61 Budget proposes to intensify the emphasis in these areas as well as provide a modest improvement in the level of treatment. The main emphasis will be in expanding the pre- and post-hospital services. To accomplish this, additional aftercare facilities, improved convalescent leave programs, reduced

<sup>b</sup> Previously hospitalized in a California hospital for the mentally ill.

## DEPARTMENT OF MENTAL HYGIENE—Continued

## MENTALLY ILL HOSPITAL POPULATION MOVEMENTS BY FISCAL YEAR—Continued

patient-social worker ratio, and the establishment of day care treatment centers are proposed. These activities are discussed in detail in the appropriate sections of the budget.

In addition to these changes in the day to day operations, the Capital Outlay program reflects the continuation of the leveling-off of the mentally ill patient population in the various hospitals and the elimination of practically all overcrowding. The mentally retarded population is estimated to continue increasing; additional beds and facilities are proposed to provide care for a major portion of those deemed eligible for state institutional treatment. The main items in the construction program are a 93-bed acute hospital annex at Porterville State Hospital, a 200-bed addition to Cottage G at Stockton State Hospital which will replace the 102-bed Cottage 2 that is badly deteriorated, a research building at Pacific State Hospital and chapels at Camarillo and Napa State Hospitals.

Other projects are proposed to provide initial complements of equipment for major projects now under construction; to remodel and modernize ward facilities at Agnews, Camarillo, Mendocino, Metropolitan, Napa, and Patton State Hospitals; and to provide utility, service and other facilities at the various hospitals.

Facilities already funded and under construction which will be occupied during the 1960-61 fiscal year include the following:

The new receiving and treatment building at Agnews State Hospital will add 512 beds and is scheduled for activation during December 1959. The new 200-bed ward building, now under construction at Metropolitan State Hospital is scheduled for completion in July, 1960. The new 216-bed Juvenile Unit at Napa State Hospital is scheduled for occupancy in October 1960. The Neuropsychiatric Institute at the University of California has a 222-bed inpatient facility under construction and it is estimated that this facility, for teaching and research, will be completed during October 1960.

Other changes in capacity, the effects of which will be felt fully for the first time in 1960-61, and for which budgetary provisions are made include the following:

A 432-bed ward building at Atascadero was opened for patients in October 1959. New ward buildings at Patton State Hospital will add 1,072 beds in March, 1960; however, these will be partially offset by various remodeling projects during 1959-60 and 1960-61, which will reduce capacity by 130 beds. 17 new wards with a capacity of 1,190 beds were completed in July 1959, at Fairview State Hospital and patients are being received at the rate of approximately 100 per month. It is planned to deactivate buildings containing 276 beds at Modesto State Hospital in March 1960, because of their deteriorated condition.

## MAJOR PROGRAM AUGMENTATIONS AND COSTS

The following summary by program accounts for the proposed increase of \$9,530,829 (8.1 percent) over the 1959-60 fiscal year expenditures. These increases provide the workload adjustments required to meet the opening of new facilities, population and

price changes at presently recognized standards of staffing and supply; also, they provide for improvements in the level of service primarily in the area of treatment, training, research, and pre- and post-hospital services.

Additional personnel for staffing new facilities:		
a. New ward building, 200 beds, Metropolitan State Hospital (75)	-----	\$279,600
b. New juvenile unit, 216 beds, Napa State Hospital (110)	-----	380,188
c. New hospital facilities, 188 beds, <sup>a</sup> Neuropsychiatric Institute at U.C.L.A. (459.4)	-----	981,293
		<hr/>
		\$1,641,081
Additional personnel for workload changes:		
a. Proposed new positions (101.3)	-----	\$577,404
b. Positions to be abolished (—17.5)	-----	—114,640
	(83.8)	<hr/>
		\$462,764
Additional personnel for diagnosis and treatment to improve the level of service (55)		-----
		\$605,820
Additional other personnel for improved service (80)		-----
		\$348,624
Increased cost in authorized positions for salary adjustments and for the full year cost of positions delayed in establishment until the latter part of the current year to coincide with the availability of new facilities which they will operate		-----
		\$2,693,733
Additional man-years of personnel from fuller employment in authorized positions (419)		-----
		\$983,655
Additional personnel for training program (68)		-----
		\$245,714
Increased staffing (other than training program) for the Langley Porter Neuropsychiatric Institute (13)		-----
		\$68,210
Additional departmental, central office, and out-patient clinics personnel (other than training program):		
a. Proposed new positions (64.5)	-----	\$348,947
b. Positions to be abolished (—16.0)	-----	—80,988
	50.5	<hr/>
		\$267,959
Change in operating expense and equipment:		
a. Increases primarily due to population and price changes	-----	\$999,096
b. Increase for special (tranquilizing) drugs	-----	38,056
c. Increase for regular drugs	-----	201,492
d. Decrease in training program (primarily training aids)	-----	—18,222
e. Increase in special training program	-----	13,791
f. Provision for cerebral palsy study	-----	15,000
		<hr/>
		\$1,249,213
Expansion of family care program		-----
		\$236,000
Increase in research program		-----
		—\$290,845 *
New day-care treatment centers		-----
		\$450,000
Increase in contributions to State Employees' Retirement Fund		-----
		\$568,901
TOTAL		<hr/>
		\$9,530,829

\* Actually an increase of \$200,000 over the 1959-60 appropriation. See discussion under Program Research, page 382.

<sup>a</sup> In addition to the 188-bed inpatient service, facilities are available for a 20-bed day hospital program and a 14-bed Somato therapy room.

## DEPARTMENT OF MENTAL HYGIENE—Continued

## STATE HOSPITALS FOR THE MENTALLY ILL AND MENTALLY RETARDED

## EXPANDED PROGRAMS

In continuing the attack on the problem of mental illness it appears that an increase in program funds can be most advantageously spent in augmenting hospital treatment staffs, expanding the convalescent leave and local mental health programs, providing additional after-care facilities and initiating a day hospital program. In addition, it is believed that staff and operating expense increases for the training program, increases in the social services staff, as well as increases in both regular and special drug programs should be authorized to provide a balanced program in order to assure continuance of progress in the treatment of mental illness.

In order to best utilize available resources the department has developed a "4-Point Program" to meet the increasing mental health problem. This program is outlined as follows:

1. Sharing the Load of Increased Services	\$61,921
2. Increasing Efficiency of Present Operations	\$74,289
3. Emphasizing the State's Pre- and Post-Hospital Services	1,188,035
4. Sharpening the Tools	454,364
<b>Total, Expanded Program</b>	<b>\$2,578,609</b>

1. Sharing the Load of Increased Services	\$61,921
State-Local Mental Health Services	\$48,467

In the 1958-59 fiscal year 2 psychiatric consultants and 1 chief of state-local mental health service, working under the general direction of the deputy director of community services, provided program consultation in planning and operating 12 local mental health programs. In the 1959-60 Budget, 1 psychiatric consultant was added and it is estimated that service will be provided to 21 local programs. It is now estimated that in the 1960-61 fiscal year 33 local jurisdictions will require service for their programs. It is proposed therefore that 2 positions be added to handle increasing administrative details and develop necessary procedures, and that 3 community organization specialists be provided to work with psychiatric consultants to supply necessary consultation services to local jurisdictions.

Private Psychiatric Institutions Services	\$13,454
---	----------

In addition it is proposed that 2 positions be provided to assist the chief of the private institution section in administrative detail and to handle emergency and other investigations.

2. Increasing Efficiency of Present Operations	\$874,289
Departmental Administration	\$85,670

Several positions have been proposed to provide the necessary staff support for an expanded mental hygiene program. 2 positions are proposed to provide the director with necessary consultation in the field of industrial hygiene. 4 positions are proposed in the personnel section to provide services required by expanding programs and concomitant increases in authorized positions. 2 positions are proposed in the rehabilitation therapy section to assist with the heavier demands for consultation and guidance by the hospitals.

It is proposed that 7 positions be provided, in the Bureau of Patients Accounts, to alleviate the heavy caseload and to take care of clerical shortages. The present caseload averages 195 per worker and is anticipated to increase to 214 by July of 1960. The proposed positions would reduce this ratio to 160. Increase in Professional, Technical and

Service Staff	\$549,071
---------------	-----------

The proposed increase in the level of hospital services includes 10 staff psychiatrist, 6 clinical laboratory technologist, 1 electroencephalographic technician, 11 social worker, 49 new clerical and 60 reclassified clerical positions. The distribution of these positions among the 14 hospitals is shown in the section on "NEW POSITIONS" under the appropriate functional subsection.

In addition, 2 teaching positions are proposed at the Langley Porter Neuropsychiatric Institute to replace 1 teacher previously furnished by the local school district and increase the level of service of this important function.

It is proposed that 15 laundry positions be provided to bring the staffs of the mentally retarded hospitals to an approximate ratio of 1:68. Because of the critical enteric disease cross-contamination factor in the laundries, it is considered necessary that this level of service be provided.

Increase in Regular Drugs and Hospital Supplies

\$201,492

The 1958-59 Budget provided increases in the regular drug allotment from \$12.50 to \$16 per patient for the mentally ill and \$17.50 to \$21 per patient for the mentally retarded. This was the first increase in the allotment since the 1952-53 fiscal year. Although the increases alleviated somewhat an inability to provide supplies to keep pace with previously authorized increases in the treatment programs, there still exists a gap between the level of medical treatment and allowances for drugs and supplies. It is proposed that an increase of \$4 per capita for both mentally ill and mentally retarded be authorized based on studies of minimum needs by departmental personnel.

Increase in Special Drugs	\$38,056
---------------------------	----------

This proposed increase is to provide special drugs to convalescent leave patients who need special drug therapy in conjunction with the proposed accelerated convalescent leave medical service program. It is estimated that 25 percent of the leave cases require special drug therapy and the funds requested are to provide such drugs to indigent patients who are estimated to comprise 25 percent of the total requiring drugs.

3. Emphasizing the State's Pre- and Post-Hospital Services	\$1,188,035
--	-------------

Psychiatric Social Worker Homefinding Unit	\$83,920
--	----------

It is anticipated that economies in operation and an improved therapeutic atmosphere can be obtained by placing more patients in family care homes. In order to find the necessary homes, 13½ positions are proposed which will provide the necessary additional time to search out those homes willing to accept these patients.

Increase in Social Services	\$147,852
-----------------------------	-----------

An increase in the level of services performed by the Bureau of Social Services is proposed through the addition of 1 assistant to the chief of social services and 1 intermediate stenographer-clerk positions to the central office administrative staff, and 2 assistant regional supervisors, 14 social workers and 6 intermediate stenographer-clerks to the field worker staffs. This will provide for a strengthening of the administrative staff in both central and field offices. It will also reduce the ratio of leave patients to caseworker from the present 70.5 to 1 to a more manageable 65 thereby providing a better level of service.

After-Care Facilities	\$220,313
-----------------------	-----------

It is proposed to establish 3 additional after-care facilities as another step in completing and balancing the treatment programs at Camarillo, Modesto and Patton State Hospitals. Staffing of each facility requires 1 senior psychiatrist, 2 staff psychiatrist, 1 clinical psychiatrist II, 1 senior psychiatric social worker and 3 clerical positions, totaling 24 positions for the 3 proposed facilities.

Increase in the Convalescent Leave Program	\$285,950
--	-----------

Convalescent leave patients are now served primarily by psychiatric social workers. This also applies to approximately 75 percent of the leave patients from hospitals with after-care facilities. It is proposed to establish 1 or more psychiatrist positions at each hospital, except Atascadero and Fairview State Hospitals, to work with the field staff in treating those patients on leave who are not served by an after-care facility. The primary functions of this group of psychiatrists are to perform patient treatment (including the prescribing of drugs), psychiatric evaluation, progress reviews, medical examinations, and consultation on special problems. It is estimated that a minimum of 19 positions distributed among the hospitals are required based on a ratio of 1 psychiatrist per 500 patients on leave. The distribution of positions by hospital is shown in the appropriate sections under "NEW POSITIONS."

DEPARTMENT OF MENTAL HYGIENE—Continued

STATE HOSPITALS FOR THE MENTALLY ILL AND MENTALLY RETARDED—Continued

EXPANDED PROGRAMS—Continued

3. Emphasizing the State's Pre- and Post-Hospital Services—Continued

Day Care Treatment Centers ----- \$450,000

The day hospital program is proposed to initiate a new form of institutional treatment by the Department of Mental Hygiene whereby mentally ill patients may receive institutional type treatment during the day and return to family responsibility in the evening. Many patients now in mental hospitals do not require 24-hour inpatient care, therefore, their care in a day hospital would result in economic benefits resulting in savings in salaries and wages, plant operation and operating expenses. The program would also be an influence in reducing the number of admissions to hospitals. In addition to the anticipated financial benefits, therapeutic advantages include a more meaningful psychotherapy when patients are not abstracted from their environment and the prevention of patient readjustment when he leaves a regular hospital for the outside world.

Since this is the beginning of a new program, it is proposed that 3 units at a cost of \$150,000 each be assigned to the Sacramento office. They will then be established in selected parts of the State.

4. Sharpening the Tools ----- \$454,364

Departmental Training Program ----- \$208,584

Additional funds were provided in the 1958-59 Budget in order to place an emphasis on the in-service training of professional staff in psychiatric techniques. A chief of professional education was added at each hospital to administer the program, as well as a clerical position, consultant funds, funds for additional books and training aids, and equipment. The 1959-60 Budget augmented the consultant funds and provided for additional books and journals,

and equipment. Funds were also provided for specialized training.

It is now proposed to augment the program by the addition of a training officer I and an intermediate stenographer clerk position to the departmental staff and 8 training assistants, 14 librarian III, 24 psychiatric resident II, and 14 student professional assistant positions to be distributed among the hospitals. Distribution of the positions by hospital is shown in the appropriate subsections under "NEW POSITIONS." This proposal also provides for a \$5,000 increase in consultant services funds, a total of \$16,041 for specialized training, and a decrease of \$23,350 for training aids and equipment.

Langley Porter Neuropsychiatric Institute ----- \$45,780

It is proposed that 6 positions be established to initiate a training program in community mental health. This program will provide psychiatric positions (psychiatrist, nurse, social worker, psychologist) with a knowledge of the different community services which are available and are of material benefit in the treatment of the mentally ill and mentally retarded.

Psychiatric Research ----- \$200,000

The psychiatric research program was initiated in the 1956-57 Budget through the provision of funds for employment of a chief of research. Appropriations of \$200,000, \$500,000 and \$802,000 were made for expansions in the program for 1957-58, 1958-59 and 1959-60 respectively. An increase of \$200,000 is proposed in this budget which will bring the total appropriation to \$1,002,000 to provide the funds necessary for a balanced total research effort. All funds appropriated for this program are available for expenditure for a 3-year period.

This program is discussed in greater detail under Departmental Administration (see page 382).

NEW POSITIONS

Of the total of 1,026 new positions proposed for the Department of Mental Hygiene, 481.3 additional positions totaling \$2,381,392 are to staff the mentally ill and mentally retarded hospitals while the balance are to staff Neuropsychiatric Institutes and the departmental administration activities. The 481.3 positions are reduced by the deletion of 17.5 existing positions at a reduction of \$114,640, leaving a net increase of 463.8 positions at a cost of \$2,266,752.

These new positions at the hospitals represent standard classes used at all of the hospitals and are, therefore, discussed functionally as groups. They are also reflected in the budgets of the various hospitals but are not discussed in any detail there. The majority of the positions are budgeted on

accepted workload formulas, previously related to the number of patients admitted and/or the estimated year-end population. Due partially to these workload factors, the 17.5 presently authorized positions are being discontinued as mentioned above. A complete list of positions to be abolished and proposed new positions with their effective dates can be found in the budgets of the various hospitals.

Position changes for departmental administration, outpatient clinics, Langley Porter Neuropsychiatric Institute and the Neuropsychiatric Institute at U.C.L.A. are explained and listed in the individual budget for each of these agencies. The position changes in the various hospitals are explained below in chart and narrative form.

## Medical and Laboratory Personnel

— Senior psychiatrist (reclassification of 47 authorized staff psychiatrist positions)	\$28,200
41 Staff psychiatrist	541,200
1 Dentist	10,860
1 Dental assistant	3,456
8 Clinical laboratory technologist	42,912
1 Electroencephalographic technician	4,404
— Staff psychiatrist	—52,800
48 Total	\$578,232

The above schedule of positions includes (1) staffing adjustments, both additions and deletions, necessary to maintain the presently authorized level of service in accordance with existing workload standards, (2) those positions proposed to increase the overall level of treatment service and (3) the reclassification of authorized positions to provide second level supervision in the psychiatric treatment program in those hospitals which either do not now have such positions or the staffing is not on a uniform basis.

Of the 41 psychiatrist positions, 12 represent workload adjustments based on workload standards applied to admission and resident population forecasts for the various hospitals while 4 positions are proposed for deletion to maintain workload standards. 10 of these positions are proposed to increase the level of treatment services, and 19 are proposed to augment the convalescent leave program with the purpose of providing psychiatric services to patients on leave thereby reducing the number of these patients returned to a hospital.

The dentist and dental assistant positions are required at Fairview on a workload basis as a result of the planned increase in population as the hospital builds toward its ultimate capacity.

2 clinical laboratory technologist positions are required to maintain the currently authorized level of service, and 6 are proposed to provide a 10% improvement in the level of service in the hospitals for the mentally ill.

The electroencephalographic technician is proposed for Napa to provide the increased service necessary to meet the demands for electroencephalographic and electrocardiographic services which are not now available.

Distribution by hospital of the major classifications included above are shown in the preceding "Schedule of Workload Adjustments in Major Position Classifications" and "Schedule of Increased Services Provided in Major Position Classifications."

## Medical Administration

1 Assistant Superintendent—psychiatric services	\$15,000
This position is required to complete the staffing of the medical administrative structure at Patton in accordance with current staffing standards. The current standard provides one	

such position for each hospital with a population in excess of 4,500 patients and it is estimated that Patton will have 4,750 patients as of June 30, 1960.

## After-Care Facilities

3 Senior psychiatrist	\$41,400
6 Staff psychiatrist	79,200
3 Clinical psychologist II	21,024
3 Senior psychiatric social worker	17,316
9 Intermediate stenographer-clerk	34,290
24 Total	\$193,230

The above 24 positions will provide for the establishment of 3 additional after-care facilities to be located at Camarillo, Modesto and Patton State Hospitals. As an adjunct to the regular hospital treatment program, substantial numbers of patients can be placed in the after-care program and there would be able to receive the necessary psychiatric, medical and therapy treatment during the day and be able to return home at night. The after-care facility staff would also serve to aid in the training of the regular hospital staff and those in resident training. These programs also provide for the utilization of existing bed space and facilities by patients who are in need of constant care and treatment rather than by those who may be placed on leave and receive the benefit of psychiatric therapy on a day-to-day basis.

## Other Treatment Personnel

1 Recreational therapist	\$5,106
2 Occupational therapist	10,212
3 Total	\$15,318
The 3 rehabilitation therapy positions are required to maintain the presently authorized level of service at 3 hospitals in accordance with existing workload standards. The recreational therapist position is proposed for Metropolitan and the 2 occupational therapists are proposed 1 each at Napa and Fairview State Hospitals.	
1 Supervising psychiatric social worker I	\$6,360
21 Senior psychiatric social worker	121,212
—4 Senior psychiatric social worker	—23,088
18 Total	\$104,484

11 of the above 21 senior psychiatric social worker positions reflect adjustments necessary to maintain the presently authorized level of service at several state hospitals in accordance with existing workload standards. 4 positions are to be deleted to maintain the authorized level of service. The individual position adjustments by hospital are shown on the preceding "Schedule of Workload Adjustments in Major Position Classifications" chart. The supervising psychiatric social worker I and remaining 10 senior psychiatric social worker positions are to im-

## Other Treatment Personnel—Continued

prove the level of service in keeping with the proposed increases in the other disciplines which, with social worker classes, make up the basic treatment team. The individual position assignments by hospital are shown on the preceding "Schedule of Increased Services Provided in Major Position Classifications" chart.

11 Elementary teachers ----- \$60,456

Atascadero is now authorized 1 teaching position. The addition of 1 position is proposed to absorb a 25 percent population increase and to raise the program level.

The new juvenile unit at Napa is scheduled for activation early in the 1960-61 fiscal year. It is proposed to provide 6 additional teacher positions to raise the teacher-student ratio to a level comparable to similar units within the department.

Fairview is estimated to have a population increase of approximately 25 percent from June 30, 1960, to June 30, 1961, bringing the total to 1,832. The authorized teaching staff is 4 positions. An additional 4 positions are proposed to bring the teaching staff to a level consistent with other hospitals.

## Nursing Personnel

5 Senior psychiatric nurse ----- \$25,530  
24 Psychiatric nurse ----- 116,640  
4 Senior psychiatric technician II ----- 17,616  
8 Senior psychiatric technician I ----- 31,968  
118 Psychiatric technician-trainee ----- 360,100

159 Total ----- \$551,854

60 of the above positions are required to staff the new 200-bed geriatrics ward at Metropolitan and the remaining 99 positions are required for the new 216-bed juvenile unit at Napa. The number of positions in the various classes are based on previously accepted standards of staffing at similar facilities. No other ward nursing changes or additions are proposed in this budget.

## General Medical Records and Clerical

14 Intermediate stenographer-clerk ----- \$53,340

These positions are proposed to provide clerical assistance to the administrative assistant at each of the hospitals. Presently, clerical assistance is provided, when available, by the clerical pool which does not allow the administrative assistant to carry out his work in the most efficient manner.

- Supervising medical records clerk (reclassification of 14 authorized intermediate stenographer-clerk) ----- \$16,380

- Senior stenographer-clerk (reclassification of 32 authorized intermediate stenographer-clerk) ----- 15,552

- Senior file clerk (reclassification of 14 authorized intermediate clerk) ----- 9,324

- Total ----- \$41,256

These proposed reclassifications will provide a more adequate supervisory framework for both the medical records unit and the professional clerical pool. The 14 supervising medical records clerks will provide an intermediate level between the medical records officer and the working supervisors. The 32 senior stenographer-clerks and the 14 senior file clerks will provide working supervisors for the professional clerical pools and the medical records units, respectively.

The distribution of positions is as follows: supervising medical records clerk, 1 at each hospital; senior file clerk, 1 at each hospital; senior stenographer-clerk, 1 each at Atascadero, DeWitt, Mendocino, Modesto, Fairview and Porterville; 2 each at Pacific and Sonoma; 3 each at Agnews, Metropolitan and Stockton; 4 each at Napa and Patton; and 5 at Camarillo.

2 Intermediate typist-clerk ----- \$7,260  
1 position is proposed for the personnel section

at Mendocino and at Metropolitan on the basis of workload increases related to new positions in the budget. The workload standard is based on 1 clerk for each 250 positions.

23 Intermediate typist-clerk ----- \$87,630  
-2 Intermediate typist-clerk ----- -7,620

21 Total ----- \$80,010

These positions are proposed for the central professional clerical pools at the various hospitals. They are required for workload related to the proposed new positions in the budget and are based on a standard of 1 typist for each 3 professional staff members.

The 2 positions are recommended for deletion on the basis of decreases in professional staff recommended earlier.

22 Intermediate stenographer-clerk ----- \$83,820

It is proposed that 22 intermediate stenographer-clerk positions be established to provide full-time clerical aid to assistant superintendents at the various hospitals. At the time the assistant superintendent positions were established, no provision was made to provide these top level positions with clerical help and they are now obtaining part-time services from the central clerical pool which is an unsatisfactory and inadequate arrangement.

The proposed distribution of these positions by hospital is 1 each at DeWitt, Mendocino Modesto, Pacific, and Porterville; 2 each at Agnews, Metropolitan, Stockton, and Sonoma; and 3 each at Camarillo, Napa, and Patton.

12 Intermediate typist-clerk ----- \$43,560

These 12 intermediate clerical positions are proposed to maintain on a current basis the clerical workloads involved in the processing and recording of patient movements. The processing of movements on a daily basis is essential in hospital activity and current staffing is inadequate to meet the current level of operations. A minimum of 12 positions are required and the proposed distribution by hospital is 2 at Agnews, 1 at Camarillo, 3 at Metropolitan, 4 at Napa, 1 at Patton, and 1 at Stockton.

1 Intermediate typist-clerk ----- \$3,630

This position is proposed to provide clerical assistance to the rehabilitation therapy department at Atascadero. The position is required for existing workload and will provide staffing comparable to that provided other hospitals of the department.

8 Intermediate typist-clerk ----- \$29,040

These positions are proposed for assistance in the patients' board and personal accounts activity. Due to significant increases in hospital admissions and releases during recent years, the clerical phase of this function has become increasingly overloaded and there exists an urgent need for relief. 2 positions each are proposed for Agnews, Camarillo, and Napa, and 1 position each at Metropolitan and Stockton.

## Professional Training Program Personnel

8 Training assistant I ----- \$50,880

These positions are needed to provide additional technical assistance in the 8 largest hospitals to develop the personnel-training function in the hospitals. The hospitals are not adequately staffed to provide this service and it is proposed to establish 1 position each at Agnews, Camarillo, Metropolitan, Napa, Patton, Stockton, Pacific and Sonoma State Hospitals.

14 Librarian III ----- \$76,944

1 librarian III position is proposed for each hospital in order to provide effective use of the professional libraries. At present, positions are not provided in hospital staffing for professional library supervision, ordering, cataloguing, circulating, etc. With the increasing research and training programs at the hospitals and the greater use of resources by the staff, maintenance and use of the medical library becomes an important activity.

## DEPARTMENT OF MENTAL HYGIENE—Continued

## STATE HOSPITALS FOR THE MENTALLY ILL AND MENTALLY RETARDED—Continued

SCHEDULE OF INCREASED SERVICES ADJUSTMENTS IN MAJOR  
TREATMENT POSITION CLASSIFICATIONS—Continued

## Professional Training Program Personnel—Continued

24 Psychiatric resident II (effective June 1, 1961) \$15,456

These 24 positions are proposed to provide staff in keeping with a continuing psychiatric residency program at the hospitals. The proposed increase is consistent with the normal development of this program as presently authorized. These positions will not be established until June 1, 1961, as it is necessary to make residency appointment commitments nearly a year in advance. Included are 2 positions each for Napa, Patton and Sonoma, 3 positions each for Atascadero, Mendocino and Stockton, 4 for Camarillo and 5 for Agnews.

14 Student professional assistant \$46,116

1 such position is proposed at each hospital to provide for increased opportunities for paid field experience in hospital facilities and to increase recruitment advantages in the fields of rehabilitation services, psychology, social services, nursing services and food service.

## Food Service Personnel

1 Food administrator I \$5,232

This position is proposed at Stockton to administer the preparation of special diets in the ranch area. Approximately 150 different diets are required at the ranch area which is located 5 miles from the main hospital making close supervision impossible.

13 Food service assistant \$39,186

These 13 positions are proposed at Metropolitan as follows:

10 positions to staff, on a post assignment basis, the 2 dining rooms in the new 200-bed geriatric ward building (6 posts plus 4 relief) and 3 positions to staff the 150-patient congregate dining room which will serve remodeled wards 28 and 30 (2 posts plus 1 relief).

## Laundry, Housekeeping, and Clothing Personnel

30 Laundryman \$104,250

5 positions at Pacific and 10 at Sonoma are proposed to increase the staff of these hospitals to a ratio of 1 position to 68 patients. This level of service is considered necessary because of the critical enteric disease cross contamination factor in the laundries of the mentally retarded hospitals.

15 positions are proposed at Fairview based on the estimated increase in population which has been steadily building up since the opening of the hospital in January of 1959.

4 Janitor \$13,824

2 positions are proposed at Napa for the new ward portions of the Juvenile Unit which will be completed in July, 1960. This unit will contain approximately 40,400 square feet of floor space requiring janitorial service.

2 positions are proposed at Camarillo to provide janitorial service for approximately 33,000 square feet in the new Administrative Office Building which will open in April of 1960.

4 Assistant Seamstress \$13,176

1 position each at Camarillo and Patton, and 2 positions at Napa are proposed to provide a ratio of such employees to patients in these hospitals closer to similar ratios in the other hospitals for the mentally ill.

## Plant Operation Personnel

2 Carpenter I \$11,544

1 Electrician I 5,772

1 Plumber I 5,772

2 Stationary engineer 11,544

1 Groundsman (2 part-time seasonal help) 3,996

2.3 Institution fireman 10,998

9.3 Total \$49,626

1 stationary engineer is proposed at Agnews to provide maintenance service for the recently activated Receiving and Treatment, and Administration Buildings.

1 carpenter I, 1 electrician I, and 1 plumber I are proposed at Napa to provide maintenance service for the new juvenile unit which is scheduled to open in October of 1960.

1 carpenter I and 1 stationary engineer are proposed at Metropolitan to provide maintenance service for the new geriatrics ward which is scheduled to open in July of 1960.

2 groundsman positions, on a seasonal basis, are proposed at Fairview for 1 year only. These positions will provide the necessary help for the large newly landscaped areas which requires more maintenance than established areas.

1 fireman position is proposed at both Atascadero and Fairview, and 3 part-time fire fighters, equivalent to 0.3 of 1 position, are proposed at Fairview. These positions will bring the staffing of these hospitals to the level currently authorized at the other hospitals in accordance with Management Survey No. 921.

## Farming Personnel

1 Milker \$4,194

2 Farmhand 7,620

3 Totals \$11,814

The milker and 1 farmhand positions are required at the Camarillo State Hospital dairy in accordance with staffing standards now authorized for dairy operations. The remaining farmhand position is proposed for Patton State Hospital to perform general duties at the dairy in accordance with authorized staffing standards.

—1 Cannery supervisor —\$6,952

—3 Farmhand —10,890

—3.5 Seasonal help —13,290

—7.5 Total —\$31,132

1 cannery supervisor and 1 seasonal help position at Patton are proposed for deletion as a result of the anticipated discontinuance of cannery operations at the end of the 1959-60 fiscal year.

3 farmhand and 2.5 seasonal help positions are to be abolished at Sonoma because of the planned elimination of the orchard operation at the end of the current year.

## Other Personnel

3 Telephone operator \$10,890

2 additional telephone operator positions are required at DeWitt State Hospital to provide coverage for a 2-position board which is now installed. The third position is proposed to provide the additional coverage required by a new 3-position board at Camarillo.

**ADMINISTRATION**

**GENERAL ANALYSIS**

The Department of Mental Hygiene is organized in three primary functions: Administration, Bureau of Patients Accounts and Bureau of Social Services. The 1960-61 Budget includes 64.5 new positions and proposes the abolishment of 16 authorized positions. The analysis of each section discusses the proposed changes in positions in detail.

Departmental Administration of the Department of Mental Hygiene performs the primary functions of policy formulation, co-ordination and direction of the overall activities of the department including its hospitals, clinics, and other facilities. Services are provided in the following areas: research, community mental health activities, public information, business and fiscal management, co-ordination of the nursing and rehabilitation service programs, personnel management and training, food administration, statistics, engineering, guardianships, deportation and institution transfers, and inspection and licensing of private institutions. Also, the department is responsible for the administration of National Mental Health Act funds for California, and the outpatient clinic program.

Further expansion of the community services authorized by the Short-Doyle Act is programmed in 1960-61. It is estimated that 33 local jurisdictions will qualify for aid as compared to 21 in 1959-60 and 12 in 1958-59. The department reimburses these participating jurisdictions for 50 percent of the cost of their approved program. Research projects at the various hospitals have been approved and this program is explained in detail under the budget request for research funds. Provision has been made for a study of the need for specialized cerebral palsy facilities within the mental hospital system. The entire departmental cost of the specialized training program is provided for in this budget.

The following changes, proposed for 1960-61, include the addition of 18.5 new positions and the deletion of 2 positions presently authorized.

1 calculating machine operator and 1 intermediate clerk position were authorized specifically in the statistical section to bring the cohort follow-up studies program to a current basis. This will have been done about July 1960 and the positions will be needed no longer.

1 additional intermediate typist-clerk is proposed for the fiscal unit to provide a ratio of 1 clerk position to 3.5 professional and technical positions. A reorganization of the professional staff of this section has occurred over the past three years to provide for handling an increased workload resulting from new programs and a generally increasing level

of service activity at the hospitals. No additional clerical help has been provided.

0.5 intermediate typist-clerk is proposed for the management analysis section. The two analyst positions are now authorized a one-half time clerical position and the volume of the work is such that a full-time clerical position is required.

1 departmental industrial hygiene specialist and 1 intermediate stenographer-clerk are required to initiate an industrial accident prevention program. Employee industrial injuries and occupational illnesses continue to account for significant direct and indirect monetary costs. A full-time specialist is needed to initiate and co-ordinate a department wide program to effect a reduction in costs attributable to industrial injuries and occupational illnesses.

4 additional positions are required by the personnel section to provide services for expanding programs and increases in authorized positions. A training officer and 1 analyst were included in the 1957-58 Budget which was the only increase in technical staff since 1950-51. This proposal includes 1 personnel officer I to provide personnel services to Departmental Administration, 1 associate personnel analyst for general service, and 2 intermediate stenographer-clerks, 1 for each additional technical position.

2 positions are proposed for the private institution inspection section. 1 supervising field representative is proposed to relieve the section chief of a portion of the administrative detail involved in the program, assume responsibility for general supervision of field representatives and supervise office personnel and to make emergency and other investigations. The second position is an intermediate stenographer-clerk to provide clerical services for an expanding program and an increase in professional positions.

2 additional positions in the rehabilitation therapy services section will provide 1 assistant chief of rehabilitation service to assist with the heavier demands for consultation and guidance which has resulted from greatly expanded and accelerated programs at the hospital level. 1 additional intermediate stenographer-clerk position is required to process the clerical workload which will be generated by the new professional position.

3 community organization specialists, 1 administrative assistant, and 1 intermediate stenographer-clerk position are proposed for the community services program. These positions are required to handle increasing administrative details and supply necessary consultation services to the continually expanding local programs.

## BUREAU OF PATIENTS ACCOUNTS

## GENERAL ANALYSIS

The Bureau of Patients Accounts assesses and collects charges for the care and treatment of the mentally ill patients within the ability of the patients or their responsible relatives to pay. In addition, reviews are made for the purpose of determining possible benefits to which patients are entitled. The effectiveness of the bureau's program is indicated in the following table of annual collections for patients' care and treatment:

Actual 1956-57	Actual 1957-58	Actual 1958-59	Estimated 1959-60	Estimated 1960-61
\$8,341,236	\$9,467,833	\$10,622,565	\$11,569,300	\$12,549,300

The following changes proposed for 1960-61 include 8.5 new positions.

It is estimated that by July 1, 1960, the caseload per patients'

estates and accounts specialist will average 214 cases. An increase of 4 specialist positions is proposed to reduce the caseload to 160 which will allow proper handling of the workload and result in greater collections. 2 positions are proposed for the Los Angeles regional office and 1 each for the San Francisco and Oakland offices. 1 intermediate typist-clerk is proposed for the Los Angeles office to perform the necessary clerical work in connection with increases in personnel and workload. 1 intermediate typist-clerk and 1 intermediate clerk are proposed for the Sacramento office to meet workload increases which have resulted from increased collection and adjustment activities and the addition of 3 new specialist positions in the current year. In addition, 1.5 temporary help positions are proposed to provide overtime funds required in the efficient operation of the tabulating function.

## BUREAU OF SOCIAL SERVICE

## GENERAL ANALYSIS

The Bureau of Social Service conducts preleave investigations, arranges placements to permit hospital leaves for mentally ill and mentally retarded patients, and assists in re-establishing the patients as responsible members of the community. Determining and arranging for employment opportunities and living accommodations, developing the most healthful family relationships, and frequent patient contacts to effect a firm and lasting adjustment are all important elements of the overall leave program of the department. In this regard, the department arranges home leaves, industrial leaves, and family care home leaves.

The following program changes proposed for 1960-61 include the addition of 37.5 new positions and the deletion of 14 authorized positions.

- (1) To accelerate the location of family care facilities in order to place additional patients in family care homes the addition of the following staff is proposed: 1 supervising psychiatric social worker, 10 senior psychiatric social workers and 2.5 intermediate stenographer-clerks.

- (2) To strengthen the central office staff and relieve the chief of administrative detail, it is proposed to add 1 assistant to the chief of social services and 1 intermediate stenographer-clerk.

- (3) 2 assistant regional supervisor positions are proposed to strengthen field supervision. 2 supervising psychiatric social workers and 10 senior psychiatric social workers are proposed to reduce the average caseload per case worker from 70.5 to 65 in order to provide a more adequate level of service. 6 clerical positions are included to furnish needed assistance to the psychiatric social workers requested.

10 social worker and 4 intermediate typist-clerk positions are to be abolished as the workload for which they were authorized did not materialize.

The following schedule indicates the measure of performance for the social service program:

## SOCIAL WORKER CASELOAD AND UNIT COST

Year-end number of active assigned leave of absence cases	9,577	10,000	10,400	400 (4%)
Total number of social workers	147.7	185	202	17
Ratio of active assigned cases to all social workers (including supervisors, and excluding family care home finding workers)	64.8	57.5	54.5	—3
Ratio of active assigned cases to case workers (excluding supervisors and family care home finding unit)	76.6	68	65	—3
Cost per active assigned case	\$160.17	\$185.80	\$198.58	\$12.78 (6.9%)

13									
14	GENERAL ANALYSIS								
15	Objectives								
16									
17	The outpatient mental hygiene clinics provide for the pre-								
18	vention, early diagnosis, and treatment of mental illness, re-								
19	tardation, or disorder, and are established to assist persons								
20	not requiring hospitalization.								
21	Program and Performance								
22									
23	The programs provided by the 6 state-supported clinics and								
24	the 1 federally supported clinic at Berkeley operate in local								
25	metropolitan and rural areas. The Department of Mental								
26	Hygiene acts as administrator of National Mental Health Act								
27	funds for California and is responsible for allocation of such								
28	funds to other agencies as well as setting and maintaining								
29	required levels of service. In addition to the general services,								
30	the Berkeley Clinic conducts a training program for social								
31	workers, psychologists, and psychiatrists.								
32	The total performance of the clinics is indicated by the fol-								
33	lowing schedule which shows the number of hours spent by								
34	professional employees in interviews with patients (on either								
35	an individual or a group basis) and in preventive services to								
36	communities. The hours spent by patients in individual and								
37	group therapy are also shown. Of the professional time allocated								
38	to all services, 87.4 percent was directed toward treatment of

a Federal grants and expenditures therefrom are not included in the overall budget totals.

b Hours spent in services, excluding time spent in case reviews, administration, and training.

c Cost of services to patients (total cost prorated on basis of employee service-hours), divided by patient-hours.

d Excludes Langley Porter and Los Angeles Neuropsychiatric Institutes.

e Includes full-time services of 3.5 psychiatric residents.

58	<b>GENERAL ANALYSIS</b>				
59					
60	<b>Objectives</b>				
61					
62	The Langley Porter Neuropsychiatric Institute is a teaching				
63	and research center for the University of California and the				
64	Department of Mental Hygiene and provides care and treatment				
65	for patients with early curable types of mental disorders as a				
66	part of the overall teaching and research program.				
67					
68	<b>Program and Performance</b>				
69					
70	The statistics presented in the following summary are indica-				
71	tive of the performance of this institute as reflected by inpatient				
72	and outpatient caseloads.

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61
------	------------------------------	-------------------	----------------------	---------------------

GENERAL ANALYSIS—Continued

Program and Performance—Continued

projects of various kinds are under way. The facilities include an outpatient department, a 105-bed inpatient service, plus 15 day/night program beds which accommodate 30 patients. The latter program, which is of the demonstration type, was begun in the 1957-58 fiscal year and is now operating at a maximum level.

University medical school students receive courses in psychiatry at this institute as a part of their training. An increase in the number of medical students participating in this program will place additional demands on the institute. To meet this demand, the outpatient program will be increased by 5,185 annual interviews over the current year workload of 17,585.

A total of 19 new positions are requested to carry out the major changes in the program as follows:

- (1) For workload increases resulting from an increase of 5,185 patient interviews annually due to an increased number of university medical students, the following positions are proposed: 1 staff psychiatrist, 1 clinical psychologist, and 1 senior psychiatric social worker.
- (2) For increased workload in the business and administrative functions which has resulted from expansions in the training and research programs, the following positions are proposed:  
1 administrative assistant to relieve the business manager of detail and allow him time for planning and management activities.  
1 property clerk to manage the large equipment inventory now at the institute.

1 senior stenographer-clerk to provide secretarial services to the associate medical superintendent. This assistance is not now provided other than by utilizing the superintendent's stenographer when available.

1 intermediate account-clerk to assist the accounting officer in handling the increased workload created by the research program.

1 intermediate typist-clerk to provide a second position for the personnel office in order to maintain the existing workload on a current basis and to handle the estimated increase in workload.

3 intermediate typist-clerks to perform necessary clerical services for proposed new professional positions on the authorized basis of 1 clerk to 3 professional positions and to provide clerical services for the 26 existing psychiatric residents.

- (3) For the initiation of a training program in community mental health in the outpatient department, 1 senior psychiatrist, 1 senior psychiatric social worker, 1 clinical psychologist, 1 public health nursing consultant and 2 intermediate stenographer-clerks are proposed. This training program will provide the members of the psychiatric disciplines an opportunity to gain knowledge of existing agencies and develop skills in dealing with the problems of patient populations in the community and the home.
- (4) To provide for an adequate level of patient education services, 2 elementary teacher positions are proposed. 1 position will replace a teacher heretofore supplied by the local school district and the second position will bring the teaching services to an adequate level.

GENERAL ANALYSIS

Objectives					The Neuropsychiatric Institute at University of California, Los Angeles, is a teaching and research center, and provides care and treatment for patients with early curable types of mental disorders as a part of the overall teaching and research programs of the University and the Department of Mental Hygiene.			
Program and Performance					The Neuropsychiatric Institute is being built as a part of the Medical School of UCLA and is scheduled for completion by November 1960, with the actual opening being scheduled for December 1, 1960. The first units to be activated will be the administrative offices, treatment staff offices, service areas, outpatient department, rehabilitation therapy, neuropathology, and electroencephalography. Activation of the treatment units is scheduled as follows:			
		Date	Ward	Capacity				
		January 1, 1961	Adolescent psychiatry	20				
		January 1, 1961	Child psychiatry	22				
		January 1, 1961	Neurology	28				
		January 1, 1961	Neurosurgery	22				
		January 1, 1961	Adult psychiatry—I	24				
		February 1, 1961	Day hospital	(20)				
		February 1, 1961	Somatotherapy	(14)				
		February 1, 1961	Adult psychiatry—II	24				
		April 1, 1961	Adult psychiatry—III	24				
		May 1, 1961	Adult psychiatry—IV	24				
		Total		188				

<sup>a</sup> Composed of savings in salaries and wages, \$25,871; operating expenses, \$45,491; equipment, \$4,039; and loss in reimbursements, \$3,882.

<sup>b</sup> Composed of savings in salaries and wages, \$15,665; operating expenses, \$21,459; and decreased reimbursements, \$10,640.

## GENERAL ANALYSIS—Continued

## Program and Performance—Continued

In the 1956-57 fiscal year a limited program was initiated which included an outpatient clinic. In 1957-58 the institute was authorized to assume full support of an expanded outpatient clinic program to meet the teaching needs of the University of California medical school. With the opening of the new institute in December 1960, the program will be expanded to include training for psychiatric residents, medical students, psychology fellows, social work students, occupational therapy students, graduate and undergraduate student nurses, state hospital physicians, and fellows in psychiatry. Also included in the program will be clinical and basic research projects, many of which are now under way, a 188-bed inpatient service, and a 20-bed day hospital program, and a 14-bed somatotherapy room.

The following positions are proposed to staff the new institute. They are scheduled at intervals in order to meet the needs of the various functions as they are put into operation.

(1) Administration: 1 administrative assistant I is proposed to assist the superintendent in his administrative duties. 44 clerical positions are proposed for the various administrative functions and to provide clerical help for the professional positions. 8 business positions are proposed to carry out the normal business functions of the institute, and 7 clerical positions are proposed to assist these business positions. 6 telephone operator positions are included to operate the 2-position PBX board on a 24-hour basis. 2 student professional assistants are proposed to receive training in the area of public health and mental health administration.

(2) Care and Welfare: 31 medical treatment positions are proposed which will provide psychiatric, medical, and dental treatment to the patients and will also participate in training and research. 9 laboratory positions will carry out the necessary laboratory work at this institute. In line with the training function of the institute, it is proposed that 4 psychiatric residents be provided to increase the number of such positions to 24 thus allowing for 8 residents in each year of the 3-year training program. 2 student professional

assistants and 1 medical student assistant are also proposed for training purposes. 238 nursing positions are proposed for ward nurse staffing on a post assignment basis. In addition to patient care, these positions participate in training and research. 3 nursing positions are proposed to spend full time in planning, supervising, and conducting nursing training. 13.4 treatment personnel, other than medical treatment, nursing, or teaching, are proposed to provide services mainly in the area of rehabilitation therapy. 5 teaching positions, including a school principal, are proposed to provide the necessary education for 22 children and 20 adolescents during their hospital term. 21 social worker positions are proposed to carry out the necessary co-ordination between the hospital and home environments of the patients. 2 student professional assistant positions are proposed for training in rehabilitation services and 2 positions for training in social work.

(3) Support and Subsistence: 1 food administrator I, 1 food service supervisor II, and 14 food service assistants are proposed to carry out the food service function. All food preparation will be accomplished in the U. C. L. A. Hospital kitchen, with the serving and cleanup accomplished by the food service staff. 1 seamer-seamstress position is proposed to repair the numerous cloth items used by the institute. 40 housekeeping positions are proposed to carry out all of the cleaning duties in the institute, as no patient help will be used.

(4) Plant Operation: 2 building maintenance positions are proposed to accomplish all minor repair tasks. It is anticipated that the Building and Grounds Department of the University will be used for all major or highly skilled repair work. 1 automotive equipment operator is proposed for the institute.

No equipment is proposed as new position complements will be provided for by the Capital Outlay equipment list for the new building.

13					
14	<b>GENERAL ANALYSIS</b>				
15					
16	<b>Objectives</b>				
17					
18	Agnews State Hospital provides care and treatment for				
19	mentally ill patients, alcoholics, narcotic addicts and epileptics				
20	without mental retardation, and primarily serves the Counties				
21	of Santa Clara, San Mateo, Santa Cruz, San Francisco, Ala-				
22	meda, San Benito and Monterey.				
23					
24	<b>Program and Performance</b>				
25	The level of care and treatment techniques utilized at this				
26	hospital are comparable to those employed at the other state				
27	hospitals for the mentally ill operated by the department, and				
28	emphasize treatment rather than custody.				
29	The total performance of the hospital is best measured by				
30	the number of admissions and net releases which is set forth				
31	in tabular form as follows:				
32		1956-57	1957-58	1958-59	
33	Total admissions -----	3,402	3,657	3,783	
34	Total net releases -----	3,304	3,763	3,777	
35	Net transfers to other hospitals -----	76	135	14

The new 512-bed receiving and treatment building, activated in the current year, will eliminate overcrowding.

The major program changes are directed toward: (1) increasing the level of the hospital treatment program by adding professional and technical staff, including staff training personnel, and increasing funds for regular drugs and supplies; and (2) adding emphasis to the convalescent leave program by providing professional staff and extending the availability of tranquilizing drugs to these patients.

To accomplish these changes and to meet workload requirements, a total of 23 new positions are listed below under "Proposed New Positions." These programs and positions are explained in detail in the section titled "State Hospitals for the Mentally Ill and Mentally Retarded" which follows the departmental summary and general analysis. (See page 373.) Changes in price and population have been reflected where appropriate.

This hospital is relatively new, having been activated in the 1954-55 fiscal year. A new 432-bed dormitory unit activated during the current year has eliminated overcrowding.

The major program changes are directed toward: (1) increasing the level of the hospital treatment program by adding professional and technical staff, including staff training personnel, and increasing funds for regular drugs and supplies; and (2) adding emphasis to the convalescent leave program by extending the availability of tranquilizing drugs to these patients.

To accomplish these changes and to meet workload requirements, a total of 16 new positions are proposed. They are listed below under "Proposed New Positions." These programs and positions are explained in detail in the section titled "State Hospitals for the Mentally Ill and Mentally Retarded" which follows the departmental summary and general analysis. (See page 373.) Changes in price and population have been reflected where appropriate.

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1958-59	ESTIMATED 1959-60	PROPOSED 1960-61	CHANGE FROM 1959-60
------------------------------	-------------------	----------------------	---------------------	------------------------

**SUMMARY**

<b>TOTAL EXPENDITURES</b>				
Support (General Fund) -----	\$5,232,014	\$5,756,064	\$5,878,371	\$122,307 (2.1%)
Average population -----	2,991	2,893	2,802	—91 (—3.1%)
Per capita costs -----	\$1,749	\$1,990	\$2,098	\$108 (5.4%)
Personnel man-years -----	808.1	831.9	848.9	17

**GENERAL ANALYSIS****Objectives**

DeWitt State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, and a limited number of mentally retarded patients. It serves primarily the Counties of El Dorado, Yolo, Sutter, Yuba, Placer, Nevada, Sierra, Butte, and Plumas.

**Program and Performance**

It is planned that the average population at this institution will consist of 2,252 mentally ill and 550 mentally retarded patients during the 1960-61 fiscal year. The level of care and treatment techniques utilized at this hospital are comparable to those employed at other state hospitals caring for the mentally ill and/or mentally retarded, and emphasize treatment rather than custody.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

Mentally Ill:	1956-57	1957-58	1958-59
Total admissions -----	629	816	950
Total net releases -----	624	901	938
Net transfers from other hospitals	179	—24	28
Mentally Retarded:			
Total admissions -----	—	—	—
Total net releases -----	6	18	8
Net transfers to other hospitals --	—	—23	41

The major program changes are directed toward: (1) improving the level of the hospital treatment program by adding staff training personnel, and increasing funds for regular drugs and supplies; and (2) adding emphasis to the convalescent leave program by providing professional staff and extending the availability of tranquilizing drugs to these patients.

To accomplish these changes and to meet workload requirements, a total of 10 new positions are included and listed below under "Proposed New Positions." These programs and positions are explained in detail in the section titled "State Hospitals for the Mentally Ill and Mentally Retarded" which follows the departmental summary and general analysis (See page 373). Changes in price and population have been reflected where appropriate.

<sup>a</sup> Composed of savings in salaries and wages, \$312,765; operating expenses, \$225,969; equipment, \$12,712; and excess reimbursements, \$18,777.

## GENERAL ANALYSIS

## Objectives

Mendocino State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, and epileptics without mental retardation, and serves primarily the Counties of Marin, Sonoma, Mendocino, Humboldt, Del Norte, Siskiyou, Modoc, Trinity, Shasta, Lassen, Tehama, Glenn, Colusa and Lake.

## Program and Performance

The level of care and treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department, and emphasize treatment rather than custody.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1956-57	1957-58	1958-59
Total admissions -----	873	987	1,104
Total net releases -----	965	994	1,162
Net transfers to other hospitals ----	-18	-229	-15

The major program changes are directed toward: (1) increasing the level of the hospital treatment program by adding professional and technical staff, including staff training personnel, and increasing funds for regular drugs and supplies; and (2) adding emphasis to the convalescent leave program by providing professional staff and extending the availability of tranquilizing drugs to these patients.

To accomplish these changes and to meet workload requirements, a total of 12 new positions are included and listed below under "Proposed New Positions." These programs and positions are explained in detail in the section titled "State Hospitals for the Mentally Ill and Mentally Retarded" which follows the departmental summary and general analysis (see page 373). Changes in price and population have been reflected where appropriate.

A new 200-bed geriatric ward is scheduled for occupancy in July 1960. An overcrowding factor of 3.8 percent will remain as a result of the rapid population growth of this hospital during the current and past years.

The major program changes are directed toward: (1) increasing the level of the hospital treatment program by adding professional and technical staff, including staff training personnel, and increasing funds for regular drugs and supplies; and (2) adding emphasis to the convalescent leave program by providing professional staff and extending the availability of tranquilizing drugs to these patients.

To accomplish these changes and to meet workload requirements, primarily caused by new facilities, a total of 103 new positions are included and listed below under "Proposed New Positions." These programs and positions are explained in detail in the section titled "State Hospitals for the Mentally Ill and Mentally Retarded" which follows the departmental summary and general analysis (see page 373). Changes in price and population have been reflected where appropriate.

## GENERAL ANALYSIS

## Objectives

Modesto State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, epileptics, and for a limited number of mentally retarded patients. It serves primarily the Counties of Stanislaus, Tuolumne, Mono, Mariposa, Merced, Madera, Fresno, Kings, Tulare and Kern.

## Program and Performance

It is planned that the average population at this hospital will consist of 2,362 mentally ill and 220 mentally retarded patients during the 1960-61 fiscal year. The level of care and treatment techniques utilized at this hospital are comparable to those employed at other state hospitals caring for the mentally ill and/or mentally retarded, and emphasize treatment rather than custody.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1956-57	1957-58	1958-59
Mentally Ill:			
Total admissions-----	415	778	624
Total net releases-----	516	946	792
Net transfers from other hospitals	231	18	-86
